THE BARNES REVIEW

A JOURNAL OF POLITICALLY INCORRECT HISTORY

VOLUME XXXI NUMBER 2 • MARCH / APRIL 2025 • WWW.BARNESREVIEW.COM

New book has arrived at TBR!

PROVOKED

How Washington Started the New Cold War with Russia and the Catastrophe in Ukraine

Over and over, U.S. government officials and their mainstream media allies called Russia's 2022 invasion of Ukraine an "unprovoked attack." The slogan became so overused, people began to ask the obvious question: Why do they protest so much?

In *Provoked: How Washington Started the New Cold War with Russia and the Catastrophe in Ukraine*, seasoned journalist Scott Horton explains how, since the end of the last Cold War and the fall of the Soviet Union, successive U.S. administrations pressed their advantage against the new Russian Federation to the point it finally blew up into a full-scale war between Russia and Ukraine.

From NATO expansion into Eastern Europe to "shock therapy" economic policy, the Balkan and Chechen wars, color-coded revolutions, new missile defense systems, assassinations, Russiagate, and, ultimately, the brutal conflict in Ukraine, *Provoked* shows what really happened and why it did not have to be this way.

Look what these big names are saying about Scott Horton's new book!

"Scott Horton has become an invaluable chronicler of the destruction wrought by our interventionist foreign policy. With his new book *Provoked*, Scott blows the lid off the mountains of lies used to justify Washington's waste of billions of dollars and countless Ukrainian lives in a futile proxy war with Russia. Truth is the greatest disinfectant, and Horton's crucial account of this awful chapter in U.S. foreign policy is like a spring cleaning. Read this book and pick up copies for your friends … and adversaries!" —Ron Paul, former Texas congressman, and founder of the Ron Paul Institute for Peace and Prosperity

* * *

"*Provoked* is manna from Heaven for anyone who wants to know where the extreme Russophobia in the West came from, as well as the central role the United States played in causing the Ukraine war. Horton provides a detailed account of America's foolish and dishonest behavior toward Russia in the years since the Cold War ended." —John J. Mearsheimer, author of *The Israel Lobby and U.S. Foreign Policy*

* * *

"Scott Horton's important new book traces America's journey to war and intervention through a succession of presidencies and builds a case that points to a frightening, potential final destination for the United States: isolation and alien-

ation from most of the world. Scott's message is simple. Stop now before it's too late." —Col. Douglas MacGregor, U.S. Army (ret.)

* * *

"Scott Horton is a treasure. He is also the neocons' nightmare. He knows their deceptions and lies, and he is fearless in exposing the disasters they have wrought. *Provoked* is the most thoroughly researched, rationally grounded, and compellingly presented assault on war and defense of peace written in English in the post-9/11 era. It will become the standard against which all similar works are measured, and indispensable reading for all who need to understand how the American government has, time and again, brought civilization to a terrifying precipice." —Judge Andrew P. Napolitano, *New York Times* best-selling author/commentator, and host of the *Judging Freedom* podcast

YANKED OUT OF THE MEMORY HOLE BY TBR'S OPERATION BOOK RESCUE!

The Jewish Question

Notes and Documents

TBR Operation Book Rescue Seal of Approval

First time in English! In conjunction with banned publisher JR Books Online and through donations made to TBR's "Operation Book Rescue," TBR is now able to offer this translated French work on the "Jewish issue." The author, Henri Delassus (1836–1921), a high-ranking Roman Catholic priest, doctor of theology, prothonotary apostolic (official of the Holy See), honorary canon of the diocese of Cambrai, and overtly anti-Jewish and anti-Masonic author,

FR. HENRI DELASSUS

published, in 1910, a seminal three-volume study entitled *La Conjuration antichrétienne* (*Anti-Christian Conspiracy*), in which he shed light on the conspiracy he was convinced existed between high-ranking, influential Jews and Freemasonic lodges with the purpose of destroying European Christendom. For 2,000 years, argues the author, the Jews have been pursuing the destruction of Christianity and the conquest of the entire world.

He explains: "To rule the nations, one needs to destroy the institutions that constitute the social order, particularly the Christian one. Hence the 1789 principles, hence the human rights, hence liberalism, whose virus is being inculcated by Freemasonry into every society. These poisons are undermining and killing every single institution: religion, family, motherland, property, army. Nothing can resist them."

Contained in this book is the translation of a work published in 1911 as *La Question Juive: Notes et Documents.* It mainly consists of selected parts from *Anti-Christian Conspiracy* that deal specifically with the actions of

powerful Jews. Revealing in some places and prophetic in others, this book should be read by anyone willing to learn about the mistakes of the past so as to avoid repeating them in the future. Softcover, 146 pages, #1037, **$18** plus $5 S&H in the U.S. Order from TBR Book Club, P.O. Box 550, White Plains, MD 20695. Call toll free at 1-877-773-9077 to charge, Mon.–Thu. 8–4 ET. "Given that some ethnic groups—especially ones with high levels of ethnocentrism and mobilization—will undoubtedly continue to function as groups far into the foreseeable future, unilateral renunciation of ethnic loyalties by some groups means only their surrender and defeat—the Darwinian dead end of extinction. The future, then, like the past, will inevitably be a Darwinian competition in which ethnicity plays a very large role."

Join TBR in Our Mission to Bring History Into Accord With the Facts!

Want to ensure your legacy and that of The Barnes Review (TBR) at the same time? Here are a few tips on how you can ensure a portion of your estate makes it to TBR when you pass on.

Note that your gift helps guarantee future generations can experience honest history devoid of the political correctness and woke ideology that is infecting academia and history publications at all levels. No longer are America's White heroes remembered as they should be. The statements and actions of many of these history makers of the past are being scrutinized through the lens of "Cultural Marxism," and their stories accompanied by warnings and disclaimers.

Some of these read something like this: "Warning! The following biography reflects the morés and outdated attitudes of the times. Caution is advised."

This might apply to George Washington or James Madison, who happened to have been slaveholders at a time when that practice was legal. Or Thomas Jefferson, who used the term "merciless Indian savages" in the Declaration of Independence. Or perhaps to Andrew Jackson, who is said to have a "particularly harsh record when it comes to enslaved people and Native Americans," according to the History Channel or even Teddy Roosevelt, whose statue came under attack in 2020 for including a Black man and an Indian in an allegedly "subservient position."

But there is so much more history to preserve and defend, from ancient times through the Middle Ages to the historically distorted eras of World War I and World War II all the way up to today. No organization does more with your financial gifts than TBR. Your swift action can make sure TBR's brand of honest and unfiltered history survives far into the future.

Here are some of the ways you can enure TBR's legacy and yours as well:

Mention TBR in Your Will or Living Trust: It's Pretty Simple

Perhaps you want to leave money to The Barnes Review in your will or trust and want the flexibility to change your will in the event that life circumstances change. You can do both.

In as little as one sentence, you can complete your gift. This type of donation to TBR in your will or living trust helps ensure that we continue our mission for decades to come.

Such verbiage can be as simple as: "I give ____% of the residue of my estate, or the sum of $_____ dollars to The Barnes Review in La Plata, Md., Tax I.D. No. 52-1558272 for its general purposes."

Remember, however, many times heirs can choose to contest a will, costing TBR thousands of dollars to fight their challenges in court. Also, unless TBR knows about your gift, when you pass, we may never be informed. All lawyers have to do is claim they "tried to contact us" and failed. Make sure your attorney can guarantee your will contains ironclad language.

And Even Better Are Beneficiary Designations: Here's How to Do That in Three Easy Steps:

Not everyone wants to commit to making a gift in their wills or estates. Some prefer the increased flexibility that a beneficiary designation provides by using IRAs and retirement plans, life insurance policies, commercial annuities, investment accounts, or even savings and checking accounts.

Here's how to name The Barnes Review as a beneficiary:

1 Contact your retirement plan administrator, insurance company, bank, or financial institution for a change-of-beneficiary form.

2 Decide what percentage you would like TBR to receive and name us, along with the percentage you chose, on the beneficiary form.

3 Return the completed form to your plan administrator, insurance company, bank, or financial institution. Beneficiary designations are foolproof if you follow these rules, and benefits are paid out without a court battle.

Over the past four decades, literally hundreds of magazines have declared bankruptcy and ceased publication.* Believe me, powerful organizations have tried on numerous occasions to shut us down. But, by our tenacity, the grace of God, and your generosity, TBR still stands. Perhaps it is because we offer something of real value: the unvarnished truth.

Make sure TBR does not make that list by acting today to remember TBR in your estate plans. If you have any questions, feel free to call us at 202-547-5586 and leave your contact information. We will contact you ASAP. We are not financial planners, so always consult a qualified estate-planning professional for a will or trust, or follow the instructions listed above for designating TBR as the beneficiary of one or more of your accounts.

The Importance of Race in Civilization

By Wayne Macleod. A grand overview of the relationship between civilization, culture and race. Using historical examples, the author shows that different races create different civilizations, each a reflection of their own inner values. These civilizations and cultures only come to an end when the originating races are destroyed—through physical integration and racial miscegenation. According to the author, "Culture is primarily artistic, that is born from the soul of a people, who may utilize many tools in the pursuit of their achievements. Needless to say, the better the tools the higher the Culture, but, in all cases of Western history, the discoveries of ancient or contemporary peoples that aided Western Civilization were attained by Europeans themselves, never were they the result of culture mixing." Softcover, 100 pages, #1030, $**12**.

Exploding the Official Myths of the Lincoln Assassination

James Perloff dismantles the official story, thanks to the digitization of handwritten 19th-century documents. Among the book's topics: Why did Secretary of War Stanton deny Lincoln the protection he requested at Ford's Theatre? Why was Lincoln assigned a disreputable bodyguard? Why was Booth sure he only needed a one-shot derringer to kill the president? Why were the only actual assassination attempts against those who opposed the Reconstruction plan devised for the South? Why were telegraph wires shut down? Why did Stanton take charge of the investigation? Why was Booth's escape road the only road left unpatrolled? Why did Booth leave his card at Andrew Johnson's house on the day of the assassination? How did Powell gain access to Seward's home? Why were so many pages missing from Booth's diary? Much more. Softcover, 158 pages, #1028, $**16**.

Great Britain, the Jews & Palestine: How America Was Dragged Into WWI

By Samuel Landman. This booklet, written in the 1930s by one of Britain's leading Zionists, shows how the Zionist lobby manipulated America into entering World War I against Germany in exchange for the British government's plan to give Palestine to the Jews as a homeland. In return for Britain handing Palestine over to the Jews, the Zionists would use their power in America to bring that nation into the war to crush Germany. As Landman wrote: "The only way to induce the American president to come into the war was to secure the cooperation of Zionist Jews by promising them Palestine, and thus enlist and mobilize the hitherto unsuspectedly powerful forces of Zionist Jews in America and elsewhere in favor of the Allies on a quid pro quo contract basis." Original text plus a new introduction. Softcover, 32 pages, #1036, $**10**.

The Indians: Narratives of Massacres During the American Revolution

By Abraham G. Bevier (1846). Highlights of these accounts include: the massacre of Lt. John Graims; the narrow escape of three schoolchildren from the Indians; the massacre at Fantinekill; the killing of the family of the Socks and Mack families; the burning of Wawasink; and more. Also includes an appendix detailing some natural and man-made features in the area as well as an interesting section on the tense relations between Tories and Colonials during the era. The classic revolutionary poem "Taxation of America" is also included in full, as well. Softcover, 60 pages, #1039, $**10**.

Did Lincoln stop a Rothschild takeover of America?

DIXIELAND DECEIVED

THE GRAND CONSPIRACY BEHIND THE U.S. CIVIL WAR

The true story of the U.S. Civil War, aka the War Between the States, aka the War of Northern Aggression, does not "lie in the middle" somewhere but, rather, is something altogether different from either the contemporary Northern establishment account or the Southern Revisionist version. In reality, the brotherly bloodbath of 1861–1865 wasn't really, in its true essence, a "civil war" as much as it was an attack launched upon the United States from an invisible foreign power with traitorous agents and sincere dupes operating in both the North and South.

It was "the usual suspects" based in Rothschild's Europe and aligned with the empire-seeking Plantation Aristocracy based in the South. It was this elite who long-range-planned and, under one false pretext after another, finally executed America's greatest disaster. And it was the determined leadership of President Abraham Lincoln that thwarted the elaborate scheme of this deadly cabal in the end. Acclaimed "Correctionist historian" and investigative journalist Mike King will take you on an exciting "you are there" illusion-shattering suspense ride through this important era of U.S. history, which still holds modern-day implications.

Dixieland Deceived: The Grand Conspiracy Behind the U.S. Civil War (softcover, 8.5 x 11, 300 pages, #1026, **$45** minus 10% for TBR subscribers plus $5 S&H inside the U.S.) is available from TBR, P.O. Box 550, White Plains, MD 20695. Charge toll free by calling 1-877-773-9077, Mon.–Thu. 8–4 ET. You may also purchase the book at www.BarnesReview.com.

What People Are Saying:

"Over a decade of learning history in the public school system taught me nothing. I now feel that it was intentionally boring so we didn't care to look too closely at who was involved. In [reading this book], I learned 1,000 times more. There are other conspiracies surrounding the intentions of the founders of the country and the intentions of those involved in Reconstruction; however, this book has completely changed the context. I could not put it down and, although I have disagreed with some of [King's] work in the past, I have always respected him as a journalist, and his work is always something to think about because he knows how to make a point and to limit the clouded details. And he knows BS when he sees it."—DAVID GRIFFIN

* * *

"As a descendant of a Confederate soldier, I was raised on a steady diet of what I now believe to be fabrications and lies. I joined the Sons of Confederate Veterans and was disturbed by the number of men present who wore rings bearing the symbols of a secret society. I noticed often that the Confederate flag was positioned with the stars pointing downwards—another red flag significant of the secret society.

Now I understand why! This book has taken the scales from my eyes. Amazing what original source material will do. Mike King has done a wonderful job of clearing away the fog of propaganda. Read this book. It is truth."—JAMES STEVENS

Remembering a Great Populist: Jean-Marie Le Pen

By Rémi Tremblay

4 For French nationalists and populists, the name of Jean-Marie Le Pen will live on for generations. The outspoken Le Pen, who passed away in January, was known as a brutally honest truth-teller who bravely discussed the most important—and taboo—issues facing Frenchmen.

The Saxons—After 1066

By Thomas Redfern

10 Many people are unaware of what happened to the Saxons after their devastating defeat at the hands of Norman King William the Conqueror at the Battle of Hastings. Truth is, they did not simply disappear. Instead, many moved on to greener pastures in the Byzantine Empire and, eventually, set up towns on the Black Sea coast. Here is their survival story.

What to Do With The Haitians?

By José Niño

24 In 1804, Afro-Haitian soldiers carried out a bloody massacre of Whites and Mulattoes on Hispaniola, driving survivors to the eastern portion of the island. Today, the leaders of the Dominican Republic want any and all troublesome Haitian immigrants out of their nation. Could America learn a lesson?

Germany's Hitler

By Marc Roland

28 TBR readers are well aware that the victors of wars write the history of those conflicts. WWII was no different. But what is contained in this authorized biography can at least help set the historical record straight on the most vilified man in history: Adolf Hitler.

Germany's Last Gasp: May 1945

By Arthur Kemp

36 Though the war was officially over, German troops were still furiously battling the Soviets, trying desperately to fight their way toward the Western Allies to escape a grimmer fate.

Can the Holocaust Conclusions of This Historian Be Trusted?

By John Wear, J.D.

47 When confronted with uncomfortable facts about the Holocaust, mainstream historians inevitably resort to quoting Christopher Browning, allegedly one of the world's leading experts on the subjects of genocide, Nazi Germany, and the Holocaust. But can this Court Historian's reliance on eyewitness testimony and his conclusions stand rational scrutiny?

George Wallace Jr. Speaks

Interview by James Edwards

56 Alabama Gov. George Wallace, despite his consistently bad press, garnered 3.75 million votes in the 1972 Democratic presidential primaries, even after being shot and crippled in the midst of those contests. Here, his son, George Jr., candidly discusses his father's political legacy, views on integration, and the assassination attempt that inevitably ended George Wallace Sr.'s presidential aspirations.

Explaining Genetics and How DNA Creates Seven Races

By Arthur Kemp

60 For decades, people had the common sense to realize that there were differences between the races. However, in the modern age of political correctness (Cultural Marxism), we have been asked to believe that race is merely a "social construct." Here the author explains why this is unscientific hogwash and why the data indicate there are actually seven human races.

Wild West Lawmen Were as Dangerous as the Outlaws

PERSONAL FROM THE EDITOR

An Inspirational Issue of TBR

In January, influential French populist and nationalist Jean-Marie Le Pen, sadly, passed on at the age of 96. During his long career, he fought tenaciously to call attention to the myriad problems that threaten, still, to bring doom upon France, Europe, and the Western world at large. These include mass Third World immigration, fiscal insanity, a loss of national pride, fake history and the poisonous behind-the-scenes machinations of the Cultural Bolsheviks.

We believe he would have been quite pleased to see his brothers and sisters in the White world finally fighting back, with citizens in multiple Western nations—from the United States to France to England to Hungary—turning away from self-destructive "woke" policies and back toward a sane nationalism spearheaded by a healthy resurgence of racial realism.

Read about Le Pen's inspiring life in our lead article by French-Canadian writer and political analyst Rémi Tremblay.

In a story of incredible perseverance, we also offer an article from English historian Thomas Redfern, who recounts the fate of the Saxons after their crushing defeat at the hands of Norman King William the Conqueror. Rather than meekly submitting, Saxon nobles and commoners alike engaged in a brief but ineffective resistance movement. Failing to overthrow their Norman overlords, many Saxons then made their way to Byzantium, enlisting to defend that empire from mounting threats.

Eventually, many of these Saxon immigrants settled in the Crimean region, creating the first "New England," according to the author.

Their thrilling tale demonstrates our people are a resilient lot, and must be even more so today, as we face our own racial dissolution. Yes, we can survive, but only if we fight for what's ours.

In a related story from another part of the world, told by researcher José Niño, himself a Venezuelan of European stock, we learn of the efforts of the leaders of the Dominican Republic to protect their nation from an immigrant invasion from Haiti by deporting as many Haitians as possible back home and building a security wall.

Today's Dominicans have a long memory and have not forgotten that their European ancestors were nearly wiped out by Black Haitian slaves who ran amok in the late 1870s, massacring nearly every non-Black on Hispaniola. Today's president of the Dominican Republic understands that it is racial dissolution, more than any other factor, that dooms a nation.

We also offer a three-article compendium on WWII Germany, as TBR continues its efforts to bring history into accord with the facts in regard to that misconstrued era. First, TBR regular Marc Roland gives us a review of the only authorized biography of Adolf Hitler.

Next, historian Arthur Kemp recounts the last German offensive of World War II, bravely led by General Field Marshal Ferdinand Schörner, conducted to buy as much time as possible for other German troops and civilians to escape the murderous Soviet troops advancing from the east.

Wrapping up that trilogy, John Wear explains why the conclusions of one of the most oft-quoted Holocaust "experts" cannot be trusted on any aspect of the subject.

We also publish a rare interview with the son of former Gov. George Wallace of Alabama, plus another piece detailing a few of the courageous yet lesser-known lawmen of America's Wild West era.

Also included is an important article explaining what "race" really is. You'll find that tract will give you the ammunition you need to defeat those who argue that race is merely a "social construct." ❖

Mr. Trump's Genocidal Bedfellows

Is Donald Trump a peacemaker or a warmonger? He was elected as a peacemaker. Trump built his political career by blasting the "forever wars" in the Middle East. He won the 2024 election by promising to end the war in Ukraine and by not being "Genocide Joe." If Trump's second term is marked by peace and prosperity, he will retire in 2028 as a success. If war and bloodshed reign, and the economy suffers, Trump will be viewed as an epic failure.

Unfortunately, Trump is setting himself up for failure—by siding with the craziest warmongering genocidal lunatics on the planet, the Israeli right wing. Israel has been in a state of declared or undeclared war against all of its neighbors, and, indeed, against the people of the region, since its founding in 1948.

Israel is not a U.S. ally because it refuses to declare its borders. (It can't have borders, because it needs to keep attacking its neighbors and stealing their land.) Though ineligible for ally status, Israel has become America's master, by having its loyalists buy politicians and the media. And the worst Israeli extremists—the West Bank settlers, who are widely loathed even among their fellow Israeli Jews—seem to think they have become Trump's masters. If Trump obeys them, disaster will inevitably follow.

On his first day in office, Trump signaled his loyalty to Itamar Ben-Gvir and Bezalel Smotrich by rescinding Joe Biden's sanctions on the worst of the Israeli settler leaders. The settlers celebrated by burning Palestinian houses and vehicles, injuring at least 21 people. The settlers and their Israel Defense Forces (IDF) accomplices have killed more than 860 people in the West Bank during the past 15 months, including 175 children, and wounded more than 6,700—part of an ongoing slow-motion genocide which has continued for decades, in parallel with the more intensive genocide of Gaza.

The settlers Trump de-sanctioned are terrorists devoted to stealing Palestinian land through murder and vandalism. They claim that Yahweh gave them land thousands of years ago, so they have the sacred right to slaughter the current owners, whom they regard as no better than animals, and confiscate their belongings.

Trump's support for the craziest Israeli settlers is incompatible with his expressed wish to bring peace to the region. The settlers are squatting on land the whole world agrees belongs to Palestinians—land that Israel stole in its 1967 invasion of its neighbors. Even Israel's 1967 leaders admitted that stealing territory through war is unacceptable and illegal, and vowed that they would be giving back the occupied territories as soon as a suitable peace plan could be arranged.

The 1993 Oslo Accords formalized the return of the Occupied Territories in return for lasting peace. But Israel refused to meet its commitments, instead sending more than half a million invading terrorist settlers to murder Palestinians and permanently encroach on their land under the protection of the IDF. That terror invasion was made possible by the 1995 murder of Yitzhak Rabin, the Israeli prime minister who had been planning to comply with the Oslo Accords.

Trump's first-term "peace plan," the so-called Abraham Accords, was a disaster that made the current genocidal war inevitable. No regional nation, and even less the Palestinians, can genuinely support any peace plan that does not require Israel to withdraw from all of the Occupied Territories stolen in the 1967 war. Yet Trump signaled the exact opposite, by moving the U.S. Embassy to Occupied Jerusalem and supporting the extremist settlers. The regional countries that signed the "Satan Accords," as they are known in the region, did so under duress, to gain rewards and avoid punishments, with their fingers crossed, knowing that what they were signing was absurd. They might as well have been signing a deed giving Israel ownership of a distant galaxy: "Sure, we'll sign off on this palpable nonsense, just give us the money."

Will Trump make the same mistake twice? Today, he knows which side doesn't want peace. On Dec. 13, 2021, Trump said Netanyahu "never wanted to make peace," and added that Palestinian leader Mahmoud Abbas was the one who actually wanted peace.

Netanyahu has, in fact, dedicated most of his political career to trying to draw the U.S. into a war on Iran. If Trump continues to rubber-stamp the lunatic actions of the worst Israelis, he could find himself on the losing side of the U.S.-Iran war modeled in the 2003 Millennium Challenge exercise. As that war game discovered, all-out U.S. war with Iran would likely lead to thousands of American deaths, the closure of the Straits of Hormuz, the destruction of most Middle Eastern oil infrastructure, and the worst global economic calamity ever.

Trump's second term, and his place in history, are already in serious jeopardy. ❖

Remembering French Populist Jean-Marie Le Pen

Despite being vilified as an "anti-Semite" and a "homophobe," This French nationalist leader left a giant legacy

By Rémi Tremblay

It is with sadness nationalists the world over learned of Jean-Marie Le Pen's passing on January 7, 2025, the historical leader of the nationalist Front National (FN or National Front). This man, nicknamed "the Menhir" because of his Breton origin and his physical stature, had become a living legend, perhaps the most famous French politician never to have been president.

Although well-known in France, Le Pen, the man who undoubtedly marked recent French history, may not be familiar to American readers. His passing is a great opportunity to present him to the U.S. public.

Like many populist politicians, Jean-Marie Le Pen was born into a modest family. His father, a fisherman, was killed on August 22, 1942, when his boat struck a sea mine. Thus, he was raised by his mother, who benefited from a state pension to pay for his studies.

Hot-tempered and deeply patriotic, Le Pen tried to join the Resistance against the Germans as a teen but was refused because of his young age. He thus continued his studies and obtained a law degree.

Highly energetic, he worked several odd jobs to make ends meet and started getting politically involved, first in Charles Maurras's Action Française ("French Action"), before joining the tax-protester Poujadisme movement (named after its founder, Pierre Poujade). This was a populist party vowing to defend small business owners.

JEAN-MARIE LE PEN
1928–2025.

After finishing his studies, Le Pen joined the airborne troops, the famous "paras," and served in Indochina. Demobilized, he campaigned under the Poujadist label and was elected in the winter of 1956.

A few months later, he left to fight in Algeria, taking a prolonged leave from parliament. While serving in Algeria, he was recognized by his opponents, the FLN terrorists, for his respect for the dead Muslims, who were buried according to their own traditions. This mark of respect goes against the legend formed in the 1980s of Le Pen being a brutal and ruthless fighter, with accusations of torture launched against him as an attempt to demonize him and halt his growing popularity.

After his first term as a member of parliament (MP), he stepped back from politics and founded a record company, SERP, which sold historical songs and speeches. He took an interest in radical movements and sold both anarchist and fascist songs, as well as famous speeches which were hard to find prior to the internet. Parallel to that, he obtained a diploma in political science.

With barely enough to make a living, he accepted an offer to return to politics in 1972 as the leader of the newly formed National Front.

The movement, officially called the Front National Pour l'Unité Française ("National Front for French Unity"), was founded on October 5, 1972, by the radical nationalists of Ordre Nou-

veau ("New Order") and other more moderate politicians who opposed Charles de Gaulle's hegemony.

It must be noted that, even though he was the first leader of the party, he was not among its founders—a mistake often made by mainstream journalists.

A year later, a more moderate party emerged to challenge the FN, the Parti des Forces Nouvelles ("Party of New Forces"), which basically advocated an alliance with the mainstream parties to gain some sort of legitimacy and get some crumbs of power. This plan never worked, and the mainstream right was quite happy to use this party to destabilize the FN.

Contrary to their predictions, they never received any recognition from the mainstream for what they did. Despite their willingness to compromise, they were treated as pariahs and eventually disappeared.

But the FN was far from being a party like the others. It had several newspapers and magazines, among which were *National-Hebdo*, *Identité*, *Français d'Abord*, and *Année Zéro*,[1] along with other regional or more targeted publications, and it became a cultural hub, with countless artists and writers involved. Singer Pierre Durand, historian Jean Mabire, journalist Roland Gaucher, and the author François Brigneau were among the supporters of Le Pen.

The activists were a hectic group. The Front was what its name implied: a front. Therefore, at the annual gathering of the BBR (*Bleu*, *Blanc*, *Rouge*, "blue, white and red," for the colors of the French flag), one could meet neo-pagans chatting with traditional Catholics, while former members of the French Resistance were having a beer with former collaborators, and neo-fascists would casually talk with conservatives and monarchists.

Only Le Pen could manage to hold everyone together toward a common cause. He summed up his fight in a catchy sentence: "I'm economically left-wing, socially right-wing and nationally French."

In 1998, historian Philippe Conrad stated the only adjective that suited Le Pen was "populist." Back then, the word was rarely used.

The beginnings of the Front were modest in terms of votes. However, in the 1980s, the party finally surpassed 10%. With its slogan "French and France first," the Front was the first to denounce the immigration problem that would explode in the years after.[2]

In 1984, an appearance on the TV show *L'Heure de la Vérité* allowed Le Pen to gain popularity. He became instantly known across the country. From a marginal politician, he suddenly became a national leader.

The same year, he could boast of having received 2 million votes, with 10 MPs elected in the legislative elections. It was an historical moment.

However, the system adapted. In 1986, the electoral system was changed

Desecration of Graves in Carpentras Blamed on the National Front

In 1990, polls gave 25% support to Le Pen for the forthcoming elections. While nothing seemed to curb Le Pen's growth, on the night of May 8, a Jewish cemetery in the town of Carpentras was desecrated. Tombs were broken, and one corpse was disinterred and left out in the open.

Even though no one had been arrested for the outrage, almost all the establishment politicians and their supporters immediately blamed Le Pen's National Front. Jewish "Nazi hunter" Serge Klarsfeld was one of the first to make accusations, pointing out that, just after the incident, Le Pen had recently denounced Jewish influence in the media.[1]

The Carpentras desecration spurred mass organized protests, during which an effigy of Le Pen was hung. Francois Mitterrand took part in this demonstration, along with several other prominent French politicians.

In the end, four members of a small "neo-Nazi" party, Le Parti Nationaliste Français et Européen (PNFE, the "French and European Nationalist Party") were found guilty of the desecration. The PNFE was a staunch opponent of the FN, and, even though Le Pen went through great effort to point this out, his protestations were ignored by the media. ❖

from the proportional representation that gave the FN its seats, to a two-round majority system that favored the establishment parties.

This ensured the FN was prevented from acquiring seats, despite the increasingly impressive numbers of votes it would obtain in the years which followed.

At the same time, the controlled media started to circulate smear stories about Le Pen's military service, and in particular the claim he had participated in "torture sessions" during his service in Algeria. Needless to say, no evidence was ever produced to substantiate these allegations, despite being repeated by the media for decades thereafter.

These lies marked the start of a venomous campaign against Le Pen by the media; no lies would be too base to be thrown at him. He later explained he had to eat a "whole bowl of toads" every morning, a reference to the petty lies hurled at him every day. As he said, "politics is not a leisure activity."

Worse was yet to come. The Carpentras Affair effectively crippled the FN for years and is still invoked by journalists to show the "danger" of the FN, even though it was proven the FN had absolutely nothing to do with it. [See item at left.—Ed.]

Lies were one thing. Violence was another. Le Pen's meetings were frequently assaulted by communists, anti-fascists, and immigrants, making it hard to rent conference halls.

Activists were frequently attacked, and some even died while putting up electoral posters in hostile towns or neighborhoods. Some high-ranking members were targeted by terrorist attacks. Le Pen's own apartment was destroyed in a bombing, and others like François Duprat, were murdered. Of course, no one was ever charged with Duprat's murder.

Another leading FN personality, Jean-Pierre Stirbois (1945–1988), who had been elected deputy mayor of the city of Dreux, one of the first early breakthroughs for the party, died in a highly mysterious car crash. The circumstances surrounding his death were never fully clarified, and many in the FN believed his vehicle had been sabotaged.

Commenting on the violence faced, Le Pen wrote in the first volume of his autobiography, "violence against us is normalized and even justified" by the establishment.

Being the leader of a group targeted by the establishment and every left-wing group in the country was no easy path to walk. Added to those external problems were internal dissensions, mostly about questions of strategy and leadership.

Several activists thought Le Pen was too authoritarian and he should leave his position to someone younger and more modern, with a milder and more moderate message.[3] Behind his back he was called "the Louis XIV of Saint-Cloud" (a reference to his house in the Paris suburb Saint-Cloud) and the "Benito Mussolini of Trinité-sur-Mer" (a reference to his native town).

These machinations led to several schisms, the most significant of which was the 1998 split led by former deputy leader Bruno Mégret. Convinced of the importance of making alliances with the mainstream right, and thus copying the failed tack of the PFN of the 1970s, Mégret's initial success dissipated into failure, and most of his followers either returned to the FN or left politics completely.

The most recent split in this sad story of dissidents was led by the Algerian Jew Éric Zemmour and his Reconquête movement—which briefly attracted the support of Le Pen's glamorous niece Marion Maréchal-Le Pen (who has also since returned to the FN fold).

Despite all of those problems, the FN continued to grow, and, by the mid 1990s, had once again succeeded in winning control of several important town halls across the country.

Despite a populist tone and political promises based on the current needs of French workers, Le Pen liked to use references to France's long memory and history. He had a great grasp

Jean-Marie and Marine Le Pen, pictured in 2012, when they were both members of the European Parliament. Due to her father's refusal to sufficiently apologize for statements he made earlier in his career deemed "anti-Semitic," Marine booted him out of the National Front.

of culture and could quote classic authors in interviews and speeches.[4]

In his view, the Great Replacement was accompanied by "the great replacement of our history."

In 1996, a national campaign on Clovis, King of the Franks, was organized, the goal being to promote French history and show the FN was the party that was in sync with French greatness of yesteryear.

Le Pen, a history buff, saw France as part of a community called Europe. On this latter point, if he opposed Brussels, in his biography he explained, "The history of Europe is comprised of Marathon, Salamis, Lepanto, Vienna, Poitiers. … France is a part of Europe, which is something much greater than the European Union."

In 1990, during the Iraqi invasion of Kuwait, Le Pen met with Saddam Hussein in an attempt to resolve the Kuwait hostage crisis, as Iraqi forces had detained nearly 2,000 foreigners in Kuwait. In return for Hussein's cooperation, Le Pen went on to help organize the SOS Enfants d'Irak ("SOS Children of Iraq") in 1995, aimed at helping the children of Iraq who were then being starved to death in the hundreds of thousands, thanks to the boycott program initiated by U.S. Secretary of State Madeline Albright, among others.

Significantly, Le Pen, unlike many of his opponents who had never served in a war, opposed most modern conflicts, advocating for peaceful alternatives, such as in Yugoslavia. On that, he clearly differed from the mainstream right.

Another important point of difference with the right was Le Pen's focus on the environment. Already in the 1970s, he had announced a policy of protecting the environment and blamed both capitalism and communism for environmental damage.[5]

For the French political establishment, Le Pen was persona non grata. All the establishment parties, from the far left to the right, were always united against him. Thus, everyone was taken by surprise when, in 2002, he advanced to the second round of the presidential election against the professional scam artist Jacques Chirac, who was, nine years later in 2011, formally convicted of corruption.

Before the second round, an "anti-fascist mobilization" was set in motion. Millions demonstrated against Le Pen and vowed not to let the "beast" pass. Still, he received 5.5 million votes, representing 17.79% of the voters.

In 2011, Le Pen retired from his leadership role at the FN but remained a member. At a special conference, his daughter, Marine, won two-thirds of the party members' approval to take over, while the most nationalist elements supported her opponent Bruno Gollnisch.

After Marine's takeover, several

members left for smaller parties, and she expelled many considered to be "extremists."

In 2015, she expelled her own father, who had remained the "honorific president," from the party, and initiated an internal reform program to rebrand the movement.

Despite her detractors, Marine's rebranding strategy paid off. In the second round of the 2022 presidential election, she received 41.45% of the vote,[6] and won a remarkable 89 seats in the French parliament, even with the heavily biased electoral system.

By 2024, the party had been renamed Groupe Rassemblement National ("National Rally Group") and won 126 seats in the French parliament, making it the single largest party in that body, with over 10 million votes.

Le Pen remained an active voice outside the FN, and was most famous for his weekly internet show, which ran right up until his death.

Described as an "orator of another era,"[7] Le Pen was a fierce debater and a political streetfighter. He always appeared where no one expected him and never backed down. A man of great culture, he will be remembered as long as the French people survive.

That was what Le Pen feared the most: the disappearance of his people: "The White people are dying. Demography teaches us, under a certain fertility rate—currently reached or almost reached by some of our neighbors—the phenomenon is irreversible, and collapse is inevitable." ❖

Le Pen Considered the 'Holocaust' Merely a Minor 'Detail' of WWII, Not One of Its Defining Events

On September 13, 1987, during the TV show *Grand Jury de RTL–Le Monde*, Le Pen stated the alleged homicidal gas chambers of World War II were merely a "detail" of World War II, implying the so-called Holocaust was no more than a footnote of the war and not a central event as Jews and mainstream historians insist.

Asked about Holocaust Revisionism by interviewer Olivier Mazerolle, he answered, "I have not really studied the question, but I believe it is merely a point of detail in the history of the Second World War."

After the backlash, Le Pen denounced "the despicable system of concentration camps" created by "two totalitarian and anti-religious ideologies: communism and national socialism," adding, "Nazi crimes belong to the past, while communist crimes belong to the present and, unfortunately, the future."

A few years later, he continued claiming gas chambers were but a minor footnote of history. His refusal to publicly apologize and recant his claims were among the reasons invoked by his daughter to expel him from the party in 2015. ❖

How Washington Started the New Cold War with Russia and the Catastrophe in Ukraine

Over and over, U.S. government officials and their mainstream media allies called Russia's 2022 invasion of Ukraine an "unprovoked attack." The slogan became so overused that people began to ask the obvious question: Why do they protest so much?

In *Provoked: How Washington Started the New Cold War with Russia and the Catastrophe in Ukraine*, seasoned journalist Scott Horton explains how, since the end of the last Cold War and the fall of the Soviet Union, successive U.S. administrations pressed their advantage against the new Russian Federation to the point it finally blew up into a full-scale war between Russia and Ukraine.

From NATO expansion into Eastern Europe to "shock therapy" economic policy, the Balkan and Chechen wars, color-coded revolutions, new missile defense systems, assassinations, Russiagate, and ultimately the brutal conflict in Ukraine, *Provoked* shows what really happened and why it did not have to be this way.

"Scott Horton has become an invaluable chronicler of the destruction wrought by our interventionist foreign policy. With his new book *Provoked*, Scott blows the lid off the mountains of lies used to justify Washington's waste of billions of dollars and countless Ukrainian lives in a futile proxy war with Russia. Truth is the greatest disinfectant, and Horton's crucial account of this awful chapter in U.S. foreign policy is like a spring cleaning. THE SAXONS ...after 1066

Resistance to the Norman Conquest, exile and the first 'New England'

By Thomas Redfern

The simplistic history of the Norman Conquest of England is that it was all over by the time darkness fell on the bloody battlefield of Hastings on October 14, 1066. With the flower of Anglo-Saxon nobility lying dead on Senlac Field around mutilated King Harold, William used terror tactics to force the surrender of key fortified towns. Then he marched into London unopposed and accepted the country's submission at his Christmas Day coronation in Westminster Abbey.

The historical reality is, however, much more complex. Armed Anglo-Saxon resistance continued for years, leading in the end to one of the least-known but most remarkable examples of English emigration: the establishment of the first "New England"—not the one in America, but the colony known in Constantinople as Nova Anglia, on the northern coast of the Black Sea, to the east of what is now Crimea.

Harold, then a captive of William I in Normandy, pledges on holy relics that he will support William's claim to the throne as shown on the Bayeux Tapestry. Harold broke that oath, earning the eternal ire of William.

1066: THE YEAR OF HASTINGS

King Harold had rushed his army first to defeat the Danish Viking invasion of northeast England, and then made a forced march south, in the hope of repeating his victory in Yorkshire by crushing William at Hastings, not far from the Normans' landing beaches.

The haste of this mobilization meant, despite the Danes' initial crushing defeat of the defenders of the north at Fulford Bridge, serious casualties in the battle to destroy the Danes at Stamford Bridge, and the virtual annihilation of the Saxon army and the death of their king, a significant number of English nobles survived the invasion. William parceled out the possessions of those killed at Hastings to his Norman followers and Flemish and Breton mercenaries, but survivors of the former Saxon elite initially retained at least some of their vast properties.

RESISTANCE AFTER HASTINGS

Active resistance took various forms, ranging from isolated uprisings to more organized campaigns. Figures

"The Death of King Harold at the Battle of Hastings"—an illustration by James William Edmund Doyle—shows the moment Harold took an arrow to the eye. Historians are not positive Harold was killed this way or if it is a propaganda legend concocted by the Normans. Traditionally, death by a skewer through the eye was the fate of perjurers, and this is how William portrayed Harold after he failed to comply with his fealty oath.

such as Hereward the Wake and Wild Edric have been remembered as leaders of this resistance, though the extent of their roles is debatable. Yet these figures were not entirely isolated, and their efforts were part of a broader pattern of rolling rebellion against Norman rule during the years following William's victory.

Hereward the Wake is known for his resistance centered on the Isle of Ely, in the fenland wastes of what is now Cambridgeshire. The bogs, lakes, and marshes surrounding his base were a serious handicap to the mounted cavalrymen which were the shock troops of the Norman war machine. While romanticized accounts of his exploits may exaggerate his actions, they reflect genuine unrest in the region. Similarly, Wild Edric is associated with uprisings in the Welsh borderlands, where he reportedly collaborated with Welsh allies to resist Norman incursion. Here, resistance fighters were aided by a combination of dense woodland, steep slopes, and broken, rocky terrain.

Two of King Harold's sons, Godwin and Edmund, had taken refuge in Ireland. In the summer of 1068, backed by Diarmait mac Máel na mBó, the King of Leinster, they returned to their father's ancestral powerbase located at Wessex.

If they expected a liberator's welcome, however, they were disappointed. The citizens of Bristol remained loyal to King William the Conqueror and closed their gates to the rebels. Moving southwest into Somerset, they were opposed by a force led by English Earl Eadnoth the Staller.

Eadnoth had been constable in Wessex under both Edward the Confessor and their father, but he was now loyal to the new regime. The two armies met at Bleadon, and, although Eadnoth was killed in the battle, the brothers were defeated and sailed back to Ireland.[1]

In 1069, a major rebellion broke out in Northumbria. The unrest began when William's appointee, Earl Robert de Comines, was killed in Durham. This sparked widespread rebellion by local Anglo-Saxon nobles and disaffected peasants. The crisis for William worsened when the rebels captured York, killing a large number of Norman soldiers, and were joined by a Danish force under King Sweyn Estridsson, whose family had historic ties to England from the time of King Canute the Great.

Emboldened by the fighting in the north, rebellions broke out in other parts of the country. William sent earls to deal with problems in Dorset, Shrewsbury, and Devon, while he dealt with rebels in the Midlands and Stafford.[2]

With his conquest hanging by a thread, William acted with typical Norman ruthlessness. He bribed King Sweyn's army to sail home, leaving the rebels isolated. Determined to make an example of them, William ordered his troops to enact a scorched earth policy, known as the Harrying of the North.

MASS DESTRUCTION FOLLOWS

The campaign of brutal devastation was aimed at breaking the spirit of resistance as well as denying rebel guerrilla forces bases and supplies. Conducted during the winter of 1069–70, it involved the systematic destruction of villages, which were burnt to the ground and their inhabitants slaughtered. The destruction of crops,

Queen Edith "Swanneck" identifies King Harold's body in this 1827 painting by Horace Vernet.

stores and livestock across the region left survivors to resort to cannibalism or starve to death.

Records from the *Domesday Book*—William's hugely detailed 1086 account of land ownership, assets, population, and values—suggest as much as 75% of the population of the region died or never returned. Entries record "wasteas est" or "hoc est vast" ("it is wasted") for estate after estate; in all, a total of 60% of all holdings were laid waste. Even the prosperous areas of the country had lost 60% of their value compared to 1066. Only 25% of the population and plow teams remained, with a reported loss of 80,000 oxen and 150,000 people.

Over 50 years later, the Anglo-Norman chronicler Orderic Vitalis gave a glimpse of the violence of William's vengeance:

> The King stopped at nothing to hunt his enemies. He cut down many people and destroyed homes and land. Nowhere else had he shown such cruelty. This made a real change.
>
> To his shame, William made no effort to control his fury, punishing the innocent with the guilty. He ordered crops and herds, tools and food be burned to ashes. More than 100,000 people perished of starvation. I have often praised William in this book, but I can say nothing good about this brutal slaughter. God will punish him.

INVASION FROM IRELAND

In 1069, Godwin and Edmund Godwinson launched a new raid from Ireland. Landing with more than 60 ships at Appledore, a small fishing port on the north Devon coast, they were met by a Norman force under the command of the king's second cousin, Brian of Brittany, and William de Vauville.

As sheriff of Devon, de Vauville called out the fyrd, the local militia. Once again, there are signs that pre-Conquest political rivalries and loyalties were still in force. The combined Norman-Saxon force outmatched the raiders, who were said by the *Anglo-Saxon Chronicle* to have lost 1,700 of their best men before the return of high tide allowed the survivors to flee and escape.[3]

When they got back to Ireland, Godwin and Edmund were told by King Diarmait that he would not give them any more support. They sailed to Denmark and disappeared from the historical record. For two such major figures simply to vanish begs the question of where they went. This raises the intriguing possibility they made their own way to join the full-on emigration which we will encounter shortly.

The final blow to English hopes for liberation came in 1074, with the

death of King Sweyn of Denmark, which put an end to the prospect of external support for rebellion. It does not seem mere coincidence this was the moment many Anglo-Saxon nobles, such as Sigurd, earl of Gloucester, chose to abandon their estates and emigrate.

Orderic Vitalis wrote in his *Ecclesiastical History* that the Normans had imposed a yoke on the English:

> And so the English groaned aloud for their lost liberty and plotted ceaselessly to find some way of shaking off a yoke that was so intolerable and unaccustomed.

It is worth noting in passing that the idea of the Norman yoke was revived during the English Civil War and again in the 18th century. It featured in the debate between Thomas Paine and Edmund Burke, and Thomas Jefferson also championed the idea.[4]

EMIGRATION FROM ENGLAND

Key references to the resulting emigration from England include a brief account by Goscelin of Canterbury, written in the 1090s; another by Ordericus Vitalis, written in the first half of the 12th century; a more detailed narrative included in the Latin *Chronicon Universale Anonymi Laudunensis*, written by an English monk at Laon, France, in the early 13th century; and a related account in the *Edwardsaga*, or the "Icelandic Saga of Edward the Confessor" (*Saga Játvardar Konungs Hins Helga*). This was composed in the 14th century but drew on an earlier text from the early 12th century.

Although differing in a number of minor details—such as the name of the leader of the exiles and the exact route they took on their way to exile—in general, the sources all paint a complementary and consistent historical picture.

They agree a group of English lords who hated the Conqueror's rule, but had lost all hope of overthrowing it, decided to sell their land and leave England forever. Led by an "earl of Gloucester" named Sigurd (Stanardus in the *Chronicon Laudunensis*), they set out with 350 ships—235 in the *Chronicon*—for the Mediterranean via the Straits of Gibraltar.

The range in the estimate for the number of ships involved compares with that for those used in William's invasion, which is between 700 and 1,000. At about a third the size of the Conquest fleet, it still speaks of a major and coordinated "flight of the earls," which involved a very sizeable proportion of the old aristocracy.

Clearly, such a massive expedition could not have been put together without the tacit acceptance of the new regime. William was surely very pleased to see them go, particularly as they took their families with them. Most of all, the ships' oars required strong young men, so what was leaving was the last army Anglo-Saxon England ever produced.

The central role of a nobleman from Gloucester is readily explained by the fact this important port at the head of the mighty Severn estuary borders Wales. As such, it was so far from Harold's forced march routes to Yorkshire and then back down to the southeast coast that its pre-Conquest aristocracy is unlikely to have lost much blood or vitality in the three great but hasty battles of 1066.

The Severn estuary has one of the highest tidal ranges in the world; its sailors would have been among the best and most confident in the whole of Europe. The idea of sailing around Cornwall and then south to Spain and the Mediterranean would not have been too daunting. Their ships, after all, were essentially the same as those used by the Vikings to reach Iceland, Greenland, and Newfoundland.

THE VARANGIAN GUARD

Once in the Mediterranean, they voyaged around raiding and adventuring for a period before learning Constantinople was under attack. They decided to set sail for the great city and break the siege. When they reached it, they fought victoriously for the emperor. To show his gratitude, and to cement this valuable alliance with a formidable fighting force, the emperor offered the exiled English warriors a place of honor in his Varangian Guard.

This account is supported by contemporary Byzantine sources. As to the date of this emigration of disgruntled Anglo-Saxon lords and their followers, Christine Fell makes a good case for it having taken place in the mid- to late-1070s, after the death of King Sweyn of Denmark in 1074.[5] The

A Varangian Guardsman of the 11th century.

Chronicon Laudunensis gives 1075 as the date of the arrival of the English in Constantinople.

If so, they arrived in the reign of Michael VII Doukas (r. 1071–78), and the siege they helped relieve was that of the Seljuk Turks, which occurred in his reign. This would make sense of the fact the *Edwardsaga* states Constantinople was being besieged by a "heathen folk."

The main objection to this is both the *Edwardsaga* and the *Chronicon Laudunensis* claim the English arrived early in the reign of Alexios I Komnenos (r. 1081–1118). But this does not fit with their description of the besieging of Constantinople by "heathen folk" nor the *Chronicon's* stated date for their arrival.

The simplest explanation is the English emigrants arrived in the mid-1070s under Michael VII, relieving the siege by the Turks, but their later extensive use by the more famous Alexios I Komnenos led to the wrong name being attached to the reign in which they arrived.

Why, then, did English exiles and adventurers throw in their lot with the descendants of the Eastern Roman Empire? Partly, no doubt, because its position at the crossroads for trade between Christendom, the Middle East, and the Silk Road to China made the city and its imperial hinterland massively wealthy. The Anglo-Saxons knew Constantinople by the same name as the Vikings, who traveled there as traders and mercenaries via the great rivers of Russia. They called it "Micklegard"—the "Great City."

There is also a possibility they were following a "whales-path" which others of their kin had already sailed. The first significant study of the Anglo-Saxon military migration was made by A.A. Vasiliev in 1937. The great Russian émigré Byzantinist believed Anglo-Danish huscarls (high status mercenaries and oath-sworn companions) entered service after leaving England upon the death of King Canute in 1035.[6]

According to Caitlin Green's study, *The Medieval "New England": A Forgotten Anglo-Saxon Colony on the North-Eastern Black Sea Coast*:

MICHAEL VII DOUKAS
Byzantine emperor, 1071–1078.

> The Varangian Guard was the personal bodyguard of the Byzantine emperor from the time of Basil II (976–1025), founded to provide the emperor with a trustworthy force that was uninvolved in the internal politics of the Byzantine Empire and thus could be relied on in times of civil unrest. Whilst initially made up of Rus from Kiev, with Scandinavian warriors subsequently forming an important part of the guard through the 11th century, from the late 11th century onward it had a significant English component, too. Indeed, the "English Varangians" appear to have continued to constitute a high proportion of the Varangian Guard right through the 12th century and up until the siege of Constantinople in 1204, during the Fourth Crusade.

The English newcomers were particularly welcome; the previous Varangian Guard had been wiped out by Seljuk Turks at the disastrous Battle of Manzikert in 1071. So great was the transformation that many Byzantine sources from the time use a new name for the emperor's crack division: "Englinbarrangoi," the English Varangians.

NORMANS AND BYZANTINES

Intriguingly, there is an additional factor: There was a shared hostility of both Byzantine rulers and Anglo-Saxon exiles to the Normans.

The Normans were originally Viking settlers who had assimilated into the culture of northern France. Among their military innovations was the use of the stirrup, which allowed mounted knights to fight on horseback, rather than using horses to get to the battlefield, then dismount and fight on foot. Retaining their Viking ancestors' skill as seafarers, they also specialized in the rapid construction of castles to secure their garrisons in newly occupied territory.

Many Norman adventurers who had not joined William's invasion of England instead looked south as they established themselves as a potent force in medieval Europe. By the mid-11th century, they had begun a systematic conquest of southern Italy, previously under Byzantine control. The campaigns of Robert Guiscard and his son Bohemond of Taranto epitomized Norman ambitions in the region.

In 1071, the Normans captured Bari, the last major imperial stronghold in southern Italy, marking the end of Byzantine rule in the area and signaling the start of a prolonged struggle for dominance in the Adriatic and the eastern Mediterranean.

In 1081, Robert Guiscard launched an invasion of the Byzantine Balkans, exploiting the internal instability of the empire. The Normans achieved early victories, including the capture of Dyrrhachium (modern-day Durrës, Albania), a strategic port city. These successes were partly due to the Normans' disciplined heavy cavalry, which outmatched the local Byzantine forces.

However, Alexios I Komnenos, a

ALEXIOS KOMNENOS

HENRY I

shrewd and resourceful leader, rallied his empire and forged alliances, notably with the Venetian Republic, whose naval superiority played a decisive role in countering the Norman threat. At the Battle of Larissa in 1083, Alexios secured a critical victory, forcing the Normans to retreat.

With such engagements taking place less than 20 years after the Battle of Hastings, every member of the English contingent that dominated the Varangian Guard would have been either an exile who had lost his country to the Normans, or a dispossessed son. There can be no doubt, when fighting Normans for their imperial paymaster, they also had a personal grudge against their common foe.

This era saw the partial recovery of the Byzantine Empire under Alexios. Emperor from 1081–1118, at the time of the First Crusade, he partially restored the strength of the Byzantine Empire after its defeats by the Normans and Turks in the 11th century.

Alexios was crowned on April 4, 1081. After more than 50 years of ineffective or short-lived rulers, Alexios, in the words of Anna Komnene, his daughter and biographer, found the empire "at its last gasp," but his military ability and diplomatic gifts turned things around. He drove back the south Italian Norman invasion of western Greece.

In addition to the material and nationalistic grudges produced by the Norman Conquest, the English exiles are likely to have been pushed to a favorable attitude toward Byzantium by cultural and religious considerations.

Micklegard was the largest, most sophisticated, and cosmopolitan city in the known world. Despite the clashes between Norsemen and Anglo-Saxons, and repeated bouts of bloody politicking over the crown, pre-Conquest England had also been seen as a wealthy, cultured, and sophisticated society compared to neighboring princedoms.

The Conquest, moreover, had taken place a mere 12 years after the Great Schism between Western Europe, under Rome, and Eastern Christendom, under Byzantium. Although the English Church had come down on the side of Rome, it was still too distinctly independent for the liking of the Vatican.

William claimed legitimacy for his invasion on the basis of an alleged promise from Edward the Confessor, the previous king, who was said to have named William as his heir. Additionally, William accused Harold of breaking a sacred oath of loyalty—which had been sworn on holy relics after he was shipwrecked in Normandy—to support William's claim to the throne. These factors allowed William to present his campaign as one of justice and fidelity, appealing to the Church's moral authority.

PAPAL ENDORSEMENT

Pope Alexander II sent a consecrated banner to William, symbolizing the Catholic Church's blessing and approval of his campaign. This served as a powerful propaganda tool, signaling divine endorsement of William's cause and encouraging knights and soldiers to view their participation as a righteous act, akin to a crusade.

In terms of religious power politics, it turned out to be a good investment for the Vatican. William rapidly replaced English bishops with Norman ones, bringing the Church in England strictly under Roman control. He repeated this in South Wales after leading the military expedition to St. David's in 1081.

His son, Henry I, encouraged large-scale Norman settlement in South Wales, building the first royal castle at Carmarthen in 1109. The Church reforms imposed there by the Normans included the establishment of new bishoprics, the imposition of Norman clerics, and the construction of cathedrals such as those at St. David's and Bangor.

The process was repeated on an even bigger scale when the Anglo-Normans went on to invade Ireland. They were aided by the 1155 papal bull *Laudabiliter*, which granted King Henry II of England the right to seize

the country, citing the need to reform the Irish Church and bring it more fully under Roman control.

Henry II clashed with Rome in various areas but, when it came to invading Ireland, he was only too pleased to have the beginning of 800 years of conflict categorized as a religious crusade on behalf of the Roman Catholic Church. The Anglo-Norman invasion of Ireland began in 1169 and was formalized under Henry II in 1171, when he landed in Ireland to assert control both over the Norman barons who had initiated the invasion and the surviving Irish chieftains.

While the bull's authenticity has been questioned, it is a fact the Vatican had a long track record of using the Normans as shock troops in support of its own ambitions—a tendency also seen throughout the Crusades.

Above, an artist's rendering of Byzantine Greek Princess Anna Komnene at work on a history of her father, Emperor Alexios I Komnenos. At right, a photo of her 12th century manuscript *The Alexiad*.

ENGLISH VARANGIANS

The English Varangians certainly saw a religious aspect to the conflict. The *Edwardsaga* explicitly states the exiles refused to follow the rites promulgated by Rome, instead sending for church leaders and priests from Christian Hungary.

Whatever their precise reason for enlisting, membership in the guard was highly esteemed and well-rewarded. It offered the exiled Anglo-Saxons a chance to regain honor and purpose after their displacement, and to support the families they had brought with them.

Anna Komnene, mentioned earlier, was a Byzantine princess and historian. As the daughter of Emperor Alexios I Komnenos, she had a privileged perspective on the political and military affairs of Byzantium in the late 11th and early 12th centuries. Her *Alexiad* provides a detailed account of her father's reign, including descriptions of the Varangian Guard.

Komnene writes about the fierce loyalty and combat prowess of the Varangian Guard, highlighting their unique role in Byzantine society. For example, she notes:

> The axe-bearing barbarians, who are called the Varangians, fought with loyalty for the emperor, disregarding their own lives when the battle turned perilous.

SAXONS IN CRIMEA

Now we come to the most remarkable part of the story. It is found both in the *Chronicon Laudunensis* and the *Edwardsaga*. The *Edwardsaga* states, whilst some of the exiled Anglo-Saxons accepted the offer of joining the Varangian Guard, some members of the group asked instead for a place to settle and rule themselves:

> [I]t seemed to Earl Sigurd and the other chiefs that it was too small a career to grow old there in that fashion, that they had not a realm to rule over; and they begged the king to give them some towns or cities which they might own and their heirs after them. …
>
> King Kirjalax [Alexios I Komnenos] told them he knew of a land lying north in the sea, which had lain of old under the emperor of Micklegard, but in after days the heathen had won it and abode in it. And, when the Englishmen heard that, they took a title from King Kirjalax that this land should be their own and their heirs after them if they could get it won under them from the heathen men free from tax and toll. The king granted them this.
>
> After that, the Englishmen fared away out of Micklegard and north into the sea, but some chiefs stayed behind in Micklegard, and went into service there.

The Chapel of Saints Nicholas and Augustine of Canterbury—also known to the Turks as Bogdan Saray (Moldavian Palace)—in modern-day Istanbul, was, according to local legend, founded in the 11th century by an Anglo-Saxon noble who fled to Constantinople after the Norman conquest of England. Others insist the structure was not built until the 14th or 15th century, in actuality being a chapel within an aristocratic mansion of the Late Byzantine period, something not seen in Constantinople before 1453. Above is a photo of the edifice as it appeared in 1903. Today, the building lies in complete ruins. SOURCE: "MAPPING EASTERN EUROPE"

> Earl Sigurd and his men came to this land and had many battles there, and won the land, driving away all the folk that abode there before. They called it England [Nova Anglia, "New England," in the *Chronicon Laudunensis*].
>
> To the towns that were in the land and to those which they built they gave the names of towns in England. They called them both London and York, and by the names of other great towns in England.
>
> They would not have St. Paul's law, which passes current in Micklegard, but sought bishops and other clergymen from Hungary. The land lies six days' and nights' sail across the sea in the east and northeast from Micklegard; and there is the best of land there: and that folk has abode there ever since.

The description of New England as lying "across the sea in the east and northeast from Micklegard" suggests the lands Alexios gave to the English exiles lay on or near the Crimean Peninsula. This is supported by the sailing time specified, too, as the 4th-century A.D. *Periplus of Pseudo-Scylax* estimates six days and nights to sail from Constantinople to the Crimean Peninsula.

There are hints Byzantium saw a restoration of its authority in the area at the turn of the 11th century, possibly after a brief period of Turkish influence there.[7]

This is implied in the letters of Theophylact of Ohrid to Gregory Taronites and the contemporary eulogy of Manuel Straboromanus to Alexios I Komnenos. This alludes to the restoration of Byzantine influence in the northeast of the Black Sea by the Cimmerian Bosporus (the modern Kerch Strait, on the east of the Crimean Peninsula, leading to the Sea of Azov).

SAXON TOWN NAMES

Historian Caitlin Green provides additional insights into the Anglo-Saxon settlement. Drawing upon Byzantine and Western sources, Green argues this colony was not merely a remote outpost but a structured community that retained strong ties to its Anglo-Saxon roots.

Five intriguing place names appear on 14th-to-16th-century portolans (coastal charts made by Italian, Catalan, and Greek navigators) in the north and northeastern portions of the Black Sea.

Two of these names, Susaco and Londina, are of particular importance. Susaco—or Porto di Susacho—is found on the earliest charts of the area, from the 14th century onward. It seems to originate from the name "Saxons," perhaps deriving from the Anglo-Saxon folk- and region-name "Sussex" (the "South Saxons").[8] It is close enough to the modern city of Sochi for them potentially to be one and the same.

Londina is found close to Susaco on the more detailed charts of the 15th and 16th centuries and has been plausibly viewed as being just what it looks like, a version of the English place name "London." The other towns are on the eastern coast of the Crimean Peninsula, and all involve the name element "Varang."

There are independent historical references to a "land of the Saxi" (*Terram Saxorum*) being in this part

of the Black Sea in the 13th century, with the Saxi stated to be Christians and portrayed as doughty warriors, dwelling in well-fortified cities. These references are found in the accounts of the Franciscan friars who were sent on a mission to the Mongols by Pope Innocent IV in 1246–47, in the hope of enlisting their aid against the Muslim Turks.

Not only does the presence of the Christian Saxi in the area of the Crimean Peninsula/Sea of Azov offer further support for the historicity of the *Edwardsaga/Chronicon* narrative, but it also suggests the Anglo-Saxon exiles who reportedly founded "New England" in about A.D. 1080 continued to be identifiable as a separate people with their own "land" as late as the mid-13th century. Indeed, they seem to have still been a military force to be reckoned with, to judge from the friars' account of the Saxi's resistance to an attempted conquest of them by the Tartars:

> When we were there we were told the Tartars besieged a certain city of these Saxi and tried to subdue it. The inhabitants however made engines to match those of the Tartars, all of which they broke, and the Tartars were not able to get near the city to fight owing to these engines and missiles.
>
> At last they made an underground passage and bursting forth into the city they tried to set fire to it, while others fought, but the inhabitants posted a group to put out the fire, and the rest fought valiantly with those who had penetrated into the city and, killing many of them and wounding others, they forced them to retire to their own army.
>
> The Tartars, realizing they could do nothing against them and that many of their men were dying, withdrew from the city.[9]

The author of the *Edwardsaga* believed the descendants of the English exiles still lived there in the 14th century ("that folk has abode there ever since"). The long-term existence of significant English settlements on the Black Sea coast might well help explain the continued presence of English Varangians at Constantinople, with this force perhaps being renewed in each generation from Nova Anglia.

Illustration of a Varangian family of the 10th century from the Baltic region. Created by Kruse, published in *Magasin Pittoresque*, Paris, 1843.

The mid-14th-century *De Officiis of Pseudo-Codinus* related that the Crimean Varangians were still a separate people and noted their annual Christmas tradition:

> Then the Varangians come and wish the emperor long life in the language of their country, that is, English, and beating their battle-axes with loud noise.

END OF THE SAXON VARANGIANS

As for the Varangian Guard in Constantinople itself, they were still serving the emperors loyally into the 13th century. In 1203, they defended Constantinople against the Fourth Crusade, initially repulsing the Roman Catholic Crusaders with the help of Pisans and their iconic axes. However, due to political turmoil within the city, the Varangians switched their allegiance to Alexios V, resulting in a second attack by the Crusaders in April 1204.

During the ensuing siege, the Varangians were cut off from the main imperial body. They resisted fiercely but were eventually overwhelmed by the Crusaders' advance. Some sought refuge in the church of St. Nicholas, which is said by tradition to have been built by the English exiles. Unfortunately, the Crusaders set fire to the church, leading to the suffocation or death of those inside. Constantinople fell, and the Varangian Guard submitted to the victors.

The ruthless three-day sacking of the city and the transfer of most of its lands to the new "Latin Kingdom" seriously weakened Byzantium, although the Orthodox natives retook Constantinople in 1261.

Thereafter, there are occasional mentions of Varangians up until 1405. In 1329, there were still "Varangians with their axes" guarding the keys to any city in which the emperor happened to be staying.[10]

John Kantakouzenos mentions them in his history as still being guards in 1316, 1328, 1330, and 1341. But it seems they were just a small retinue of palace guards, not a powerful unit of the army as they once had been. Emperor John VII said in a letter to King Henry IV that some English Varangians were active in the defense

of Constantinople against the Turks in 1402. They are mentioned in 1404 during Manuel II's reign, as well. No mention of any Varangians, however, has been found in relation to the final fall of the city to the Turks in 1453.[11]

There are reports of archeological finds of Anglo-Saxon style on the Azov coast.[12] Several commentators in search of traces of ancient English ancestry have proposed DNA studies on modern residents of the area. Unfortunately, the Russians are too busy proving they have more right to Crimea and the Donbass than the Ukrainians, to whom the region was donated in Soviet times. They will surely not be in any hurry to establish an ancient English claim. ❖

Jewish Moneylenders Financed the Conquest

'Antisemitic' clauses in Magna Carta reflect tensions dating back to 1066

Magna Carta was the first of a series of legal documents and historic events that culminated in the foundation of the United States as a free society based on equality before the law and limited government.

King John was forced to sign the "Great Charter" in 1215. For all its status as one of the foundations of the liberties of freeborn men, the rebellious barons who compelled the unwilling monarch to accept it were motivated far more by their own self-interest than by enthusiasm for proto-democracy or concern for "the little guys."

That said, Magna Carta was a much-needed reaction to the extremely centralized form of government imposed on England by King John's great-great grandfather, William the Conqueror.

It contained 63 clauses, which addressed various grievances and established fundamental legal principles. Topics included the rights of barons, regulation of feudal obligations and the fair administration of justice.

The right to trial by jury and prohibition of arbitrary punishment were to become the cornerstone of our legal system.

Two of the clauses have in recent years caused some embarrassment, widely regarded by liberals as "anti-Semitic":

- Clause 10 stated, if a debtor died owing money to Jews, the debt would not accrue interest during the minority of the heir.
- Clause 11 gave protections to widows and heirs, stating they should not be forced to pay debts owed to Jews (or others) from their inheritances beyond what was just and reasonable.

These clauses reflect the significant role Jewish moneylenders played in Norman England's financial system, as well as the tension between them and broader society.

They beg the question: "When did Jewish moneylenders arrive in England?" and the answer sheds new light on the Norman Conquest.

William's invasion was a massive undertaking. The fleet required 700–1,000 ships, along with provisions, weapons, soldiers and even a pre-fabricated wooden castle. The total cost has been estimated at 20,000 to 25,000 pounds of silver—a monumental sum in the 11th century.

This was raised through taxes, contributions from nobles in Normandy, Brittany and Flanders, and loans from continental moneylenders, including wealthy Jewish financiers.

William rewarded his noble investors with grants of English land. His Jewish backers claimed their pounds of flesh in other ways.

Though precise evidence tying Jewish moneylenders directly to the financing of William's fleet and military campaign has not survived the passage of time, the arrival of

(See GENTILE ELITES, page 20)

Gentile Elites Used Jewish Financiers as a Shield Against Revolutionary Reaction

(Continued from page 19)

Jewish communities in England immediately after the Conquest is well documented.

This brought England into line with continental Europe, with Jewish moneylenders playing a critical role in funding infrastructure, administration, and trade.

They were valued by monarchs for their expertise in moneylending, an activity that was restricted for Christians by the Biblical prohibition on usury.

Their financial activities indirectly served royal purposes: Jews provided high-interest loans to nobles, clergy, and other members of society. The monarchy benefited by taxing the profits of these loans and by appropriating debts owed to Jewish moneylenders.

Jews were legally classified as "servi," official servants of the Crown, a status that granted them royal protection but also made them subject to heavy taxation. This system allowed kings to extract substantial sums from the Jewish community through levies, fines and tallage (a tax imposed specifically on Jews, who were all exempt from military service).

Tallage paid by Jews is a recurring feature of the Pipe Rolls, surviving English medieval financial records. Interestingly, the records reveal no such levies on Jews were made under William, providing circumstantial evidence of his indebtedness to them for helping his campaign to seize England.

Under the feudal system, all land was ultimately owned by the king. In cases where borrowers could not repay debts to Jewish moneylenders, the Crown often seized those debts, effectively turning Jewish loans into royal income.

This practice tied Jewish financial activities to the monarchy's fiscal strategies.

While Jews were instrumental in the financial structure of Norman England, they were not appointed to collect taxes from the general population. Tax collection remained the domain of royal officials, such as sheriffs. But the Jewish community's key role in moneylending provided major contributions to royal revenue.

Combined with the Crown's protection of Jews as its property, this made them targets of resentment among debtors and the broader population, culminating in periodic violence and, eventually, Edward I's expulsion of Jews from England amidst widespread accusations of ritual murder.

The clauses against Jewish moneylenders in Magna Carta thus reflect a longstanding tension in post-Conquest England. It also reminds us that gentile elites throughout the centuries seem to have found it useful to have Jews doing their financial dirty work, since resulting resentment tended to boil up into anti-Jewish pogroms, rather than potentially revolutionary challenges to the entire status quo. ❖

Here is World War II submarine history as it actually happened—straight from the mouths of the greatest German U-Boat and Allied submariners of the conflict. Sharkhunters' *KTB MAGAZINE* is the one and only publication in the world dedicated to the authentic, unvarnished "underwater" history of World War II—from both sides of the clacsh—as told in the words of the men who were actually there!

Hundreds of the great German U-Boat skippers, pilots and other mariners from around the globe have been, and still are, members of Sharkhunters International from our founding over four decades ago. (Even President Ronald Reagan was a member and received *KTB Magazine*!)

In every issue of Sharkhunters' *KTB Magazine*, the memories of these WWII heroes are recounted. But they have also allowed us to publish rare photos and inside stories of their personal lives in our magazine. In the pages of KTB—and only in KTB—can amateur and professional historians alike read about their military actions, secret U-Boat missions, combat experiences, and more.

Information from Sharkhunters and *KTB Mazaine* is honest military history with a major emphasis on the German U-Boats—without the politically correct mainstream propaganda.

Our monthly *KTB Magazine* is named after the logbook carried by each U-Boat during WWII, the "Kriegs Tage Buch," and is still kept as a reference in many archives. The history of at least one U-Boat is covered in each issue of *KTB* from the time each U-Boat was launched to the ship's intimate structural details to her skipper's patrol areas, victims, and the final fate of each U-Boat. Along the way, you'll hear their gripping stories like never before.

Founding Editor Harry Cooper knows these men, stayed in their homes, met their families and recorded the recollections of their adventures. These German skippers and their crews were not raving killers, shooting men in parachutes and machinegunning Allied survivors in lifeboats. Those tales of "evil Nazis" are nothing but fake war propaganda!

March of the Titans

Three of the planned five volumes of the newly expanded, full-color Prometheus Edition of *March of the Titans* are now in stock. Here they are:

Volume I
The Rise of Europe

From the Earliest Times to the Fall of the Roman Empire

The expanded text—with every chapter having been fully rewritten and updated, and with many new chapters added as additional archaeological discoveries and facts have emerged—has now been divided into four separate volumes, each addressing a specific era.

Volume I begins with three brand new chapters that reveal: 1) How modern science has conclusively proven race is determined by genetics alone; 2) How race influences the rise and fall of civilizations; and 3) The precise archeogenetic origins of the White race.

Utilizing the most recent archeological evidence, Volume I offers a comprehensive overview of prehistory, including the Upper Paleolithic and Neolithic Ages. It then examines the Old European civilizations in Europe, presenting new archeogenetic and archeological evidence that elucidates their racial origins and notable achievements.

The subsequent section reviews the Indo-European Invasions of Europe and the Middle East/Far East, accompanied by new genetic evidence that traces the migrations of these peoples from their homeland above the Black Sea to the farthest corners of Europe—and even to present-day China.

Following this, the edition thoroughly examines the fate of the Indo-Europeans in the Middle East, presenting irrefutable DNA evidence and detailing how this affects the current racial composition of that region.

Ancient Egypt is then explored, starting with groundbreaking archeogenetic findings that show the founders of ancient Egypt were a White population. This civilization later declined after becoming genetically diverse due to a significant influx of Semitic and African peoples. The full-color illustrations in this detailed chapter highlight the racial transition in Egyptian society.

The narrative then shifts to Classical Greece. Leveraging the latest archeogenetic evidence, this section reveals the racial origins of the prominent Grecian civilization, the Mycenaeans. Furthermore, it explains how the Classical Grecian civilization emerged and eventually declined due to racial fatigue from constant warfare and the substantial importation of racially alien slaves.

Next, the period of King Philip's Macedonian dominance over Greece and the entire Middle East by his son Alexander the Great is detailed. This expanded section reinforces the multiracial composition of Alexander's empire and elaborates on its fragmentation into rival factions following his passing.

The subsequent sections cover the Roman Republic era, the Roman Empire, its bifurcation into Eastern and Western domains, and the collapse of both segments in various new and augmented chapters. Additional chapters discuss Roman civilization and culture; the transitions led by Julius Caesar and Octavian Augustus from the Roman Republic to the Roman Empire; and a pivotal new chapter on Rome and the onset of Christianity. There are also considerable enhancements to the chapters on Rome's interactions with the Celts, Germans, and the Middle East—with the later ringing the racial death-knell for the Empire.

The narrative then moves to the first significant non-White invasion of Europe, detailed in a revised chapter on the Hun invasions and their atrocities in Europe, which occurred a few decades prior to the Western Roman Empire's fall.

In addition, the archeogenetic and archeological evidence shows, just before the Western Roman Empire's collapse, a staggering 80% of Rome's inhabitants were of Middle Eastern racial origin.

To conclude, an enlarged section on the Byzantine Empire narrates its history until its fall in 1453. A remarkable addition to this section is an archeogenetic study that unveils the Byzantine Empire's racial composition, which mirrored the racial demographic shift in Rome during the Western Empire's final days to that of a minority White population.

Hardback, high-quality stock, 308 pages, full color throughout, 581 color illustrations and maps, #1015, $56.

Volume II—Part 1
The European Nations States From Iceland to Germany

Volume II, Part 1, of the Prometheus Edition of *March of the Titans: The Complete History of the White Race* starts with the religious and cultural development of Europe following the fall of the Roman Empire.

First, it examines the origin of Christianity and the exact method of that religion's violent and coercive spread into Europe from the Middle East. It then reviews the effect of Christianity on European society and culture, particularly how it plunged Europe into a nearly 1,000-year-long Dark Age, during which all the classical advances in science, philosophy, and culture were violently suppressed.

Next, the twin events of the Renaissance and the Reformation are studied. The Renaissance, or "rebirth" of Classical pre-Christian rationality, science, and learning, led directly to the Reformation. This major split in Christianity between Catholicism and Protestantism sparked a series of major Christian wars, which resulted in the extermination of untold numbers of Europeans—and at least half of all Germany—causing an incalculable loss in European numbers and setting the continent back once again by hundreds of years.

This volume then continues by outlining two Great Race Wars waged against Europe by nonwhite invaders after the fall of Rome: the combined Bulgar, Avar, Khazar, and Magyar invasions; and the Islamic Moorish invasion of Iberia and parts of France. These sections provide the first genetic evidence of where exactly these racial groups originated, who they were, and how largely incorrect confusion over the identity of the Khazars and Magyars became prevalent.

Next, this volume provides a country-by-country racial history of Iceland; Ireland, Wales; Scotland; England; the United Kingdom; Portugal; Spain; France; Belgium; Luxembourg; the Netherlands; Norway; Sweden; Finland; Denmark; and Germany. Each nation has its own distinct chapter which shows how its population was shaped by its individual racial history. To underline this narrative, each country chapter ends with a fully referenced DNA survey of that nation. In addition, this volume contains expanded and separate chapters on the Vikings and their worldwide adventures and explorations, and the story and legacy of Napoleon Bonaparte.

Most importantly, revealed in this work is the one true cause of the rise and fall of the world's greatest empires—that all civilizations rise and fall according to their racial homogeneity and nothing else—a nation can survive wars, defeats, natural catastrophes, but not racial dissolution.

Hardback, 8.5 x 11, high-quality stock, 380 pages, full color throughout, #1025, $56.

Volume II—Part 2
The European Nations States Switzerland to Russia

The main themes of this volume are the racial, social, and political consequences of two major non-White invasions of Europe: the Mongol invasion of Eastern Europe, and the Ottoman Turk invasion of southeastern Europe. The Mongol invasion created the Khanate of the Golden Horde in the region now known as Ukraine and southern Russia. This racially alien state waged almost constant warfare on the formative European peoples to the north, resulting in a centuries-long conflict that stifled the political, economic, and social development of all of Russia. This, in turn, ultimately created the social conditions that led directly to the Bolshevist Revolution and its dreadful consequences.

The nearly 1,000-year-long invasion and war by the mixed-race Ottoman Islamic empire created havoc in the Balkans, racially, socially and politically. It resulted in the complete Islamification of three separate nations in the region, the creation of a significant mixed-racial element, and extensive political instability, which ultimately led to the outbreak of the First World War.

The Ottoman's destructive march into the heart of Europe was only finally stopped in 1683 at the gates of Vienna by a European force made up of several nations—one of the few times in European history that white peoples had actually unified in the face of a common threat to their existence.

This volume then provides a country-by-country racial history of Switzerland, Post-Roman Italy, Poland, Czechia, Slovakia, Austria, Hungary, Slovenia, Croatia, Bosnia and Herzegovina, Serbia, Kosovo, Montenegro, North Macedonia, Albania, Romania, Moldova, Bulgaria, Post-Classical Greece, Malta, Lithuania, Latvia, Estonia, Belarus, Ukraine, and Russia.

Each nation has its own distinct chapter which shows how its population was shaped by its individual racial history. To underline this narrative, each country chapter ends with a fully referenced DNA survey of that nation.

In addition, this volume contains six expanded and separate chapters on Russia, broken up into the five distinct historical periods of that nation and its expansion into the Far East and Central Asia. The true cause of the Soviet Union's breakup—the inability of a multiracial state to have long-term sustainability—is also revealed, along with the fact the present-day Russian Federation is headed inexorably down that same disastrous path.

Finally, this volume provides a complete overview of the course and impact of the Crusades—a European reaction to the Muslim invasions of the Middle East and North Africa, and a chapter dealing with the historical quirks that created the four microstates of Europe (Andorra, Liechtenstein, San Marino, and the Vatican).

Most importantly, revealed in this work is the one true cause of the rise and fall of the world's greatest empires—that all civilizations rise and fall according to their racial homogeneity and nothing else—a nation can survive wars, defeats, natural catastrophes, but not racial dissolution.

Western Nations Could Learn a Lesson from the Dominican Republic

Caribbean nation shows how to properly carry out mass deportations of unwanted immigrants

By José Niño

Are developing nations doing the work the U.S. government refuses to do? On October 8, 2024, Haiti's acting representative to the Organization of American States (OAS), Gandy Thomas, accused the Dominican Republic of launching "a discriminatory campaign" against Haitians based on their nationality and race.

The government of Luis Abinader recently announced efforts to expel upwards of 10,000 Haitians on a weekly basis, which has irked Haitian public officials such as Thomas. The Dominican government's campaign to increase deportations of Haitians is not an isolated incident.

Abinader's policies follow a concerted program by the Dominican Republic to clean up its immigration system over the last decade. In 2013, the Constitutional Court of the Dominican Republic issued a decision resulting in the revocation of the nationality and citizenship of 245,000 Dominicans of Haitian extraction.

The court decision eliminated *jus soli*, more commonly known as birthright citizenship, for the children of foreign parents and went into effect retroactively all the way to 1929. From there, the Dominican political class has taken it upon itself to continue deporting unwanted Haitian migrants from their country.

LUIS ABINADER
Wants Haitians out of nation.

The income disparities between the two nations have made the Dominican Republic a magnet for cheap labor from Haiti over the last century. For perspective, the Dominican Republic enjoys a per capita GDP of $10,716, whereas Haiti has a per capita GDP of $1,693, according to data from Macrotrends. Similarly, the Dominican Republic has a higher life expectancy (75) than its troubled neighbor to the west (65).

How is it a developing nation such as the Dominican Republic has no real hang-ups about carrying out mass deportations? A sober appraisal of the two countries' respective development trajectories reveals a history fraught with racial strife.

SHAKY RACIAL FOUNDATIONS

Italian explorer Christopher Columbus landed on the island of Hispaniola—where modern-day Haiti and the Dominican Republic are located—in 1492. Under the auspices of the Spanish Crown, Columbus's brother, Bartholomew Columbus, founded the first European settlement in the Western Hemisphere at Santo Domingo, which is the current capital of the Dominican Republic.

The Spanish Crown authorized the importation of slaves in 1570 to the Captaincy General of Santo Domingo. Spain would later cede the western part of Hispaniola to France in 1697 as part of the Peace of Ryswick treaties which ended the Nine Years' War. The western part of Hispaniola would be renamed Saint-Domingue.

Saint-Domingue then became an

agricultural hub renowned for its lucrative sugar, coffee, cocoa, cotton, and indigo exports. The French colonial possession's economy was supported by a massive slave population. From 1680 to 1776, roughly 800,000 African slaves were imported to France's crown jewel in the Caribbean.

Because of the economic structure of the French colony, its racial makeup was quite imbalanced. Forty thousand white Frenchmen lorded over 500,000 black slaves of African origin. In addition, there were 27,000 "affranchis"—people of mixed African and European descent—in 1789. This was a racial powder keg waiting to explode.

THE HAITIAN RACE WAR

With the outbreak of the French Revolution (1789-1799), disgruntled Blacks in Haiti saw the perfect opportunity to revolt against their French overlords. By 1791, the island was in a full-blown state of rebellion and eventually overthrew its French rulers in 1804. Ignore the politically correct renditions of this period: This was not a good-vs.-evil struggle, as the Haitian revolutionary forces engaged in wholesale race massacres.

In November 1803, Haitian rebels decisively defeated the French army, making the island's independence a fait accompli. On January 1, 1804, the Haitian Declaration of Independence was proclaimed. After breaking free from the French, the Haitians wasted no time in carrying out a genocide against the remaining White European population on the island.

Under orders of self-proclaimed Emperor of Haiti Jean-Jacques Dessalines, Haitian soldiers, the majority of whom were former slaves, went on a race-fueled rampage against the European population of Haiti. From February until April 1804, historical records point to Haitian forces slaughtering an estimated 7,000 White Europeans in the process.

REVOLUTIONARY SPIRIT

The Napoleonic Wars on the Old Continent created major power vacuums in Latin America, as Spain became a client state of the French Empire in 1808. Latin American colonists, who were inspired by the examples of the American and French revolutions, began to plant the seeds of rebellion in the early 19th century.

On November 9, 1821, Dominican revolutionary José Núñez de Cáceres overthrew the Spanish government and declared independence from Spain, establishing the Republic of Spanish Haiti in eastern Hispaniola. Concurrently, then-president of Haiti Jean-Pierre Boyer offered to help the political leaders in Spanish Haiti, who signed off on a plan to allow about 10,000 Haitian soldiers to enter the city of Santo Domingo in February 1822. Thus began the Haitian occupation of Santo Domingo.

THE DOMINICAN REVOLT

The Haitian occupation of Santo Domingo was shaky from the outset. In contrast to French Haiti, Santo Domingo was largely made up of European and mixed-race individuals (White Europeans with a mix of indigenous and African blood). Haiti was markedly more African than Santo

José Antonio Páez (1790–1873), the Venezuelan independence pioneer whose leadership in his nation's separatist movement ensured Venezuela's sovereignty from the short-lived republic of Gran Colombia (made up of Colombia, Venezuela, Ecuador, Panama, and parts of northern Peru, western Guyana, and northwestern Brazil) in 1830. He also later served as Venezuela's president. Above, a painting of Paez, crafted by Juan Jorge Peoli, 1890, now hangs in the Smithsonian American Art Museum in Washington, D.C.

Domingo. as so many Whites and Mulattoes had been previously eradicated on the Haitian half of the island.

The government of Jean-Pierre Boyer turned into a tinpot dictatorship in short order. The Dominican populace was particularly incensed by Boyer's rule, which was marked by flagrant acts of misgovernance, burdensome taxation, and attacks on Dominican culture.

Boyer's efforts to execute land reforms clashed with the Dominican practice of "terrenos comuneros" (communal land tenure). The Boyer regime's heavy-handed rule naturally created blowback among Dominicans, who began to see their overlords as racially alien despots.

Increasingly fed up with Haitian rule, prominent Dominican dissidents Juan Pablo Duarte, Ramón Matías Mella, and Francisco del Rosario Sánchez forged a resistance movement called "La Trinitaria" (The Trinity) in 1838. Due to internal tensions and a deteriorating economic situation, Boyer was forced out of office in 1843 and lived the rest of his life in exile until his death in 1850. Following Boyer's unceremonious exit from power, Dominican nationalist forces led by Duarte pounced on the situation to take control of Santo Domingo on February 27, 1844.

RAFAEL TRUJILLO
Understood danger to nation.

Dominican revolutionaries were able to completely expel Haitian forces by 1856. The Dominican War of Independence (1844–1856) and the trials and tribulations Spanish-speaking Dominicans faced under the yoke of Haitian rule were critical experiences that forged Dominican national identity.

RACIAL TENSIONS CONTINUE

Even after Haiti and the Dominican Republic separated, racial tensions remained high on the island of Hispaniola. In the 1930s, anti-Haitian sentiment was at a fever pitch. Dominican leader Rafael Trujillo, who came into office in 1930, sought to consolidate his political power by capitalizing on the Dominican population's justified animus toward Haitians.

After traveling across the Dominican Republic's northwestern frontier and several parts of the Cibao border region, Trujillo claimed Dominicans were being victimized by Haitian cattle and crop thieves. As the champion of the Dominican people, Trujillo ordered Dominican forces to actively repress

the Haitian criminal presence in this region.

What was initially slated to be a routine criminal mop-up operation turned into the Parsley Massacre of 1937, where Dominican forces killed roughly 14,000 to 40,000 Haitian adults and children. Dominican troops subjected thousands of civilians to interrogations where they were forced to say the word "perejil" (Spanish: parsley). Due to the obvious linguistic differences, Haitians were seemingly incapable of correctly pronouncing the word parsley, leading to their being tortured and even executed by Dominican authorities.

In the present, anti-Haitian sentiments linger among Dominicans. Unlike their counterparts in the politically correct, multi-racial West, Dominicans are proud of their national identity and see their Haitian neighbors as a racial "other," incapable of coexisting with them. Nearly two centuries of racial conflict have taught Dominicans to remain firmly nationalist in their political orientation.

The Dominican Republic is by no means a wealthy nation. However, it has a strong cultural sense, and its ruling class does not shy away from protecting it. The West can learn a thing or two from the Dominican experience. Ultimately, it is not a lack of state capacity preventing the U.S. but rather the lack of political will that explains Washington, D.C.'s unwillingness to fully confront its massive problems with illegal immigration.

As long as American political leaders stay committed to open borders and political correctness, America's White European population will continue declining as time goes by. A new cohort of nationalist leaders is desperately needed for the United States to course correct. ❖

Varying Approaches to Border Security: The Dominican Republic vs. the U.S.A.

On February 27, 2024, Dominican Republic President Luis Abinader announced his government would complete a border wall, which he called a "perimeter fence," along the nation's 240-mile boundary with Haiti.

The wall was designed to halt illegal migration and combat the criminal trafficking of drugs and weapons. The wall includes advanced surveillance technologies including motion sensors, facial recognition, night vision cameras, radar, thermal detectors, and drones.

As of November 2024, the first phase of the wall was 84% complete, with full completion anticipated by the first quarter of 2025.

In contrast to this policy, between 2020 and 2024, the U.S. advertised an "open borders" policy for Haitians. By 2022, there were already 731,000 Haitians living in the U.S.

In 2021, the Biden administration reduced entry requirements for Haitians, admitting another 116,500.

In January 2023, a program was introduced permitting up to 30,000 migrants monthly from Haiti, Cuba, Nicaragua, and Venezuela to enter on "humanitarian grounds." Applicants required U.S.-based sponsors, applied in advance, and traveled by air.

By September 2023, approximately 85,300 Haitians had been admitted under this program, representing the largest beneficiary group.

In 2023 and 2024, an additional 423,000 Haitians entered America, constituting nearly 4% of Haiti's population.

Pictured: Above, armed Dominican border guards patrol their border wall to keep Haitians out. Below, masses of Haitians prepare to stream across America's southern border. ❖

Germany's Hitler

Those who want to know more about Adolf Hitler should take a gander at this authorized biography

"YOU ARE WASTING YOUR TIME trying to reclaim the reputation of the Hitler," one reader wrote in a letter to TBR last year. Considering the incessant propaganda campaign waged against Germany, Adolf Hitler, and the German people for more than a century, it is probably an impossible task, we might agree. That being said, these kinds of mainstream historical lies must be countered if TBR is to own up to its obligation to bring history into accord with the facts.

By Mark Roland

There are more books about Adolf Hitler than any other historical figure. Eighty years after his death, the world's largest publishing companies continue to churn out biography after biography, each claiming fresh insights into his life and personality. However, the only things new they occasionally offer are ever more preposterous calumnies amid the same rehash of official, uniformly negative narratives repeated unchanged since 1945. If you have read one, you've read them all.

Lost amid this immense, if consistently biased library of unrelieved hatred in print, is one volume reissued by a non-conformist publisher of the Führer's only authorized biography. As such, it provides invaluable source material today's Court Historians are afraid to cite for its myth-busting potential. Originally appearing in 1934 and rereleased in an updated edition four years later, the book was specifically dedicated to English-speaking readers in Britain and America, then being incited to war against their racial brothers and sisters in the Third Reich. Back then, as an honest voice crying in a wilderness of lies, whatever *Germany*'s *Hitler* had to say was shouted down but has since become more vital than ever, as an effective antidote to four generations of deceit.

Adolf Hitler dressed in his field uniform during World War I.

Contrary to the usual critics' expectation, it is not a propaganda panegyric to Adolf Hitler but introduces him instead as a flesh-and-blood human being divested of the slanders that distorted and still conceal his true identity. To do so, Heinz A. Heinz interviewed Hitler's old classmates, army buddies, fellow working men, landlords, and early party comrades, and even his jailer. They divulged revealing, often everyday scraps of information which, in the aggregate, present a credible, real-life portrait found in none of the other thousands of malevolent tomes.

It is, therefore, especially threatening to consensus writers whose careers absolutely depend on the uncritical depiction of Hitler as the most cruel, inhumane creature the world has ever known. This kosher caricature, for all its ubiquitous big-money publication, is nonetheless vulnerable to the pinpricks of simple truth presented in Heinz's book.

He tells, for example, how:

> In a village in the neighborhood of the Obersalzburg [located about 75 miles southeast of Munich, the site of Hitler's former mountain residence], there lives a boy who suffers from paralysis. He once wrote to Adolf Hitler and asked for a wireless set as a Christmas present. The

letter found its way into the Führer's hands, and, to the great surprise and joy of the poor youngster, the Führer insisted on making him a personal present of the much-desired set.

This Yuletide gift gave Hitler an idea he immediately transformed into reality. He ordered the Hitler Youth organization to institute a special subgroup that supplied wireless sets and special education in their use, both free of charge, to handicapped German children in economic need. A medical study issued just three months later reported chronic depression and suicide rates for juveniles aged nine-to-15 years old had since abruptly fallen to their lowest levels ever recorded, especially among the blind, many of whom went on to excel as telegraph operators.

Encouraged by these results, Hitler ordained that musical instruction and special access to musical instruments must also be made available to financially strapped, handicapped children, again at his government's own expense. The brilliant success of these social programs was eventually broadened to embrace all lower-class, physically disadvantaged Germans, regardless of age. In time, bands and even whole orchestras of handicapped performers became public fixtures of the Third Reich. As a consequence, general standards of emotional health saw significant improvement. "We help those who help themselves," Hitler explained, "thereby raising our whole racial community"—"Volksgemeinschaft."

Two of Adolf Hitler's paintings are shown. At upper left is a highly detailed scene of a farmhouse in the Bavarian Alps. Above is a watercolor of Old Town Square, Prague, with Tyn Church in the foggy background.

His people were not without gratitude. Heinz writes:

> On average, 3,000 letters reach the Chancellor's office every day, each of them addressed to Adolf Hitler personally, from all parts of the country. A special bureau deals with these letters alone, and it has been ascertained the great majority of the requests received are, in point of fact, justified.

Germany's HITLER

The Only Authorized Biography

Germany's Hitler—the 1938 authorized biography of Adolf Hitler—is one of the most suppressed English-language books ever to emerge from Germany. But it is absolutely vital for anyone interested in understanding why Hitler won the total support of the German people. Professional journalist Heinz A. Heinz interviewed Hitler's old school friends, army colleagues, his jailer and early party comrades to provide an unprecedented insight into the German leader's background and pre-World War II policies. Included are vivid and unique descriptions of Hitler at school, his World War I battlefield experiences, early politics, the truth behind the November 9 Putsch, Hitler in prison, and the struggle to power from 1926 to 1933. It ends just after the Austrian Anschluss and the end of the Czech/Sudeten crisis. This book was the foremost Hitler myth-buster of its day, and is full of personal and political insights. Contains all original illustrations. Softcover, 234 pages, #747, **$24** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. He frequently causes such letters to be laid before him, with a view of keeping in constant touch with the anxieties of the people and in order to lend a helping hand himself.
>
> During the weeks preceding Christmas, the stream of letters grows to the dimensions of a flood. Tens of thousands of children write to "Uncle Hitler" to tell him about their Christmas wishes. They believe he must surely be on good terms with St. Nicholas, and in this they are right.

The postal deluge repeated itself in early spring:

> Every year, on his birthday, Hitler receives more presents than it has ever been the lot of a statesman to receive from his fellow countrymen. Every year, on April 20, entire post office vans drive up to the Chancellor's residence, and whole rooms gradually fill with presents of every description. The great majority come from humble homes and also from children, and many of the presents represent months of patient work. It is with the greatest happiness the Führer examines all the presents which are sent to him.

We may find it difficult to imagine any politician in the world today—especially any American politician—celebrated with equal fervor by his own people.

Unlike U.S. congressmen best known for voting themselves pay raises at every opportunity, Hitler gave all his regular government money away:

> His official salary is wholly diverted for the relief of poverty and unemployment. He accepts no income from his chancellorship, but directs this money should go to the relief of the jobless. It may not be equally unknown, during the winter of 1933–34, when the sales of his book had reached their peak, the whole of this increment was also earmarked for the poor.

Hitler had no personal financial investments of any kind—no stocks or bonds, no annuities, no properties, no bank loans, no interest-bearing accounts, no regular income, nothing but sporadic royalties from the sales of *Mein Kampf* which, as just mentioned, he more often than not donated to various social causes.

Hitler was the rarest thing in the world: a man who could not be bought. That explains why his enemies had to kill him and also explains why they continuously flood the public with books and movies vilifying him. To them, everyone has a price. Because he did not, they were angered and horrified he was beyond their control.

It is with the greatest happiness that the Führer examines all the presents that are sent to him on his birthday.

How could such an anomalous personality have come to be? Was he born that way? If not, what forces shaped this very different sort of man?

The first was undoubtedly his mother, Klara. Her unconditional love for her children was exemplified by cheerful if untiring selflessness on their behalf. It was this joyful, constant service toward the well-being of her family that most deeply engrained Adolf from early youth, and beyond into adulthood, when he transposed the motherly altruism with which she nurtured him onto the whole German people. It was from this fundamental compassion his benevolent social programs sprang.

Later, when Hitler became chancellor, he named a street after his mother in Passau, a city in Lower Bavaria, where she and her little family lived happily from 1892 until 1894.

The next formative influence of his life set in after her death in 1907. Over the next seven years, he completed approximately 360 sketches and watercolors of mostly outdoor scenes and—after his move to Vienna, then Munich—churches and monuments. The close attention to detail required by the execution of these images instilled in him a profound appreciation of Germany's natural beauty and the greatness of that old nation's high culture, a recognition from which arose a patriotic passion, as ever-growing as it was heartfelt.

All his artworks shine with that bright love of country. They graphically contradict hostile portrayals of a dark, misanthropic soul seething with deep resentment and paranoid hatred. That characterization instead belongs to self-evidently psychotic expressions of nightmarish imagery conceptualized by personalities like Pablo Picasso or Marc Chagall.

To supplement the inadequate income Hitler made by peddling his paintings on city street corners, he resorted to part-time employment as a day laborer, a lowly condition that nonetheless acquainted him all too well with the miserable existence of working-class fellow countrymen. Time spent in this proletarian "School of Hard Knocks" personally educated him about their virtually hopeless dilemma, which he would later rectify by raising Germany's standard of living to the highest in all Europe, even in the face of the Great Depression which ravaged the rest of the world.

The final influence of his life was World War I. The consistent heroism and steadfast comradeship of the so-called "common man" Hitler witnessed during four years of trenches flooded with storm water and blood inspired him with the idea to rebuild their shattered nation on these same, high qualities. But the odds of survival seemed impossible. "Of the three thousand men in the Regiment List," in which Hitler served, "only 500 came safely out of it. The rest were killed or wounded." One of his fellow dispatch runners recalled a typical British attack in early September 1915:

Elk Eber's 1938 painting of a dispatch runner *Der Meldeganger* (*The Messenger*) was highly acclaimed by public and critics alike the following year at the Greater German Art Exhibit, in Munich.

> The air was full of screaming shells and the hideous hissing and crashing of the "whiz-bangs" [anti-personnel explosives]. Suddenly, our company officer discovered telephone communications with the next section had broken down, and Hitler and another man got the order to go and find out what was wrong.
>
> They made it, somehow, but got back only by the skin of their teeth, utterly done in. The wire had been cut. An attack in force was imminent. Warnings must be sent further afield. Hitler received the order a second time. It was nothing less than a miracle how he escaped with his life. It was literally raining shells. The attack, however, failed. How we withstood it, I cannot tell.

Worse was to come, according to the same dispatch runner:

> I shall never forget the night of September 15 as long as I live. It was an inferno of fire. All our field telephones were out of order again, and we message carriers were on the go incessantly, our lives at stake every moment. We were opposed by Australians. They came on over and over again. Hitler and another courier got the order.
>
> He and his comrade set off in

the face of almost certain death, peppered with shot and shell every yard of the way. Half the time they were cowering for shelter in shell holes and ditches. They were wet through and half-frozen. Hitler's companion gave out. Buckled right up, unable to stick it another step.

Hitler hoisted him along, somehow, rather than leave him to his fate, and the two of them came at last, God only knows how, back at the dug-out.

These were par-for-the-course battles on the Western Front from 1914 until 1918. For his participation in so many of them, Hitler's superior officers valued him highly.

On September 17, 1917, they gave him the Military Service Cross with swords; on May 9, 1918, he got the regimental diploma for signal bravery in attack; and, on August 4, 1918, he received the Iron Cross first class.

The Iron Cross First Class was not given to lance corporals, save for exceptional and repeated acts of courage. This award made him eligible for application to officer training, which would have allowed him to be excused from duty for the rest of the war, safely away from the fighting in a clean environment with good food.

Max Amann, formerly regimental clerk, tells us, "Hitler never wanted a commission. He'd joined up in the ranks, and in the ranks he wanted to remain." Another comrade recalled, "Hitler then was a nobody like the rest of us. Nothing but a man in the trenches."

Enemy-inspired assertions assailing him as a draft-dodger only began with the onset of his notoriety in 1920. The same accusation is repeated today, such as this line from the chapter on Hitler's early years in today's *Holocaust Encyclopedia*: "Hitler moved to Munich, Germany, in May 1913. He did so to avoid arrest for evading his military service obligation to Habsburg Austria"

This distortion was debunked as long ago as the pre-World War II publication of Heinz's book:

KLARA HITLER (1860–1907), Adolf's mother, whose death from cancer deeply affected him. Twenty-six years later, as German chancellor, he channeled his lifelong grief by instituting the first government-sponsored research programs into the prevention and cure of the disease. See *The Nazi War on Cancer* by Robert N. Proctor (Princeton University Press, 1999). Though hardly an unbiased treatment of the subject, it remains the only book of its kind so far.

One of the gibes leveled by his opponents at the Führer is that he was a "deserter" from the Austrian army, otherwise how came it that he volunteered in Bavaria?

The sufficient answer to this calumny is contained in a document issuing from Austria itself. It states Adolf Hitler duly reported himself to the military authorities at Salzburg, on February 5, 1914, but that he was found to be "unfit" for military service.

An ironic, little-known incident during the immediate postwar period elucidates his transformation from common soldier to political activist. In the wake of Imperial Germany's surrender and the subsequent chaos spreading throughout society, Hitler was having lunch with some army buddies in a public restaurant, when conservatives of the Free Corps, then battling a Bolshevik attempt to seize Bavaria, showed up:

They took every man in the place, including Hitler, prisoner, and shut them up in the cellars of the Max Gymnasium [in Munich]. A few days later, however, an officer who had been at the front, happened to come along and spotted Hitler among the prisoners. "Why, how's this?," he demanded. "You're no communist!," and had him immediately set free.

Upon his release, Hitler was promoted to regimental instructor. Heinz tells us:

He discovered his own gift for public speaking and exposition. He rather imagined he had such a talent, but these classes in barracks were useful enough to exercise and prove it. As a matter of fact, this military duty gave him the key to his own future. He decided to leave the army and go in for politics altogether.

By then, Jewish power over a prostrate Germany was not the disguised affair it hid behind in other Gentile nations. It was blatant, and no one denied it. Heinz says:

The Communist Central Office in Berlin [Lenin himself] sent the Jew Levine [Eugen Levine, leader of the Second Bavarian Soviet Republic], a man of their own, to Munich, and, on the night of April 17, 1919, a Red assembly was held in the Wittelsbach Palace, which inaugurated the brief Red regime with yet another Jew, Ernst Toler, at its head.

The Communist Party of Germany Levine served was under its founder, Paul Levi. He opposed another Jew, Kurt Eisner, then in control of the liberal Independent Social Democratic Party. Heinz writes of:

… severe strikes in the Ruhr inspired by communist leader Karl Liebknecht [together with Rosa Luxemburg]. Munich and the southern half of the country [was] in the hands of the Bolsheviks, who sought to link it up with the Hungary of Bela Kun [born Béla Kohn] and

Russia of Lenin [raised by his Jewish aunt, Maria Alexandrovna Blank].

To enable this splintering of Germany into Soviet states, Bavaria's Red Army numbered over 20,000 troops.

In opposition to these catastrophic conditions, Hitler's counter-revolutionary ideology needed hardly more than three years to transform its original seven-member group into a mass-movement that made its first bid for power on November 9, 1923. With its failure in the streets of Munich, Hitler, painfully wounded with a broken shoulder, was arrested. The soldiers who opened fire on his demonstration were not, however, Jewish communists but German conservatives, who despised him as much as they hated Lenin, if not more so.

Twenty-one years later, they would try to kill him again in their July 20, 1944 bomb-plot at his Wehrmacht headquarters in East Prussia, with many an attempted coup de grâce during the decades between. For now, they were the primary powers-that-be ruling Bavaria, where Hitler's trial on charges of high treason presented them with a dilemma. A death penalty or even lengthy incarceration would make him a public martyr, empowering the very phenomenon he created and they deplored.

The National Socialist German Workers Party (NSDAP) had won widespread popular support and sympathy, and was a political entity worth harnessing for its own agendas. To make over its stormtroopers into useful cannon fodder against Bolshevik uprisings, Hitler needed to be controlled.

After serving nine months of a five-year prison sentence, he was paroled on December 19, 1924, on the condition NSDAP activists strictly adhere to federal government regulations. Hitler agreed, knowing full well the watchful authorities would send him back behind bars for a much longer term if he gave them the slightest excuse to prosecute him once more.

Confirming conservative fears, "an incredible number of letters, telegrams and parcels arrived for our most important prisoner that morning." Hitler arrived at Landsberg Prison, remembered Warden Franz Hemmrich:

In 1934, German Chancellor Adolf Hitler visited Franz Hemmrich, his warden at Landsberg prison from 10 years before.

> He gave away the contents of parcels sent to him, and always contrived, if possible, to have something on hand for the children of anyone who came to see him.

Sharing his confinement were several dozen other veterans of November 9 who had been arrested and found guilty for their participation.

Heinz says:

> He was always at their command to be of help or service. As a rule, he was singularly cheerful, and did his best to make their evenings go with a swing. He even got Hess [Rudolf Hess, likewise imprisoned for his role in the Munich Putsch] to make out a list of their birthdays, so whenever one of these came round, the individual in question would be specially invited to coffee with him in his room, and they'd sit and talk, and Hitler would dish up some little present or other. He never made any distinction of persons. He'd offer a peasant who came to see him his own chair to sit on, as readily as he'd offer it to a general.

When the day of Hitler's release finally arrived, the Warden recalled:

> He took cordial farewell of his companions, and then, turning to me, shook me by the hand and thanked me for what I had done for him, though I am at a loss to know exactly what this might have amounted to. A moment after, he had gone.

Otto Leybold, a high-ranking Bavarian official, joined Hemmrich at the prison gate to see the car that came to fetch their most controversial inmate. He recalled:

> The governor himself turned to me, as Hitler drove away, and remarked, "Well, if it's anyway possible to uplift this country again and set her on her feet, that's the man to do it." ❖

Germany Speaks: Nazi Germany Explains Itself to the English Speaking World

In the year immediately preceding the outbreak of WWII, the German foreign office launched a campaign in Britain to explain the inner workings of Nazi Germany. The highpoint of this campaign was this book, a four-part set of 21 essays by leading party officials, each explaining in detail the rationale of their policies. Contributors included Von Ribbentrop, Dietrich, Todt, Ley, Darré, Frick, Von Epp, and 14 others. Sections discuss: state structure, population growth, race, Jews, the judicial system, women's rights, the educational system, the role of propaganda, and the eugenics measures adopted by the state. The second part explains the Reich's economic system, its agrarian, social, labor and welfare policies, sports, culture, entertainment, foreign policy, world economics, colonies, trade, the world press, politics, and, finally, a plea for lasting peace. Softcover, 253 pages, #724, **$25**.

Hitler Speaks on the Jews: Selected Speeches and Writings of Adolf Hitler, 1919–1945

Compiled and translated by Frank Diepp. This book cuts through the myths about national socialist anti-Semitism by going directly to the source: Adolf Hitler himself. To achieve this task, the compiler combed through hundreds of Hitler's speeches and his major writings, dating from 1919 to April 1945. The end result of this labor is the production, without commentary, in Hitler's own words, explaining why he was an anti-Semite. This is a riveting read from beginning to end, and is vital for anyone seeking a real understanding of the Hitler phenomena. Softcover, 145 pages, #969, **$15**.

What the World Rejected: Hitler's Peace Offers 1933–1940

By Friedrich Stieve. Written by Germany's foremost diplomatic historian of the early 20th century, this work maps out all the numerous times Adolf Hitler made unconditional offers of peace to all the nations of Europe—and how the major anti-German belligerents—France and Britain—turned down these offers every time. The author lists Hitler's offers in detail, complete with quotes, starting with his offers of 1933, 1935, 1936, 1938, late 1939 and his offer of world peace of autumn 1939. Includes four new sections that did not appear in the original publication: The full text of Hitler's "Appeal for Peace and Sanity"; Hitler's Political Testament dictated just hours before his death; Göring's final letter to Churchill; and an extract from "The Forrestal Diaries." Stalin's War: A New History of WWII

Prize-winning historian Sean McMeekin reveals how Stalin—not Hitler—was the driving force of World War II in this major new history. WWII endures in the popular imagination as a heroic struggle between good and evil, with villainous Hitler driving events. But Hitler was not in power when the conflict erupted in Asia, and he was dead before it ended. His armies did not fight in multiple theaters, did not span the Eurasian continent, and he did not inherit any of the spoils of war. Those belonged to Stalin. Drawing on new research in Soviet, European and U.S. archives, *Stalin's War* revolutionizes our understanding of this global conflict. Hardback, 864 pages, #927, **$40**.

Hitler's Commando: The Daring Missions of Otto Skorzeny and the Nazi Special Forces

Written by Otto Skorzeny. Foreword by Charles Messenger. Introduction by Dan Raviv. Otto Skorzeny was Adolf Hitler's favorite soldier and Germany's top commando in World War II. It was Skorzeny who successfully led the rescue of Benito Mussolini. Skorzeny was also sent to Budapest to stop Hungarian regent Adm. Miklos Horthy from signing a peace treaty with Stalin in 1944. He also played a critical role in the Ardennes offensive with a plan to raise a brigade disguised as Americans with captured U.S. tanks. The author gives us details of his WWII missions, and a fair appraisal of the situation in Germany, as well as tactical mistakes. Softcover, 244 pages, #887, **$20**.

Written by one of the original founding members of the NSDAP, this booklet was the primary political document that underpinned the ideology and ideas of the future Nazi Party. Deals with foreign policy, internal policy, property, usury, economics, race, religion, culture, agriculture, citizenship, the military, and much more. Softcover, 78 pages, #797, **$13**.

The Last German Offensive of WWII: May 8–11, 1945

THE LITTLE-KNOWN LAST GERMAN OFFENSIVE OF WORLD WAR II started hours after the official end of that conflict on May 8, 1945—and lasted nearly four days, only ending on May 11. This offensive was the breakout of the German Army Group Center from the last major German-occupied region in continental Europe. The campaign saw German forces under Field Marshal Ferdinand Schörner attack advancing Soviet units while simultaneously retreating to surrender to the West.

By Arthur Kemp

On May 7, 1945, General Field Marshal Ferdinand Schörner, commander of what was left of the once-mighty Army Group Center ("Heeresgruppe Mitte"), received, by radio telegraph, news of the German surrender and the order to lay down arms by 11 p.m. the following day.

Sitting in his headquarters in Budweis (today known as Ceské Budejovice) in the German Protectorate of Bohemia and Moravia, Schörner faced a difficult choice.

Although the conversation in his bunker on May 7 has not been recorded, it requires little imagination to recreate. The surrender order was clear, but the approaching artillery fire of the Red Army must have made all in the headquarters aware of what their grisly fate would be.

Four years of grim warfare against the Soviets had allowed the Germans to see first-hand the true nature of Bolshevism: they had been the first to uncover and expose the torture stations of the Soviet secret police, the NKVD, and they had seen the brutal reprisals carried out by that organization's counterintelligence department, SMERSH (literally named "Death to Spies"), which operated behind the Red Army lines, torturing and executing soldiers and civilians alike for alleged treason to the communist cause.

FERDINAND SCHÖRNER
Accomplished officer.

There was little choice: either break out to the West and surrender to the Americans, or be exterminated by the Reds. Schörner knew a breakout order would breach the surrender order from the German High Command, but he was determined to give his men the best possible chance of survival under the circumstances.

The order was then given for what would be the final act of World War II in Europe: an offensive that would last three days after the official end of the war, and forever etch Army Group Center's name in history as the very last German military unit to surrender.

Everyone knew Schörner's order was a desperate gamble. Obedient to orders as always, the corps commanders went out to prepare their forces for the offensive. The main thrust would be with what remained of their fighting vehicles, with infantry left to fight their way on foot. Those injured too badly to march were left with weapons and stationary artillery to cover their comrades' withdrawal—a suicidal sacrifice all stoically accepted.

Thus began the last German offensive of World War II, on the evening of May 8, 1945.

Battle-hardened veterans of Army Group Center on an armored personnel carrier, May 1945, preparing for the last, desperate German offensive of the war.

SITUATION DESPERATE

By May 7, 1945, the military situation of Army Group Center was desperate. Surrounded on all sides by a sweeping Soviet advance, the 600,000 remaining soldiers of what had once been the most powerful German army of the war awaited the inevitable.

At its formation in 1941, Army Group Center had consisted of 1.3 million soldiers, 1,800 tanks, and 1,600 aircraft, making it the largest and most powerful of the three German Army Groups tasked with the invasion of the Soviet Union.

The glory days of Army Group Center, which included the seizure of Belarus and the capture of Smolensk, had gradually given way to the grinding attrition of the Eastern Front campaigns, culminating in the catastrophic losses during the great Soviet summer offensive of June–August 1944, Operation Bagration.

That Soviet offensive had inflicted over 400,000 casualties on Army Group Center and had resulted in almost all of Belarus falling to Soviet forces. By late 1944, Army Group Center had been reconstituted but was significantly weaker, lacking adequate reserves, equipment, and air support.

The army was then ordered to defensive positions stretching from Poland, East Prussia, and Slovakia, in a last-ditch attempt to halt the Soviet advance into Germany. All autumn, the Soviets launched localized offensives, particularly around Warsaw and the Vistula River, steadily eroding Army Group Center.

Schörner, who already had a track record of many victories and well-coordinated fighting retreats and defensive positions, was appointed head of Army Group Center in early January 1945.

That same month, the Red Army launched its Vistula–Oder Offensive, which, using its overwhelming numerical superiority, broke through the German defenses on a wide front. Army Group Center's positions in Poland collapsed rapidly as Soviet forces surged westward, capturing Warsaw on January 17 and reaching the Oder River by the end of the month.

The remnants of Army Group Center were then forced to retreat

into Czechoslovakia and southern Poland. By March 1945, Schörner had completed his defensive positions around Prague and the Ore Mountains.

Schörner gave strict orders for discipline to be maintained and authorized his commanders to execute any deserters. The men of Army Group Center followed his orders nearly to the man, and only a tiny handful attempted to desert.

On May 5, Schörner issued the last printed directive to Army Group Center. At that time, his army had successfully defended their part of the front against a massive Soviet assault and was the only part of the German frontline that had not buckled.

In this directive, Schörner gave his men the first inkling of his plan.

TEXT OF SCHÖRNER'S DIRECTIVE

Headquarters, 5 May 1945
The High Command
of Army Group Center

"After six years of intense struggle, the overwhelming forces of our enemies have succeeded in breaking almost all of our front lines. Only the front held by our Army Group remains unbroken, and this is solely due to your bravery and steadfastness.

"The war is drawing to a close. In accordance with the order of the Führer-appointed leader and Supreme Commander of the German Wehrmacht, Grand Adm. Dönitz, it is imperative to continue fighting to ensure the rescue of the most valuable members of the German people.

"It is my intention to accomplish this task by bringing you, my soldiers, back to your homeland united and with pride. This honorable leadership responsibility can only be fulfilled with obedient and effective troops.

"In these most difficult days for our Reich, we must not lose our resolve, give in to cowardice, or listen to the slogans cunningly spread by the enemy.

"We must trust in our leadership to make the right decisions in this situation as well.

"For six long years, we have stood together and resisted the enemy. In these final weeks, we must not present the world with a picture of dissolution and thereby destroy the negotiations that have now begun.

"Every dishonorable withdrawal, every attempt to return home by one's own efforts, is a shameful betrayal of one's comrades and our people and must be punished accordingly.

"Our discipline and the weapons in our hands are the guarantees of emerging from this war with honor and bravery. The heroic death of so many of our comrades and our own sense of honor demand no less. Only those who give up on themselves are truly lost.

Der Oberbefehlshaber der Heeresgruppe Mitte

H.Qu., den 5. Mai 1945

Soldaten der Heeresgruppe Mitte!

Nach sechsjährigem harten Kampf ist es der Übermacht unserer Feinde gelungen, einen Teil unserer Fronten zum Einsturz zu bringen, allein die Front der südlichen Heeresgruppen der Ostfront steht noch ungebrochen. Dies ist Eurer Tapferkeit und Standhaftigkeit zu danken.

Der Krieg geht seinem Ende zu. Entsprechend dem Befehl des vom Führer berufenen Staatsführers und Obersten Befehlshabers der deutschen Wehrmacht, Großadmiral Dönitz, gilt es solange weiterzukämpfen, bis wertvollste deutsche Menschen geborgen sind.

Nach Erfüllung dieser Aufgabe ist es meine Absicht, Euch, meine Soldaten, geschlossen und in stolzer Haltung in die Heimat zurückzuführen. Diese hehre Aufgabe der Führung kann nur mit einer gehorsamen und schlagkräftigen Truppe durchgeführt werden. Wir dürfen in diesen schwersten Tagen unseres Reiches die Nerven nicht verlieren und nicht feige werden, vor allem dürfen wir nicht auf die vom Feind raffiniert ausgestreuten Parolen hören. Wir müssen das Vertrauen zu unserer Führung haben, daß sie auch in dieser Lage das Richtige tut.

Sechs lange Jahre haben wir zusammengehalten und dem Feind getrotzt. In den letzten Wochen dürfen wir der Welt kein Bild der Auflösung bieten und die jetzt angebahnten Verhandlungen dadurch zerschlagen. Jede unerlaubte Entfernung, jeder Versuch aus eigener Kraft den Weg in die Heimat zu finden, ist ehrloser Verrat am Kameraden, an unserem Volk und muß entsprechend geahndet werden.

Unsere Disziplin und unsere Waffen in der Hand sind für uns das Unterpfand, anständig und tapfer aus diesem Kriege zu gehen. Unsere Ehre und der Heldentod so vieler unserer Kameraden verpflichten uns dazu. Nur wer sich selbst aufgibt, ist wirklich verloren.

Soldaten meiner Heeresgruppe!

Wir haben zusammen so manche schwere Krise an manchem Frontabschnitt des Ostens gemeistert. Ihr könnt das Vertrauen zu mir haben, daß ich Euch auch aus dieser Krise herausführe; und ich habe das Vertrauen zu Euch, daß Ihr zu Volk, Staat und Staatsführer steht.

Aber zusammenstehen müßen wir und trotz einiger Verräter und Feiglinge unsere letzte Kraft in der letzten Stunde dieses Krieges für die Erfüllung unseres Auftrages einsetzen. Nur eiserner Zusammenhalt, unerschütterlicher Widerstandswille und eine stets geschlossene Front führen uns gerade und erst recht auf dem Boden des Protektorates in die Heimat.

Schörner
Generalfeldmarschall

The last printed directive issued by Field Marshal Ferdinand Schörner to the soldiers of Army Group Center, issued on May 5, 1945. In this communique (see story for full text), Schörner gave the first inkling to his soldiers of his plan to withdraw them to Germany as the war ended.

"Soldiers of my Army Group!

"Together, we have overcome many crises on our sector of the Eastern Front.

"You can trust me to lead you out of this crisis, and I have confidence in you, knowing that I stand with our people, our state, and our leader. But we must stand together and, despite the presence of some traitors and cowards, summon our last reserves of strength in these final hours of the war to fulfill our mission.

"Only iron unity, an unyielding will to resist, and a consistently united front will lead us back with honor to our homeland, firmly on the soil of the Protectorate."

DEFENSIVE PREPARATIONS

Schörner's defensive preparations were so well-planned that the mighty Red Army was forced to bypass them, and, in a pincer movement, nearly surrounded Army Group Center, leaving only a small passage to the West.

There, at the end of the western passage, the American Army stood patiently, having halted its advance at the Plze (Pilsen) line, in adherence to agreements made at the Yalta Conference decided between the Allied leaders.

On April 16, the Soviets launched their Berlin Offensive, aimed at capturing Berlin. As that operation proceeded, Army Group Center's last orders from the Führer bunker were to hold their positions for as long as possible in an attempt to prevent the Red Army from sweeping into central Germany and Austria.

Schörner, a Hitler loyalist to the last, accepted the orders and succeeded in holding his ground to the extent that, even when Berlin was overrun on May 2, Army Group Center had held all its positions against the Soviet onslaught.

As a result, by the time the German surrender order reached Army Group Center late on May 7, Schörner's forces controlled one of the largest pieces of territory on continental Europe still held by the Reich, consisting of northern and central Czechoslovakia, key defensive positions in the Bohemian Mountains, western Slovakia, and eastern Bavaria.

Infuriated, the Soviets ordered a new offensive especially designed to break Army Group Center. This attack, named the "Prague Offensive," was launched on May 6, 1945, a week after Hitler's death in Berlin. Behind the German front line, communist Czech partisans had also started operating, initiating uprisings in Prague and elsewhere, further complicating the German defense.

Schörner prepared for what he knew would be his last battle. The numbers involved this time, however, were just too vast for even the battle-hardened veterans of Army Group Center.

In December 1944, Army Group Center comprised approximately 486,000 personnel. By January 1945, this number had decreased to around 400,000 due to combat losses.

At the same time, the number of operational tanks available to the army had declined dramatically, a problem exacerbated by fuel shortages. By January 1945, Army Group Center, in one of its last official reports, listed fewer than 200 tanks and only 500 assault guns. Around 98 aircraft were available to defend the entire front held by the Army Group.

Against this paltry force, the Red Army units leading the attack on Army Group Center comprised 2.4 million troops, 6,000 tanks and self-propelled guns, 24,000 artillery pieces, and 6,300 aircraft. Many of these fighting vehicles had been provided by the Americans, and the first Soviet tank to enter Vienna was, in fact, a U.S.-manufactured M4 Sherman.

SURRENDER

Typically, Schörner prepared his westward offensive in detail. On May 2, he had informed the German High Command—now based in Flensburg, near the Danish border—of his plan to fight through the Soviet forces and order his forces to surrender to the American Army. His communication was received without counterorders,

Two Soldiers, Two Lost Fronts

German War Diaries of the Stalingrad and North Africa Campaigns

This book contains two recently discovered war diaries—one by a member of a Panzer Division in Russia, and the other by a member of Rommel's AfrikaKorps. Together, along with timelines and overviews, they comprise a fascinating look at the German side of WWII. The stories are told as events occurred, and without postwar reflection. The first diary was kept by a soldier in the 201st Panzer Regiment, and the author never included his name. This diary covers April 1942 to March 1943 and details the German victory at Kharkov, the advance to the Caucasus and, finally, the brutal winter of 1942–43.

The second diary's author was a soldier named Rolf Krengel. It starts with the beginning of the war and ends shortly after the Allied occupation.

which he correctly took as assent and permission.

Then, on May 7, 1945, when the surrender order came through to his headquarters, Schörner issued a carefully prepared directive dated the same day. The directive ordered all forces to fight their way to the west and break through to American lines, and to surrender there.

The fight westward was to be conducted in three phases: first, the forces nearest the Soviets were to hold their defensive positions, particularly in key areas around Prague and the Bohemian Mountains, for as long as possible to allow the troops behind them to withdraw. Some units were directed to conduct delaying actions, including demolitions and counterattacks, to hinder Soviet progress.

Those forces closest to the American lines were then ordered to immediately advance west and surrender, and the third phase was for all remaining forces to strike west. Schörner was well aware they would have to fight, and the campaign unfolded almost exactly as he planned.

The German offensive started in the evening of May 8, initially catching the Soviet forces—who were expecting a general surrender that same evening—by surprise. Priority was given to mobile units, including remaining tanks and mechanized divisions, to break through Soviet lines.

By the early morning of May 9, the first German forces had reached the American lines and had surrendered.

During the course of the second day of the offensive, Schörner, after making sure there was no longer any useful purpose to him remaining at his headquarters (now located at Podersam, present-day Podborany, Czech Republic), used his personal Fieseler Fi 156 Storch aircraft to fly to Austria.

Even then, Schörner refused to surrender his own person. Adopting civilian attire, he landed on an open field near Mittersill in Tyrol, Austria. He then hid out in an Alpine hut but finally surrendered to American forces on May 18. Schörner has been falsely accused of "abandoning" his forces during the fight westward, but this is based on an inaccurate assessment of the situation: the orders had been given, and the army was moving west as best it could. As total surrender was only 24 or so hours away, Schörner did what was the most feasible thing available to him at that time.

The last recorded photograph of Field Marshal Ferdinand Schörner taken during the war. He is seen greeting Joseph Goebbels (right), German minister of propaganda, on March 9, 1945, in the Silesian town of Lauban (now in Poland), which had been recaptured by Schörner's forces from the Soviets. Schörner's cunning attack had destroyed the Red Army's 3rd Guards Tank Army, which had lost 162 tanks, 106 vehicles, 159 assault guns, and 74 mortars, compared to German losses of just 10 tanks. The Soviets were never able to recapture Lauban, and the front line there remained static until the end of the war.

THE BATTLE FOR PRAGUE

The Soviets quickly recovered from their initial surprise and, using their overwhelming forces, finally broke through the German defenses around Prague on May 9.

In that city, communist partisans, who had also expected the Germans to surrender on May 8, quickly found themselves fighting determined Wehrmacht and SS units who had no intention of a quick surrender.

The fighting in Prague then devolved into a blistering street-by-street battle, during which many famous sights were severely damaged (including the famous Old Town Hall, which contained the 600-year-old astronomical clock).

The fighting in Prague only ended on May 11, 1945, when the last German units surrendered after running out

of ammunition and supplies. These battles were the very last of World War II in the European theater and occurred fully four days after the official end of the war.

The surrender of these units marked the conclusion of the Soviets' Prague Offensive, and also the official end of the German breakout attempts.

BREAKOUT ATTEMPTS END

Schörner's offensive succeeded in allowing large numbers of Army Group Center to reach the American lines. However, more than half never managed to reach their objective. Many units were ambushed by Soviet forces or attacked by Czech resistance fighters, and those who were captured almost all faced brutal reprisals from the partisans, with entire columns being massacred after their capture.

The German forces who had made their way to the American lines were soon to be bitterly disappointed. In terms of the Yalta Conference, the Allied leaders had agreed German forces would surrender uncondi. tionally to the respective Allied power operating in the area of their surrender.

This had the practical effect of seeing German units surrendering to the Americans or British in areas designated as "Soviet zones" being transferred to Soviet custody. This agreement also extended to civilians, particularly those classified as citizens of territories annexed by the Soviet Union, such as Poland, the Baltic states, and Ukraine.

As a result, all of the Army Group Center units who had fought their way to surrender to the American lines near Plze and southern Bavaria were simply handed back over to the Soviet Union.

Approximately 600,000 soldiers from Army Group Center fell into the hands of the Soviets. After being held in temporary open-air detention camps in Czechoslovakia and Poland—during which thousands died due to starvation and exposure to the elements—they were then transported by train or on foot to labor camps in the Soviet Union, primarily in Siberia, the Ural Mountains, and other remote regions.

The majority of the prisoners were sent to Gulag labor camps or special POW camps. They were used as forced labor to build infrastructure such as roads, railways, factories, and mines, enduring grueling work in harsh climates, with inadequate food, clothing, and medical care.

While most of the Western Allied powers released most of their German prisoners of war (POWs) by the end of 1947, German POWs held by the Soviet Union were held much longer, with the first ones only being released in 1953, and many others as late as 1956—after West Germany negotiated their release in a treaty signed with the Soviet Union.

Although exact mortality rates are difficult to estimate due to Soviet obfuscation of numbers, it is widely estimated at least 50% of the German POWs captured by the Soviets died in captivity. Thus, of the 600,000 Army Group Center soldiers who either surrendered to the Soviets or were handed over to them by the Americans, only around 300,000 were eventually registered as having returned to Germany by 1956. ❖

World War Two Turning Points

The Secret Decisions, Forgotten Blunders, and Cover-Ups That Really Determined the Outcome

What really determined the course of World War II? Highlighting 21 major events, decisions, and strategic failures, *World War Two Turning Points* reveals the much deeper factors that lie behind the well-known course of events as portrayed by the victors. Topics covered include little-known strategic failures, such as the German navy's decision to build capital ships instead of submarines, the Finnish army's refusal to defeat the Soviets at Leningrad, Japan's failure to invade the USSR when that state was at its weakest point, Hitler's competence as a military leader (he was no bungling fool), and a full discussion of the German "wonder weapons" and how, but for lower-ranking mistakes, they could have changed the course of the conflict. The Career of Ferdinand Schörner

Ferdinand Schörner was born on June 12, 1892, in Munich, Bavaria, Germany. He joined the Royal Bavarian Army in 1911 as a cadet and was commissioned as a lieutenant in 1913, serving as an infantry officer during World War I. He gained recognition for his bravery and tactical skill, being awarded the Pour le Mérite, Germany's highest military honor, for his actions on the Italian Front during the Battle of Caporetto in 1917.

After WWI, Schörner remained in the military during the Weimar Republic and served in the Reichswehr, the small, 100,000-man army permitted under the Treaty of Versailles. He rose through the ranks during the 1920s and 1930s, serving in various staff and training roles, focusing on infantry tactics and operational planning.

The outbreak of World War II saw Schörner command a regiment in the 3rd Mountain Division during the invasion of Poland. During the invasion of France, Schörner continued to serve with distinction. As commander of the 6th Mountain Division, Schörner played an important role in the Balkans Campaign, particularly in the rapid conquest of Greece. He also participated in the airborne assault on Crete, commanding mountain troops during the hard-fought conquest of that island.

Schörner's division then participated in the invasion of the Soviet Union, fighting in the southern sector. They took an active part in the Caucasus during the campaign that attempted to capture the region's vital oil fields. Despite the eventual German withdrawal, his command was recognized as one of the best performing of that campaign.

Schörner was promoted to higher commands, including corps and later army leadership, often in crisis situations where German forces faced overwhelming Soviet attacks. His leadership in the 1944 Battle of Crimea conclusively demonstrated his ability to stabilize collapsing fronts.

German Field Marshal Ferdinand Schörner is shown entering the courtroom during his trial in Munich, October 4, 1957. He was charged with ordering the execution without court-martial of three deserters. This included two Wehrmacht officers and a non-commissioned officer.

Mainly as a result of his defense of Crimea, Schörner was appointed commander of Army Group North, later renamed Army Group Courland, and tasked with holding the Courland Pocket. Once again, despite overwhelming odds, Schörner's command played an important role in holding off the Soviets for an inordinate amount of time, given the overwhelming odds deployed against the German forces.

Finally, in January 1945, Schörner was appointed commander of Army Group Center, and went on to once again halt all attempts at a Soviet advance, even when other German fronts had collapsed and even Berlin was taken.

In recognition of his efforts, Adolf Hitler promoted Schörner to the rank of Field Marshal on April 5, 1945, making him one of the last individuals ever to receive the rank.

After his capture by American forces, he was deported to the Soviet Union, where he was imprisoned for a decade, only being released in late 1955. Upon his return to Germany, the puppet occupation government of West Germany then charged him for "war crimes."

His "war crime" was the execution of deserters from the German army during the war (even though Allied forces had also routinely executed their own deserters) and he was sentenced to a further four-and-a-half years in prison. He was released in 1960 and retired to his hometown in Munich, where he died in July 1973. ❖

Japan's War of Self-Defense

The True Story of World War II in Asia

In East Asia, the 100-year prelude to the momentous events of the 1930s and 1940s was as intriguing as the conspiratorial machinations taking place in Europe and the United States during the 19th century. After World War II finally erupted, the good people of Japan would endure immense suffering, death and destruction. But was the U.S.-UK-China war against Japan really a justifiable effort? Was Japan really the only one to blame for the events which ensued?

The big lie of World War II—referred to as "The Greater East Asia War" by Imperial Japan—has left a nasty "dirt stain" upon the good name of this ancient nation with such an impressive cultural past. The inimitable Mike King's epic, irrefutable and very readable *Japan's War of Self-Defense* sets the record straight in a manner state-approved Court Historians may not wish to entertain, but is true, nonetheless.

Japan's role in WWII is NOT usually given unbiased and factual attention. Happily, there's an increasing awareness the "sneak attack" of December 7, 1941, was deliberately provoked by the FDR administration. Now comes a very informative and entertaining book that turns the established version of the Pacific War on its head. It's an excellent adjunct to Mike King's *The Bad War*, also available from TBR.

Here's what one online reviewer had to say about *Japan's War of Self-Defense*:

"An excellent, well-written book loaded with verifiable information (facts and evidence) from credible sources regarding the use of relentless warmongering propaganda in order to satisfy the goals of certain government elites and collaborators to force U.S. entry into WWII. This caused massive destruction to Japan and the death of millions of Japanese men, women, and children—not only soldiers but civilians as well. The death toll was in the millions.

"The use of information suppression, misinformation, disinformation—the propaganda tools of criminals and the untrustworthy, domestic and foreign—had occurred for decades and even generations against the people of Japan.

"This is how the United States was led into ongoing foreign wars and conflicts on foreign soil from 1914 to the present—for more than 100 years.

"The tragic outcomes of these wars, as cited in the book, could have been avoided if the righteous and just were in charge and making the decisions to pursue peace and prosperity for all, instead of war and destruction.

A Dutch MP's Warning

A Dutch Member of Parliament for the populist "Forum voor Democratie" (FvD, "Forum for Democracy") has issued a warning that mass Third World immigration is causing the replacement of the Dutch people in a process that, left unchecked, will lead to the "replacement of the Dutch population." The immediate outcry which followed his use of that term did not deter Gideon van Meijeren, who then doubled down on his warning, issued during the Dutch parliament's debate on the Asylum and Migration Budget in the Hague. Meijeren defended the term as a factual description of the demographic shifts caused by mass immigration and refused to take back his words. Citing official statistics, he pointed out, since 2000, the population of the Netherlands had increased by more than 2 million people, of whom at least 95% have a "migration background"—the Dutch establishment's code word for Third World. He went on to describe the trends as a "deliberate demographic transformation."

9.4 Million Since 2008

At least 9,427,470 so-called asylum seekers—almost all from the Third World—have lodged asylum claims in the European Union (EU) from 2008 to September 2024, an analysis of statistics from the EU's official statistical bureau Eurostat has revealed. Men aged 18-34 years accounted for 39% of the total number of first-time applicants. Statistics for children under 14 indicate 51% were boys and 49% were girls. Most children aged 14-17 years were boys (73.5%) and 26.5% were girls. Syrians remained the largest group of people seeking asylum, followed by Venezuelans, Afghans, and Turks. Germany, Spain, Italy, and France continue to receive the highest number of asylum applicants, accounting for 71% of all first-time applicants in the EU.

Joe's Symbol of Mass Immigration vs. Mt. Rushmore

Joe Biden, in his farewell address, focused on the efforts of the workers who undertook the dangerous task of assembling the Statue of Liberty on Ellis Island in 1886. It's not surprising Joe would choose that symbol of mass immigration to center his address upon. But take a look at these men working on Mt. Rushmore in 1934. It was an amazing accomplishment and even more perilous than re-assembling Lady Liberty. Could the United States recreate the massive stone faces on Mt. Rushmore today? Do we have the will and the workers capable of doing it?

Whites Overcounted by Millions

Whites have been overcounted by at least 3.1 million in the last U.S. census because most people of "Middle Eastern" and "North African" origin have been counted as "White." This figure has emerged from a Census Bureau (CB) announcement that, for the next census, "Middle Eastern" and "North African" will be added to the choices available for questions about race and ethnicity. According to the bureau, people descended from places such as Lebanon, Iran, Egypt, and Syria have until now been encouraged to identify as White but can now identify in the new group. The CB estimates more than 3.1 million U.S. residents identify as Middle Eastern and North African, otherwise known as MENA.

Population Grew at Record Pace

The U.S. population grew by nearly 1% in the 12 months until the end of 2024, according to population estimates released by the U.S. Census Bureau. As the nation's population surpasses 340 million, this is the fastest annual population growth the nation has seen since 2001. The growth was primarily driven by rising net international migration. With a net increase of 2.8 million people, "international migration" accounted for 84% of the nation's 3.3 million increase in population between 2023 and 2024. This reflects a continued trend of rising international migration, with a net increase of 1.7 million in

2022 and 2.3 million in 2023. Florida (411,322), California (361,057), and Texas (319,569) saw the largest gains from international migration.

Indo-European Origins of Greeks

A newly published genetic study conducted by a team of European scientists has conclusively confirmed the ancient Greeks were descended from Indo-European tribes who originated on the steppes of Russia and formed part of the "Yamnaya culture." The results showed Indo-Europeans from the steppes settled in Western and Eastern Europe in different stages and time frames, meaning the "arrival of steppe ancestry in Spain, France, and Italy was mediated by Bell Beaker populations of Western Europe. … In contrast, Armenian and Greek populations acquired steppe ancestry directly from Yamnaya groups of Eastern Europe." This ties in perfectly with the emergence of the Mycenaean Greek civilization around 1700 B.C.

AI Unlocking Pompeii Texts

Rolls of parchment—scorched together and rendered previously unreadable by the A.D. 79 eruption of Mount Vesuvius in Italy—have been unlocked and "read" for the first time in nearly 2,000 years with the aid of Artificial Intelligence (AI). According to a report in the journal *Nature*, the AI technology has been used to "read" papyrus scrolls uncovered at the Villa of the Papyri at Herculaneum in south Italy that had been buried and carbonized in the eruption. A sophisticated AI program detected ink patterns on X-rays of the scrolls, and then processed the scanned data to identify layers within the scrolls, mapping the surface where the text is likely written. This was then transformed into two-dimensional images without physically unrolling the scrolls—a process that would destroy the fragile material. One of the most important scrolls unlocked is a new work by the Epicurean philosopher and poet Philodemus, which had previously been considered lost.

Christopher Browning
Court Historian Extraordinaire

A LEADING PROPONENT OF THE STANDARD "HOLOCAUST" NARRATIVE, Christopher Browning—professor emeritus of history at the University of North Carolina at Chapel Hill—has, again and again, repeatedly failed to demonstrate his primary thesis in a convincing fashion. What makes this pertinent is Browing is still cited by those trying to refute Holocaust Revisionists in any kind of scholarly debate. For mainstream historiographers, Browning is considered an expert on the Nazis' "Final Solution," and a believer in every "eyewitness testimony." Here, TBR CONTRIBUTING EDITORIAL BOARD member John Wear exposes Browning's consistently faulty logic.

By John Wear, J.D.

American historian Christopher R. Browning is a professor of history at the University of North Carolina at Chapel Hill. His research focuses on national socialist Germany and the so-called Holocaust. He has written extensively about three issues:

1. German policy and decision making regarding the "Holocaust";
2. The behavior and motives of various German personnel involved in implementing national socialist Germany's Jewish policy;
3. The use of survivor testimony to explore Jewish responses and survival strategies.[1]

In addition to writing numerous books on the Holocaust, Browning has served as a paid expert witness in at least two major trials. Browning testified as an expert witness for the prosecution in the 1988 criminal trial of Ernst Zündel in Toronto, Canada.[2] He later testified as an expert witness in David Irving's libel suit against Deborah Lipstadt and Penguin books.[3]

CHRISTOPHER BROWNING
Oft-cited Holocaust "expert."

This article discusses some of the weaknesses of Browning's research regarding the Holocaust.

EXTREME GENOCIDE

Like most mainstream historians, Browning regards the Holocaust as history's most extreme case of genocide. Browning writes concerning the Holocaust:

> I believe that the Holocaust was a watershed event in human history—the most extreme case of genocide that has yet occurred. What distinguishes it from other genocides are two factors: first, the totality and scope of intent—that is, the goal of killing every last Jew, man, woman, and child, throughout the reach of the Nazi empire; and second, the means employed—namely, the harnessing of the administrative/bureaucratic and technological capacities of a modern nation-state and Western scientific culture.[4]

Browning further defines the Final Solution as "the Nazis' plan to kill every last Jew in Europe on whom they could lay their hands."[5] Browning says Hitler's goal of a Nazi-dominated Europe free of Jews was to be obtained "through the systematic and deliberate

murder of every last Jew—man, woman, and child—caught within the Nazi sphere of domination."[6]

If, as Browning claims, the Germans had the goal of killing every last Jew throughout their empire, they certainly didn't do a very good job of it. As of January 1984, there were 4.39 million successful individual restitution claims under the terms of the German Federal Compensation Law (BEG) of 1953 and 1956.

This law provides monetary compensation to individuals who were "persecuted for political, racial, religious or ideological reasons" by the wartime German government. The great majority of these successful restitution claims was from Jews. Jewish Holocaust historian Raul Hilberg estimated about two-thirds of the allowed claims had been from Jews.[7] Using Hilberg's conservative estimate would mean that Jews had received over 2.9 million BEG restitution claims by January 1984.

These successful Jewish BEG claims understate the number of potential successful BEG claims to Jews. As of 1985, Jews in Poland, the Soviet Union, Hungary, Romania and Czechoslovakia were not eligible for BEG restitution.

Also, some European Jews who survived World War II died before the German BEG restitution law was enacted in 1953. The *Atlanta Journal-Constitution* newspaper estimates only half of the Jewish "Holocaust survivors" around the world in 1985 had received restitution under the BEG.[8] These successful Jewish BEG claims understate the number of potential successful BEG claims to Jews.

Such a large number of surviving Jews is not consistent with a German program of genocide against European Jewry.

The New York Jewish publication *Aufbau* documents that, on June 30, 1965, 3,375,000 inmates, the vast majority of whom were Jewish, had survived the German camps and were receiving reparations from Germany.[9] How could there be 3,375,000 survivors of the German concentration camps receiving reparations from Germany 20 years after the war was over if Germany had mass murdered 6 million Jews? Norman Finkelstein, the author of *The Holocaust Industry*, quotes his mother as asking, "If everyone who claims to be a Holocaust survivor actually is one, who did Hitler kill?"[10]

Stephen F. Pinter, who was a U.S. War Department attorney stationed in Germany after the war, also disputed the claim millions of Jews were murdered by Germany. In a statement made in 1959, he wrote:

> From what I was able to determine during six postwar years in Germany and Austria, there were a number of Jews killed, but the figure of a million was certainly never reached. I interviewed thousands of Jews, former inmates of concentration camps in Germany and Austria, and consider myself as well qualified as any man on this subject.[11]

There were a number of Jews killed, but the figure of a million was never reached.

Another problem with Browning's statement is that a large number of Jewish children survived the Holocaust. Revisionist historian Carlo Mattogno has prepared a long list of children and twins at Auschwitz-Birkenau who survived the camp.[12] These children were not fit for work and could not have survived the war if Auschwitz-Birkenau had been the extermination camp it is claimed by Court Historians to have been.

Browning's statements also do not take into account the fact a large number of disabled Jewish adults who were not fit for work survived their internment at Auschwitz-Birkenau and other German camps. For example, Anne Frank's father, Otto Frank, contracted typhus at Auschwitz-Birkenau and was sent to the camp hospital to recover. He remained at Auschwitz-Birkenau when the Germans abandoned the camp in January 1945, survived the war, and died in Switzerland in August 1980.[13] If Auschwitz-Birkenau had been a place of mass exterminations, why would the German authorities leave behind thousands of disabled Jews such as Otto Frank to testify to their genocide?

Primo Levi, a Jewish chemist, is another disabled Jew who one would think would have been executed at Auschwitz-Birkenau. However, along with about 7,000 to 8,000 additional disabled Jews, Levi was left behind in Auschwitz. Although the Germans could have easily gassed and cremated these Jewish inmates in Crematorium V at Birkenau during the first week of January 1945, they let them survive the war to tell their stories about Auschwitz-Birkenau.[14]

NO EXTERMINATION ORDER

Originally the Holocaust story assumed Germany had a plan or program for exterminating the Jews. In the 1961 edition of his book *The Destruction of the European Jews*, Raul Hilberg wrote that, in 1941, Hitler issued two orders for the extermination of the Jews.[15] However, even though the Allies captured most of Germany's government and concentration camp records intact, no order or plan has ever been found demanding the extermination European Jewry.

In the revised 1985 edition of Hilberg's book, all references to such extermination orders from Hitler were removed. Browning, in a review of the revised edition of *The Destruction of the European Jews*, wrote:

> In the new edition, all references in the text to a Hitler decision or Hitler order for the "Final Solution" have been systematically excised. Buried at the bottom of a single footnote stands the solitary reference: "Chronology and circumstances point to a Hitler decision before the summer ended." In the new edition, decisions were not made and orders were not given.[16]

The Villa Am Grossen Wannsee, located just outside of Berlin, was the site of the infamous Wannsee Conference, where mainstream Holocaust scholars insist the "Final Solution" for the transportation of Jews to Poland for mass murder was allegedly concocted. The problem is, there is no language in any document indicating mass murder—as opposed to mass relocation—was the actual Nazi plan.

With respect to Hitler's role in the alleged extermination of European Jewry, Browning testified at the 1988 Zündel trial there was no proof of a written order from Hitler to exterminate Jews. Browning testified Hitler had adopted the nod theory, which held it only took a nod from Adolf Hitler to exterminate Jews.

"I did indeed coin the phrase that it would have only taken a nod of the head, or it could have only taken yes," Browning testified. "We have, I have argued, circumstantial evidence of at least incitements or initiative."[17]

Then what proofs exist of the so-called Final Solution? Browning testified at the 1988 Zündel trial that, in his opinion, the Wannsee Conference protocol and the diary of Hans Frank, the wartime governor of German-ruled Poland, were the two most striking proofs of a plan of extermination.[18]

Other Holocaust historians also claim the Wannsee Conference, held on January 20, 1942, was the start of a program to systematically exterminate Europe's Jews. The documentary evidence of this meeting, however, shows no extermination program existed. Instead, the German policy was to evacuate the Jews to the East. Israeli Holocaust historian Yehuda Bauer has declared, "The public still repeats, time after time, the silly story that, at Wannsee, the extermination of the Jews was arrived at."[19]

Likewise, Israeli Holocaust historian Leni Yahil has stated in regard to the Wannsee conference, "[I]t is often assumed the decision to launch the Final Solution was taken on this occasion, but this is not so."[20]

Frank's diary also does not indicate Germany had an extermination program against Jews during the war. Instead of destroying his diary, Frank voluntarily handed his 43-volume diary to the officers of the American Army who arrested him.[21]

It should be noted Frank had a volatile personality, and bloodthirsty and inflammatory statements were also made by the Allies during the war. In a war in which many millions of people were killed, emotions ran high. Highly provocative and heated statements, including ones made by Frank in parts of his diary, were made by supposedly responsible leaders on both sides of the war.[22]

Frank testified at the International Military Tribunal (IMT) that he had not known of a program of mass killings of the Jews during the war. However, when asked if he had participated in the annihilation of the Jews, Frank stated:

> I say yes … particularly after hearing the testimony of the witness

> [Rudolf] Höss, my conscience does not allow me to throw the responsibility on these minor people. … A thousand years will pass and still this guilt of Germany will not have been erased.[23]

This last sentence has been repeatedly quoted in books and articles about national socialist Germany. It does not prove Germany had a program of genocide against the Jews. It only shows Frank believed the false testimony by Höss at the International Military Tribunal at Nuremberg, which had been criminally obtained by the Allies through the use of torture.

EXTERMINATION OF WORKERS

To his credit, Browning writes that the German use of Jewish slave labor was not a matter of consensus and could vary greatly as to time, circumstance and place.[24] However, Browning frequently cites instances where Germans used extreme measures to exterminate Jewish workers.

For example, Browning writes that Heinrich Himmler labored furiously between the spring and fall of 1943 to murder the Polish "work Jews." Browning writes:

> This elimination of these "work Jews" was not, I must emphasize, achieved through what the Nazis euphemistically termed "destruction through labor."
>
> For the most part, the victims were not gradually worked and starved to death. Rather, the workers in these camps and remnant ghettos were killed in a relentless campaign of systematic mass murder, exemplified above all by the great Erntefest or "harvest festival" massacre of 42,000 "work Jews" in the Lublin district in a mere two days on November 3–4, 1943.[25]

Browning describes the Erntefest massacre as one of the largest German killing operations against Jews in the entire war.[26] However, Browning provides no credible documentation these 42,000 "work Jews" were massacred in two days. He apparently thinks we will take it on good faith these mass murders happened.

Browning is correct there were instances where Jewish inmates were overworked. For example, Mauthausen in Austria was a German concentration camp in which the working conditions were horrible.

The camp was located near a quarry which was a principal supplier of paving stones for Vienna and other cities. Stone cutting and hauling is a strenuous occupation in the best of circumstances but at Mauthausen the work was especially arduous. Most of the labor in the quarry was done with pick and axe, and prisoners hauled heavy chunks of granite on their backs up 186 steps which connected the camp to the quarry.

Conditions at Mauthausen got even worse after the evacuation of Auschwitz, when thousands of Hungarian Jews were sent to Mauthausen and its sub-camps.

> Browning is correct that there were instances where Jewish inmates were overworked.

Marched through the winter without adequate clothing and food, prisoners who survived to enter Mauthausen were usually in desperate physical and psychological condition.[27]

Mauthausen also spawned an especially brutal system of close to 50 sub-camps. The major sub-camps were Gusen and Ebensee. In addition to quarry work, inmates at Gusen built underground armament factories for the production of machine guns and other weaponry, as well as fuselages for Messerschmitt aircraft for use in the German war effort.

Ebensee was created in 1943 to provide labor for the construction of underground factory tunnels. Both sub-camps in 1945 became end-destinations for dying transported workers from other camps. By the end of the war, conditions at Mauthausen and its satellite camps were so bad that every day hundreds of prisoners died from exhaustion, starvation, dehydration, typhus and other diseases.[28]

Browning is not correct, however, that German work policies were designed to kill Jewish workers.[29] There are numerous documents indicating the Germans consistently attempted to improve working conditions for their Jewish inmates.

For example, on December 28, 1942, SS officer Richard Glücks, who was the head of the camp administration office, sent a directive to commandants of the concentration camps. This directive ordered:

> [C]amp physicians must use all means at their disposal to significantly reduce the death rate in the various camps. … The camp doctors are to see to it that the working conditions at the various labor sites are improved as much as possible." The directive also stressed that "the Reichsführer SS [Heinrich Himmler] has ordered that the death rate absolutely must be reduced.[30]

Glücks followed up his directive in January of 1943 by informing the concentration camp commandants, "As I have already pointed out, every means must be used to lower the death rate in the camps."[31]

German camp administrator Oswald Pohl, in an order dated October 26, 1943, gave specific measures to ensure the health and productivity of the internees of the camps. A copy of the order was sent to Himmler. Pohl began by stating the importance of the camps in the war effort. In addition to stressing the importance of proper nutrition, clothing and rest, Pohl specified ill prisoners were to receive a special diet to help restore their health.[32]

While such directives were not always implemented as ordered, such directives did help significantly lower the death rates in the camps. Such orders are not consistent with a plan to commit genocide against European Jewry.

GENOCIDE IN THE EAST

Browning writes that the Germans used gas vans to murder Jews in the Soviet-occupied territories.[33] Ingrid Weckert writes regarding the alleged German gas vans:

> There is no document to indicate that [homicidal] "gas vans" had ever come up for discussion in the Third Reich. The term dates from post-war times. … To automatically connect the term "Special Motor Vehicle" with the murder of Jews reveals gross ignorance of the facts. … To date, no vehicle that clearly could have served as [a] "gas van" has ever been found.[34]

Browning does not tell us how the alleged German homicidal gas vans operated. This is typical of virtually all Holocaust historians. American engineer Friedrich Paul Berg wrote regarding the Holocaust literature, "[A]s far as the actual mechanics of the extermination process are concerned, about all one ever finds is an occasional short and vague description."[35]

Browning never provides even a short and vague description of how German homicidal gas vans operated.

Browning also disputes Jewish Princeton University historian Arno Mayer's belief that the murder of Soviet Jews was not part of a comprehensive German plan of extermination. Mayer writes:

> Even so, and notwithstanding the unparalleled magnitude of the Jewish suffering, the extermination of eastern Jewry never became the chief objective of Barbarossa. The fight for "Lebensraum" and against Bolshevism was neither a pretext nor an expedient for the killing of Jews. Nor was it a mere smoke screen to disguise the Jewish massacres as reprisals against partisans. The assault on the Jews was unquestionably intertwined with the assault on Bolshevism from the very outset. But this is not to say that it was the dominant strand in the hybrid "Judeo-Bolshevism" that Barbarossa targeted for destruction. In fact, the war against the Jews was a graft onto or a parasite upon the eastern campaign, which always remained its host, especially once it became mired deep in Russia.
>
> When they set forth on their mission, Einsatzgruppen and the RSHA were not given the extermination of Jews as their principal, let alone their only, assignment.[36]

Mayer states the killing of Jews in the Soviet Union occurred as the result of the inexorable radicalization of the war in the east, and because many Soviet Jews were classified by the SS as carriers of Bolshevism.[37] Browning writes:

> Mayer sees the mass murder of European Jewry as a byproduct of Nazi Germany's anti-communist crusade on the one hand, and its hyper-exploitation of impressed labor on the other.[38]

Browning says Mayer "refuses to understand the Final Solution for what it was—the Nazis' plan to kill every last Jew in Europe on whom they could lay their hands."[39] Browning thinks Mayer has gone astray in his understanding of the Holocaust.

Browning relies on the Einsatzgruppen reports to indicate extremely large numbers of Jews were murdered in the Soviet Union, and that these killings were part of a program that had been coordinated and monitored by Berlin.[40]

However, Mattogno has shown the figures quoted in the Einsatzgruppen reports are inaccurate. Mattogno writes:

> For example, in the summary of the activity of Einsatzgruppen A (October 16, 1941 to January 31, 1942) the number of Jews present in Latvia at the arrival of the German troops is 70,000, but the number of Jews shot is reported as being 71,184! Furthermore, another 3,750 Jews were alive in work camps. In Lithuania, there were 153,743 Jews, of which 136,421 were allegedly shot, whereas 34,500 were taken to the ghettos at Kaunas, Wilna, and Schaulen, but the total of those two figures is 170,921 Jews![41]

The Holocaust Hoax Exposed

Debunking the 20th Century's Biggest Lie

Victor Thorn's *The Holocaust Hoax Exposed* dissects nearly every element of what has become the most grotesque conspiracy theory of the 20th—and now the 21st—century. Covered in this book is the mythology surrounding "death camps," the truth about Zyklon B, Anne Frank's diary, how the absurd "6 million" figure has become a laughing stock. From eye-opening facts that not one autopsy exists that shows the use of Zyklon B on work-camp inmates to zero photographic evidence of this supposed enormous event to the ludicrous and licentious tales woven by the Holocaust historians, survivors and Holocaust hucksters, Thorn's masterpiece should be required reading for anyone interested in understanding the underpinnings of the Zionist power elite. Second edition. Softcover, 184 pages, #609, **$20** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Marshal Erich von Manstein also proved the inaccuracy of the Einsatzgruppen reports. The prosecution's case was based on the reports showing Einsatzgruppe D, under the command of Otto Ohlendorf, had executed some 85,000 Jews in four-and-a-half months. Manstein defense attorney Reginald T. Paget wrote that these claims were quite impossible:

> In one instance we were able to check their figures. The S.D. claimed that they had killed 10,000 in Simferopol during November, and in December they reported Simferopol clear of Jews. By a series of cross checks, we were able to establish that the execution of the Jews in Simferopol had taken place on a single day, November 16. Only one company of S.D. was in Simferopol. The place of execution was 15 kilometers from the town. The numbers involved could not have been more than about 300. These 300 were probably not exclusively Jews but a miscellaneous collection of people who were being held on suspicion of resistance activity. …
>
> It was indeed clear that the Jewish community had continued to function quite openly in Simferopol and, although several of our witnesses had heard rumors about an S.D. excess committed against Jews in Simferopol, it certainly appeared that this Jewish community was unaware of any special danger. …
>
> By the time we had finished with the figures and pointed out the repeated self-contradiction in the S.D. reports, it became probable that at least one "0" would have to be knocked off the total claimed by the S.D., and we also established that only about one-third of Ohlendorf's activities had taken place in von Manstein's area.
>
> It is impossible to know even the approximate number of murdered Jews, for not only was Ohlendorf lying to his superiors but, as we were able to show, his company commanders were lying to him.[42]

Von Manstein testified he had no knowledge Einsatzgruppe D or the German army had a policy of murdering Jews. The court believed Manstein and found him innocent of murdering Jews.[43]

Peter Winter has also exposed the fraudulent nature of the Einsatzgruppen reports.[44] Thus, the Einsatzgruppen reports do not support Christopher Browning's statement that there was "a conscious Nazi policy aimed at the systematic extermination of every last Jew in Europe."[45] Mayer is correct that the deaths of Soviet Jews were not attributable to a German policy of genocide.

CONCLUSION

Lipstadt writes that Browning and her other four expert witnesses—Richard Evans, Peter Longerich, Robert Jan van Pelt, and Hajo Funke—"constituted the historian's ultimate dream team." She says these professors were appalled by Irving's cavalier treatment of the historical record and made an exceptional commitment in her defense against Irving's libel suit.[46]

> None of these expert witnesses has proven a German policy of genocide against European Jewry.

I agree with Lipstadt that Browning and her four other well-compensated expert witnesses made an exceptional commitment in her defense against Irving's libel suit. However, none of these expert witnesses has been able to prove a German policy of genocide against European Jewry. ❖

Revisionist Books on the Holocausts of WWII

Sorry Mom, I Was Wrong About the Holocaust: The Trials & Tribulations of the Schaefer Siblings

By Monika Schaefer. The author's mother and father—both Germans—were proud of their heritage, though they were told they should not be. In America, the children were taught Germans were brutes, warmongers and responsible for "the Holocaust." By the time she understood she had been "brainwashed," her parents had passed away, so she wrote a cathartic posthumous letter and made a video as her research had proven she had been lied to about WWII, Hitler and the Holocaust, which did not match what she was taught in school. That video went viral and triggered a surreal odyssey that ended up with her and her brother Alfred spending time in German prisons. This book recounts their saga. Softcover, 304 pages, #955, **$25**.

The Six Million: Fact or Fiction?

By Peter Winter. 6th edition. New appendices. How Zionists and Nazis cooperated on Germany's racial laws; how Zionists offered to take up arms against Britain; how Nazi policy was aimed at encouraging Jews to emigrate, and then evacuating them; how official German records show there were 4.5 million Jews under Nazi control, and 4.3 million lodged claims as "Holocaust victims" after the war; how the USSR used torture to produce "confessions" from Germans and more. Considered by some to be the most important, easy-to-access, information-filled Holocaust resource ever. Covers nearly every myth and fact ever reported about the incarceration of Jews in work camps during the Hitler era and why so much of the mainstream Holocaust narrative simply cannot be trusted. Softcover, 80 pages, 8.5" x 11," 160 illustrations, #604, **$25**.

The Holocaust: An Introduction—Exploring the Evidence

By Thomas Dalton. Where did the six million figure come from? How did the gas chambers work? Why do we have so little physical evidence from the camps? Why haven't we found the six million bodies or their ashes? Why has there been so much censorship on this topic? The holocaust is the greatest murder mystery in history. Can it be proven? Softcover, 128 pages, 13 illustrations, #816, **$15**.

Debating the Holocaust: A Look at Both Sides

By Thomas Dalton. Issues discussed include: No trace of a "Hitler order" to exterminate Jews; key witnesses falsified or exaggerated their stories; little evidence of disturbed earth for mass graves at major "death" camps; few remains of the millions of alleged victims—neither bones nor ash; mass-gassing with Zyklon-B and diesel exhaust nearly impossible; wartime air photos show none of the alleged mass-cremations; the 6 million number has no basis in fact; Jewish world population records suggest many fewer than 6 million lost; the 1 million "survivors" claim implies few wartime deaths; and ghettos and concentration camps served for ethnic cleansing and forced labor. In this book, for the first time ever, the reader will see a real historical debate on the issues. Softcover, 334 pages, #815, **$42**.

Final Solution: Germany's Madagascar Resettlement Plan

Hitler's final solution offered Zionist leaders the island of Madagascar, the untouched, mineral-rich, barely populated, large and secluded island off the coast of east Africa. This new Madagascar was to be governed by a joint German-French board with representation granted to any government cooperating. Ralph Grandinetti tells us what the Madagascar plan was and why it failed. Softcover, 90 pages, #626, **$12**.

Unmasking Anne Frank: Her Famous Diary Exposed as a Literary Fraud

Edited by Thomas Dalton. Millions of people know of Anne Frank's story, but very few know of the many problems with it. Anne's tale is rife with absurdities, logical problems, inconsistencies and incoherent claims. Here, Japanese researcher Ikuo Suzuki deconstructs the famous diary. In the process, he unmasks the truth: the notorious diary was likely written by a middle-aged Jewish man in conjunction with Anne's father, Otto, to foist upon the public the deceptive story of a teenage girl who was "gassed" in a German work camp. Here, for the first time, is a thorough, detailed and highly readable critique of the global bestseller that is *The Diary of Anne Frank*. Far and away the best critical analysis of the famous diary, this book fills a badly needed gap in Revisionist literature. Softcover, 192 pages, #998, **$22**.

The First Holocaust. Jewish Fundraising Campaigns With Holocaust Claims During and After WWI

Don Heddesheimer's compact but substantive *First Holocaust* documents pre- and post-WWI propaganda that claimed East European Jewry was on the brink of annihilation—and the magic number was six million then, as well. The book details how these Jewish fundraising operations in America raised vast sums in the name of feeding suffering Poles and Russians but actually funneled much of the money to Zionist and communist groups even before World War I. One of TBR's most popular Holocaust Handbook volumes. Softcover, 2nd edition, 142 pages, illustrations, bibliography, index, #386, **$15**.

Germany's War: The Origins, Aftermath and Atrocities of World War II

By John Wear. *Germany's War* documents that the Allied leaders were primarily responsible for starting and prolonging WWII—costing millions of lives. FDR's numerous provocations forced Germany to declare war on the U.S.A. despite Hitler's desire for peace. Also covers Stalin's plan for European conquest, America's second crusade, how WWII was planned and instigated, the Allied conspiracy to prolong the war, the Allied POW camps that killed a minimum of a million Germans, the appalling plight of expelled Germans, history's most terrible peace, crimes committed in German camps, the alleged genocide of 6 million Jews, and more. Softcover, 514 pages, #717, **$25**.

The French Gestapo Trials

By Vincent Reynouard. Is everything we have been told about the Gestapo—the German secret police—nothing but lies? Is the reputation of the Gestapo as torturers and thugs false? Reynouard compared the accusations made against the Gestapo at the Nuremberg Tribunals by the Allies with the postwar French trials of the same personnel, involving the same cases, the same victims and the same eyewitnesses. What he found was that the evidence and accusations presented by the Allies against the Germans were fake. Softcover, 236 pages, #734, **$18**.

Germany Must Perish!

By Theodore Kaufman. This book—written in 1941 by a New York Jewish-German émigré—caused a storm in Germany and America with its open advocacy of the physical extermination of all Germans. This was to be done via a process of mass sterilization and the dismemberment of that nation. Because of Kaufman's claimed links to the policy advisors of the U.S. president, Nazi Propaganda Minister Joseph Goebbels used the book to help encourage Germans to fight to the last. Ironically, significant sections of Kaufman's book, despite being dismissed as the work of a loner, came true. At least 12 million Germans were expelled from their ancestral lands following the end of the war, and their deportation became the single largest transfer of any population in modern European history. Softcover, 97 pages, #640, **$10**.

Mass Murder at Katyn

Here is the first-ever complete English translation of the forensic report by the Germans detailing the mass murder of Polish officers and officials by Stalin's secret police in the Katyn Forest, originally published in 1943. Dismissed as "propaganda" and ignored for 50 years, this report was completely accurate, and, if anything, an understatement of the events. The detailed report starts with an overview of the basic facts surrounding the discovery of the mass graves and then produces a series of eyewitness accounts of the captive Poles being transported to the site of the executions. Next, the reader is given a thorough account of the environment and its effect upon buried bodies—establishing the time of death beyond question. Then, a series of postmortem studies on the bodies is presented. It also provides correspondence between the Red Cross and other parties on the matter, while the next section details the Allied response, which alleged the murders hadn't occurred and then that the Germans were responsible. Also includes a list of identified victims and a complete photo record of the graves and the items recovered. Softcover, 290 pages, 8.5" x 11" format, #929, **$28**.

Holocaust Encyclopedia: Uncensored and Unconstrained

For the first time in history, a team of critical scholars has produced an encyclopedic compendium of cutting-edge information on the topic that pays no tribute to any power, respects no taboo, poses all the questions worth asking and gives answers exclusively based on real evidence. *Holocaust Encyclopedia* addresses all the major Holocaust crime scenes: Auschwitz, Belzec, Sobibór, Treblinka, Dachau, Bergen-Belsen, Buchenwald, Mauthausen, Babi Yar, Ponary, Janowska, and Maly Trostinets, to name a few. The authors explain how the legend was formed, changed over time, the reasons for these changes and which aspects of the narrative are credible *Holocaust Encyclopedia* examines the execution chambers, gas vans, mass graves, crematoria and cremation pyres. It discusses toxicological issues regarding the various lethal gases claimed to have been used: gasoline and diesel exhaust gases, carbon monoxide, Zyklon B/hydrogen cyanide, to name only a few. How did these tools work, if at all? What traces can we expect to find, if any? And, ultimately, which traces were actually found during forensic investigations undertaken since WWII's end. Large format (8.5"×11"), 634 pages, hardback, case laminate cover, 579 entries, 357 illustrations (101 color, 256 B&W), bibliography, index, #1013, **$110**.

An Interview With the Son of Alabama Gov. George Wallace

George Wallace Jr. offers insights into father's views on race, state's rights, populism, Elvis, and more

WHAT FOLLOWS IS THE TRANSCRIPT of a radio interview conducted by TBR BOARD OF CONTRIBUTING EDITORS member James Edwards with George Wallace Jr., the son of former Alabama Gov. George Wallace, during an episode of *The Political Cesspool* radio show taped in 2012. This uncensored interview has never before appeared in print. In it, Wallace explains his father's position on race and his belief that, had his father not been shot, Wallace Sr. might very well have gone on to become the Democrats' presidential nominee against President Richard Nixon in 1972.

GEORGE WALLACE JR.
Son of famed populist.

James Edwards: What was it like growing up as the son of one of the most iconic governors in American history?

George Wallace Jr.: Well, it was very interesting. He was a fascinating man in so many ways. His career was one that took off immediately, well beyond the borders of Alabama, and he became a national figure very quickly. Our lives went from the tranquility and peaceful existence of rural Barbour County in southeast Alabama to one of being in the governor's mansion and the son of a very controversial man.

I wrote a book about it called *George Wallace: The Man You Never Knew*. I have always enjoyed writing, and the more I wrote about my father and the events that shaped his life, the more I realized there was a man in my father that many people never really knew in so many ways. I know he was defined early on relative to the issue of segregation, which was part of his journey. But I tried to chronicle his entire journey, which I've done professionally, politically, and personally.

But our lives were very interesting because he rose to the highest levels as a candidate and was winning in 1972 as a conservative Democrat when he was shot and taken out of the race. He has since been called by many prominent writers and editorial columnists—George Will, Dave Broder, Paul Greenberg, Dan Carter, and others—the grandfather of the modern conservative movement.

The Wallace voters of 1972 became the Ronald Reagan voters of 1980. In 2000, I was a delegate at the Republican National Convention, and people from around the country came up to me and told me they had been delegates for my father decades earlier.

Edwards: You included hundreds of truly incredible personal family pictures in the book.

Wallace: The book has 333 photographs, and I could have had a thousand. Where do you stop? There are so many fascinating historical photographs. There are some inter-

esting pictures of my dad and Elvis Presley. Elvis was a great fan, and he used to call my father all the time. Elvis told him one time that he had a "Wallace for President" sign on the front lawn of Graceland in 1968.

After my father was injured [by would-be assassin Arthur Bremer] in 1972, Elvis would call quite often and offer him his various vacation spots around the world, and he said, "George, I'll come pick you up in my jet. We'll just go wherever you want to go." My dad never did, but he was grateful and thanked him. But Elvis was a big fan, and he loved my father.

Edwards: I personally found your father's stand in the 1960s to be commendable. As a populist, he advocated for the people's will. I believe the federal government has overstepped its bounds on too many occasions. Many people still self-segregate to a large degree. It's a choice free people should have. Having a preference is not hatred. I know your father was conflicted by the matter before, during, and after his time in office, but am I mistaken here?

Wallace: The inextricable link between states' rights and the sovereignty of the state—the Tenth Amendment, if you will—was inextricably linked with the issue at the time, which was segregation. And he felt—and the people of Alabama, mostly felt—we should determine our own timetable relative to that. But he was raising constitutional questions at the University of Alabama as to who should run that institution, the federal government or the state of Alabama.

As my dad related to me over time, he said, "Son, we were taught it was in the best interest of both races to be separate." Now, as archaic as that sounds today, the point I make to you is that the people of the South did not have hate in their hearts. Now there are exceptions, of course, to that.

George Wallace Jr. is shown with his father, circa the mid-1960s.

But the battle raging way back then is the same battle that rages today. My father was prophetic in many ways about what he was saying back then. But it was always the race issue that defined him, even though he really transcended it.

On the day he was shot, May 15, 1972, in Laurel, Maryland, he was a million popular votes ahead of the other candidates in the Democratic primary and several hundred delegates ahead. He carried every county in the state of Florida and every county in the state of Michigan. He had truly transcended the issue of race, and he was a national figure, and he was stopped the only way he could have been stopped. I've written extensively about that in my book. There's so much more about his shooting than people will ever really know.

But, yes, the sovereignty of the states, the sense we should determine our own destiny, is where he tried to draw a line, and is a battle still raging today.

Edwards: Do you believe your father was most likely going to be

Double victory follows tragedy: Alabama Gov. George Wallace and his wife Cornelia hold up *The Sun* newspaper with a headline announcing Wallace's victories in the May 16, 1972, Maryland and Michigan Democratic presidential primaries. The governor was paralyzed from the waist down by one of four gunshot wounds suffered on May 15 while campaigning at a shopping center in Laurel, Maryland.

elected president had it not been for the assassination attempt in 1972?

Wallace: We knew something was going to happen. Big momentum was on our side. You could feel it. You knew there was no way he was going to be stopped going to Miami [site of the 1972 Democratic National Convention]. He had the delegates. He was the only conservative running for president that year.

I found a couple of letters in the book from our family archives which were not intended for the public domain, where my father had written Bremer, the man who shot him and left him paralyzed and in pain until the day he died. My dad told Bremer he loved him. He said, "Arthur, I've forgiven you, and, if you'll ask our Lord and Savior Jesus Christ into your heart, you and I will be together in Heaven."

That was truly, in many respects, my father's greatest victory.

Edwards: An incredible movie about your father's life was released in 1997. I remember watching it and found it inspiring. The title, simply enough, is *George Wallace*, and it boasts an all-star cast including Gary Sinise, who played your father, and Angelina Jolie, who played your stepmother. Sinise won an Emmy Award for his portrayal of your father. Most interestingly, he received the Emmy on the very night your father passed away.

Wallace: He did. My understanding is he got the news backstage and then walked out on stage and made the announcement himself that my father had passed away. I later heard Gary in an interview, and he mentioned playing my father was the most intriguing role he had ever played in his career. That was a source of great pride for me.

Edwards: Did you have any interaction with him or the cast during production?

Wallace: I talked to Mare Winningham, the actress who portrayed my mother. They had an opening in Washington I could not make because of a prior engagement, but some friends of mine were there, and I received a note from Sinise about how pleased he was to portray my father. It was an interesting movie, and my father did get to see it. He thought it was fair, meaning even-handed.

Edwards: In addition to writing about your father, you have also written extensively about the South. What do you want people to know?

Wallace: I have always resented how the people of the South, even today, are portrayed by many on the left. There is an agenda at work. It portrays Southerners in such a way as slow and backward. Then you add in the fact we are generally conservative, and the conventional wisdom is that we must be flawed. But we're not flawed.

I'm convinced the people of the South and the spirit of the people of the South are going to save this country. I really believe that. ❖

The Jewish Question

Notes and Documents

First time in English! In conjunction with banned publisher JR Books Online and through donations made to TBR's "Operation Book Rescue," TBR is now able to offer this translated French work on the "Jewish issue." The author, Henri Delassus (1836–1921), a high-ranking Roman Catholic priest, doctor of theology, prothonotary apostolic (official of the Holy See), honorary canon of the diocese of Cambrai, and overtly anti-Jewish and anti-Masonic author,

FR. HENRI DELASSUS

published, in 1910, a seminal three-volume study entitled *La Conjuration antichrétienne* (*Anti-Christian Conspiracy*), in which he shed light on the conspiracy he was convinced existed between high-ranking, influential Jews and Freemasonic lodges with the purpose of destroying European Christendom. For 2,000 years, argues the author, the Jews have been pursuing the destruction of Christianity and the conquest of the entire world.

He explains: "To rule the nations, one needs to destroy the institutions that constitute the social order, particularly the Christian one. Hence the 1789 principles, hence the human rights, hence liberalism, whose virus is being inculcated by Freemasonry into every society. These poisons are undermining and killing every single institution: religion, family, motherland, property, army. Nothing can resist them."

Contained in this book is the translation of a work published in 1911 as *La Question Juive: Notes et Documents.* It mainly consists of selected parts from *Anti-Christian Conspiracy* that deal specifically with the actions of

powerful Jews. Revealing in some places and prophetic in others, this book should be read by anyone willing to learn about the mistakes of the past so as to avoid repeating them in the future. Explaining Race

How Genes Create Racial Diversity

Race is a real biological fact, deeply rooted in genetics, and is not a "social construct" as deluded far-left, politically correct, woke race-deniers insist

By Arthur Kemp

The science of modern DNA analysis—as used by all the popular home DNA testing kits—has definitively proven that race is a biological reality and that racial differences are genetic in origin.

This science has overturned decades of far-left propaganda that has claimed all races are "99% identical" and the even more idiotic claim that "race is a social construct."

This misrepresentation occurs even though, as will be shown here, there is overwhelming consensus among geneticists and scientists that there are indeed clearly identifiable genetic differences between groups of people. Many medical treatments—such as bone marrow transplants, as one example—are exclusively dependent upon genetic compatibility.

Above, Maclyn McCarty (the scientist who discovered that DNA carried genetic information) shakes hands with Francis Crick as James Watson looks on. Together with Maurice Wilkins, Crick and Watson received the Nobel Prize in 1962 for their discovery of the DNA double helix in 1953.

THE DOUBLE HELIX AND PCR ANALYSIS

Although scientists long suspected the existence of molecules that controlled hereditary attributes, it was only with the 1953 revelation of the double helix model of DNA structure by James Watson and Francis Crick that DNA replication and its role in heredity was finally revealed.[1]

In 1983, the American biochemist Kary Mullis invented polymerase chain reaction (PCR), a groundbreaking technique that revolutionized molecular biology. This breakthrough made it possible to create millions of copies of specific DNA sequences, which provided the breakthrough needed to start developing ancestry trait determination.

HUMAN DNA STRUCTURE

The structure and functioning of human DNA are relatively simple and only appear confusing due to the use of often needless acronyms.

At the core of human DNA is the cell, a tiny organism about 0.00004 of an inch or one thousandth of a millimeter in size. There are 30 trillion cells in an average human body.

Inside each cell is a nucleus, that

contains three important components:

1. Sugar molecules, known as deoxyribose and ribose. These two molecules differ from each other in terms of the numbers of respective carbon, nitrogen, and oxygen atoms;
2. Phosphate molecules; and
3. Five chemicals called base pairs, referred to as nucleobases. These are Adenine (represented by the symbol (A), Cytosine (C), Guanine (G), Thymine (T), and Uracil (U).

When these base pairs (A, C, G, T, or U) combine with one of the two types of sugar molecules, they are called "nucleotides." When these nucleotides form long chains, they are called "polynucleotides."

When two of these polynucleotide strands twist around each other, they form a double-stranded helix, or double helix.

This is the "twisted ladder" structure, which is the most widely known representation of DNA and genetics. The acronym DNA is short for Deoxyribonucleic acid.

The use of the term twisted ladder is particularly helpful in explaining where the base pairs are located—they are the stairs or rungs of the DNA ladder.

This four-letter "alphabet" (A, T, G, and C) is arranged in specific formats, which are called codons. These codons create the specific amino acids that in turn "order" the body to create physical forms.

It is therefore the order in which four of these bases (A, T, G, and C) are placed that constitutes the genetic code of a human.

Another of the human cell's components is a fluid that surrounds the nucleus called the cytoplasm. This fluid contains Ribonucleic acid, or RNA. Just like DNA, this RNA is made up of a chain of nucleotides, except that it has the nucleobase Uracil (U) instead of Thymine (T). RNA also has only a single-strand structure, folded in on itself, and does not have the double or ladder structure of DNA.

RNA's purpose is to control the process through which proteins are generated (using a system called messenger RNA or mRNA, transfer RNA or tRNA, and Ribosomal RNA). RNA also controls the process known as gene regulation, which controls when, how, and how much of a gene is expressed (activated).

Single Nucleotide Polymorphisms (SNPs) represent differences in a single DNA building block, called a nucleotide. The four nucleotides—adenine A, cytosine C, guanine G, and thymine T—form chemical bonds called base pairs which connect the two sides of the DNA ladder or double helix. It is variations in the connecting order of these base pairs that cause physical differences between individuals. When individuals share enough common traits, they form a related and physically uniform group, called a race.

CHROMOSOMES

A chromosome is a strand of DNA (that is, chains of polynucleotides in the twisted ladder formation) combined with proteins and packed tightly into self-containing units.

All humans have two pairs of sex chromosomes—the DNA strands that determine whether that individual is a male or female, and two pairs of 22 chromosomes that determine everything else about that individual.

The DNA molecules inside a chromosome are tightly wound around proteins (called histone proteins) that compress the DNA strands and help to determine how they behave. There are five basic histone proteins, named H1 to H5.

GENES

A gene is made up of a series of nucleotides on a DNA strand at any specific place on a chromosome. In other words, genes are areas on the chromosomes that are in control of certain functions.

There are at least 20,500 genes in a human, and these genes vary in size between a few hundred DNA bases to more than 2 million bases.

Each individual has two copies of each gene, one inherited from each parent. The actual location of a gene on a chromosome is called a locus (loci in plural).

ALLELES

When any one of two or more genes occur at a given site (locus) on a chromosome, they are called alleles. Alleles may occur in pairs, or there may be multiple alleles affecting the "expression" of a particular trait. This is called the genotype, or the genetic constitution of an individual.

If the paired alleles are the same, the genotype is called homozygous, and, if they are different, the genotype is called heterozygous. An allele is therefore a variant form of a gene.

An allele is called "dominant" when it overrides the traits of other alleles in a heterozygous pairing. When an allele is recessive, it means that it will always be overridden by a dominant allele in any heterozygous pairing.

Alleles are of vital importance in human genetics. They play a major role in determining the traits of an individual, both physical and psychological. These trait-determining alleles may occur in pairs or be in multiple arrays. No matter how they are linked, it is these alleles that determine the expression of the gene: in other words, how it is shaped and created.

When this expression takes the form of the physical appearance of a trait, the result is known as a phenotype. This is the outward physical appearance of that individual.

SINGLE-NUCLEOTIDE POLYMORPHISMS (SNPS)

A single-nucleotide polymorphism (abbreviated to SNP, and often spoken of as a "snip") is the name given to the point where nucleobases (A and C, or G and T) link up.

Each and every SNP represents a difference in a single nucleotide. This can, for example, mean the replacement of the C nucleotide with the T nucleotide in a certain stretch of DNA. This change then alters the entire expression or output of that particular gene.

The manner in which these base pairs combine is the origin of genetic differences between people and races. The human genome contains approximately 3 billion base pairs, and the number of possible combinations is huge: 4 to the power of 3 billion.

Racial types in profile: From left to right, African, Australian Aborigine, European, and Amerindian.

It is at this level of the genome that genetic diversity is created. Different genes arise from specific sequences of these base pairs, and the diversity in base arrangements drives the creation of unique proteins, and, therefore, all human traits.

SNPs are thus the generators of phenotypes: they cause the creation of different physical forms and psychological differences that manifest themselves as racial groups.

SNPs are the primary tool used by DNA tests in ancestry determination, because individuals from closely related groups have similar SNPs. This means that the more closely related individuals are, the more SNPs they will have in common.

HAPLOTYPES: X, Y, AND MTDNA

Each human being possesses some alleles that always remain the same and are never subjected to any sort of change. These alleles are called haplotypes.

Two of these allele groups—the X and the Y—form chromosomes by themselves and are located inside the cell. The X and Y chromosomes serve a primary function in determining the sex of the individual, with the X chromosome being the female chromosome and the Y chromosome being the male counterpart.

Y chromosomes are passed down unchanged from father to son and therefore contain valuable insights into the origin of that individual on his paternal side.

The X chromosome, however, also includes DNA from some of the female's paternal ancestry and is therefore less reliable in determining a solely maternal ancestral descent.

This is where another group of alleles, known as mitochondrial DNA, or mtDNA, plays an important role. Mitochondrial DNA is found outside the nucleus of the cell. The mtDNA serves primarily as the energy source for the cells. Because it is exclusively inherited through the female line, it serves the same purpose in tracking female ancestry in the same way that Y chromosomes do for the male.

Y- and mtDNA groups have been assigned alphabet designations in order to differentiate them from each other. In this way, Y chromosomes are named from A to R, and mtDNA haplogroups are named from A to Z.

When individuals are closely related to one another, they will share Y- or mtDNA groups, most likely from a single, or small group of ancestors. They are therefore reliable indicators of line of descent—and therefore of an individual's original founding group.

Y- AND MTDNA DO NOT DETERMINE APPEARANCE

Even though Y- and mtDNA haplogroups are passed directly from father to son and mother to daughter

respectively, there is currently no evidence to indicate that they determine the overall physical appearance of an individual, and therefore what is perceived as a race.

Y- and mtDNA groups do, however, without question, indicate origins from specific areas, and these regions are in turn associated with specific "looks," or phenotypes.

This is because, very often, those who have the specific Y- and mtDNA haplogroups also possess specific sets of autosomal DNA strands—which are the genes that do determine physical appearance and psychological characteristics.

It is, however, worth noting that there are many individuals who possess Y- or mtDNA haplogroups associated with a specific region but who do not share the phenotype, or look, associated with the geography of their haplogroup. All this means is, somewhere in those individuals' family trees, there has been admixture in the male or female line but their autosomal DNA has remained constant.

For example, the spread of the Indo-European language speakers from the steppes of Russia (and the region around the Black Sea) around 5000 B.C. impacted a region stretching from present-day Pakistan to Ireland, and from Scandinavia to Egypt. Thus, the R (and specifically the R1a and R1b Y-haplogroups and their subclades) can be found in geographic regions, in varying quantities, from Pakistan to Ireland, even though the phenotype of the individuals in those regions varies considerably.

Y- AND MTDNA DIVIDE INTO SEVEN MAJOR GROUPS

When Y and mtDNA Haplogroups are grouped by their geographic origin—or, rather, their regions of greatest preponderance—they divide clearly into seven geographic regions. These regions also correlate directly with the obvious racial groups:

1. Africa (sub-Saharan)
Racial group name: Negroid

- mtDNA Haplogroups: I, L, U3, U6;
- Y-DNA Haplogroups: A, B, and E (M40, M96).

* * *

2. Region: East Asia
Racial group name: Mongoloid

- mtDNA Haplogroups: B, C, D, E, F, G, R11, Y, and Z;
- Y-DNA Haplogroups: C (M217), D, N, O, and P.

* * *

3. Region: Central Asia
Racial group name: Indo-Iranoid

- mtDNA Haplogroups: M, R1–R9, R30, R31, U6, U9, V, and W;
- Y-DNA Haplogroups: F, G (M201), H, K, and L.

* * *

4. Region: Middle East
Racial group name: Semitic

- mtDNA Haplogroups: J, N, R0a, and U7;
- Y-DNA Haplogroups: J, and T.

5. Region: Oceania
Racial group name: Australoid

- mtDNA Haplogroups: O, P, Q, R12, R14, R21, R22, R23, and S;
- Y-DNA Haplogroups: M, S, and C1.

* * *

6. Region: Europe
Racial group name: Europid

- mtDNA Haplogroups: H, K, T, U1, U5, and U8;
- Y-DNA Haplogroups: I, and R.

* * *

7. Region: Americas
Racial group name: Amerindians

- mtDNA Haplogroups: A, B, C, D, and X;
- Y-DNA Haplogroups: Q.

Single-Nucleotide Polymorphisms (SNPs)

Position of a single-nucleotide polymorphism (SNP) inside a DNA strand.

(Each major haplogroup has several subclades, which are too numerous to list on the simplified list above.)

AUTOSOMAL DNA (ATDNA)

Autosomal DNA (atDNA) is all the DNA material that does not determine the sex of the individual, that is, everything that is outside of the Y- and mtDNA spectrum.

Autosomal DNA contains the SNPs, alleles, and the genes (which are merely defined groups of the latter two), and therefore is the genetic material that provides a wealth of information about an individual, or a group of individuals, including physical characteristics, and psychological traits such as behavior and intelligence. Each of these traits are coded by a specific set of SNPs.

Individuals sharing a large amount of similar autosomal DNA are—obviously—closely related to one another. This is most commonly demonstrated in immediate families but also in larger groups, or tribes, of people.

Within any given group, there are often small variations (mutations) at the SNP level. When one of these variations occurs, the mutation is given its own category, or subgroup, which falls under the main haplogroup heading. These subgroups are given the name subclades or clades.

The first letter of a subclade's name will be the haplogroup alphabet name of its parent haplogroup, followed usually by a hyphen and the name of the SNP that is most different from the parent.

A practical example of this would be the Y chromosome called Haplogroup R. This haplogroup is divided into many subclades. Names of some of the subclades of Haplogroup R include R0a, R1, R1a, R1a1, R2, R3, R5, R5a, R5a1, R5a2, and so on.

Genetic data is therefore obtained via three sources: Y haplogroups, mtDNA haplogroups, and autosomal DNA (specifically the alleles and SNPs).

By studying these three components, it is possible to gain an accurate insight into the geographic origins of individuals, their physical appearance, and the characteristics of that individual, which include personality, cognitive ability, and so on.

SNP Analysis Reveals Seven Races

Figure 3b from the Genomics paper "Toward a More Uniform Sampling of Human Genetic Diversity: A Survey of Worldwide Populations by High-Density Genotyping" (2010). Chart name: "Principal component analysis. First two principal components (PCs) are shown. Each individual is represented by one dot and the label corresponding to their regional origin."

RACE = VARIATIONS IN ALLELES AND SNPS

From the above overview, it can be correctly concluded that all humans share the same basic genetic structure: all humans have cells, the five base pairs, sugar and phosphate molecules, the twisted ladder structure, etc.

It is this commonality which has allowed the left to deceptively claim that there are "no genetic differences between the races."

However, only the willingly blind will deny that groups of people differ in physical characteristics. No one in their right mind will deny that, for example, Chinese people look like Africans, or that Africans look like Europeans, and so on.

Given that there are clear and obvious physical differences between groups of people—and that these physical differences are perceived as races—the obvious question then arises: how are races, that is, groups of individuals with common physical and psychological characteristics, formed?

The answer to this question is surprisingly simple: it is the variation in individual genes at the SNP level that gives rise to the differences that are interpreted as races.

A gene (which, it will be recalled, is merely a collection of nucleotides on any given chromosome's DNA strand) that codes for light skin, will,

for example, be dominant in certain groups of people and be an inherited trait.

Conversely, a gene that codes for dark skin will be found in groups of people with dark skins, which is also an inherited trait.

Tall people will have the SNPs for larger skeletal structure, while intelligent people will have the SNPs that code for a higher IQ.

A group of individuals who are closely related will, for example, share the same SNPs for intelligence, height, or any other characteristic that is inherited.

Similarly, genes that code for specific eye colors, hair colors, hair textures, skeletal structures (which include skull shapes, bone densities, and bone lengths), and all of the other attributes by which race is identified, will be found in the individuals, and groups of individuals, who display those common traits.

These genes are always the result of specific arrays of alleles and specific SNPs. It is these DNA components that determine the outward expression of human genetics; in other words, how individuals are quite literally shaped and created.

When large numbers of individuals share similar gene expression (that is, alleles and SNPs), they will take on a uniform appearance. This uniform appearance takes on the physical form of what is perceived to be a race.

These physical attributes—which are the result of gene expression—along with haplogroup categories, provide the genetic basis of all racial groups.

Autosomal DNA plays the dominant role in shaping the physical appearance of an individual. When enough individuals share specific genes, they will have a similar appearance. It is this "similar appearance" which presents itself as "race," or "racial groups."

It is the difference in these genes, or, more directly put, the difference in the way that the SNPs (and their components) are configured, that causes racial characteristics.

AUTOSOMAL DNA DIVIDES HUMANS INTO SEVEN MAJOR GROUPS

There are many genetic studies that have conclusively determined the role of SNPs in determining race, but perhaps the most significant one to date was produced by an international team of scientists in 2010.

That study, titled "Toward a More Uniform Sampling of Human Genetic Diversity: A Survey of Worldwide Populations by High-Density Genotyping,"[2] was prepared in a joint effort by 10 scientists from the University of Utah, one from the Molecular Genealogy Foundation in Utah, and three from the University of Toronto, Canada.

This study conducted its own DNA sampling from 13 worldwide populations "not covered by previous studies" and then combined them with already established and verified worldwide samples consisting of at least 250,000 SNPs from 40 populations spread around the globe on all continents.

The samples were then compared with one another to determine similarities or differences between the SNPs. Using this method, it became possible to map just how close—or how far away—SNPs are from one another in terms of their innate composition.

The results, when projected out in schematic format, conclusively confirmed the division of humans into seven geographic divisions—a fact that was already identified by the Y- and mtDNA haplogroups, and discussed above. (See chart, page 64.)

AFRICAN "GHOST DNA" FROM UNIDENTIFIED ORIGIN

The great distance between the African sample and the rest of the human types, as vividly illustrated in the graphic depicting SNP differences between the races, is caused by two factors: the vast physical and psychological differences between the Negroid race and all other races, and also the existence of what is known as "ghost DNA" in Africans. (See again, chart on facing page.)

Race and Racial Differences A Handbook for the 21st Century—How DNA Shapes Mankind Into Seven Major Races

By Arthur Kemp. Race is real, it is biological in nature, and it is shaped and determined by genetics alone. This book is the first to conclusively show exactly how races are physically and psychologically shaped by individual genes. Using data and references from dozens of highly reputable scientists and journals, this fully referenced work starts with an overview of the development of the study of race, from the earliest times up to the very latest advancements in DNA analysis. From there, it explains how human DNA works and how it relates to geographic locations. When analyzed, the DNA differences divide into seven distinct regions. Each region clusters according to genetic similarity—the definition of race. This provides proof of the biological existence of race, and destroys any claims that race is a "social construct." This work builds on the DNA reality by probing deeper and revealing the exact genes that determine the physical differences we see before us as racial types. What are the seven races? Find out! This African ghost DNA was first brought to the scientific world's attention in 2020, when a paper published in the journal *Science Advances* announced that around 19% of DNA sequences in West Africa come from no known human group.[3]

One of the paper's authors, in an interview with National Public Radio surmises:

> [African ghost DNA] comes from a yet-to-be-discovered group. … We do not have a clear identity for this archaic group. That is why we use the term "ghost." It does not seem to be particularly closely related to the groups from which we have genome sequences from.[4]

A DEFINITION OF RACE

There can therefore no longer be any question that race and racial differences are genuine biological realities that are observable to the naked eye, and which are genetic in origin.

This allows for a final definition of race: a closely related group of people whose common physical appearance and psychological are determined by genetic factors alone. ❖

More Uncensored Books on Race from TBR

The Importance of Race in Civilization

By Wayne Macleod. A grand overview of the relationship between civilization, culture and race. Using historical examples, the author shows that different races create different civilizations, each a reflection of their own inner values. These civilizations and cultures only come to an end when the originating races are destroyed—through physical integration and racial miscegenation. According to the author, "Culture is primarily artistic, that is born from the soul of a people, who may utilize many tools in the pursuit of their achievements. Needless to say, the better the tools the higher the Culture, but, in all cases of Western history, the discoveries of ancient or contemporary peoples that aided Western Civilization were attained by Europeans themselves, never were they the result of culture mixing." Softcover, 100 pages, #1030, $12.

The Children of Ra: Artistic, Historical and Genetic Evidence for Ancient White Egypt

By Arthur Kemp. Lavishly illustrated with over 106 full-color pictures, the 2017 DNA evidence and a historical overview, this book proves that Whites created the initial Egyptian civilization—and that ancient Egyptian culture came to an end once those people had been bred out of existence. Proves Tut was of the same racial stock as Europeans, and discusses the massive DNA testing of Egyptian mummies by scientists. Softcover, now 6 x 9, 83 pages, color interior. #827, **$21**.

The War Against Whites: The Racial Psychology Behind the Anti-White Hatred Sweeping the West

Arthur Kemp reveals that the Black Lives Matter ideologues do not seek "racial equality," but rather the total destruction of White civilization. Kemp says they are driven by a deep mass psychosis which falsely blames White people for all problems encountered by non-Whites trying to fit into a First World society. Kemp deals with unalterable genetic traits—IQ, character, psychology and behavior—and shows they are the true causes of racial disparities in crime, socioeconomic status, education and health. Starting with a complete review of the George Floyd incident, this work covers it all! Dissects the myth that police in the U.S. are "hunting Blacks"; shows through official global crime records that Whites are overwhelmingly the victims of non-White criminal attacks; and provides the only solution through which racial conflict can be avoided and all can exist in peace and harmony. Softcover, 290 pages, 473 footnotes, 79 illustrations, three tables, indexed, #885, **$25**.

The Place of Prejudice in Modern Civilization and Other Selected Writings

Sir Arthur Keith was Britain's most famous anthropologist. A president of the Royal Society and the Royal Anthropological Institute, Sir Arthur was knighted for his services to the academic world in 1921. Collected here are six of his most important works that summarize his conclusions on the evolutionary pressures that shaped the origin of races, the differentiation between racial types, and the unique position of Jews within the world's racial framework. The six writings contained in this collection are: "The Place of Prejudice in Modern Civilization"; "On Certain Factors Concerned in the Evolution of Human Races"; "Nationality and Race from an Anthropologist's Point of View"; "The Peoples and Races of Europe"; "The Jews as a Nation and as a Race"; and "Anti-Semitism and Zionism." The section on Zionism, written in 1947, predicts that the Zionist colonization of Palestine would result in a "long and bloody war." Softcover, 171 pages, #973, **$17**.

Heredity: The Cause of Racial Differences in Intelligence

Prof. Henry Garrett was one of America's most respected writers on psychology and racial differences for the first 60 years of the 20th century—but is now almost unknown to the U.S. public. His contributions were, however, immense: He laid the basis for what became the most significant counter to the Franz Boas school of anthropology, which claimed that all racial differences were environmental and not hereditary. Garrett's status in the academic world—and his impeccable anti-Nazi credentials—made it very difficult for the liars of the mass media to smear him, and, thus, they were unable to silence him in most of the academic journals of his day. The only way to silence his voice was to ban his work after his death. This is why his works have, until now, been completely suppressed and had, until this new edition, vanished. Softcover, 109 pages, #967, **$10**.

The Lost White Race

By Ira Calvin. The author takes the stand that there will have to be two worlds, i.e., a White world and a colored world. He maintains that if we don't do this, the White race will die, and in the end there will be only one world: a colored one. The author makes a strong and justifiable appeal for a setup wherein the White race can be assured of continued existence, which, he believes, is the best thing for the future of the world, i.e., a White homeland like all other races have. Softcover, 184 pages, #661, **$20**.

The Aryan Race: Its Origins and Its Achievements

A beautifully written cultural history of the Indo-European peoples. The author, a classical scholar, defines "Aryan" as a "linguistic race" spanning the areas occupied by the great Indo-European invasion, reaching from India to Ireland, and proceeds to analyze all aspects of the cultures across this vast region. Along the way, he proves that the broad family of Indo-European language speakers had a common origin at some distant point in the past. It includes an overview of the development of ancient Indo-European households, farming arrangements, legal systems, culture, religion, language and political development. Read of the tales from the Rig-Vedas, their similarity to Greek and Roman myths, and the parallels with the Norse Eddas. It is a treasure trove of facts and myths that reflects the genius of the Indo-Europeans. Softcover, 252 pages, #829, **$25**.

Wild West Lawmen

Sometimes Old West sheriffs were more dangerous than the outlaws

By John Tiffany

Thanks to Hollywood, TV and, before that, dime novels, a few names of good guys and bad guys of the old Wild West are known to one and all. This includes names like Wild Bill Hickok, Wyatt Earp, Bat Masterson, Billy the Kid, Jesse James and others. Often the legends of these individuals are exaggerated, and some of the heroes and villains of our collective childhood are made up from the whole cloth. But there were plenty of real-life good guys who were as colorful and dangerous as any outlaw, yet who are nearly forgotten, and deserve to be remembered. What follows are short biographies of just a few of these forgotten Wild West lawmen.

SAM SIXKILLER

Sam Sixkiller is a very interesting but neglected Western gunslinger. Born in 1842, the colorfully named Sixkiller was a half-White Cherokee lawman in Oklahoma back when it was called the Indian Territory, not yet opened to paleface settlement. Sixkiller initially enlisted in the Confederate Army, but something happened, and he wound up fighting for the Yankees instead, joining the Union Army in 1863. He eventually saw combat in Arkansas and the Indian Territory. Many Indians owned slaves, and the territory was split between pro-Union and pro-Confederacy factions. Between conventional fighting and bushwhacker raids, the territory, in many areas, was reduced to a wasteland by the end of Lincoln's War. In May 1865, Sixkiller was discharged and returned to his farm and his wife Fannie.

The slaves in the territory were declared free, but their former owners resented the change and used violence to drive out the freedmen, often burning down their houses. Adding cattle rustling, bootlegging, intertribal conflicts, and criminal opportunities opened up by railroad-building to the mix, the Indian Territory was indeed a very wild and dangerous place.

> Elfego Baca survived one of the most amazing gunfights in the history of the Wild West.

In 1874 Sam's father Redbird Sixkiller talked the young man into taking a job as sheriff in the town of Tahlequah. For several years, Sixkiller cleaned up his jurisdiction and maintained law and order. However, in late 1878, he ran into trouble with the wealthy Thompson family of Indians, shooting down their son Jeter when the boy was involved in illegal activity.

The Thompsons sparked an investigation into Jeter's shooting, which resulted in Sheriff Sixkiller being suspended without pay pending a hearing before the National Council of the Cherokee. In the November 1879 hearing, Sixkiller was absolved of wrongdoing and reinstated, but without the pay he missed during his suspension. This prompted Sixkiller to quit. By 1880, Sixkiller was working three jobs: as a sheriff in Muskogee, as a U.S. marshal, and as a security guard for the Missouri-Pacific Railroad.

During his life, Sixkiller exchanged gunfire with a slew of bad guys: "Half-blood" Dick, Sixkiller's most bitter enemy, Willis Petitt, an emancipated Black slave; "Mule Thief" Bollen; "Badman" Dick Glass, who wore a bulletproof vest; female bootleggers Cunningham and Annie; other bootleggers including "Simple" Frank, "King" Solomon Coppell and others; "Wise" Solomon Coon, a train thief and bootlegger; Barney Sweeny; "Highwayman" Bill Rider; and deadly gunfighters like "Baron" Gus, William Fox, "Wild" Charley Buffington and Tandy Walker.

Sweeny, an ex-member of the Jesse James gang, and his gang of train robbers shot it out with Sixkiller. Sixkiller killed one of these robbers and brought Sweeny in alive, eluding a

vigilante mob that wanted to lynch the prisoner.

In 1886, Sixkiller was killed by two outlaws trying to steal his weapons. After his death, President Grover Cleveland signed a bill that made assault on an Indian Territory policeman a federal offense.

TOM SMITH

"Bear River" Tom Smith is said to have been born in 1838 in New York City. By 1862, he was serving in the New York City Police. By 1867, he had headed west and worked laying track for the Union Pacific Railroad in Nebraska. By 1868, his crew had reached Wyoming, and the wild and lawless town of Bear River sprang up around their work camp. Smith put his experience to work protecting law-abiding workers from the drunken excesses of the railroad workers, strike-breaking thugs, and vigilantes.

Tom had allegedly shot dead 14 men and wounded many more by the time events came to a head in the Bear River riot of 1868. Legend has it that some workers were falsely imprisoned in the town jail, and Tom and some fellow railroad workers exchanged prolonged bouts of gunfire with vigilantes and strike-breakers, eventually freeing their coworkers. In the process, they destroyed the jailhouse and the anti-labor newspaper, but Smith was severely wounded. Order was restored by the arrival of federal troops from Fort Bridger, a fur-trading outpost established in 1842 on Blacks Fork on the Green River, in what is now Uinta County, Wyoming

Upon recovering from his wounds, Tom gave up alcohol forever and continued protecting the railroad workers as construction extended through Utah. In May 1870, he became the town marshal for violent Abilene, Kansas, and tamed the town by enforcing the municipal ordinance that only he, within the town, could bear arms. Tom tried to arrest the murderous gunslingers Moses Miles and Andrew McConnell but was shot down with rifle fire. Then, one of his quarries finished him off with an ax. Abilene thereafter returned to its lawless ways.

PERRY OWENS
Fearless Western lawman.

COMMODORE PERRY OWENS

Another forgotten hero is "Commodore" Perry Owens, named for the naval hero of the War of 1812. Born in 1852, he made his mark as a gunslinging cowboy driving off rustlers.

In 1880s Arizona, he hired on at a stagecoach station as a rifleman charged with driving off Indian attacks. His reputation began to grow as a dead shot. He then signed on as a security guard for a railroad, also killing buffalo for the railroad barons. It is alleged he single-handedly drove off an obstreperous Apache raiding party after they killed his companions. In the process, two Apache warriors were killed by Owens.

He went on to be elected as Apache County sheriff. In September 1887, while trying to subdue one of the factions involved in the Pleasant Valley War, a gunfight ensued. Referred to as the Owens-Blevins Shootout, Owens took on several men and came out unscathed. Rather than seeing Owens as a hero, he was relieved of his position as sheriff. He moved on to Seligman, Arizona, where he ran a saloon, dying peacefully in 1919 at the age of 66, eventually being buried in Flagstaff.

ELFEGO BACA

Another colorful character was Elfego Baca, a White Mexican. Born in Socorro, New Mexico, in 1865, Baca gained a reputation as a tough lawman after the discovery of silver in the Magdalena Mountains. When cowboys from the Slaughter Ranch started drinking and shooting up the town of Frisco, Baca arrested one of the cowboys. Then, 150 of the ranch hand's friends gathered in the street demanding the man's release. Baca fired into the mob, killing one man.

The crowd dispersed, but they were back the next morning, intent on killing Baca and releasing their friend. Shooting broke out, and Baca took cover in a nearby house. A gun battle ensued for more than 30 hours, with the cowboys firing some 4,000 rounds into the flimsy structure. Yet Baca continued shooting, like a cat with nine lives—in fact, earning him the nickname "El Gato."

Tired of wasting their bullets, the cowboys tried to set fire to the roof of the building but failed, as it was made of sod. They then tried setting off a dynamite charge at one corner of the house, but even that failed. After killing four cowboys and wounding eight more, Baca emerged without a scratch.

He was charged with murder but was acquitted when the door to the house was admitted into evidence with more than 400 bullet holes in it.

Later, serving as a sheriff, he sent

letters to many lawbreakers, telling them to turn themselves in by a certain date or he would "know you intend to resist arrest, and I will shoot you." Most of the wrongdoers peacefully turned themselves in as a result.

Baca signed on as a U.S. marshal in 1890, serving two years before giving up law enforcement. He then became a lawyer in Socorro. He was important in New Mexico politics for his ability to deliver the Hispanic vote. He then became a private detective and wrote a weekly column for the Spanish-language newspaper *El Nuevo Mexicano*.

According to a biographer, Baca was far from perfect: "He drank too much, talked too much and had a weakness for wild women. He was often arrogant, and … he showed no compunction about killing people."

On his 75th birthday, Baca boasted to a reporter that he had defended 30 men charged with murder and had lost only one case. Baca died at the ripe old age of 80.

BUD LEDBETTER

Born in 1852 in Aurora, Arkansas, and serving as a deputy sheriff in Johnson County for 10 years, James Franklin "Bud" Ledbetter, a giant of a man, gained a reputation as a ferocious fighter against thieves and killers.

He drifted to the Indian Territory in 1894, where he worked for a while for an express company, then was recruited as a deputy U.S. marshal—one of the coolest-headed officers ever to wear the star. He single-handedly brought in four members of the train-robbing Jennings gang.[1]

As police chief of Muskogee, Oklahoma, Ledbetter was once called upon, with two deputies, to arrest several squatters in a house there. The occupants shot at Ledbetter, riddling his clothes with bullet holes. Miraculously, he was unwounded. Later, a newspaper editor asked him how he felt when the men were shooting at him. With amazing understatement, he admitted that he had been "a little fretted."

Ledbetter was police chief for two years and lived in Muskogee for the rest of his life, passing on in 1937.

DAVE J. COOK

Dave J. Cook was born sometime around 1840 to 1842. He was a Colorado sheriff in the 1860s and, in the 1870s, was police chief of Denver. In his career, he was responsible for over 3,000 arrests. At the time, there was no standardization and no training for the office of sheriff. However, Cook fixed that. He compiled a basic set of rules called "Self-Preservation" in his 1882 book *Hands Up! or Twenty Years of Detective Life in the Mountains and on the Plains*. The rules became somewhat of a standard operating manual for Western peace officers. Some of his rules included:

- Never hit a prisoner over the head with your pistol because you may afterward want to use your weapon and find it disabled;
- Never attempt to make an arrest without being sure of your authority;
- When you attempt to make the arrest of a desperado, have your pistol in your hand or be ready to draw when you make yourself known. … My motto has been, "It is better to kill two men than to allow one to kill you";
- After your prisoner is arrested and disarmed, treat him as a prisoner should be treated—as kindly as his conduct will permit. You will find that, if you do not protect your prisoners when they are in your possession, those whom you afterward attempt to arrest will resist you more fiercely; and
- Never trust much to the honor of prisoners (your safety or their custody). Nine out of 10 of them have no honor.

HENRY ANDREW (HECK) THOMAS

Henry Andrew (Heck) Thomas was born in Athens, Georgia, in 1850. Reared and educated in Atlanta, he got the nickname "Heck" at an early age. His parents wanted him to become a Methodist minister, but the young man had other ideas. His male relatives—his father and several uncles—served in the Confederate Army and, at age 12, Thomas himself was a Rebel courier at the front of the fighting in Virginia. When Union Gen. Philip Kearny was killed during the Battle of Second Manassas, Gen. Robert E. Lee personally ordered Thomas to return Kearny's horse and belongings to his widow, crossing through the lines under a flag of truce. Said Thomas, "It was one of the proudest moments of my life."

At the age of just 17, Thomas joined the Atlanta police force, soon thereafter marrying his cousin, Isabelle Gray and starting a family. Thomas gained fame as a fearless lawman after being wounded in one of the city's race riots.

In 1875, Thomas moved his family to Galveston, Texas, going to work as a guard for the Texas Express Company and the Houston and Texas Central Railroad. Train robberies at the time were rampant. In 1878, the Sam Bass gang tried to rob a train some 12 miles southeast of Dallas. In the shootout, Thomas was injured, but the gang came away empty-handed because Thomas had stashed the cash in an unlit stove while putting decoy packages in the safe. By the time the bad guys discovered they had been tricked, the train was miles away.

In 1885, he left his position as chief agent for Texas Express to run for chief of police. He lost by a narrow margin and went to work for the Fort Worth Detective Association. Soon, he was chasing Jim Lee and his brother "Pink." These were murderous members of the notorious Lee gang of horse and cattle rustlers.

In May 1885, U.S. Marshal James Guy formed a posse to pursue the gang. They were ambushed, and four posse members were killed. Rewards adding up to some $7,000 were posted for the brothers.

After a steady four months of searching, Thomas and his posse caught up with the brothers in a hayfield near Dexter, Texas. Given a chance to surrender, the brothers' only answer was the sound of their Winchesters, and, in the melee that

followed, the Lees were slain.

Not long thereafter, in 1886, Thomas was appointed deputy U.S. marshal and moved his family to Fort Smith, Arkansas, the stomping grounds of infamous "Hanging Judge" Isaac Parker. For the next seven years, Thomas would earn a reputation as one of the Wild West's most effective lawmen, apprehending dozens of notorious outlaws including members of the Doolin, Dalton, and Bass gangs.

Often working single-handedly, Thomas would bring more outlaws—bootleggers, horse thieves, murderers and others—to justice than any other marshal working in the Arkansas and Oklahoma (Indian Territory) area.

Though his career was succeeding, his marriage was crumbling. His wife Isabelle became weary of frontier life and her husband's long absences. So, she divorced him and went back to Georgia with their five children.

However, while Thomas was recuperating in 1888 from wounds suffered in the line of duty, he met a schoolmarm and preacher's daughter named Mattie Mowbray. In October 1889 the couple married in Arkansas City, Kansas, and Thomas began a second family.

By 1891, Thomas and two other deputy marshals, Chris Madsen and Bill Tilghman, started working together to bring in some of the most notorious outlaws of the Wild West, becoming known as the "Three Guardsmen." (Bud Ledbetter, mentioned earlier, later became known as the "Fourth Guardsman.")

Ironically, Bob and Grat Dalton had once been deputy U.S. marshals themselves. And Thomas had once worked closely with their brother Frank Dalton, who had been killed in the line of duty. Old times did not, however, prevent Thomas from being their nemesis.

After the gang robbed a train in Adair, Oklahoma, Thomas persistently tracked them into the Osage Nation and located their campsite some 29 miles south of Coffeyville.

On October 5, 1892, the Dalton gang tried to pull off a simultaneous robbery of two banks in Coffeyville, Kansas, aiming to steal enough cash so they could escape to South America and retire from a life of crime. However, the townspeople shot them down while they tried to make their getaway with the cash. Gang members and four citizens were killed.

Word came to Thomas that four gang members, including Bob and Grat, had been killed in Coffeyville. Another brother, Emmett Dalton, was a survivor, although severely wounded, with 23 gunshot wounds. Thomas went on to Coffeyville and identified the bodies for the Wells Fargo Company. Thomas said Bob Dalton was the most accurate shot he had ever seen.

While working in the Indian Territory, Thomas arrested more than 300 wanted men in a deadly job that felled 15 other officers. Thomas himself was wounded at least six times during gunfights. During his tenure Thomas was noted for going after the most dangerous outlaws, because the rewards were higher.

After a heart attack in 1909, he finally retired from law enforcement, aged 59. Three years later, he died of Bright's disease and was buried in Lawton, Oklahoma. ❖

ENDNOTE:

1. According to author Kathy Weiser-Alexander in her book *Legends of America*, "In 1899, Al Jennings was sentenced to life in prison, but, due to the legal efforts of his brother John, his sentence was reduced to five years. He was freed on technicalities in 1902 and received a presidential pardon in 1904 by President Theodore Roosevelt. Before he turned to a life of crime, Jennings, who was an attorney, ran for Oklahoma governor in 1914 but was soundly defeated."

Books from the Late Tom Goodrich

Black Flag: Guerrilla Warfare on the Western Border, 1861–1865—A Riveting Account of a Bloody Chapter in Civil War History

By Thomas Goodrich. From 1861 to 1865, the Missouri-Kansas border was the scene of death and destruction. Thousands died, and entire populations were violently uprooted. It was here also that some of the greatest atrocities in American history occurred. Yet in the great national tragedy of the Civil War, this savage warfare has seemed a minor episode. Drawing from a wide array of contemporary documents—including diaries, letters, and first-hand newspaper accounts—Thomas Goodrich presents a hair-raising report of life in this merciless guerrilla war. Filled with dramatic detail, Black Flag reveals war at its very worst, told in the words of the participants themselves. Bushwhackers, Jayhawkers, soldiers, civilians, scouts, spies, runaway slaves and the guerrillas all tell of their terrifying ordeals. Black Flag is a brutally honest account. Softcover, 192 pages, #817, **$20**.

Lincoln's Avengers: Grief & Revenge in the Aftermath of the Murder of Abraham Lincoln

Many volumes have been written about the assassination of Abraham Lincoln. But few, if any, accounts have ever discussed the campaign of revenge that gripped the nation after the murder. Any person who did not show the requisite grief at Lincoln's death was vilified. Some people were tarred, feathered and forced to carry American flags in public humiliations. Men who bore even a passing resemblance to assassin John Wilkes Booth were lynched. Mobs appeared at the houses of former President Franklin Pierce—a New Hampshire native and a fierce opponent of abolition—and demanded that he display the flag. When it was noticed that there were no signs of mourning on the house of former President Millard Fillmore, an angry mob slung mud and splashed black ink on the residence. In New York City, a gang of club-wielding teenagers burst into the home of Julia Tyler, widow of John Tyler, the 10th president, a Southerner, to make sure no Confederate symbols were present. Riotous mobs threatened to hang thousands of Confederate POWs on the spot around the country. People with a grudge against a neighbor took the opportunity to press false claims so as to exact revenge on their rivals. In The Purge, author Thomas Goodrich has compiled scores of eyewitness accounts that each, in its own way, helps uncover the truth about this troubling period of time—one that has been completely ignored by almost every other historian. Softcover, 108 pages, illustrated, #874, $**12.50**.

The Darkest Dawn: Lincoln, Booth and the Great American Tragedy

Many books have discussed the killing of Lincoln, but few have shown us the immediate aftermath of the president's assassination: the public panic … the news that other members of the cabinet had been targeted or attacked, the massive manhunt for Booth, the arrest of the alleged conspirators and a populace begging for revenge—all of this happening even as a war was still raging in some parts of the country. But this story has never been told with the immediacy and intimacy of *The Darkest Dawn* by Tom Goodrich. Softcover, 376 pages, #842, **$22**.

The Day Dixie Died: The Occupied South 1865–1866

By historians Thomas and Debra Goodrich. Starting with the assassination of Lincoln, the authors trace the history of Reconstruction, the death, destruction, crime, starvation, exile and anarchy that pervaded those terrible years. Few books give you the actual truth about this period in time, but this one does—in graphic detail. Many photos. Possibly the best book on the subject ever written. Softcover, 320 pages, #273, **$22**.

Scalp Dance: Indian Warfare on the High Plains, 1865–1879

By Thomas Goodrich. From the Sand Creek Massacre in 1864 through Custer's Last Stand in 1876 to the final defeat of the mighty Sioux and Cheyenne nations in 1878, *Scalp Dance* reveals the bloody, bitter clashes between two cultures—one bent on

conquest, the other defending its land in the only way it knew how. Drawing heavily from diary accounts, letters and personal memoirs, a spellbinding tale of life and death on the prairie has been crafted. Individual fates are told, each its own drama. It also discusses the brutality with which the Indians treated their enemies, most of which is glossed over today in history books. Some of the most savage war in world history was waged on the American Plains from 1865 to 1879. Softcover, #210, 340 pages, **$22**.

A Heavy Silence: The Battle of the Little Bighorn in the Words of Those Who Were Actually There

Much has been written about the Battle of the Little Bighorn, and even more about the ill-fated commander of the 7th Cavalry who led the troops who were massacred that day, George Armstrong Custer. But few, if any, have heard from those who actually witnessed the battle—the cavalrymen, the officers and those who came upon the battlefield after that dreadful two-day fight to the death. In this illustrated booklet created by The Barnes Review history magazine, author Tom Goodrich takes us on a journey back to the Little Bighorn and allows the men who were there to speak for themselves in their own gripping words. As cavalry scout Billy Jackson said while he and several mates were trying to slip their way past bloodthirsty Indian braves lurking in the surrounding ravines, "Ahead of us was black darkness, heavy silence. As we went on, our hearts became more and more heavy; we feared that all of the troops had been killed." Now hear from dozens more! Fortunately, it appears one man from Custer's doomed command survived, and we have included an extra bonus article that discusses the tale of Frank Finkel—who survived the slaughter by pure luck. Also included are 15 illustrations with enlightening captions covering all kinds of fascinating tidbits about the battle and the commanders. Softcover, 60 pages, saddle-stitched, **$10**.

Hellstorm: The Death of Nazi Germany, 1944–1947

There has never been such a gripping retelling of WWII as one will find in *Hellstorm: The Death of Nazi Germany.* Readers will see what Allied airmen saw as they rained down death on German cities; what those below felt as they trembled in their bomb shelters; the horrors of the Eastern Front during the last months of fighting, the mud, blood, and madness. Readers will witness for themselves the worst nautical massacre in history, the greatest mass migration known to man, and the fate of those wretched victims in postwar death camps. Softcover, 390 pages, #549, **$30**.

TBR is sad to announce that, in December 2024, author Tom Goodrich passed away at age 77 after a long and distinguished career as a Revisionist writer. Buy his books while they last!

Rage & Revenge: Torture and Atrocities in War & Peace

Rage & Revenge is a terrifying, up-close and personal look at what war and its aftermath are really like. For too long, the true nature of combat and the "peace" that follows has been concealed from the general public. Most who have never witnessed war naively assume that there are rules and laws governing such contests. As the reader of *Rage & Revenge* will quickly discover, nothing could be further from the truth. Covering such wars as the Indian Wars during the conquest of the American West, and the island hopping of the American military against the Japanese, Thomas Goodrich weaves a torrid tale of some of the most horrific crimes committed during war. Softcover, 222 pages, #841, *$20.*

LETTERS TO THE EDITOR

APARTHEID ISRAEL A MISNOMER

Thank you for the articles on Palestine [TBR, January/February 2025]. They were very insightful and helpful. Personally, I hate it when the left talks about "Apartheid Israel" and compares the treatment of Palestinians to the treatment of Africans under Apartheid.

It is a false comparison:

- Apartheid South Africa never phosphorus bombed Africans in the "townships."
- Apartheid South Africa built hospitals for Africans, and did not blow them up.
- Apartheid South Africa built schools for Africans, and did not blow them up.
- Apartheid South Africa gave work to Africans, and did not starve them.
- Apartheid South Africa gave "homelands" to Africans, and did not drive them out of their traditional areas.
- Apartheid South Africa gave money to the African homelands to build them up, and did not bomb and destroy all infrastructure.
- Apartheid South Africa helped African numbers to grow and did not genocide them out of existence.

It is completely incorrect to compare Israel's treatment of Palestinians to Apartheid South Africa's treatment of Africans. In fact, I would go as far to say that it is a grave insult to South African Apartheid.

FELONS IN CHARGE

The secretary-general of the United Nations (UN) has rightly and courageously called on Israel to stop its genocide in Gaza. The felons in charge of Israel show contempt for the UN, as well as for the International Court of Justice and the International Criminal Court, by perpetuating their crimes and extending them to Lebanon, Syria, and Yemen. They might pause if an International Genocide Tribunal on Israel were set up stipulating death penalties matching the enormity of their crimes, namely in a tented prison camp with dwindling, water, food, medical, and energy supplies for as long as it takes.

A GREAT FRIEND PASSES

Good grief! I'm so shocked, and very sad to hear the news of losing that great historian and friend Tom Goodrich. A few years ago, Tom came to stay as my guest at my chateau in Germany, where he continued his writing in the peace and quiet of those dairy-farming rolling plains of the Little Red Riding Hood region, where the cautionary tale was first discovered. Great company, although the cold weather was tough on an ever-sunny Florida guy!

During his career, and his battle with leukemia, he always fought back against adversity and maintained his nearly impossible-to-dim spirit. A good description of Tom was a non-egotistical servant of the truth. A rare and kindly comrade, I say, "long live the legacy of Tom Goodrich!"

MORE SAD NEWS

The passing of Jürgen Graf is indeed very sad news. I had the great pleasure and honor of working closely with Jürgen during the course of about a year as he was translating my book *Sorry Mom, I Was Wrong About the Holocaust* into German. It became a very difficult task for him to do, as it was during that time that he became seriously ill. I cannot say enough about this man, his wisdom, kindness, knowledge, intelligence, integrity, and I could add many more words. Now he is at peace and need no longer suffer. He was a man of great virtus [valor, excellence, courage].

LOVES GÖTZ

Wow! That article in [the January/February 2025 issue of TBR] on Teutonic knight Götz von Berlichingen was amazingly inspirational. What a man! And the wealth of illustrations was superb. Kudos to your entire staff for that article presentation. I took the gorgeous issue and went to my local copy shop and had the cover enlarged on nice paper and framed it. Old Götz is looking down on me as I write this letter! Thanks again for that great bit of European history. And also, please accept my plaudits for the rest of that issue—from the Mideast coverage to the Suffragette terrorists to the Confederate spies in Canada to the interview with the policeman who booked Rosa Parks. This is why I subscribe to TBR.

DON'T NEED THAT BOOK

With regard to your book *The Greatest Jesus Mystery of All Time*, I would like to inform you that when the Bible doesn't mention certain facts, it means that these facts are not necessary for a better understanding of the history of Jesus' life and works. Also, Jesus was the son of a carpenter, so he was taught the same profession by his father and, more importantly, as a Jewish boy in that period, he was taught the prophets and other Jewish books, but most importantly was taught by his heavenly Father to prepare for his ministry.

GERMAN ELECTIONS

We were in Austria and Germany leading up to the recent elections and saw the signs for Herbert Kickl. In Vienna, they were defaced with a Hitler mustache drawn on the photo. (I mean, he does promote rule of law and following the Austrian constitution, as well as free-market capitalism, so he must be a "Nazi," right? Wait, does the "zi" part of "Nazi" not refer to the "sozialistische" (socialist) part of the word "Nationalsozialistische" (national socialist), as in "Nationalsozialistische Deutsche Arbeiterpartei" (National Socialist German Workers' Party)? In the Austrian countryside, they were not defaced.

The cities are overrun with Muslim migrants to the point that Munich is hardly recognizable as a German city. In Germany, there are now an average of two gang rapes per day, predominantly Muslim men raping German women. I am glad the Marxists in charge care so much about German women!

Salzburg was notably more preserved than other cities. That's where the Austrian plagiarism expert Stefan Weber is from, who recently exposed Qué Mala Harris's plagiarism. (Due to the Democratic National Convention lecture about how to correctly pronounce her name, author Doug Casey pronounces Kamala's first name "Qué Mala"—how bad.)

Since then, I have been listening in German to every press conference and interview I can by Kickl and by Alice Weidel and Tino Chrupalla. Likewise, Polish Member of the European Parliament Dominik Tarczynski and Hungarian Prime Minister Viktor Orbán. Also, German journalist Peter Hahne. His recent book is titled *Ist das euer Ernst?"* ("Are You Serious?!"). They are excellent. We need more people like them in the United States. Kickl's pre-election speech in front of St. Stephen's Cathedral in Vienna was fantastic. I was lucky enough to have been there for it.

The legacy media in Germany and Austria are singing the same song as the legacy media in the United States. Since the German elections have been going well for candidates who oppose globalism and the military-industrial complex, it must be "Russian interference in the elections" and such.

The establishment "Cartel Parties," as the Alternative for Germany Party (AfD) refers to them, are trying to ban the "Freiheitliche Partei Österreichs" (Freedom Party of Austria or FPÖ) by calling them criminal "right-wing extremists." They are also trying to exclude them from holding positions in government, although they were duly elected. To them, "Democracy" means the globalist candidate will be installed, not the candidate for whom the people voted.

Swiss Journalist Roger Köppel of *Die Weltwoche* is producing excellent content about the FPÖ and AfD.

The previously banned German media outfit Compact—mostly staffed by very young journalists—is also putting out good content you can view at www.compact-online.de.

DON'T GET TOO EXCITED

Before any TBR readers get too excited over the so-called "far-right" parties supposedly on the uptick in Europe (and Trump in America), I feel the need to point out an unpalatable truth: contrary to how the legacy media portrays them, none of these parties or movements truly represents European interests.

As the ex-Jewish writer Gilad Atzmon once explained, the Jewish lobby in post-World War II European politics has gone to work in the following manner: first, they infiltrate European society and take over both the "left" and the "right" of the political process. The "left" is made up of the socialist Zionist lobby, and the "right"

Continued on page 76

Continued from page 75

is made up of the hardcore "right-wing" Zionist lobby. This mirrors the political situation in Israel, where the "right-wing" Zionists under Benjamin Netanyahu (who seek to exterminate the Palestinians) are in opposition to the "left-wing" Zionists in the Labour Party (who are in favor of the "two-state solution," as, they argue, it is bad optics to be seen as genocidal maniacs).

This division is then reflected in the "right wing" and "left wing" of the Zionist-controlled European (and American) political scene: "Politics" just becomes a debate between "left-wing Jews" (for example, the Biden administration's kosher cohort) and "right-wing Jews" (see for example, the Trump administration's kosher cohort). All they actually argue over is what is best for the Jews. Actual Gentile interests are never discussed.

Sadly, all the European "right-wing" or "populist" parties are firmly in the "right-wing Zionist" camp. This includes Reform UK, the German AfD, the Austrian FPÖ, the Hungarian Fidesz, France's RN [Rassemblement national], and even Vladimir Putin. For what that is worth, are all completely under the spell of the right-wing Zionist lobby.

The real nationalist parties are persecuted by both sides, and never even allowed to surface on the deliberately uneven playing field the "democracies" pretend exists.

HONORING REVISIONISTS

I enjoyed your September/October 2024 issue about Willis Carto and some of the great Revisionists. I think mention should be made of Jim and Joe Rizoli and Diane King. Jim Rizoli is a hard-core historical Revisionist. He and his brother Joe, who died recently, had a popular cable show that educated the public about the illegal immigrant hordes and, later, also dealt with the fundamental and pervading issue of the Holocaust.

Their immigrant battles led them to the plight of Ernst Zündel in Canada, who was being prosecuted for having reprinted *Did 6 Million Really Die?* Thus, Jim and Joe's efforts and cable shows began to focus more on the issue of the Holocaust. That's where their troubles accelerated. In 2002–2003, they began producing numerous factual videos addressing important issues of the Holocaust.

Much to the dismay of the Anti-Defamation League and the Southern Poverty Law Center, the Rizolis exposed the truth about the Holocaust on a public access television show on October 20, 2009 and were constantly harassed by that organization for their courage.

Jim has produced thousands of videos, hundreds of them dedicated to debunking many aspects of the Holocaust. Approximately 600 YouTube videos under the name of Jim Rizoli were banned. His name was also banned on Facebook.

In 2010, their cable shows were suspended. The shows came back on for a bit in 2012, and then were permanently removed in 2014 for providing a venue to tell the true story of the Holocaust for Revisionists and Germans throughout North America, Europe, and Australia.

Along the way, they were helped immensely by Diane King, another dedicated Revisionist who is an expert on the Holocaust in her own right. Today, you can find more about them on Substack and BitChute.

Their research has forced many to conclude that no Jews were ever killed in homicidal gas chambers, and that there was no program to physically exterminate all the Jews. Hitler had Zyklon B de-lousing chambers, but they were used only to help keep people alive! Those gas chambers were used in many strategic locations throughout Eastern Europe to fumigate entire railroad trains against deadly typhus-bearing vermin.

Jim Rizoli also defended the Iranian Holocaust skeptic and former President Mahmoud Ahmadinejad, instructing viewers to conduct their own research on the Holocaust to discover the truth, and directed people to visit websites to advance their historical research.

Together, the Rizoli/King team interviewed Fred Leuchter, Robert Faurisson, Vincent Renouard, Bradley Smith, Germar Rudolf, Fredrick Töben, Gunther Deckert, Lady Michele Renouf, Mark Weber, Fritz Berg, TBR's Peter Papaherakles, Benton Bradberry, Paul Fromm, seven German survivors of Allied atrocities, Tom Goodrich, Mike King, and Monika Schaefer, to list just a few.

JUST LEAVE US ALONE

In my study of history, along with my reading of The Barnes Review, a theme keeps appearing from nations that want to keep foreigners out. The Dutch in South Africa passed laws to keep their nation Dutch. They carved out the wilderness and turned it into a profitable nation. Then, the UN stepped in with sanctions and destroyed this once great country. Hitler wanted Germany for Germans. England, France, Russia, Poland, and the USA had no business interfering. Croatia had purity with the help of the Nazi regime. Years later, once again, the UN stepped in, not using the sacrosanct word "Holocaust," but "ethnic cleansing." Japan, China, and Korea were closed countries for generations and still are, for the most part. Justice Brandeis, in a decision, said, "The greatest freedom we have in our country is the freedom to be left alone."

Sad News for the TBR Family, Revisionism

JÜRGEN GRAF (1951–2025)—a member of TBR's BOARD OF CONTRIBUTING EDITORS—was a Swiss author, teacher, and translator. Born in Basel, Switzerland, Graf pursued philology at the University of Basel, focusing on English, Romance, and Scandinavian studies, and completed his licentiate in 1979. He subsequently worked as a language teacher, including a tenure teaching German in Taipei, Taiwan. In the early 1990s, Graf became interested in the topic of Holocaust Revisionism. His inaugural work, *Der Holocaust auf dem Prüfstand: Augenzeugenberichte versus Naturgesetze* ("The Holocaust on Trial: Eyewitness Accounts Versus Natural Laws"), was published in 1993. This and subsequent publications led to his dismissal from a teaching position in Basel. Collaborating with Italian Holocaust Revisionist Carlo Mattogno, Graf co-authored several works challenging established Holocaust history.

Graf's activities resulted in legal repercussions under Swiss anti-freedom-of-speech laws. In July 1998, he and his publisher Gerhard Förster were convicted for "Holocaust denial." Graf received a 15-month prison sentence and a substantial fine.

To avoid imprisonment, he fled Switzerland in August 2000. He initially sought refuge in Iran before relocating to Moscow, where he lived and worked as a translator. There, he met and married Belarusian historian Olga Stepanowna in 2001. In 2024, in ill-health and desiring to return home, he undertook a risky trip back to Basel. There, he remained unmolested by the authorities until his death on January 14, 2025, at the age of 73.

THOMAS GOODRICH (born Michael Thomas Schoenlein; 1947–2024)—a member of TBR's BOARD OF CONTRIBUTING EDITORS—was a daring American author and historian most renowned for his works on the U.S. Civil War, American Indian atrocities and and honest World War II history. Born in the American Midwest, Goodrich developed an early interest in history, influenced by his family's military background—both his biological and adoptive fathers served in World War II.

Throughout his career, Goodrich authored many notable books. *Bloody Dawn: The Story of the Lawrence Massacre* (1992) delved into the 1863 Confederate attack on Lawrence, Kansas. In *Scalp Dance: Indian Warfare on the High Plains, 1865–1879* (1997), he examined the violent conflicts between Indian tribes and U.S. military forces that countered the Court Historians' modern depiction of American Indians as guiltless martyrs, i.e., "Nobles Savages." *Black Flag: Guerrilla Warfare on the Western Border, 1861–1865* (1999) explored irregular and extremely vicious warfare during the Civil War.

The Day Dixie Died: The Occupied South, 1865–1866 (2021) discussed the South's challenges during Reconstruction, but his most famous work, *Hellstorm: The Death of Nazi Germany—1944–1947* (2014), honestly and accurately portrayed the suffering of German civilians during and after World War II. In 2005, Goodrich and his wife Debra launched the *Kansas Journal of Military History*, which had as many as 5,000 subscribers. Goodrich died on December 4, 2024, at the age of 77.

The world could learn a valuable lesson from the statement.

WESTERN CIVILIZATION

Mr. Angel, you and other conservative writers, such as Pat Buchanan and Paul Craig Roberts, have recently lamented the decline of Western civilization. But none of you, as I recollect, actually defined Western civilization, though it seems to me that before we have a reasonable discussion, we should be clear about what we are talking about.

It is not as easy as it seems. In my intellectual travels, I have encountered at least 11 definitions of Western civilization, based variously on race, tribe, appearance, geography, religion, language, and mixed criteria:

1. Mesopotamia and Egypt forward through Israel, Greece, and Rome to modern Europe, including Islam. Probably the classic, textbook (standard) definition. 2. Same, but not including Islam. 3. White peoples. 4. Caucasians. 5. Northern Europeans ("Aryans"). 6. European civilization since the advent of writing. This would include ancient Israel by way of Christ. 7. All peoples from the Russian steppes ("Aryans"?) including India, Iran, Pakistan, and Afghanistan, perhaps Bangladesh and Sri Lanka. 8. Same, plus the Middle East and North Africa, including Turks, Arabs, Jews, Berbers, Kurds, Armenians, and many others (very similar to No. 4). 9. "Indo-Europeans," meaning those who speak Indo-European languages, including a few obvious additions. 10. Christendom (basically Europe and her colonies since 300 AD). 11. "Faustian" civilization (Spengler), i.e., Europe since A.D. 1000.

My own choice would be No. 8, but I think most modern Westerners would choose No. 6. So, let us go

Continued on page 78

Continued from page 77

with that: Europe since writing—maybe 3,000 years, maybe 4,000 (Cretan hieroglyphs). Having picked a definition, we need a description. What are the salient features of Western civilization? I would list four (and I welcome correction):

1. Emphasis on individual rights, including justice and freedom. 2. Institutional, organized education, i.e., schools and universities. 3. Unending exploration beyond every frontier. 4. Christianity. Some of these points are shared by other civilizations, in particular No. 3, though generally not with the intensity of the West. Christianity is almost an exclusive feature of the West.

And how does it stand with these four points? 1. The love of individual rights is alive and well, indisputably, although not with the particular emphasis that most conservatives would prefer. But the concept itself, apart from the content, is in full bloom. 2. Organized, institutional education is obviously alive and well, though, again, with a content generally anathema to conservatives. 3. Exploration remains a dynamic pillar of the West, in all directions. 4. As to Christianity, it is an item of faith, an absolute dogma, that the Church is under the protection of the Holy Spirit and can never fail. "Lo, I am with you alway, even unto the end of the world." No one who claims to be Christian can believe otherwise. Some of the morals and practices of today's "Christians" are a little odd, to say the least, but the Church itself will never fail. So, where is the problem, where is the decline? I see no death for the West.

Nevertheless, suppose the West does decline. What, then, would take its place? Not one of the current contenders is remotely possible:

1. Communism. Not a civilization at all, but rather an agent of Satan bent on destroying anything good, especially Christianity. Not yet dead, by any means, but not a replacement of the West. 2. The New World Order. Utterly materialistic and, therefore, incapable of being the basis of any civilization, though, as an ally of communism (which it is), a dangerous force. 3. China. Too bogged down with communism and probably too materialistic, fundamentally, to provide an alternative to a spiritually based civilization. But China's vast material strength deserves attention. 4. Islam. Too disorganized to challenge the West seriously. Not even at the national level, let alone at the regional level, are Muslim countries sufficiently cohesive and organized for a purpose greater than simple survival. Objective, third-party justice is almost non-existent. Despite great potential, Islam is 100 years away from being a factor. But it does have a significant spiritual dimension. 5. India. With its enormous material, intellectual, and spiritual assets, a serious contender, but its stupefying corruption voids the opportunities. In addition, its position as an alternative boils down to Hinduism versus Christianity. Not a chance.

Where is the threat? And note that the two cultures that might actually challenge the West—India and Islam—are actually part of the West, per my view (No. 8 above). Although, as a lifelong conservative and a very old-fashioned Catholic, I am revolted by current trends, I remain optimistic.

[Thank you for your insightful overview. "Western civilization" is indeed a term that describes the shared history, beliefs, and structures of cultures, either European or those influenced by Europe. When we include the term "influenced by Europe," however, we are forced to include the entire world. This is because all the races of the world—Asians and Africans included—have all been "influenced by Europe." You just have to look at the fact that they all use Western technology, Western clothes, Western cultural references—in fact there is almost nothing which they use every day which did not come from, or originate with, Europeans.

This salient fact brings us to the core of the issue: race. The reality is that all European, or "Western" civilization, is exclusively the product of one race. Call that race the "European," or "White" race, or whatever you want. This racial basis of civilization is the ultimate definition of "Western civilization." Only the European/White race creates "Western civilization," and no other race can create it. All other races merely copy it.

This racial basis of civilization also means that there is indeed a real and severe threat to the continued existence of Western civilization.

As Europeans/Whites are the only ones who can create that civilization, it stands to reason that if those people disappear, for any reason, then Western civilization will disappear with them.

If one looks at current demographic trends within the present-day European heartlands—North America, Europe, Australia and New Zealand—it is very clear that the European/White race in all those regions is under genuine demographic threat. If the triple threats of mass Third World immigration, declining birth rates, and an aging population, are not halted and reversed, then inevitably, Europeans/Whites will vanish, and their civilization along with them. Your optimism should therefore be tempered with a healthy dose of racial realism.—Ed.]

TBR Books on the Wild, Wild West

Jesse James & the Lost Templar Treasure Secret Diaries, Coded Maps & the Knights of the Golden Circle

Here is an investigation into the lost treasures of Jesse James and the Knights of the Golden Circle and their connections to the Templars, Rosicrucians and the Founding Fathers. Explains how Jesse James used techniques involving sacred geometry, gematria and esoteric symbols to hide the treasures he was entrusted with and encoded his maps. Provides instructions for using the encoding template employed by Jesse and the Freemasons to hide and recover treasure and sacred relics. Shows how the encoding template confirms the existence of treasures on Oak Island and Victorio Peak and can be traced to a 16th-century book containing a secret map of the New World and the "Hooked X" of the Knights Templar. By Daniel J. Duke—the great-great-grandson of Jesse James Softcover, 160 pages, #868, **$17**. **A perfect companion to …**

Secret History of the Wild, Wild West: Outlaws, Secret Societies & the Hidden Agenda of the Elites

Drawing on family diaries, author Daniel J. Duke—the great-great-grandson of Jesse James— unravels the hidden history of the Wild West to expose the outlaws, politicians and secret societies that were pulling strings behind the scenes. He examines Jesse's close ties with outlaws like Johnny Ringo, Jesse Evans and Billy the Kid. He demonstrates how Jesse faked his own death and lived out his life under an alias, and how Billy the Kid did the same. He also details how both Jesse and Billy continued their work for a secret organization after their faked deaths. Also explores how Jesse was related, by blood or marriage, to powerful people in the Baylor family, Copperheads, Knights of the Golden Circle, Lyndon Johnson, Harry Truman and Billie Sol Estes. Exposing the secret agenda behind the outlaw gangs of the Wild West, Duke also reveals the secret war between the clandestine organization and its opposition that has been waged in the shadows for centuries. Softcover, 208 pages, #944, **$17**.

The Stories of Our Pioneers: Their Heroic Deeds & Devoted Lives

By Augustus Lynch Mason, John Clark Ridpath and Trumbull White. First written in 1904, this book chronicles the heroic deeds and lives of the intrepid and courageous patriots of America. This reproduction has more than 100 B&W illustrations. Much of this book would be considered too politically incorrect to make it into any modern history book today. Here is America's history as viewed by the people of the early 1900s who were unafraid to celebrate our real heroes and revile the dastardly villains of the early days of our nation, at least a few of whom we are sure you've never heard. Loaded with inspiration for all ages, this book is great for adults, but also perfect for a younger person who needs just these kinds of tales today. A real gem of American history. Softcover, 694 pages, #761, **$40**.

Indian Fighter: The Life of Gen. George A. Custer

By Frederick Whittaker. Although Union Brevet Gen. Custer is mostly known for his "last stand" at the Battle of Little Bighorn in 1876 (he was a colonel again by then), this dashing military commander was in reality one of America's finest generals. His career started with the Union Army during the Civil War, and ended after numerous highly successful campaigns in the Plains Wars against the Indians, where he was given the title of America's "best Indian fighter." This dramatic biography, first produced in the year of his death, draws upon family and other original sources and takes the reader on a swashbuckling ride through some of the greatest engagements of the Civil War in which Custer played an important part, through to the many battles, shocking atrocities and wars against the Indians, which culminated in Custer's death. Softcover, 684 pages, #795, **$30**.

War on the Border: Villa, Pershing, the Texas Rangers & an American Invasion

Jeff Guinn tells the riveting narrative of Pancho Villa's bloody raid on a U.S. border town, which sparked a violent conflict with the U.S.A. The "Punitive Expedition" was launched in retaliation under Gen. John J. Pershing and brought together the Army, National Guard and the Texas Rangers—who were little more than organized vigilantes at the time. Opposing this brigade was Pancho Villa, a guerrilla fighter who commanded a motley force of conscripts in Mexico. This was the first time the Army used autos and trucks, limited in value in Mexico, a country with no paved roads or gas stations. Curtiss Jenny airplanes conducted reconnaissance, another first. But, despite some bloody encounters, the expedition eventually withdrew without capturing Villa. Today, the U.S.-Mexico border remains as vexed and volatile as ever. Hardback, 368 pages, #941, **$28**.

Götz of the Iron Hand

PLUS A SPECIAL FOUR-ARTICLE PACKAGE ON THE HISTORY OF PALESTINE FROM ANCIENT TIMES TO THE GENOCIDE IN THE HOLY LAND TODAY.

LIFE IN THE REICH

HITLER'S GERMANY 1933–1945

By Mike Walsh. The standard of living and quality of life in Hitler's Third Reich was far superior to elsewhere in the developed world. Ordinary German workers enjoyed a lifestyle previously reserved for the upper classes of the West.

Hitler's Germany led the world in fashion, medicine, cinema, lifestyle, manufacturing, transport infrastructure, public facilities, cutting-edge science, healthcare and education. For good reason, the Germans were the cheeriest people on earth.

The claim that this was achieved through investment in militarism is absurd. Despite being war economies, the debt-ridden U.S. and European Union suffer the collapse of their infrastructure whilst their indebted populations live a hand-to-mouth existence. Prosperity in the Reich set an example that damns the hideous failures of the mutually supportive capitalist and communist systems.

A taboo topic for media and palace publishers, Life in the Reich by Mike Walsh was removed by Amazon because it dared to show Hitler's Germany as it was and not as the propagandists would have us believe it was. Mainstream media and court publishers consider this a taboo topic because they don't want you to know in case you draw the right conclusions.

CHapters include:The Missing Years; The Censored Photographs; Media Hostile to Europe's Interests; Utopia Found and Lost; A Last Appeal to Reason; The Reich's Self-Sufficiency; The Reich on the Road; Hitler's True Democracy; Every Vote Counted; Life in the Reich; Hitler's Germany; David Lloyd George; Protection of Animals; Marriage and Children; An English Woman Reflects; No Reich Racism; A German Reflects; Plundering the Reich; Great Minds Think Alike; and a bibliography.

Softcover, 120 pages, a hundred photos and illustration, #960, **$18** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains, MD 20695. Call toll free 1-877-773-9077 to charge, Mon.-Thu. 8-4 ET. Order online at www.BarnesReview.com

ALL YOU NEED TO KNOW!

One comprehensive, hardback reference volume covering all the events known as the Holocaust. Oversized (8.5 x 11), case laminate, 579 entries, 256 B&W illustrations, 101 color pictures, fully indexed, bibliography, 634 pages . . .

HOLOCAUST ENCYCLOPEDIA

UNCENSORED AND UNCONSTRAINED

The Holocaust is a topic whose public discourse is tightly controlled by powerful groups. Only their side of the story is permitted. In fact, they insist there is no other side. They guard the West's last taboo and enforce swift punishment upon those who dare to ask any questions or unearth any evidence that leads to unwelcome answers.

Undaunted by this threat, and for the first time in history, a team of critical scholars has produced an encyclopedic compendium of cutting-edge information on this topic that pays no tribute to any power, respects no taboo, poses all the questions worth asking and gives answers exclusively based on real evidence. Its contents have not been censored by any legal authority.

The lead editor of *Holocaust Encyclopedia* made sure that all contributors to this project were truly independent, and will defend what they consider to be true and accurate, even when threatened with imprisonment due to censorship laws in many countries.

In this encyclopedia, you are not lectured in so many entries what we think the Holocaust was. Rather, you find the many pieces summarized and explained that comprise the larger picture: Scores of entries present the essence of the most-pertinent witness accounts. They are the mainstay on which the Holocaust narrative rests. All are subjected to painstaking source criticism, which is one of the most important tools of a real historian. This enables the reader to assess which witnesses are trustworthy, if any.

Holocaust Encyclopedia addresses all the major Holocaust crime scenes: Auschwitz, Belzec, Sobibór and Treblinka; Dachau, Bergen-Belsen, Buchenwald and Mauthausen; Babi Yar, Ponary, Janowska and Maly Trostinets, to name but a few. But their entries do not just summarize what today's narrative is. They explain how it was formed, how it has changed over time, what the reasons for these changes are, and which aspects of the narrative are credible and why.

Forensics are the most important tool to investigate any murder case. Therefore, *Holocaust Encyclopedia* contains lots of entries discussing the many tools said to have been employed to commit the mass murders and to erase the traces: execution chambers, gas vans, mass graves, crematoria and cremation pyres. It discusses toxicological issues surrounding the various lethal gases claimed to have been used: gasoline and diesel exhaust gases, carbon monoxide, Zyklon B/hydrogen cyanide, to name only the familiar ones. How did these tools work, if at all? What traces can we expect to find, if any? And, ultimately, which traces were actually found during forensic investigations undertaken since WWII's end.

Holocaust Encyclopedia also has multiple entries on certain more-or-less common claims about aspects of the Holocaust, including a list of "Who said it?" These cover topics such as "flames shooting out of chimneys," "fat extracted from burning corpses," "blood geysers erupting from mass graves," "soap and towels issued to gassing victims," to name but a few.

Finally, several entries address factors that have influenced the creation of the Holocaust narrative, and how we perceive it today. This includes, among others, entries on psychological warfare and propaganda during the war, on conditions prevailing during criminal investigations and trials of alleged Holocaust perpetrators, on censorship against historical dissidents, on the religious dimension of the Holocaust narrative and on motives of all sides involved in this debate that refuses to go away.

In this important volume with 579 short chapters, you will discover—for the very first time uncensored and unconstrained—the bare bones of this skeleton in the West's historical closet.

Be prepared to be mind-boggled and amazed!

Haunted Heritage

The European Roots of Halloween

In this exploration of the origins of Halloween, we embark on a journey to uncover the true essence of this Aryan holiday. In the darkness of October nights, beneath the glow of jack-o'-lanterns and the rustle of fallen leaves, a tale of ancient roots and modern transformation unfolds. Halloween, once a sacred event deeply rooted in ancient Celtic and Aryan customs, has undergone a dramatic evolution over the centuries. Today, as we don costumes and indulge in sugary treats, it's all too easy to overlook the intricate cultural history that forms the foundation of this celebration. In this book, we will also delve into the layers of commercialism, religious resistance, and political correctness that have veiled Halloween's true essence. From its origins as Samhain, a sacred holiday marking the end of the harvest season and the onset of winter, to its evolution into a night of revelry and mischief, Halloween's journey is intricate.

By unraveling the threads of ancient Celtic, Germanic and Slavic influences, we gain a deeper understanding of the complexity of beliefs and customs woven into the fabric of ancient fall festivals. Through this exploration of diverse cultural influences, we can truly appreciate the depth and richness of this haunting holiday.

Join us on a journey through the shadows of history and folklore as we uncover the hidden truths and sacred traditions at Halloween's heart. Götz von Berlichingen: A Teutonic Knight's Adventures

By Marc Roland

4 In 1943, the 17th SS-Panzergrenadier-Division "Götz von Berlichingen" was formed to fight on the Eastern Front. But who was this Götz von Berlichingen, also known as Götz of the Iron Hand? The life of this fascinating character, one of the last true knights of the Holy Roman Empire, contains numerous lessons for us today.

Montreal: Nerve Center of the Confederate Spy Network

By Rémi Tremblay

16 Canada is often thought of as a safe refuge for the Union during the War between the States. But, as one Canadian Revisionist tells us, the reality is quite different. In fact, there was widespread support for the Confederacy in Canada, and its covert spy agency was born in Montreal. From a major hotel in that city's center, Confederate spies operated quite overtly.

Suffragette Terrorism Wracks Pre-World War I England

By Thomas Redfern

24 One of the most effective whitewashing of "feminist" history has been the almost complete blackout of the terrorist nature of the early UK Suffragette movement. Portrayed by the establishment as women simply struggling to obtain the vote, the real face of the Suffragette movement was violent, murderous, and involved dozens of bombings and other acts of terror.

Dissecting the Myth of Rosa Louise Parks

Interview With Drue Lackey

36 Drue Lackey, a former chief of police of Montgomery, Alabama, is best remembered as the officer shown fingerprinting Rosa Parks in the iconic photo snapped after her arrest. In this interview—never before published in print—Lackey reveals the surprising truth about the infamous bus incident, and many other revelatory facts about Martin Luther King and the events of the "civil rights era."

A History of Palestine From Ancient Times Until Today

By Arthur Kemp

42 One of the most pernicious new lies of contemporary history is the assertion by the Zionist lobby that "Palestine never existed." The truth is, the nation of Palestine has existed in that name at least since the Roman-Jewish war of 2,000 years ago and was named after an ancient European enemy of the biblical Jews, the Philistines, whose genetics are surprising.

The Crusades as a Reaction to Muslim Aggression

By Paul T. Angel

50 The Muslim world (and many anti-European establishment historians) claim that the Crusades were European aggression against Muslims. Actually, it was Islam's violent and coercive expansion out of Saudi Arabia that saw all of the Christian Middle East overrun. It was in defense of these Christian nations that Europeans undertook the Crusades.

Holocaust Propaganda, Hamas & October 7

By Peter Winter

58 The events of October 7, 2023, have been used by the Zionist state as an excuse to engage in what is the most public genocide in history, directed against the Palestinians of Gaza. Claims that Hamas fighters committed a modern-day "Holocaust," decapitating babies, putting them into ovens, mass-raping women and mass-executing civilians were made and repeated by the controlled media. Sound familiar?

America: A $4.5 Trillion War Machine in Support of Israel

By James Van Deventer

67 Many readers recognize the power of the Jewish lobby and the stranglehold it maintains over U.S. policymakers. But even the most cynical observers will be shocked at the actual cost to the U.S. in blood and treasure in the 14 wars we've fought exclusively on behalf of Israel. Here TBR details the unending carnage.

PERSONAL FROM THE EDITOR

Unbridled Power of 'The Lobby'

Many people have become blasé about the ongoing conflict in the Middle East. Few even know the full extent of the Israeli genocide being perpetrated against the Palestinians, and many believe the lies told about the October 7 Hamas attack, which have been used to justify the wholesale destruction of Gaza and large parts of Lebanon and Syria. Worse still, many in the West also believe that the wars in the Middle East have little or nothing to do with the United States or Europe, and that the decades-long conflict is somehow endemic to its inhabitants, without any readily discernible cause.

A large portion of this issue of TBR will clear the air on the conflict in the Middle East and will map out the issues at stake.

At the core of it all is the power of the Jewish lobby, that elite group that dominates the political process of the United States and Europe. This lobby's control of the domestic and foreign politics of the West ensures that Israel is always favored, even when the Zionist state has committed, and continues to perpetrate, what is unquestionably the most public and blatant genocide of the late-20th century and now the 21st century.

This issue we provide an overview of how Palestine and the Palestinians came into existence; how the aggressive rise of Islam sparked the Crusades and led to the "conversion" of the entire Levant to the Muslim faith; the truth behind the events of October 7, 2023; and, finally, how the United States of America has been harnessed by "the Lobby" since the end of World War II to physically support and financially sustain the state of Israel. All of this has been done at the cost of thousands of American lives and over $4.5 trillion.

The 2,000-year-long existence of Palestine—a fact now denied by the Zionists in their attempt to totally obliterate the Palestinian people—is an important lesson in historical truth and Zionist deception. The name of Palestine is based in the existence of an ancient European enemy of the biblical-era Jews, the Philistines. In fact, the earliest use of the name Palestine to describe the region and its inhabitants dates from Roman times.

When the Roman Empire divided into two, the eastern Roman provinces—which included the entire Middle East—fell under the control of the Eastern Roman Empire, and Eastern Orthodox Christianity. It then held sway in the Middle East for nearly 400 years, right up until the rise of Islam. Invading Islamic armies, based out of present-day Saudi Arabia, swept through Christian Egypt, Palestine, Jordan, Iraq, Iran, and, finally, into Anatolia, threatening Constantinople itself.

In reaction to this invasion, Christian Europe sent armies to liberate the Christian lands. These counter-attacks became known as the Crusades, a term now often misused and misunderstood. Ultimately, the underfunded and undermanned Christian European counter-attacks were unsuccessful, and the entire Levant fell to Islam.

Subjected to various Islamic rulers, the Palestinians were not spared the Islamification process. Ultimately, the majority were converted to Islam (although a small minority remained Christian) and were temporarily submerged into what became known as the Ottoman Empire.

The development of Zionism as a political movement among European Jewry then revived (stole) the name Palestine as a homeland for the Jews. Starting shortly after the first Zionist Congress of 1897, international Jewry launched a concerted effort to colonize the region which they themselves called Palestine.

The collapse of the Ottoman Empire at the end of World War I led to British control of Palestine. The Zionist colonization of that region continued apace, and Jewish settlements grew rapidly in number.

This demographic shift inevitably led to the displacement of the Palestinian people, and this movement is the origin of almost all the wars and conflict in the Middle East. The creation of the state of Israel—something which would have been impossible without the support provided by European nations and the United States—has led to at least 14 distinct wars since 1948.

Each of these wars—fought exclusively in the interests of Israel—has been funded by Western nations, and the United States in particular, all thanks to pressure from the all-powerful Jewish/Zionist lobby.

The cost of these wars—not one of them fought in America's interests, and, indeed, often against American interests—has been enormous in both physical lives and tax dollars.

At the same time, the controlled media has deliberately withheld the true origins of the wars in the Middle East, each and every time shifting the blame to the Islamic world rather than naming the true aggressors in this tragic story.

The final article in our series recounts each of these 14 wars, and how U.S. involvement has shaped their outcome. The story of these wars is one of the most damning indictments of the Jewish lobby's control over the American political process. In truth, the United States will never be the "land of the free" until this alien stranglehold over domestic and foreign policy is broken.

While we do concentrate a large portion of this issue of TBR to the history of Palestine, we also offer you the inspirational and true tale of Götz von Berlichingen, whose adventures as a knight errant are truly astounding, as well as informative articles about the Confederate spy network in Canada plus an interview with the man who booked Rosa Parks, which has never before appeared in print. ❖

—Executive Editor Paul Angel

Have We Lost Christian Europe?

The dramatic fall of Bashar al-Assad in December 2024 came as no surprise to those who had been closely following events in the Middle East. The Syrian government had been on the brink of collapse at least twice in the preceding five years and only survived due to the intervention of ground forces from Hezbollah, the Iranian Revolutionary Guard, and Russia's air force.

This time, however, none of those forces were available: Hezbollah was engaged in fighting Israel in Lebanon, Russia remained preoccupied with Ukraine, and Iran, facing significant internal economic challenges and having suffered substantial losses due to U.S.-backed Israeli airstrikes, was in no position to save Assad once again.

A revived resistance, funded no doubt by Western intelligence services and supported by Assad's hostile northern neighbor, Turkey, seized the opportunity. An almost unopposed march through Syria, lasting less than two weeks, led to the government's collapse. Large celebrations erupted throughout Syria, highlighting the volatility of many Arab populations, who seem capable of switching their views of their leaders from adoration to hatred almost overnight.

Celebrations also broke out in Europe, where millions of Syrians had fled following the outbreak of war in their former country. Will they return now that Assad has fallen? Not likely, according to a report by Deutsche Welle, Germany's federal government-owned public broadcaster.

In interviews with dozens of former Muslim refugees now living in Germany, only one was even considering returning. The report concluded that "the majority of them want to stay where they are."

This is hardly surprising, given that they have been able to take advantage of the superior civilizational advantages that European lands offer. For the first time, they have had properly functioning infrastructure, staggering welfare handouts, and, perhaps most appealing of all, the chance to complete their ancestors' attempts to Islamify Europe.

The previous Islamic efforts to invade Europe were violent and militaristic—see for example the Moorish invasion of Iberia, and the Ottoman Turk invasion of Southeast Europe. In those days, Europeans had not been infected with the poison of secular liberalism and were able to rise to the challenge and defeat the invaders.

The new invasion has not taken place through military means, but rather with the immigration visa and a blatant abuse of the European refugee convention, originally set up to handle European refugees and displaced persons following World War II.

Today, the leftist brainwashing has, however, done its work, and Europeans welcome the new "refugee" invaders with open arms.

In addition, Western nations have deliberately destabilized many Middle Eastern nations—all as part of the overall program of protecting Israel's interests in the region. Today, you will find asylum-seekers from Palestine, Syria, Iraq, Libya, Afghanistan, and more. It is the perfect self-created storm.

The Islamification of Europe has thus proceeded rapidly. According to the latest statistics, there are already 2,600 mosques in Germany, 2,100 in France, 1,500 in Britain, 764 in Italy, 668 in Spain, 432 in the Netherlands, 330 in Belgium, and at least 50 in Sweden. In 1960, there were just four registered mosques in the United Kingdom.

The effects of this increase in the Muslim population are obvious: The protective concrete barriers erected around Christmas markets to prevent vehicle-borne suicide bomb attacks; the heavily armed "anti-terrorist" military police units omnipresent across the continent; the crowds of Muslims marching brazenly through European town centers chanting "Allahu Akbar"; the conversion of Christian churches into mosques as native Europeans are displaced from entire suburbs; and the integration of Islamic religious rituals into European legal systems and society.

This transformation is no accident. As Labour Party UK Prime Minister Keir Starmer—himself an advocate for Third World migration into Europe—remarked on November 28, 2024, the previous "Conservative" government had deliberately pursued a "one-nation experiment in open borders," causing immigration numbers to skyrocket. Starmer stated that this occurred "by design, not accident. Policies were deliberately reformed to liberalize immigration. Brexit was used for that purpose, to turn Britain into a one-nation experiment in open borders."

According to the official statistics cited by Starmer, in the year ending June 2024, at least 1.2 million people "came to live in the UK," of which 86% (1 million) were non-EU nationals. The invasion continues without pause. Have we lost Christian Europe? ❖

The Adventures of a Teutonic Knight

By Marc Roland

In these early 21st-century Dark Ages, when traditional White heroes are demonized, their monumental statues thrown to the ground with impunity and their greatness mocked in public schools, we need to recognize the historical figures who created and defended our civilization, if we mean to keep it by following their example.

A man among them little known to Americans but related to us by blood and worthy of emulation was Götz von Berlichingen, born on November 15, 1480, in Baden-Württemberg, southwestern Germany.

Adolf Hitler said of him on July 4, 1942:

> I think it is very astonishing that men like Ulrich von Hutten and Götz von Berlichingen should have been so far in advance of their times and so progressive in their ideas, and it is a great pity that they had behind them in their struggle no strong and concrete doctrine, which would have given them the necessary moral elan and perseverance. Their completely German outlook nevertheless entitles them to a high place in the esteem of the German people. I have for this reason suggested that battleships and other large warships at present under construction should be named after them.[1]

Portrait of Götz von Berlichingen, copper engraving, housed in the City Museum of Cologne.

As things turned out, no Kriegsmarine vessels were to be christened "*Götz von Berlichingen*," although the 17th SS-Panzergrenadier-Division was so named. Its October 1943 formation of German replacement units, together with Romanian, French, and Italian volunteers, reflected the increasingly pan-European character of the Waffen-SS.

Ulrich von Hutten (April 21, 1488–August 29, 1523) is still revered in Germany as a scholar, monk, poet, satirist, and leader of knights in the Holy Roman Empire. He was an important bridge between the Renaissance and the Reformation. Like von Berlichingen, von Hutten missed having a warship named in his honor, although the Infantry Division Ulrich von Hutten was formed on March 30, 1945, from students recruited in the Dresden area.

Why did Hitler think so highly of Götz von Berlichingen, and why should we care about a German celebrity who lived 500 years ago? He was, after all, almost an anachronism—an imperial knight during and after the last days of European chivalry when even the strongest armor was no longer impervious to gunshot. That he survived active military campaigns spanning nearly half a century, from

1498 to 1544, is remarkable, especially in those days of ferocious hand-to-hand combat with blades, maces, hammers, and pikes.

The Germany of his day did not exist as a sovereign nation. It was known as the Holy Roman Empire. By no stretch of the imagination "holy," and bearing no resemblance to anything "Roman," its more than 300 separate, feuding states collectively comprised the antithesis of an empire.

These petty kingdoms were constantly at war with one another over differences of religious opinion or the insatiable greed of princes struggling to free themselves from debts incurred by their extravagant lifestyles.

For a young prince with nine older brothers ahead of him, von Berlichingen's prospects of someday becoming the ruling member of his royal house looked bleak. His only acceptable alternatives were life in the monastery or the military.

Too restless for scholarship, he enlisted as a squire in the armies of Kaiser Maximilian I, rising through the ranks to fight as a soldier in campaigns in Burgundy, Lorraine, and the Brabant, all while still in his late teens. His reputation soon grew, as described by Rollo of Gaunt:

> He is fiercely loyal to his friends and kinsmen, giving his service freely and always being the first to volunteer, gracious in accepting the aid they gave him in return. His attitude toward death and danger is cavalier, leading him to dare where other men would not. He earns respect, even from his enemies, while those who fail to respect him often learn the hard way.[2]

He earned respect from his enemies by showing them compassion in their defeat. Von Berlichingen recalled a representative incident in his autobiography, when he saw an influential civilian abusing a young man:

> He held one of the peasants and started beating him horribly. I rode to him and asked him bluntly what his business was with this peasant and why he beat him so badly. He responded condescendingly, so, in response, I punched him accordingly. "If you dare to punch another prisoner, I shall not tolerate it." If he did so again, I said I shall break his neck.[3]

Third Reich performer Heinrich George's classic portrayal of the title character in Goethe's stage play *Götz von Berlichingen* was convincingly true to life.

Such even-handedness was rare in his barbarous epoch. Von Berlichingen was a daring and boisterous hero. "Wine rejoices the heart of man," he exclaimed, "and joy is the mother of all virtues."

His consistent justice, bravery, skill, natural leadership abilities, and fidelity were so well rewarded by Kaiser Frederick of Brandenburg, that von Berlichingen could afford to leave his service in 1500. He then formed a company of mercenaries, selling his services to various dukes, margraves, and barons. During a memorably fierce battle, his participation was decisive, as outlined in his autobiography:

> When the time felt right for them, the Nurembergians started marching toward us with their cannon, their wagon forts and their foot-soldiers together.[4]
>
> They truly were not unprepared, and appeared to have trained their cannon and wagon forts well. They were rested and we were tired.
>
> When both sides collided, we and our captains sent messengers to Markgraf Casimir, asking his grace to support us. It was urgently needed, and the enemy had the advantage, requiring our full attention.
>
> We held position in God's name, but all of the Markgraf's infantry fell back. … The shots of the enemy hit in such mass that we could barely see each other through the smoke. Enemy reinforcements were on the way and were so close that we were already skirmishing with them.
>
> Against these reinforcements we lost most of our cavalry, because we first thought that they were our allies, until their cannon opened fire and put many of our cohort to flight.
>
> We still lost many brave men. I considered myself dead at one point, because my horse was heavily injured.

Von Berlichingen continues:

> An instinct then arose in my heart, or was perhaps inspired by God. It compelled me to slay the horse from under the lead rider [driver] of the wagon fort. Thereby, I prevented the others from moving forward, compelling them to halt. I then, without any directives or orders from the captains, stopped the enemy from closing the gap between the wagons.
>
> The delay I caused against the enemy was a great advantage for us, and surely was not insignificant for our good fortune and victory. I, for one, do not know how this battle could have turned out any other way.[5]

His actions that day spread von Berlichingen's renown throughout Markgraf Casimir's army, even to the vanquished enemy.

Four years later, during the War of the Succession, von Berlichingen and his mercenary army fought for Albert IV, duke of Bavaria. During the siege of the city of Landshut, a cannonball struck the redoubtable knight's sword, forcing the blade to cut deeply into his arm. The blade bit deep at his elbow, and battlefield surgeons quickly amputated his lower arm. "Here is

Götz von Berlichingen (center left with arm raised) was an early leader of the Peasants' Revolt, a folkish uprising against aristocratic despotism and Jewish usury. Here he is shown with several of his peasant leaders in the Benedictine imperial abbey of the Holy Roman Empire, located at Amorbach, Bavaria. In 1525, von Berlichingen ordered the abbey buildings stormed and plundered.

how my injury occurred," he explained in his own words:

> When I was standing still and looking for an opportunity to strike, the Nurembergians suddenly turned their cannon against us, and with it shot my sword pommel in two, so that half of it cut into my arm and into the bracer, too.[6]
>
> The pommel was so deep in the bracer that one could not see it anymore. The other parts of the sword grip were not split into two, but I could not see them. I think those parts were the ones that cut my hand off, between the glove and the crossbow-gear [trigger].
>
> The arm was shattered from front to back. When I noticed that my hand hung limply by the skin and my spear dropped below my horse, I acted like nothing happened. I turned my horse around and got away from the enemy and back to my people without any trouble.
>
> I remained in Landshut and do not need to mention what great pains I felt during that time. I begged God to be merciful and take me up to him, because I was now a ruined warrior.[7]

Observes Slavic linguist and historical writer Aleksa Vuckovich:

> For an exceptionally skilled knight to lose a hand at just 24 years of age was nothing short of a disaster. Usually, such an injury meant a man's fighting days were over. But Götz didn't see it this way at all![8]

Von Berlichingen continues:

> I then remembered a knight who I had heard of. His name was Koechli. He had only one hand and could still do everything he needed to do against his enemies on the battlefield, like everyone else.[9]

Götz was outfitted with a crude, mostly worthless version of Koechli's original artificial arm replacement, hammered together by a local blacksmith. Only later did he receive a better arm, one implementing a complex design that used springs and allowed for the segmented movement of his fingers. Vuckovich tells us:

> [It was] a more elegant one made by expert German craftsmen. … The second hand was quite impressive, even by modern standards, and could be adjusted to hold reins, a lance, shield, or even something as small as a quill pen [or a crystal wine glass]. The iron hands still

exist and are kept on display at the castle museum in Jagsthausen" [the ancestral seat of his family].[10]

And that is how von Berlichingen won his place in medical history as the first prominent figure to wear a truly efficient metal prosthesis.

From then on, he became known as *Götz von Berlichingen mit der eisernen Hand*, the "knight with the iron hand."

With it, he went on to win greater glories. In 1516, he and his comrades mounted a raid into Hesse, capturing Philip II, count of Waldeck, in the process. A ransom of 8,400 gulden was paid for the safe return of the count. Outraged, Waldeck's lawyers at court decried von Berlichingen as an outlaw and allowed anyone to kill him freely and without repercussions.

He was forced to live on the run for some time, and only escaped his wanted status when called upon to help defend the town of Möckmühl, in the state of Baden-Württemberg, against an attack by the Swabian League. That venture ended in disaster when, through lack of supplies and ammunition, the town fell to the Swabians.

The original, custom-made, 66-lb. armor worn by Götz von Berlichingen is on display at the museum in Hornberg Castle.

In violation of the terms of surrender, he was held prisoner and handed over to the citizens of Heilbronn, a town he had raided several times. Luckily for him, several well-connected knights secured his release in 1522.

Three years later, a very different kind of war broke out in Germany: an armed insurrection of farmers, yeomen, crofters, smallholders, husbandmen, and all hard-working tillers of the soil.

The 1525 *Deutscher Bauernkrieg* ("German Peasants' War"), Europe's largest and most widespread popular

uprising at that time, was preceded by many generations of abuse.

Princes and aristocrats had gradually usurped common lands and made it illegal for peasants to fish or gather wood from these territories. Guild taxes were imposed, but no revenues collected were subject to formal administration.

Embezzlement and fraud became common, while the patrician class, bound by family ties, grew wealthier and more powerful at the expense of farm workers, who were heavily taxed and forced into the lowest stratum of society.

In the early 16th century, no peasant could freely hunt, fish, or gather wood. Lords had the right to use their peasants' land as they wished. Peasants could only watch as their crops were destroyed by wild game or by nobles galloping across their fields during chivalric hunts.

When a peasant wished to marry, he needed the lord's permission and had to pay a tax. Upon the peasant's death, the lord was entitled to his best cattle, garments, and tools. The justice system, controlled by the clergy or wealthy burgher and patrician jurists, offered no redress to the peasants.

Princes, themselves overtaxed by the Roman Catholic Church, further burdened their freer peasants by increasing taxes and forcing them into serfdom. Additionally, the introduction of Roman civil law advantaged the princes by bringing all land under their personal ownership. This eliminated the feudal concept of land as a trust between lord and peasant, which had conferred both rights and obligations on the latter.

By legitimizing their rule in this manner, princes not only elevated their wealth and position in the empire through the confiscation of property and revenues but also increased their power over their peasant subjects. Princes had the authority to levy taxes and borrow money as they deemed necessary.

The growing costs of administration and military upkeep compelled them to raise demands on their subjects, while their extravagant lifestyles drained the little income they had as prices continued to rise.

Knights like Götz von Berlichingen became embittered as their status and income declined, and they increasingly fell under the jurisdiction of princes, putting the two groups in constant conflict.

The knights also regarded the clergy as arrogant and superfluous, which, in many instances, they were. Many towns had privileges that exempted them from taxes, leaving the bulk of taxation to fall on the peasants. Arbitrary road, bridge, and gate tolls were instituted at will.

Although the overall focus of the rebellion was directed primarily against the oppressive policies of the nobility, and the harshness of aristocratic treatment of the peasantry provided the immediate cause for the uprising, Jewish moneylenders also played their part. They lavishly funded the deeply indebted princelings, extending cash outlays at high interest rates, thereby enslaving them in the same kind of usury perpetrated against the farmers, who were taxed to make their overseers' loan payments in a vicious cycle that benefited only the creditors.[11]

Generations of simmering resentment needed just one more incident of aristocratic arrogance to ignite the rebellion. It came during the 1524 harvest in Stühlingen, south of the Black Forest, when the Countess of Lupfen ordered serfs to collect snail shells for use as her thread spools.

After this humiliating demand, 1,200 peasants gathered in Stühlingen, bringing with them a list of grievances, which were predictably spurned with contempt by the princely authorities.

Within weeks, most of southwestern Germany was in open revolt.

The spontaneous uprising stretched from the Black Forest, along the Rhine River, to Lake Constance, into the Swabian highlands, along the upper Danube River, and into Bavaria and the Tyrol, reaching as far south as Switzerland and north to the Netherlands. One-third of a million peasants and their supporters from all classes

The intricately engineered prosthetic hand of Götz von Berlichingen was a remarkable innovation which revealed the advanced metalworking skills of late medieval Germany. Pictured above are two iron prosthetic hands preserved at Jagsthausen Castle. Below is an illustration of the second hand, designed with leather straps and articulated fingers, enabling Berlichingen to securely hold and grip weapons—and even delicate glass items.

Götz von Berlichingen was fortunate to escape the fate of most Peasants' Revolt leaders, like Little Jack Rohrbach, who was burned at the stake in Neckargartach, now part of Heilbronn in southwestern Germany.

belonged to the revolt.

It began as separate outbreaks in the southwestern regions of what is now Germany and Alsace, then spread in subsequent insurrections to central and eastern areas of Germany and present-day Austria.

The next year, on February 15, 25 villages belonging to the city of Memmingen rebelled. At Weinsberg, peasants overwhelmed the castle and massacred the landlords. Peasants at Odenwald had already taken the Cistercian Monastery at Schöntal. They marched to the town of Weinsberg, where the Count of Helfenstein, then the Austrian governor of Württemberg, was present.

The peasants achieved a major victory by assaulting and capturing the castle there, as most of the garrison was away on duty in Italy. After taking the count as their prisoner, the peasants forced him, along with approximately 70 other nobles, to run a gauntlet of pikes.

This was a popular form of execution among the Landsknechts (foot soldiers, each armed with a halberd, an axe blade topped by a spike mounted on a long shaft with a hook on the back for grappling), while a bagpiper played a merry tune. The revolt began to resemble less an ideological movement for freedom than a vengeful mob action. It was then that von Berlichingen was elected supreme commander of all peasant forces in the Odenwald region.

His appointment did not last long. After no more than a month, at the end of April, while marching his men to Amorbach, they were joined by some radical peasants out for Berlichingen's blood. He had been involved in the suppression of another uprising 10 years earlier, and these men sought vengeance.

Getting wind of their lethal intentions, he resigned and returned to his home at Castle Jagsthausen.

Even before learning of the assassination attempt, von Berlichingen had grown disenchanted with the insurrection—not its ideals, to be sure. Von Berlichingen was more insightful

Published in *Martyr's Mirror,* Jan Luyken's 1685 line drawing depicts an episode illustrating the degree of establishment vindictiveness following 1525's failed Peasants' Revolt: When participant Dirk Willems was running from a royal agent who fell through the ice of a frozen pond, Willems turned back to save the drowning man. This act of mercy led to Willems' capture, after which he was burned at the stake near Asperen in the present-day Netherlands.

than most in recognizing the peasant movement as an honest folkish reflex that had swelled up among the agricultural producers responsible for feeding an entire people—princes and priests, paupers and peasants alike.

If managed correctly, it could have become a genuine revolution capable of uniting Germany's hundreds of contentious states into a real nation, sweeping away divisive notions of class and theology.

But it was not managed correctly. While Landsknechts, trained soldiers, and knights like himself had joined and were largely responsible for leading the revolt to many victories, these professionals were given only local or, at most, regional authority.

The movement had no central command structure. Its war was waged by ad hoc committees of popularly elected commoners who knew little or nothing of military strategy and encouraged autonomy among their followers, even allowing separate armistices with the enemy. The revolt died from too much democracy.

Additionally, it lacked artillery and cavalry, while its foes were organized by experienced field officers, possessed well-equipped, disciplined armies, and enjoyed ample funding.

Disillusioned by the movement's failure, von Berlichingen did not have long to wait for its collapse in September 1525. Its defeat did not, however, end concerns for his life. One-third of the 300,000 insurrectionists were killed, not all in combat. Its leaders, like Little Jack Rohrbach, and many ordinary adherents, such as Dirk Willems, were burned at the stake.

Von Berlichingen then fell under suspicion and was summoned before the Diet of Speyer to account for his complicity in the uprising.

The cost of its downfall had been steep. The old order was restored in an even harsher form, with a further reduction of peasant rights and freedoms. Survivors were saddled with additional taxes to pay for the war.

Because so many rebels lost their lives, the economies of the affected regions were devastated for generations due to a lack of laborers. Famine ran rampant; everywhere, people starved to death, especially during winter.

Von Berlichingen refused legal representation in court, defending himself with such confidence in his personal

sense of honor and soldierly indifference to death, no matter how gruesome, that many judges were inclined to let him go with a hefty fine.

Others on the bench were more vengeful and called for his execution. When warned that the magistrates were legally strong enough to order his capital punishment for leading the so-called "enlightened" Peasants' Revolt, he condescendingly quipped, "There is always a strong shadow where there is much light."[12]

Thanks to his numerous personal connections at the highest levels of dynastic politics, he was acquitted by the Imperial Chamber on October 17, 1526. The frustrated Speyer judges then conspired with Augsburg officials, who invited him to their city, guaranteeing him safe passage and an opportunity to clear himself of additional charges.

Instead, upon his arrival, he was arrested and imprisoned in a dungeon for the next two years. Yet again, his influential friends prevailed against (i.e., bribed) the Augsburg authorities, who released him on probation under house arrest at his castle at Hornberg. But the sexagenarian veteran was not ready for retirement.

Suleiman the Magnificent had meanwhile mobilized his Ottoman Empire into a massive military juggernaut aimed at an unprepared Europe, still weakened and divided by the Peasants' Revolt.

Desperate for the unifying leadership only a living folk hero could provide, King Charles V freed the aging prisoner from confinement, placing Götz of the Iron Hand at the head of a largely German army.

This force slaughtered the hordes of Middle Eastern invaders on the battlefields of Hungary in 1542, thwarting their conquest of the continent.

Von Berlichingen then turned his victorious forces to face France, defeating King Francis I for betraying Europe by forging a Franco-Ottoman alliance with the Turks.

This was Iron Hand's final military campaign. At 63 years old, he retired to Castle Hornberg, where he lived the rest of his long, colorful life in peace, writing his autobiography before passing away on July 23, 1562.

Exactly 211 years later, Johann Wolfgang von Goethe published *Götz von Berlichingen*,[13] a stage play depicting the 16th-century knight as an anachronistic man of action caught in the last moments of medieval Europe on the cusp of Renaissance enlightenment.

Goethe portrays him as the racial liberator of a country that imprisoned him but, ultimately, a visionary who foresaw its future unity and greatness.

"Goethe's hero is a free spirit," observes Vuckovich. He was:

> [A] maverick, intended to be a pillar of national integrity against a deceitful and over-refined society, and the way in which he tragically succumbs to the abstract concepts of law and justice shows the submission of the individual in that society. *Götz von Berlichingen* was

one of Goethe's early successes. It served as a major inspiration throughout the following centuries, especially at a time when the German people needed strong folk heroes from their past.

And, even today, we can all learn plenty of major lessons from the life and deeds of Götz von Berlichingen. We can understand that bravery, honor, and perseverance almost always pay off, and that one has to stick to one's true cause. And he chose never to give up. Even after losing an arm.[14] ❖

Götz von Berlichingen Writing His Memoir is based on the fourth in a series of seven lithographs crafted between 1836–1843 by French artist Eugene Delacroix, who was inspired by Johann Wolfgang von Goethe's play (published in German in 1773 and in French in 1823) that told the story of German knight Götz von Berlichingen. Johann Ewald: Jäeger Commander

Johann Ewald began as a commoner in the Holy Roman Empire. As a soldier, he fought in all of the great conflicts of the latter 18th century, and he keenly recorded his observations of both the people he met and places he encountered. Ewald stood as one of the most accomplished practitioners of irregular warfare in his era. Beginning his military career in the Seven Years' War, and continuing through the American Revolution and the Napoleonic Wars, he amassed a vast wealth of experience leading troops in the art of *petite guerre*. He later wrote several works based on his experiences and one of these was read by Frederick the

The Man in the Iron Mask: The True Story of Europe's Most Famous Prisoner

It is easy to forget that this story, made famous by Alexandre Dumas, is that of a real person, Eustache Dauger, who spent more than 30 years in the prison system of Louis XIV's France—never to be freed. This narrative brings to life the true story of this mysterious man and follows his journey through four prisons and across decades of time. It introduces the reader to those with whom he shared his imprisonment and those who decided his tragic fate—and why they saw him as such a threat. Wilkinson reveals one of the most enduring mysteries of Louis XIV's reign and, using contemporary documents, this book shows what life was really like for state prisoners in 17th-century France, why this mysterious man was arrested, and more! Instead he was considered a hero in England and given a knighthood, and eventually made governor of Jamaica. Chapters cover the Saracen conquest, the ancestry of the Cid, his legendary accomplishment, the reign of Don Sancho, the banishment of the Cid, his exile, the conquests of the Saracen princes, conquests in Andalusia, the unification of Spanish forces, the revolution at Valencia, the Cid's victory, the last battle, his death. The Crusaders: The War for the Holy Sepulchre

By Alfred J. Church. The Crusades were not "bald Christian aggressions against the Muslims." Here is a wonderful retelling of the stories of the First, Third, and Eighth Crusades, narrated by a fictional "wandering Jew" (cursed to live until the Second Coming of Christ). The author explains how the Islamic military conquest of huge areas of the Byzantine empire sparked off the call to crusade, and then weaves together the story of some of the most famous characters and events of the Crusades. From the dizzying successes of the First Crusade to the recapture of Jerusalem by the Muslims, the reader will meet Richard Lionheart, Duke Godfrey, Saladin, King Louis of France and others. The reader also discovers the full tragedy of the ill-fated "Children's Crusade," and more. Softcover, 175 pages, #746, **$20**.

MONTREAL

Nerve Center of the Confederate Spy Network in North America

By Rémi Tremblay

It is a common myth of the War Between the States, also known as the U.S. Civil War (1861–1865), that the inhabitants of what was then British North America (now Canada) were, for the most part, supporters of the Union side in that titanic struggle.

Most mainstream histories focus on the fact that large numbers of British North Americans enlisted in the Union Army. It is well known, for example, that four Union generals were born in British North America, and that 29 British North Americans received the Congressional Medal of Honor for their service on the Union side of the war.

Yet it is a little-known fact that significant numbers of British North Americans supported the Confederates. One of the more revealing works on this topic is the 2017 book *Montreal, City of Secrets: Confederate Operations in Montreal During the American Civil War* by Barry Sheehy (Baraka Books, Quebec).

According to Sheehy, British North America did not wholeheartedly support Washington during the war. In fact, the reality was quite the opposite. The primary reason so many Canadians joined the Northern Army was not ideological alignment but the allure of bounties ranging from $200 to $800 offered by American agents.

JACOB THOMPSON **CLEMENT C. CLAY** **EDWIN GRAY LEE**

Recruited and trained Southern intelligence gatherers in Canada.

These recruiters, who always operated illegally, were condemned by both the church and the state. The *Encyclopedia Canada* notes that "some were tricked, bribed, and even kidnapped by ruthless American recruiters, called crimpers."[1]

British North America's neutral stance during the war was not driven by moral or ideological considerations but by pragmatism. A united and powerful United States posed a direct threat to British North America, especially since some Northerners had openly expressed the idea of annexing Canada.

Despite their official neutrality, British North America and Great Britain were sympathetic to the South and hoped for its victory. Newspapers such as the *Montreal Gazette* and the *Montreal Telegraph* openly supported the Confederate States of America.

The Southern cause was widely popular, with the "Secesh"[2] being highly appreciated in Montreal, Quebec, and Halifax, Nova Scotia. British North Americans sympathized with the South not because they supported slavery, but because they saw in it a small state challenging a distant power that did not protect its interests.

A RING IN CANADA'S METROPOLIS

With 100,000 inhabitants, Montreal was by far the largest city in British

North America at the time. It was also the center of economic and industrial activity, and its port was among the most heavily trafficked.

It was in Montreal that the Confederates sought to establish their presence in British North America, leveraging the sympathy of the authorities and the local population.

At the beginning of the war, Montreal already welcomed several Southerners and Northerners known for their sympathy for secession who had preferred to flee rather than face persecution.

At that time, the Confederate community in Montreal, including active Confederates, families in exile, and other Southerners, numbered about 300 to 500 people. The city was therefore already full of Confederate supporters when Southern Secretary of State Judah Benjamin decided to organize a spy ring.

It should be remembered that the Confederates had no secret service of their own before the war and, thus, had to build one from scratch. As a result, their network was composed of doctors, businessmen, sailors, and soldiers, all of whom had to learn the secrets of the trade from three men in particular:

• Inspector General of the Confederate States Army Jacob Thompson, who had been U.S. secretary of the Interior before the war. In 1864, Confederate President Jefferson Davis asked Thompson to lead a delegation to British North America, formally appointing him head of the Confederate Secret Service;

• Clement Claiborne Clay, a former U.S. senator and, after the outbreak of hostilities, a Confederate senator for Alabama. He served in the Confederate War Department, specifically tasked with setting up a spy ring in the North. He accompanied Thompson on his mission to British North America in May 1864; and

• Edwin Gray Lee, a Confederate brigadier general and first cousin once removed of Robert E. Lee. Edwin Lee and his wife broke through the blockade to British North America in December 1864 and remained in Montreal until 1866.

In Montreal, the Confederates set up informal headquarters at the St. Lawrence Hall Hotel and at Dooley's bar. Their presence was known and tolerated, in contrast to Unionists, who sometimes had difficulty renting lodgings while visiting the city.

The Confederates brought with them sufficient funds to carry out their activities. The well-connected Benjamin ensured they lacked nothing, moving $1 million into various banks in Montreal.

Banks such as the Ontario Bank and the Niagara and District Bank willingly received and safeguarded the huge sums deposited by Confederate agents. These resources enabled the Confederates to organize a large network of spies which was in regular contact with other agents in Halifax and New York City.

In addition to the group in Montreal, another network was established with a base in Richmond, St. Catharines, Ontario. Their headquarters was, ironically, geographically close to a community formed by Black slaves who had escaped and established their own settlement there.

To communicate with the South, the Confederate agents used a variety of stratagems. They had a network of

messengers that included young women and professionals such as Benjamin Ficklin and W.W. Finney, two of the founders of the overland express mail service, the Pony Express.

Based in Montreal during the second half of the war, the Confederate agents used their skills and networks for the cause of the South. They were able to purchase the *Lee*, which became one of the most efficient vessels in circumventing the embargo, and they participated in the failed attempt to free Confederate prisoners in Ohio in 1863.

The list of messengers also included two mysterious women, often conflated into one by historians: Josephine Brown and Sarah Slater. These two beautiful Southern belles, fluent in French, were driven by a sense of duty and adventure.

Being a spy or a messenger for the Confederate Secret Service was dangerous. Several were intercepted; some were executed as traitors, while others were imprisoned in POW camps until the end of the war.

A MULTI-TASK AGENCY

The work undertaken by the Confederate agents varied from day to day. Some were tasked with organizing trade and finding ways to overcome the blockade, mainly through deals with local and British businessmen.

Another branch, led by James Holcombe, was responsible for sending freed Confederate soldiers back to the South, essentially creating an Underground Railroad operating in the opposite direction of the one used by escaped slaves.

Clement Clay was involved in planning raids to free prisoners jailed in the North. Two raids, both unsuccessful, were planned from Canada against the Johnson Island POW camp in Ohio—the first led by John Wilkinson and the second by Robert Martin. There were also plans for arson attacks on New York hotels.

Rebel Secret Service agents were also tasked with diplomatic duties. British officers who wanted to visit the South were first sent to Montreal to receive the necessary paperwork.

The agents involved themselves with the internal politics of the North, as well. Although never implemented, they studied plans to undermine the American dollar to destabilize the Northern economy.

Politics was another major concern, and the Confederates played both Democratic and Republican sides. Jacob Thompson was in charge of influencing the anti-Lincoln Republicans, the Copperheads, and the Democratic Convention to promote peace and diminish Lincoln's influence.

Rebel spy, messenger.

In doing so, he developed a network of Northern politicians who served his motives. They spent millions trying to influence the Democratic Convention to pass a resolution for a negotiated peace or truce while simultaneously attempting to organize anti-Lincoln forces within the Republican Party.

The Confederates favored the election of a president who would support a peace agreement, with the leading candidate in this regard being Gov. Horatio Seymour of New York.

By 1864, opposition to Lincoln was growing. In Montreal, countless conspiracies and alliances were formed to oust the despised president. Plans were even made to kidnap Lincoln, who was considered the main reason for the continuation of the war.

It is significant that Lincoln's eventual assassin, John Wilkes Booth, was among the frequent guests at St. Lawrence Hall in Montreal.

The work of the Confederate Secret Service with Northern politicians also explains the presence in Montreal of Democrat Copperheads and Radical Republicans such as James Wilson, John Bingham, John Sherman, and James Ashley, to name only a few.

According to Sheehy's work, other Northern figures such as banker Jay Cooke, Thomas T. Eckert, New York Mayor Fernando Wood, and publisher Benjamin Wood were also connected to the network to some degree, with the latter two actively on the Confederate payroll.

THE BIGGEST DEAL OF THE WAR

The blockade against the South, enacted on April 19, 1861, had a significant impact on the economies of both sides of the conflict.

The first consequence was a sharp increase in the price of cotton. The South had abundant cotton but was unable to sell it. In the North, the dollar was collapsing, and American exports had fallen to an all-time low. The price of cotton had increased by nearly 1000%—10 times—while, in the South, the price of necessities had also risen dramatically.

For President Lincoln, resuming cotton exports was essential to stabilizing the dollar and preventing further economic collapse. For President Davis, it was a matter of survival: the South desperately needed meat and other vital goods.

The largest cotton transaction of the Civil War, valued at half a billion dollars, was organized in Montreal with the assent of both Washington and Richmond. This deal, negotiated by former U.S. diplomat, Confederate soldier, and secret agent Nathaniel Beverley Tucker, allowed Northern industrialists to obtain permits from Lincoln to participate in the transaction.

Many of Lincoln's friends and associates were among the main beneficiaries, raising ethical questions about the process. Close associates such as Ward Lamon, Leonard Swett, and James Singleton were among those authorized to deal with the Confederates. Records from the St. Lawrence Hall archives for 1864 confirm their presence in the city.

This "cotton permit" system was highly susceptible to cronyism and abuse. Congress later declared that

This Civil War Memorial in Savannah, Georgia, along with the statues "Silence" and "Judgment" in the cemeteries of Laurel Grove and Thomasville, was crafted in Montreal by artist Robert Reid at the Montreal Marble Works.

"it is believed to have led to the prolongation of the war, and to have cost the country thousands of lives and millions of dollars in treasure."[3]

The deal was finalized toward the end of the war. By the spring of 1865, the wealth of many Northern interests depended on Richmond's ability to resist. If Richmond could hold out, the deal would proceed. However, the Southern capital was overwhelmed, and the cotton was not fully delivered by the end of the war. Consequently, it is difficult to determine what happened to the money and the cotton during such a chaotic period in history.

In addition to this exceptional transaction, several wealthy Northern businessmen visited Montreal and St. Lawrence Hall during the war. Notable visitors included William Fargo (Wells Fargo and American Express), James Brown (Brown Brothers), John D. Rockefeller, Charles Barney (Smith Barney Financial Group), Jay Gould, James Fisk, Louis Kuhn (Kuhn, Loeb & Co.), Russell Sage, and others.

These men presumably visited to make deals with Southerners. Many of them were central to the creation of Wall Street and the military-industrial complex during 1864–1865.

After the war, no longer having access to Confederate funds, several Southerners chose to remain in Canada, fearing repression in the United States. Initially, they settled in St. Catharines and later moved to Niagara-on-the-Lake.

When Confederate President Davis was detained at the end of the war, his wife Varina was initially imprisoned with him. In the summer of 1865, however, Varina was released and immediately fled to Montreal, where she had already sent their four children for safety.

Supported by the Catholic community, the children were educated and grew up free from Union reprisal. When Davis himself was freed on bail, he also moved to Montreal, pledging to return for trial if charges were brought against him.

Davis relied on the support of John Lovell, a Montreal publisher and printer who was openly pro-Confederate and had collaborated with the Confederate spy ring in the city.

While in Montreal, Davis remained reclusive but visited the community in Niagara-on-the-Lake, where he met with the exiled Confederates under the leadership of former Confederate diplomat James Mason.

There is an interesting anecdote from this period. During a theatrical performance in Montreal, the orchestra spontaneously played "Dixie" in Davis's honor after he was recognized in the crowd.

In 1867, the Davis family moved to Lennoxville, Quebec, where their two sons were studying, before eventually departing for Europe. They returned to Mississippi after a general amnesty was announced. ❖

Rebs Abscond With $200,000: The Raid on St. Albans, Vermont

By Rémi Tremblay

Known as the northernmost battle of the Civil War, the raid on St. Albans, Vermont was led by Bennett Young, a Kentucky cavalier who, like most of his men, had participated in John Hunt Morgan's famous raid in Ohio.

The primary objective was to force the Union to deploy some of their forces to the North, thus dividing the war effort. It was also an act of revenge for the actions of Northern troops, who were increasingly targeting civilian populations by burning and looting Southern cities.

On October 18, Young's men crept into St. Albans on market day. The following day, at 3 p.m., they raided the bank, stealing $200,000. After rounding up the population in the main square, they set fire to several homes, giving the Northerners a taste of the medicine that had been inflicted on Southern cities. Less than an hour after the raid began, the men fled toward Montreal and crossed the British North American border.

The St. Albans raiders outside the jail in Montreal.

American troops, however, intercepted them near Frelighsburg and Philipsburg. British soldiers then intervened, reminding the Americans they had no jurisdiction in Canada. Nonetheless, the raiders were arrested by the British.

St. Albans bank tellers being forced to pledge allegiance to the South.

During the first trial held in Montreal, the raiders enjoyed significant public sympathy. This possibly influenced the trial's outcome, as they were acquitted on the grounds that they were soldiers acting under orders from their commanders.

They were, however, subjected to a second trial in Toronto, where the public was less sympathetic. Once again, the legal case was made—and accepted—that they had conducted an act of war in a foreign land and therefore had not broken any British North American law. After this verdict, the Canadian government enacted a law banning the planning of acts of war on British North American soil.❖

Twelve Years in Hell: Victorian Southerners Expose the Myth of Reconstruction

By Lochlainn Seabrook. Southerners viewed Reconstruction as a Yankee Communist revolution. This revolution was a war planned far in advance to destroy the South. The architect of Reconstruction, Abraham Lincoln, privately planned to subjugate and then totally Northernize the South. After Lincoln's assassination, Reconstruction was taken over by Socialists and Communists, all radical members of the then-left-wing Republican Party. As part of Reconstruction, the North repeatedly violated the Constitution, committed robbery, destruction, and seizure of private property, rape, and murder. Simultaneously, legally elected Southern officials were thrown out of office and replaced by "progressives." To maintain control, Grant's radical government weaponized the police, the courts, and the military. Many of the social, racial, and economic problems plaguing the U.S. today began during Reconstruction. Now, the left is using the same 1870s-era tactics. Softcover, 520 pages, #1022, **$35**.

I, Confederate: Why Dixie Seceded and Fought in the Words of Southern Soldiers

Did the Southern Cause die on April 9, 1865, with Lee's surrender? No, the Southern Cause is flourishing today! How can this be if the North won the war? What was and is the Southern Cause? And why were millions of people of all races willing to fight for it? You'll find the answers to these questions, as well as discussions on related topics (the Constitution, nullification, sectionalism, slavery etc.) in Lochlainn Seabrook's *I, Confederate*. Seabrook provides excerpts from the writings, speeches, letters, and poems of 200 Southerners (mostly former C.S.A. soldiers), who describe, in their own words, the reasons they took up arms against their Northern cousins. Seabrook also includes writings from Southern and Northern civilians and Union veterans who also supported the campaign that Southerners referred to as "the bedrock of the Southern Confederacy." Illustrated with rare Confederate photos, preface, introduction, notes, index, and bibliography. Softcover, 376 pages, #1023, **$27**.

The Hampton Roads Conference: The Southern View

The most important meeting of the Civil War took place in Virginia in February 1865. Yet it receives barely a mention in most history books. Known as the Hampton Roads Conference, in attendance were Confederates Alexander Stephens, John Campbell, and Robert M.T. Hunter. On the other side were Lincoln and Seward. The meeting opened with "kind-hearted Lincoln" offering generous promises to the "erring South," including $400 million in compensation for slaves—if the seceded states would return to the Union. The Confederates, however, viewed the meeting as a negotiation between "two countries," demanding the North recognize their independence. Lincoln refused and demanded complete surrender. Four hours later, the meeting adjourned. Lochlainn Seabrook includes 32 analyses that set the record straight on the myths about this meeting. Softcover, 294 pages, #1024, **$25**.

Dixieland Deceived: The Grand Conspiracy Behind the Civil War

The brotherly bloodbath of 1861-1865 wasn't really, in its true essence, a "civil war" as much as it was an attack launched upon the United States from an invisible foreign power with traitorous agents and sincere dupes operating in both the North and South. It was "the usual suspects" based in Rothschild's Europe and aligned with the plantation aristocracy based in the South. It was this elite who finally executed America's greatest disaster. And it was the determined leadership of President Abraham Lincoln that thwarted the elaborate scheme of this deadly cabal in the end. By "Correctionist historian" and investigative journalist Mike King. Softcover, 8.5 x 11, 300 pages, #1026, **$45**.

Exploding the Official Myths of the Lincoln Assassination

Like many major historical events, Lincoln's assassination had an official public story and a secretive back story. Author James Perloff dismantles the official story told for 160 years in this new book made possible by the digitization of handwritten 19th-century documents and previous under-reported research. Among the questions answered: Why was Lincoln assigned a disreputable bodyguard who deserted his post before the assassination, yet was never punished?; Why was Booth sure he needed only a one-shot derringer to kill the president?; Why were the only actual assassination attempts against the men who opposed the brutal Reconstruction of the South?; How was the Ford's Theatre Presidential Box modified before the event?; Why

did D.C. telegraph wires shut down after the assassination?; Why did Stanton take charge of the investigation instead of the attorney general?; Why was Booth's escape road the only road left unpatrolled?; What did Booth tell Southerners his real reason was for leaving a card at VP Andrew Johnson's residence on the day of the assassination?; Why was Booth's diary never entered as evidence at trial, kept secret for two years and, when finally exposed, why were 86 pages missing?; and many more. The Honorable Cause: A Free South—Twelve Southern Essays

The Honorable Cause: A Free South is a collection of 12 essays written by pro-Southern and pro-secession activists. It places into context what it means to be "Southern" and why Southern identity is so important. It explores secession and how to achieve political and social liberation for the South. This book is intended to inspire emotion and thought. The authors want the reader to internalize the content and see a free and independent Dixie as the most honorable outcome for a unique people. *The Honorable Cause: A Free South* answers questions on Southern terms and in a Southern way. Finally, it details how the South can achieve status as a nation-state, with a right of self-determination. Softcover, 301 pages, #988, **$25**.

The Sequel to Appomattox: A Chronicle of the Reunion of the States

By Walter Lynwood Fleming (1919). When the armies of the Union and of the Confederacy were disbanded in 1865, there were still many problems that pressed for resolution. The surviving Confederate soldiers came straggling back to their devastated homes. Everywhere they saw widows and orphans. They found property destroyed, the labor system disorganized, and the inhabitants suffering from want. They found the White people demoralized and the Blacks free, bewildered and disorderly. Organized government had lapsed with the surrender of the Confederate armies. Beneath a disorganized society lay a devastated land. The accumulated capital of the South had disappeared in worthless Confederate stocks, bonds and currency. The banks had failed. Two billion dollars invested in slaves was wiped out. Factories had been destroyed by Federal raiders or seized, sold or dismantled because they had furnished supplies to the Confederacy. Mining industries were paralyzed. It was months before courthouses, state capitols, and school buildings were again made available for normal use. How could all of this devastation be undone? Reprint. Softcover, 322 pages, #989, **$21**.

Ousting the Carpetbaggers from South Carolina

By Henry Tazewell Thompson (1926). South Carolina has been stigmatized as "the nest wherein was hatched the snake of Secession," and it was the purpose of Reconstruction to mete out retribution upon her people and to ensure victory for the most radical wing of the Republican Party. Thus, at the point of the bayonet, a condition developed without parallel in history: The best and noblest citizens of the state were subjugated to a position of inferiority to their former slaves. This book is a history of the political revolution of 1876 in which South Carolinians, led by Gen. Wade Hampton and his Redshirts, united to throw off the oppressive yoke of "Carpetbagger" government and halt unquenchable Black revenge. Reprint. Softcover, 182 pages, #990, **$21**.

The Impending Crisis of the South: How to Meet It

By Hinton Rowan Helper. One of the most influential anti-slavery books in pre-Civil War America, this book was written by a Southerner who understood the relationship between race, civilization, culture, political power and demographics. By assembling official statistics from slave-owning and non-slave-owning states, the author proved conclusively that the presence of Black African slaves was not, as the South's leaders claimed, vital for their economy but, in fact, exactly the opposite. Helper showed that by all measures—economic, social, political, agricultural yield per square mile, education, literacy, infrastructure and many other indicators—the use of Black slaves by the South was an impediment upon economic growth that had severely retarded the entire development of all the Southern slave states. The book conclusively proves that slavery—and the presence of large numbers of Africans in the South—was a significant barrier to the economic advancement of Whites. The book also reveals that the officially endorsed abolitionist movement had two goals—the emancipation of African slaves—and their immediate deportation back to Africa or somewhere else where they would be permanently isolated from White America. Softcover, 294 pages, #1021, **$30**.

Authentic History: Ku Klux Klan, 1865–1877

The only officially authorized history of the original Ku Klux Klan, written by the daughter of the founder of the KKK in Alabama, Susan Lawrence Davis. Many fascinating truths including: The KKK was financed from England by the Jewish former Secretary of State for the Confederacy, Benjamin P. Judah; The KKK's chief chaplain was a Roman Catholic; The KKK's chief justice was North America's 33rd Degree Masonic leader; The hood was in fact outlawed by the original organization because so many people were using its disguise to commit crimes in the name of the KKK; The original KKK's primary activity was political in nature and focused on restoring White rule to the Southern states; When official KKK posses were formed, they were under strict orders not to dispense mob justice or engage in whippings, lynchings or other abuses; When rogue elements and non-KKK members performed atrocities in the KKK's name, the leadership ordered the organization to disband, citing abuse of its name as the reason for its closure. This work also reveals the mindset that lay behind the slave-owning era: a false belief that the Blacks were "content" and "loyal" under White rule—and that only a few Southerners supported the view of Lincoln. He believed, namely, that the Black presence posed a long-term demographic threat. Softcover, 229 pages, #1020, **$25**.

The Long-Buried History of British Feminist Terror

History books have cleansed the violent nature of the movement

Two of the most prominent Suffragette terrorists were Dame Christabel Harriette Pankhurst (left) and her mother Emmeline, who was the founder of the Women's Social and Political Union (WSPU).

By Thomas Redfern

Aficionados of real history are well aware that Court Historians often push uncomfortable truths into what we today call the Memory Hole. That term was originally coined by George Orwell in his prescient book *1984*. In Orwell's dystopian future, inconvenient facts that contradicted the established narrative of the state—facts the state wanted completely forgotten—were placed into a slot and disappeared forever in a deep, dark hole, never to be seen or read again.

In this way, people the state wanted branded as villains could be vilified without contest, and those the state wanted remembered as heroes or heroines could be foisted onto the public without the facts needed to examine their true nature. A classic example of this is the "Votes for Women" campaign of early 20th-century Britain, which sought to secure voting rights for women.

The struggle of the Suffragists or Suffragettes, as they were called, is often portrayed in history books, schools, and media as consisting merely of harmless street protests, hunger strikes, or selfless acts of sacrifice, such as throwing oneself under a horse to draw attention to the plight of disenfranchised women. At worst, feminist activists are depicted smashing a few windows or verbally confronting

The remains of the Kew Gardens Teahouse following a Suffragette arson attack in February 1913.

politicians. The truth, however, is that the Suffragettes waged a full-scale terrorist campaign, allegedly backed by radical leftist elements in Britain.

In 1903, Emmeline Pankhurst founded the Women's Social and Political Union (WSPU), an all-women suffrage advocacy organization dedicated to "deeds, not words." Initial acts such as heckling politicians quickly escalated into vandalism and physical assaults on opponents and police officers. Many of the predominantly middle-class women activists received repeated prison sentences. Once behind bars, many staged hunger strikes to secure better conditions and were often force-fed.

WSPU supporters soon became more aggressive, raiding Parliament, physically attacking politicians, and smashing windows at government buildings. Late in 1909, a Suffragette assaulted future Prime Minister Winston Churchill with a dog whip on the platform of a Bristol railway station.

The following year, the violence became more organized, sustained, and extreme. Christabel Pankhurst, the daughter of WSPU leader Emmeline Pankhurst, began advocating and organizing what she described as a "reign of terror." Emmeline confirmed that the campaign's objective was "to make England and every department of English life insecure and unsafe."

In June and July 1912, five major incidents signaled the escalation of the terror campaign: the homes of three anti-suffrage cabinet ministers were attacked; a powerful bomb was planted in the office of Home Secretary Reginald McKenna; and the Theatre Royal in Dublin, Ireland, was set on fire and bombed during a performance —with an audience in attendance.

What had been direct action against supposedly legitimate targets now evolved into cowardly and indiscriminate terrorism, endangering the lives of ordinary citizens.

One of the most dangerous attacks carried out by the Suffragettes was the assault on the Theatre Royal. Mary Leigh, Gladys Evans, Lizzie Baker, and Mabel Capper attempted to set fire to the building during a packed lunchtime matinee attended by Prime Minister Herbert Henry "H.H." Asquith. A canister of gunpowder was placed near the stage, and petrol and burning matches were thrown into the projection booth, where highly combustible film reels were stored, a fact of which the perpetrators were well aware.

Earlier in the day, Mary Leigh had

hurled a hatchet at Prime Minister Asquith, narrowly missing him and slashing the ear of Irish Member of Parliament John Redmond.

On October 25, 1912, a rare male collaborator, Hugh Franklin, set fire to his train carriage as it pulled into Harrow Station. He was arrested and charged with endangering the safety of passengers. Then, on November 28, mailboxes (known in England as pillar boxes for their cylindrical shape) were booby-trapped across Great Britain, initiating an 18-month sabotage campaign. Dangerous chemicals were poured into some of the boxes. In London, many letters caught fire while in transit to post offices. Paraffin and lit matches were also placed in pillar boxes.

On December 17, railway signals at Potters Bar were tied together and disabled by Suffragettes, intending to cause trains to collide.

The potential for deadly disaster was now undeniable, but the feminist terrorists were only beginning. In a speech in January 1913, Suffragette leader Emmeline Pankhurst declared "guerrilla warfare."

Her followers responded with greater ingenuity and ruthlessness. The Suffragettes hold the dubious distinction of inventing the letter bomb, a device intended to kill or injure its recipient.[1]

On January 29, several letter bombs were sent to Chancellor of the Exchequer David Lloyd George and Prime Minister Asquith. Fortunately for them, the bombs all exploded in post offices, post boxes, or mailbags while in transit on the railway system.

In the following weeks, additional attacks involving letter bombs and booby-trapped mailboxes occurred in cities including Coventry, London, Edinburgh, Northampton, and York. On February 6, five innocent postmen were injured—four severely—when a Suffragette letter bomb containing phosphorus and addressed to Asquith exploded in Dundee as investigators examined it.

On February 19, Emily Davison planted two bombs at the home of Lloyd George. Only one detonated, but the building was seriously damaged. While no one was injured, the bomb exploded just before workmen arrived at the house. The crude timer—a candle—made it highly likely the bomb could have exploded while the men were present.[2]

Emmeline Pankhurst was arrested for planning the attack and sentenced to three years in prison.

Between February and March, railway signal wires were deliberately cut on lines across the country, endangering thousands of train passengers. Inspired by the Irish Fenian Brotherhood dynamite campaign of the 1880s, Suffragettes adopted more sophisticated explosives to target symbolic locations, including the Bank of England and St. Paul's Cathedral.[3]

Sporting events were also targeted. A failed attempt was made to burn down the grounds of the All-England Lawn Tennis Club at Wimbledon. A plot to burn the grandstand of Crystal Palace Football Ground on the eve of the 1913 Football Association Challenge Cup Final was foiled.

The grandstand of the Manor Ground Football Stadium in Plumstead, home to South London club Arsenal, was successfully burned to the ground. This forced Arsenal to move to a new stadium in Highbury, north London. Suffragettes also attempted to burn the grandstands at the stadiums of Preston North End and Blackburn Rovers football clubs. Golf clubs and courses were targeted, as well.

Anti-suffrage politicians were deemed "legitimate targets," and attacks on empty sporting venues were intended to make a statement without directly harming innocent lives. However, the campaign rapidly escalated into unrestrained and indiscriminate terrorism.

On April 4, the day after Emmeline Pankhurst was imprisoned for her role in the bombing of Lloyd George's home, a Suffragette bomb was discovered outside the Bank of England. It was defused before it could detonate in one of the busiest public streets in London.

Trains and their passengers remained targets. A bomb exploded next

This period illustration, titled *Sane and Insane Sisters*, depicts "Dame London" welcoming a "sane" Suffragette. The caption reads: "You are welcome, my dear, and I admire you for your constitutional methods, which are so very different to those of your misguided sister, whom I cannot tolerate at all," referring to the Suffragette in the background preparing to throw a bomb and commit an act of arson.

Prominent Suffragist terrorists at the time included (left to right): Mary Leigh, Emily Davison, Mable Capper and one of the few men to support their efforts, Hugh Franklin, described as a "wealthy Anglo-Jew."

to a passing train in Manchester, nearly killing the driver when flying debris grazed his head. Bombs were also planted on the Waterloo-to-Kingston line, with one placed on an eastbound train and the other on a westbound train.

One of the bombs was discovered before it exploded in a previously crowded third-class carriage. The choice of a third-class carriage highlighted the indiscriminate nature of these attacks, as it would have primarily harmed working-class men and women, many of them poor.

As the Waterloo train pulled into Kingston, its third-class carriage exploded and caught fire. The rest of the carriages were full of passengers at the time, but they managed to escape without serious injury. Although they proved faulty, the bombs were designed to cause maximum civilian casualties, being packed with lumps of jagged metal, bullets and scraps of lead.[4]

The London Underground was also targeted. A nitroglycerin bomb was planted at the Piccadilly Circus tube station.

Despite the serious risk of it exploding while being transported, highly unstable nitroglycerin was used for a number of Suffragette bombs.

A simpler arson device was used in April 1913 to burn down the home of Member of Parliament Arthur Du Cros. In May, a powerful potassium nitrate bomb was discovered at St Paul's Cathedral at the start of services.

Not long after, the danger from indiscriminate attacks was further highlighted when three more postmen, this time in London, were injured by noxious chemicals that had been poured into pillar boxes.

A month later, a potentially deadly letter bomb was sent to magistrate Sir Henry Curtis-Bennett at Bow Street, but the bomb was intercepted by London postal workers. Two days later, Suffragettes again attempted to push Curtis-Bennett off a cliff in the seaside resort of Margate, but he escaped.

On May 10, a bomb packed with iron shrapnel was discovered in the waiting room at Liverpool Street Station, London, before it could explode. Four days later, another three Suffragette bombs were discovered in a crowded passenger train as it pulled into Kingston. Once again, the would-be killers had planted their bombs in a third-class carriage.

Some later feminists have suggested that the low rate of success of Suffragette bombs was due to them being used primarily to get publicity rather than to kill and maim. The fact that the three Kingston bombs, like many others, were made of nitroglycerin exposes this claim as balderdash. Nitroglycerin is so unstable—particularly when made in amateur laboratories—that it could have detonated at any time, killing and maiming untold numbers of innocent people.[5]

Another completely indiscriminate railway attack involved a Suffragette bomb thrown from an express train onto the Reading Station platform. It exploded immediately, and it was only by good fortune that no one was killed or injured.

In May 1913 alone, 52 Suffragette bombing and arson attacks were carried out across the nation.

The most common targets for Suffragette attacks during the campaign were houses or residential properties, whether owned by politicians or simply by affluent members of the public.

These attacks were justified by the WSPU on the grounds that the property owners were invariably male and therefore had the right to vote. The Suffragettes argued that these men were responsible for government actions as its electors. They ignored the fact that working-class men who did not own property were also denied the vote. In the end, dozens of homes were bombed or firebombed, with some families targeted simply because they were related to senior politicians.

The Mill House near Liphook, Hampshire, was burned because its owner was Theodore McKenna, the brother of Reginald McKenna. A bomb was detonated at a house in Moor Hall Green, Birmingham, because it was owned by Arthur Chamberlain,

the brother of Conservative politician Joseph Chamberlain.

In early June 1913, a series of fires started in rural areas near Bradford killed at least two men and several horses. Responsibility for these deaths was claimed in the movement's official newspaper, *The Suffragette*.

Also in mid-1913, a Suffragette bomb was discovered at the South Eastern District Post Office in London. It contained enough nitroglycerin to destroy the entire building and kill the 200 people working there.

Working-class people narrowly escaped disaster when a large Suffragette bomb exploded but failed to breach the Stratford-Upon-Avon Canal in Yardley Wood, Birmingham. Since there was no lock for 11 miles, a breach would have unleashed a deadly torrent of water into the densely populated valley below.[6]

On July 19, letter boxes across Birmingham were filled with poisonous chemicals, seriously burning a postman. On the same day, Edith Rigby planted a pipe bomb at the Liverpool Cotton Exchange Building, which exploded in the public hall. After her arrest, Rigby stated that she planted the bomb because she wanted "to show how easy it was to get explosives and put them in public places."

A portion of *The Toilette of Venus*, otherwise known as the *The Rokeby Venus*, painted by Diego Velasquez circa 1647–1651, was slashed by Suffragette Mary Richardson in March 1914. She allegedly hated "the way men visitors gaped at it all day long."

A Suffragette being force-fed in Holloway Prison, circa 1911.

An even more extreme act was carried out on August 8, when a school in Sutton-in-Ashfield was bombed and burned down in protest of a visit to the town by Lloyd George. On December 18, Suffragettes bombed a wall at Holloway Prison to protest the imprisonment of one of their members in the London prison. Many nearby houses were damaged or had their windows blown out, showering some sleeping children with glass.

Inevitably, such levels of violence produced fatalities. A fire started at Portsmouth Dockyard killed two men on December 20, 1913, as it spread through the workshops. The fire grew so large that the battle cruiser HMS *Queen Mary* had to be towed to safety to avoid the flames. Two days before Christmas, several postal workers in Nottingham were severely burned after Suffragette letter bombs exploded while they were moving mailbags.

Arson and bombing attacks continued into 1914. One of the first attacks of the year took place on January 7. In a mode of attack later copied by the Irish Republican Army (IRA), a dynamite bomb was thrown over the wall of the Harewood Army Barracks in Leeds, which was being used for police training at the time. One man was seriously injured. On February 4, an arson attack on Aberuchill Castle in Scotland nearly caused fatalities, but the servants inside narrowly escaped.

Many churches were also targeted, as the feminists believed that the Church of England was a leading opponent of women's suffrage. In the two-year campaign leading up to World War I, 32 churches were bombed or set on fire. Among the most iconic targets was Rosslyn Chapel in Scotland, long associated with the Knights Templar and Henry Sinclair.

On May 8, 1913, a potassium nitrate bomb was found at St. Paul's Cathedral at the start of a sermon. It likely would have destroyed the historic bishop's throne and other parts of the cathedral

had it detonated.

On April 5, 1914, St. Martin-in-the-Fields Church in Trafalgar Square, London, was bombed, blowing out the stained glass windows and showering passersby with broken glass. A bomb was also discovered in the Metropolitan Tabernacle Church in London. Then, in June, a bomb exploded at Westminster Abbey, damaging the historic Coronation Chair, created in 1301 to hold the famed Stone of Scone. The bomb, packed with nuts and bolts to act as shrapnel, narrowly missed a group of sightseers.

Two days after the Westminster Abbey bombing, a second Suffragette bomb was discovered before it could explode in St. Paul's Cathedral.

On July 12, Annie Kenney attempted a second bombing of the Church of St. John the Evangelist in Smith Square, Westminster. The bomb had been callously planted beneath a pew during a sermon. Fortunately, it was spotted by a member of the congregation, and Kenney, who was being trailed by Special Branch detectives, was arrested as she left the church.

May 1914 saw widespread public outrage after Suffragettes targeted a hospital in Dundee, burning it to the ground. Two prison medical officers were also publicly assaulted by Suffragettes with horse whips.

Shortly thereafter, a Suffragette letter bomb set fire to a moving train in Salwick, Lancashire. The train's guard heroically threw the burning sacks off the train to prevent further damage, but he was badly burned in the process.

Another attempt to flood a populated area occurred on May 7, when a bomb was placed near the Penistone Reservoir in Upper Windleden, South Yorkshire. If successful, the attack would have released 138 million gallons of water into the populated valley below, potentially drowning large numbers of residents. Fortunately, the bomb failed to cause the anticipated breach.[7]

The feminist terror campaign was halted by the outbreak of war in August 1914. The conflict finally brought the

In May 1913, St. Catherine's Church in Hatcham, London, situated on Telegraph Hill, was set ablaze in an arson attack by terrorist feminist Suffragettes supposedly protesting for the right to vote. The church, a prominent local landmark, suffered significant damage to its structure, with the attackers leaving behind leaflets promoting the suffrage cause. The attack was part of a broader campaign of militant actions orchestrated by the Women's Social and Political Union (WSPU), led by Emmeline Pankhurst. Suffragettes also targeted other high-profile historic locations including Westminster Abbey and the Hurst Park racecourse. These and other violent acts revealed that the Suffragettes must have had access to, and contacts with, Communist and anarchist revolutionaries of the time, as they are the only groups that could have supplied the explosive materials and bomb expertise to the women.

fanatics to their senses, and Emmeline Pankhurst and other leaders ordered their followers to cease all attacks and join the war effort. This mirrored the position adopted by a large majority of Irish independence campaigners and the Ulster Protestants, who had prepared to defy the Westminster elite to resist Home Rule. However, neither side in the Irish conflict before the war had used violence and terror on anything approaching the scale employed by the Suffragettes.

Their bomb and arson attacks alone caused approximately $877,000 in damages (equivalent to $90 million in 2024). According to historian C.J. Bearman, the campaign cost the British economy between £1 and £2 million from 1913 to 1914 (approximately £130–£240 million today). There were an average of 21 bombing and arson attacks per month in 1913, and 15 per month in 1914. Bearman identified 337 recorded arson and bombing attacks during this period but stated that the true number could well have been over 500.

The atrocities included the first terrorist bomb to explode in Northern Ireland in the 20th century. The bombing of Lisburn Cathedral in August 1914 was not carried out by the IRA but by Suffragettes.

The Suffragette campaign was not merely outrageous in its own right but also provided inspiration for later terrorist campaigns by several iterations of the IRA.[8] As noted earlier, the Suffragettes invented the letter bomb. The IRA's so-called S-Plan of 1939 to 1940 copied the Suffragettes' multiple incendiary attacks on pillar boxes.

The combination of high-explosive bombs, anti-personnel shrapnel, incendiary devices, and letter bombs used by the Suffragettes also influenced the IRA campaigns of the 1970s and 1980s. Even the targeting of shops with incendiaries as part of an economic warfare strategy originated not with Irish Republican tacticians but with the Pankhursts' organized terror campaign.

By the end of the Suffragette reign of terror, more than 1,300 people had

been arrested and imprisoned for violence across the United Kingdom. The two known deaths, serious injuries, near-misses, and massive damage to public and private property turned the Suffragettes into hated figures in the eyes of millions of Britons.

Today's rose-tinted accounts of the Suffragettes often downplay or completely omit their 1912–1914 terror campaign. For example, a brief history on the BBC website mentions arson and bomb attacks but minimizes their severity by listing only "Church of England buildings" as targets. This phrasing implies attacks on administrative offices rather than cathedrals and cherished churches, reflecting modern efforts to whitewash the campaign.

These accounts also frequently portray attacks on Suffragette meetings by angry mobs as irrational male fury at women demanding the vote. In reality, such incidents were often spontaneous reactions to recent Suffragette bombing outrages. For instance, the notorious 1913 attack on a WSPU rally in Hyde Park, London, was driven by public anger following the bombing of Lloyd George's home in February 1913. The meeting turned into a riot, as members of the public shouted "incendiaries" and "shopbreakers" while throwing clods of earth and manhandling Suffragettes.

Attacks on private homes often provoked understandably furious responses. In May 1913 in Doncaster, arson attacks on several homes led to a mob of 1,000 locals attacking a WSPU rally. After the burning of Bristol University's Sports Pavilion on October 23, 1913, undergraduates retaliated by raiding the WSPU office in the city.

After rowdy Suffragettes were ejected from a political meeting in Doncaster in 1913, the house of the man who expelled them was burned down. This provoked an angry mob of at least 1,000 to attack a WSPU meeting.[9]

Time and again, what is now presented in feminist propaganda as thuggish male chauvinist aggression was, in fact, retaliation for Suffragette terror attacks. Opposition was not to middle-class women obtaining the vote (while making no comparable demand for disenfranchised working-class men) but to the Suffragettes' use of deadly and indiscriminate terror attacks that have now so conveniently been pushed down the Memory Hole.

The feminists of the time were unashamed in describing their campaign. The WSPU referred to their bombing and arson attacks as terrorism, with Suffragettes declaring themselves "terrorists" in 1913.[10]

Christabel Pankhurst repeatedly used the term "terrorism" to describe the WSPU's actions, while Emmeline Pankhurst stated that they committed violent acts to "terrorize the British public." The WSPU also reported its attacks in *The Suffragette* under the headline "Reign of Terror."

Why, then, has this largely been forgotten? Because the feminist movement and its liberal allies decided it should be. In the 1930s, as the Suffragette Fellowship compiled the history of their recently successful struggle

In March 1913, Saunderton Station in Buckinghamshire was destroyed in a terrorist arson attack by Suffragettes. The blaze caused significant damage, disrupting local rail services. The attack took place during the early hours and, although no-one was arrested for it, these sorts of attacks by militant Suffragettes were common at the time, and many openly boasted about carrying out these deeds.

for the vote, they ruthlessly censored the records. As they curated the sources later used by historians, they deliberately omitted references to bombings. This was partly to protect former Suffragettes from prosecution and partly to distance the movement from its violent past and reshape the cultural memory of the Suffragette campaign.[11]

Many official records of Suffragette violence were ordered to be sealed for decades and are only now beginning to be released from the archives. On top of this, there is the natural bias of the liberal-left, which not only favors its feminist allies but also dominates academia and the legacy media.

That the sustained terrorism of the Suffragettes is now largely forgotten is testament to the power of the Memory Hole tactics of the feminists, Court Historians, media and educational system. It is also a reminder of the importance of efforts to preserve and popularize real history. ❖

Fate of a "Brutal Lunatic Woman"

On June 4, 1913, Suffragette Emily Davison stepped onto the track at the Epsom Derby and was fatally injured after attempting to pull down the reins of King George V's horse, Anmer. The incident was witnessed by thousands, including the royal family. Davison, a member of the Women's Social and Political Union, was carrying a number of political banners, obviously intending to display them at some stage, possibly after her arrest. She never had the chance, as she suffered severe injuries and died four days later. Anmer fell but recovered, while jockey Herbert "Bertie" Jones sustained a concussion but was able to ride again in several weeks. Jones bore Davison no ill will, attending her funeral, though he could very well have been killed by the actions of the "brutal lunatic woman,"as Queen Alexandra referred to Davison.

Japan's War of Self-Defense

The True Story of World War II in Asia

In East Asia, the 100-year prelude to the momentous events of the 1930s and 1940s was as intriguing as the conspiratorial machinations taking place in Europe and the United States during the 19th century. After World War II finally erupted, the good people of Japan would endure immense suffering, death and destruction. But was the U.S.-UK-China war against Japan really a justifiable effort? Was Japan really the only one to blame for the events that ensued?

The big lie of World War II—referred to as "The Greater East Asia War" by Imperial Japan—has left a nasty "dirt stain" upon the good name of this ancient nation with such an impressive cultural past. The inimitable Mike King's epic, irrefutable and very readable *Japan's War of Self-Defense* sets the record straight in a manner that state-approved Court Historians may not wish to entertain, but is true nonetheless.

Japan's role in WWII is NOT usually given unbiased and factual attention. Happily, there's an increasing awareness that the "sneak attack" of December 7, 1941 was deliberately provoked by the FDR administration. Now comes a very informative and entertaining book that turns the established version of the Pacific War on its head. It's an excellent adjunct to Mike King's *The Bad War*, also available from TBR.

Softcover, 8.25 x 11 format, 159 pages, #1035, large print, many illustrations. **$25** minus 10% for TBR subscribers plus $5 S&H inside the U.S. from TBR, P.O. Box 550, White Plains,, MD 20695. Here's what one online reviewer had to say about *Japan's War of Self-Defense*:

"An excellent, well-written book loaded with verifiable information (facts and evidence) from credible sources regarding the use of relentless warmongering propaganda in order to satisfy the goals of certain government elites and collaborators to force U.S. entry into WWII. This caused massive destruction to Japan and the death of millions of Japanese men, women, and children—not only soldiers but civilians as well. The death toll was in the millions.

"The use of information suppression, misinformation, disinformation—the propaganda tools of criminals and the untrustworthy, domestic and foreign—had occurred for decades and even generations against the people of Japan.

"This is how the United States was led into ongoing foreign wars and conflicts on foreign soil from 1914 to the present—for more than 100 years.

"The tragic outcomes of these wars, as cited in the book, could have been avoided if the righteous and just were in charge and making the decisions to pursue peace and prosperity for all, instead of war and destruction.

March of the Titans

Three of the planned five volumes of the newly expanded, full-color Prometheus Edition of *March of the Titans* are now in stock. Here they are:

Volume I
The Rise of Europe

From the Earliest Times to the Fall of the Roman Empire

The expanded text—with every chapter having been fully rewritten and updated, and with many new chapters added as additional archaeological discoveries and facts have emerged—has now been divided into four separate volumes, each addressing a specific era.

Volume I begins with three brand new chapters that reveal: 1) How modern science has conclusively proven that race is determined by genetics alone; 2) How race influences the rise and fall of civilizations; and 3) The precise archeogenetic origins of the White race.

Utilizing the most recent archeological evidence, Volume I offers a comprehensive overview of prehistory, including the Upper Paleolithic and Neolithic Ages. It then examines the Old European civilizations in Europe, presenting new archeogenetic and archeological evidence that elucidates their racial origins and notable achievements.

The subsequent section reviews the Indo-European Invasions of Europe and the Middle East/Far East, accompanied by new genetic evidence that traces the migrations of these peoples from their homeland above the Black Sea to the farthest corners of Europe—and even to present-day China.

Following this, the edition thoroughly examines the fate of the Indo-Europeans in the Middle East, presenting irrefutable DNA evidence and detailing how this affects the current racial composition of that region.

Ancient Egypt is then explored, starting with groundbreaking archeogenetic findings that show the founders of ancient Egypt were a White population. This civilization later declined after becoming genetically diverse due to a significant influx of Semitic and African peoples. The full-color illustrations in this detailed chapter highlight the racial transition in Egyptian society.

The narrative then shifts to Classical Greece. Leveraging the latest archeogenetic evidence, this section reveals the racial origins of the prominent Grecian civilization, the Mycenaeans. Furthermore, it explains how the Classical Grecian civilization emerged and eventually declined due to racial fatigue from constant warfare and the substantial importation of racially alien slaves.

Next, the period of King Philip's Macedonian dominance over Greece and the entire Middle East by his son Alexander the Great is detailed. This expanded section reinforces the multiracial composition of Alexander's empire and elaborates on its fragmentation into rival factions following his passing.

The subsequent sections cover the Roman Republic era, the Roman Empire, its bifurcation into Eastern and Western domains, and the collapse of both segments in various new and augmented chapters. Additional chapters discuss Roman civilization and culture; the transitions led by Julius Caesar and Octavian Augustus from the Roman Republic to the Roman Empire; and a pivotal new chapter on Rome and the onset of Christianity. There are also considerable enhancements to the chapters on Rome's interactions with the Celts, Germans, and the Middle East—with the later ringing the racial death-knell for the Empire.

The narrative then moves to the first significant non-White invasion of Europe, detailed in a revised chapter on the Hun invasions and their atrocities in Europe, which occurred a few decades prior to the Western Roman Empire's fall.

In addition, the archeogenetic and archeological evidence shows that, just before the Western Roman Empire's collapse, a staggering 80% of Rome's inhabitants were of Middle Eastern racial origin.

To conclude, an enlarged section on the Byzantine Empire narrates its history until its fall in 1453. A remarkable addition to this section is an archeogenetic study that unveils the Byzantine Empire's racial composition, which mirrored the racial demographic shift in Rome during the Western Empire's final days to that of a minority white population.

Hardback, high-quality stock, 308 pages, full color throughout, 581 color illustrations and maps, #1015, $56.

Volume II—Part 1
The European Nations States From Iceland to Germany

Volume II, Part 1, of the Prometheus Edition of *March of the Titans: The Complete History of the White Race* starts with the religious and cultural development of Europe following the fall of the Roman Empire.

First, it examines the origin of Christianity and the exact method of that religion's violent and coercive spread into Europe from the Middle East. It then reviews the effect of Christianity on European society and culture, particularly how it plunged Europe into a nearly 1,000-year-long Dark Age, during which all the classical advances in science, philosophy, and culture were violently suppressed.

Next, the twin events of the Renaissance and the Reformation are studied. The Renaissance, or "rebirth" of Classical pre-Christian rationality, science, and learning, led directly to the Reformation. This major split in Christianity between Catholicism and Protestantism sparked a series of major Christian wars, which resulted in the extermination of untold numbers of Europeans—and at least half of all Germany—causing an incalculable loss in European numbers and setting the continent back once again by hundreds of years.

This volume then continues by outlining two Great Race Wars waged against Europe by nonwhite invaders after the fall of Rome: the combined Bulgar, Avar, Khazar, and Magyar invasions; and the Islamic Moorish invasion of Iberia and parts of France. These sections provide the first genetic evidence of where exactly these racial groups originated, who they were, and how largely incorrect confusion over the identity of the Khazars and Magyars became prevalent.

Next, this volume provides a country-by-country racial history of Iceland; Ireland, Wales; Scotland; England; the United Kingdom; Portugal; Spain; France; Belgium; Luxembourg; the Netherlands; Norway; Sweden; Finland; Denmark; and Germany. Each nation has its own distinct chapter which shows how its population was shaped by its individual racial history. To underline this narrative, each country chapter ends with a fully referenced DNA survey of that nation. In addition, this volume contains expanded and separate chapters on the Vikings and their worldwide adventures and explorations, and the story and legacy of Napoleon Bonaparte.

Most importantly, revealed in this work is the one true cause of the rise and fall of the world's greatest empires—that all civilizations rise and fall according to their racial homogeneity and nothing else–a nation can survive wars, defeats, natural catastrophes, but not racial dissolution.

Hardback, 8.5 x 11, high-quality stock, 380 pages, full color throughout, #1025, $56.

Volume II—Part 2
The European Nations States Switzerland to Russia

The main themes of this volume are the racial, social, and political consequences of two major non-White invasions of Europe: the Mongol invasion of Eastern Europe, and the Ottoman Turk invasion of southeastern Europe. The Mongol invasion created the Khanate of the Golden Horde in the region now known as Ukraine and southern Russia. This racially alien state waged almost constant warfare on the formative European peoples to the north, resulting in a centuries-long conflict that stifled the political, economic, and social development of all of Russia. This, in turn, ultimately created the social conditions that led directly to the Bolshevist Revolution and its dreadful consequences.

The nearly 1,000-year-long invasion and war by the mixed-race Ottoman Islamic empire created havoc in the Balkans, racially, socially and politically. It resulted in the complete Islamification of three separate nations in the region, the creation of a significant mixed-racial element, and extensive political instability, which ultimately led to the outbreak of the First World War.

The Ottoman's destructive march into the heart of Europe was only finally stopped in 1683 at the gates of Vienna by a European force made up of several nations—one of the few times in European history that white peoples had actually unified in the face of a common threat to their existence.

This volume then provides a country-by-country racial history of Switzerland, Post-Roman Italy, Poland, Czechia, Slovakia, Austria, Hungary, Slovenia, Croatia, Bosnia and Herzegovina, Serbia, Kosovo, Montenegro, North Macedonia, Albania, Romania, Moldova, Bulgaria, Post-Classical Greece, Malta, Lithuania, Latvia, Estonia, Belarus, Ukraine, and Russia.

Each nation has its own distinct chapter which shows how its population was shaped by its individual racial history. To underline this narrative, each country chapter ends with a fully referenced DNA survey of that nation.

In addition, this volume contains six expanded and separate chapters on Russia, broken up into the five distinct historical periods of that nation and its expansion into the Far East and Central Asia. The true cause of the Soviet Union's breakup—the inability of a multiracial state to have long-term sustainability—is also revealed, along with the fact that the present-day Russian Federation is headed inexorably down that same path.

Finally, this volume provides a complete overview of the course and impact of the Crusades—a European reaction to the Muslim invasions of the Middle East and North Africa, and a chapter dealing with the historical quirks that created the four microstates of Europe (Andorra, Liechtenstein, San Marino, and the Vatican).

Most importantly, revealed in this work is the one true cause of the rise and fall of the world's greatest empires—that all civilizations rise and fall according to their racial homogeneity and nothing else–a nation can survive wars, defeats, natural catastrophes, but not racial dissolution.

Dissecting the Myth of Rosa Louise Parks

Secretary of local Montgomery NAACP callously refused to give up her seat to a crippled old man

What follows is a transcript of a radio interview conducted by TBR Contributing Editorial Board member James Edwards with Drue Lackey before Lackey's death in 2016 at the age of 90. Lackey served as the chief of police of Montgomery, Alabama, and is featured in the iconic photograph fingerprinting Rosa Parks after her arrest. His book, *Another View of the Civil Rights Movement*, recounts his time as a police officer in Montgomery in the 1950s and 1960s, and his personal interactions with Parks, Martin Luther King, and others. The broadcast originally aired on the *Political Cesspool* radio program. This historically significant interview has never before appeared in print.

James Edwards: The civil rights movement was hardly the saintly march and holy crusade that has been portrayed by the schoolbooks and by the media over the years. In brief, what is your view? What was the impression that you had back in the 1960s when the South was being put through the civil rights movement?

Lackey: Well, my view was that this so-called civil rights movement, headed by Martin Luther King, was really a farce. He was using the civil rights issue to raise money and further his personal cause to have parties and do his womanizing throughout the country. And, in my opinion, he was more interested in tearing America down than he was in the plight of his own people.

Edwards: When Rosa Parks was arrested for violating the segregation laws in Alabama, she was participating in an orchestrated event staged by her handlers. She refused to give up her seat on the bus, but we don't really know anything about the man for whom she refused to move. Who was this man and why was he asking for that seat in particular?

Lackey: He was an elderly man and very feeble, and he couldn't stand too well and really needed to sit down.

Edwards: So, she wasn't being bullied by somebody trying to provoke her into civil disobedience. This was a legitimate reason for her to give up her seat to an old man who was obviously at least semi-disabled.

Lackey: That's correct.

Edwards: Before Rosa Parks's arrest, had any city like Montgomery or Birmingham had problems with Blacks violating the segregation codes like that, or did this just suddenly come out of nowhere? Because, after her arrest, this seemed to just take fire and, suddenly, it's a big civil rights issue?

Lackey: Well, to my knowledge we didn't have any problems. Prior to Rosa Parks's arrest, we had two other women who were arrested for the same violation. One was arrested in March of 1955, and then the other one was in October, and then Rosa in December.

Of course, we all know that she was hand-picked. She was the secretary of the NAACP [National Association for the Advancement of Colored People] here in Montgomery. She had lunch with her attorney Fred Grey the day that she was arrested, and she attended the Communist school in Tennessee, where Martin Luther King attended, and Ralph Abernathy and others. So, it was a hand-picked deal from the word go.

Edwards: And, of course, other events came out of that. The picture that's on your book, the famous picture, was not taken after her arrest for taking the seat on the bus but was actually taken after she participated in the Montgomery bus boycott. What was she doing to get arrested during that boycott?

Lackey: She was one of the people

Above, Rosa Parks gets fingerprinted by officer Drue Lackey in Montgomery, Alabama, on February 22, 1956, when she and others were arrested for disorderly conduct after raucous protests that encouraged bus boycotting. On December 1, 1955, Parks had refused to surrender her seat to an enfeebled old White man who could barely stand. Callously, Parks refused to move to another seat so the crippled man could sit. Her initial arrest then triggered the bus boycott. Parks was no random passenger, but the secretary of the local chapter of the NAACP. She and others had tried multiple times to have some unsuspecting rider challenge them for a seat so that they might be arrested and trigger mass civil unrest.

indicted for violating the boycott law and interfering with public transportation. The deputy sheriff of Montgomery County called me and asked me if I would be willing to help him the next day, because they had these 90 people coming in, and I agreed to go up and help him. And that's where and when they took that picture.

Edwards: It always seemed interesting to me that King and some of the other civil rights activists always seemed to be one phone call away from the White House. It seemed like they had access to the highest offices of power when they needed it. And yet, in the South, we were struggling against riots and violence caused by these people. What is your opinion on that? Why do you think they had such ready access to John Kennedy, Lyndon Johnson, and Bobby Kennedy?

Lackey: Well, in my opinion, they were helping back this movement. And you're correct, they had a direct line to RFK, Johnson, and JFK. During the Freedom Rider episode that happened in Montgomery, I picked up [reporter] John Seigenthaler out of the street and took him to the hospital about two blocks away, possibly saving his life. And he immediately called Bobby Kennedy at Hyannisport and he had a list in his pocket of all the Freedom Riders that were on that bus. So, RFK and others in the administration were behind it, helped sponsor it, and saw that it was followed up.

Edwards: It is fascinating that the call he makes from the emergency room of a hospital was to Bobby Kennedy. I want to ask you about some of the media propaganda at the time. I always thought it was so incredible that the so-called civil rights activists

were presented as peaceful demonstrators. According to the network news footage of the time, these peaceful Black activists would come into town, and the mean-spirited police officers would unleash the hounds and the water hoses for no good reason.

Is that the way it was, or was the truth of the matter a little bit different than what people have seen on television?

Lackey: Well, it was a lot different than what you saw on television. I mean, the civil rights movement attracted every kind of criminal that you can think of—revolutionaries and every thug that you could come in contact with. And they would curse the police, spit on the police, and do everything they could to try to incite a riot.

And see, King used what I called a big lie technique. He'd go around saying he was preaching non-violence, but violence followed him everywhere he went. You never heard of King ever chastising any of those rioters and looters. It happened all over this country and I can't find anywhere in the Constitution that gives people the right to burn, loot, and do the things they did and be protected under the so-called civil rights banner.

Edwards: Did you and the Montgomery Police Department feel as though there was a very real threat that these so-called activists would burn down the city? Do you think that was their intention and would they have gotten away with it if you had not acted accordingly?

Lackey: That was their intention. To come in and burn the town down. I believe if we hadn't taken the action that we did, this would have happened. But we took an oath to protect the lives and property of this city, and to use force if necessary. And it was unfortunate that we killed a couple of arsonists who were teenagers. But we had no way of knowing their age. One of them was 16, one was 17.

After that happened, we got a lot of calls that they were going to come in by the busload and burn the town down. Of course, I let them know that we were going to use whatever force necessary to protect our city. And they could leave like those other two, in a box.

Edwards: Tell us a little bit more about the Freedom Riders. What do you recall about their behavior while they were under your jurisdiction, or on your watch?

Lackey: They were very belligerent, and it was apparent that they were looking to have some kind of conflict with the police or with other people. Their mannerisms and their speech and everything indicated they wanted to stir up a conflict. This was one of King's tactics. I think he trained his people to have these conflicts with the police and then, when it was all over, he would blame us for causing the riots.

> Rosa Parks's actions were not random but an attempt to foment mass civil unrest in Alabama.

Edwards: Then he would charge police brutality when you put the riot down, or brought order back to the city?

Lackey: Yeah, that was his favorite—"police brutality." And, if you go back to Fidel Castro, he started using the same technique when the Communists were taking over Cuba. And, of course, Martin Luther King was knee-deep in with the Communist Party. They came to Montgomery. We knew who they were when they came in, and we usually would put a tail on them, to follow them.

We did have some luck with the Black leadership talking to them about getting these people out of Montgomery. They weren't really there to help them, you know.

Edwards: I noticed in your book you wrote about not only the arrest of troublemakers in the civil rights movement but also other troublemakers who were opposing the civil rights movement. This doesn't seem to be covered very much by the history books or by the media either, and you were not partial when it came to stopping lawbreakers.

Lackey: No, that is correct. The news media didn't give us any coverage on that, and we had to make some arrests of Klansmen, too, you know.

Our job was to keep law and order, and we couldn't pick and choose. But we got very little coverage regarding the arrest of Klansmen.

Edwards: You met with Martin Luther King to coordinate security. What can you tell us about that?

Lackey: Yes, I had a meeting with him and even booked him once in 1956. But, in the later meeting, I discussed with King some things that we needed to do, and that he needed to do. At first, he turned down any security but changed his mind before I left. And I told him we would like to give him security. We couldn't guarantee 100%, but we could cut down the odds on [violence against King]. He admitted that he could not control his people, and he had some people in there who were going to get out of line and so forth, and he said, "I just can't control all my people."

Edwards: I see here you have a copy of the newspaper article from that time when Martin Luther King, who was preaching non-violence, actually tried to get a permit for a gun.

Lackey: Yeah, he tried to get a permit for a pistol, and he was turned down. His so-called peaceful movement was not what it was cracked up to be. The way that he got sympathizers and the money coming into his organization was by having conflict. When they would be marching on the streets and sidewalks, some of the males in his group would break off and go and urinate or defecate on a white person's lawn. I mean, that's trying to have a conflict.

If it were my house, I'd be coming out of there with a shotgun.

Edwards: It is so important to have eyewitness testimony like this. Is this what led you to write your book so many decades later? Why is it important to you that people understand the truth about the civil rights movement?

Lackey: After I retired from the police force, I read and heard these people all talking about how great King was. The coverage had no balance whatsoever, and it was then I decided to unveil [the truth].

Edwards: But it is more than that. The myth of King is propaganda. Your book is an actual factual document. Am I right?

Lackey: That is right. It's correct. And don't forget that Coretta King had those FBI files, and the tapes, sealed until 2027.

Edwards: Do you think that they will be released even then?

Lackey: I don't think they will. I tried to get in there and get them released, but I didn't have any luck on that, and I don't think they will be released. If we could have had them released, you would have seen a lot of politicians running for cover.

Edwards: The standard excuse for not releasing the files on King was that it would ruin his reputation. I think that's what Coretta Scott King said when she testified before Congress about sealing the records.

Lackey: The liberal politicians and the liberal news media flocked to him. And he had them eating out of his hand. It was sickening when you saw it happen, that these politicians would run over each other to try to get to him. And then, later, every year when they have that march over Edmund Pettus Bridge, you still see them lined up, arm-in-arm to get in on the act.

Edwards: Now it's almost like bragging that you have won the Congressional Medal of Honor if you can say that you marched with Martin Luther King. But certainly, those people, when they were there and among King's stooges and thugs must have seen some of the same behavior that you saw. Did you ever have any of them come up to you and say that they were wrong about Martin Luther King and the tactics they employed?

Lackey: I never had one of them come to me and say that.

Edwards: What was the worst day for you during the civil rights movement? What day do you recall as being the most frightening or the most disturbing from a policeman's point of view?

Lackey: There is a particular day that I recall. [Ralph David] Abernathy [King's closest advisor] had organized a group, and they were meeting at King's church. King wasn't there, but they were going to march from his church to the capitol and they'd already put this out to the news media and everybody else.

When I arrived, the White people were all over the lawns up there at the capitol. It was at least, I'd say 10,000 or 12,000, in the neighborhood of the capitol complex buildings. I sent some plainclothes officers to check it out. It was a kind of a cool day, and they [the Whites on the lawn] had on overcoats and the majority of them had shotguns, pistols, you name it. I mean, it was an arsenal there on the capitol grounds.

I called Abernathy out of the church to talk to him personally and showed him what he was up against, and what we were up against. And I said, "There ain't no way that we can give you protection with all these people, and them armed like they are. And I'm gonna ask you to call off the march." And he said, "No, we had this planned and we're going to stick with it."

Of course, the national news media was there to cover this thing because they announced it several days prior. So, they came out of the church and started across the street there, Decatur Street, toward the capitol. And when they did, all these White people started rushing down. So, I called my men to put them back in the church. We made Abernathy and all these groups get back in church. And then I told him I would let them leave there, maybe six to eight at a time, and give them the streets they were to walk down so we could furnish protection. But that was a close call there because we could have very easily had a blood bath. Montgomery was a powder keg. For some time, the least little spark could have set it off. We had to really stay on our toes trying to keep the lid on it.

Edwards: Did the White crowd disperse once the civil rights marchers were out of sight and removed from the scene, or did you have any trouble with them after that?

Lackey: No. They started dispersing straight away.

Edwards: They [the Whites] didn't throw bags of feces on you or spit on you or anything like that?

Lackey: No, we didn't have any of that. It was the other side who would do that.

Edwards: So, you saved Abernathy's life, in all likelihood, and those marchers?

Lackey: Yeah.

Edwards: But they never expressed any appreciation for that, I suppose?

Lackey: Oh, no. No, they didn't ever express any appreciation for anything we did. You know, it's all good though.

Edwards: Well, I think it's certainly apparent that you did your duty, Chief Lackey. During those very difficult and incendiary times, you showed integrity and a spirit of righteousness. The ability for us to personally speak with someone who was a firsthand witness to this history from our point of view is an opportunity very rarely afforded to anyone. Thank you for talking with us. ❖

Jews Reject Trump in Election

An exit poll conducted by the syndicated National Election Pool revealed that American Jews voted overwhelmingly against Donald Trump last November, despite his slavishly pro-Israel and pro-Jewish stance.

As reported by the Jewish Telegraphic Agency on Nov. 6, 2024, "Jews [are] among the most reliably Democratic demographics in the United States." Although there was speculation that Jews would be "alienated from the left" due to criticism of Israel's war against the Palestinians, many observers thought there would be a strong showing for Trump among Jewish voters. In fact, the Jewish turnout for Trump was the lowest proportion of Jewish votes for a Republican presidential candidate in 24 years. In California, the exit poll found that 76% of Jews voted for Harris.

✠ ✠ ✠

Why Did Jews Reject Trump?

A November 2024 opinion piece in *Forward* newspaper—one of America's oldest Jewish newspapers, founded in support of the Socialist and Communist Parties in New York in 1897—explained that the Jewish vote against Trump was because they "refused to reward someone who fomented an attack on Congress, rejected the results of a fair election, and trafficked in divisive, often anti-Semitic rhetoric." Where exactly this "anti-Semitic rhetoric" comes from, is anyone's guess, unless the Jews were self-identifying with the "Deep State" and the "Swamp," which did feature prominently in the Trump campaign.

Ursula Haverbeck, 96, Dies at Home Awaiting Appeal

Well-known German Holocaust Revisionist Ursula Haverbeck, 96, died peacefully at home last November, surrounded by her closest comrades, according to her attorney Wolfram Nahrath. A role-model heroine for Germans fighting the slander against their nation, and an irrepressible champion of historical truth and international justice, Ursula died while a Hamburg court was still considering what her latest prison sentence was going to be.

Ursula had been in and out of German gulags for the past eight years, convicted of the "crime" of asking for proof that 6 million Jews had been exterminated in World War II.

After several failed attempts by the German establishment to stop her from expressing her opinions publicly—which included a 2009 fine of $2,800—she was sentenced to 11 months in jail in 2016 at age of 87.

No sooner had she been released, than she was arrested again in 2017 for the same "heresy" of simply asking for proof of the mass murders, and then sentenced to six months in jail. That imprisonment would then be extended time and time again to eventually encompass a two-year period. Each time she was offered a choice: publicly renounce her questions and go free, or face continued imprisonment. She always chose the latter.

Finally, in April 2020, Ursula was charged a third time and sentenced to another 12-month sentence. She died at home while awaiting an appeal on that sentence. Rest in peace.

Roman Empire's Racial Diversity

A breakthrough genetic study carried out on bone fragments retrieved from the famous plaster casts of victims of the volcanic eruption that destroyed Pompeii in A.D. 79 has revealed the racial diversity of the Roman Empire. The eruption preserved the forms of many of the dying as the ash compacted around their bodies. Although the soft tissue decayed over the centuries, the bodies' outlines remained. These outlines were recovered during excavations in the late 19th century and preserved by filling the cavities with plaster. The new study, published in *Current Biology*, extracted skeletal material embedded in the casts to produce genome-wide ancient DNA. Of the five Y-chromosome (male) samples extracted, all were of Middle Eastern origin, and of the six mtDNA samples, four were of Middle Eastern origin, while the remaining two were of European origin.

The study concluded: "All Pompeiians with genome-wide data consistently derive their ancestry largely from recent immigrants from the eastern Mediterranean, as has also been seen in contemporaneous ancient genomes from the city of Rome, under-

scoring the cosmopolitanism of the Roman Empire in this period," according to a recent article in *Current Biology*. The study aligns with other artifacts recovered from Pompeii, which also reveal the multi-racial nature of the city's population, such as the famous fresco of Terentius Neo and his wife, on display at the National Archaeological Museum in Naples.

Genes Shape Personality

The all-pervasiveness of genetics as the ultimate determining factor of all humankind has been proven once again with a new study conducted by researchers at the Yale School of Medicine which revealed that the genes that control personality traits have been identified. The study, published in the journal *Nature Human Behaviour*, used data from the Million Veteran Program to identify genetic variations, called "loci," associated with each of the "big five" personality traits: extraversion, openness, agreeableness, neuroticism, and conscientiousness. The researchers then combined these data with previous genome-wide association studies (GWAS) to perform a meta-analysis with almost 700,000 individuals, marking the largest GWAS for personality traits to date.

The study identified 200 genetic loci associated with the "big five" character traits, neuroticism. They found that there was a strong overlap between neuroticism, a personality trait marked by negative feelings, and depression and anxiety. People with high agreeableness, a personality trait marked by a tendency to get along well with others, were less likely to experience these conditions.

South African Military Collapses

Anyone who might have the desire to invade South Africa should take notice that now is the ideal time for such a venture. According to the latest official figures released by the South African Parliamentary Subcommittee on Security and Justice, the South African National Defense Force (SANDF) is at an all-time operational low. According to that subcommittee: Only two of the air force's fleet of 26 Swedish-supplied Saab JAS 39 Gripen C/D variant aircraft are operational; none of its C-130BZ Hercules air transporters is airworthy; only one frigate of its navy is operational; only one MMIPV (multi-mission inshore patrol vessel) is operational; and, none of its three Heroine Class Type 209 submarines is operational, all having had "accidents" of one sort or another. Despite all these failings, fully 68% of the SANDF budget is spent on salaries and wages, the subcommittee added, according to military analysis website *DefenceWeb*.

South Africa's Steady Decline

South Africa has been on a steady decline on all fronts since the African National Congress first came to power in 1994. Among the major state-owned enterprises that have either closed down, faced bankruptcy, or needed substantial government bailouts to keep operating are the following: South African Airways declared bankrupt in 2019; state electricity supply company Eskom declared bankruptcy in 2019; Denel, the state arms manufacturer, declared bankruptcy in 2004; the South African Post Office—the oldest post office in Africa, founded in 1792—declared bankruptcy in 2023; and state transportation company Transnet, which runs all the ports and railways in South Africa, needed a R47 billion (approximately $2.5 billion) bailout in 2023 to prevent bankruptcy. The Passenger Rail Agency of South Africa has lost 20% of the entire railway network of South Africa to "theft and vandalism" since 1994.

Origin of Writing Traced

The origins of writing in the ancient Aryan-occupied land of Mesopotamia have been traced to ancient cylinder seals on clay tablets and other artifacts, new research has revealed. Scientists have identified correlations between the designs engraved on these cylinders, dating back around 6,000 years, and some of the signs in the proto-cuneiform script that emerged in the city of Uruk, located in what is now southern Iraq, around 3000 B.C. "The conceptual leap from pre-writing symbolism to writing is a significant development in human cognitive technologies," explained Silvia Ferrara, professor in the Department of Classical Philology and Italian Studies at the University of Bologna and lead researcher. "The invention of writing marks the transition between prehistory and history, and the findings of this study bridge this divide by illustrating how some late prehistoric images were incorporated into one of the earliest invented writing systems."

"Our findings demonstrate that the designs engraved on cylinder seals are directly connected to the development of proto-cuneiform in southern Iraq," confirms Ferrara. "They also show how the meaning originally associated with these designs was integrated into a writing system," according to *Antiquity* magazine in a November 2024 article.

8,000-Year-Old Serbian House

Archaeologists have unearthed the remains of an 8,000-year-old house made of "wattle and daub" in combination with wooden posts in Serbia—one of a number of such structures in the Balkans indicating the antiquity of European civilization, predating comparable developments elsewhere in the world by thousands of years. According to a report by the Austrian Academy of Sciences (OAW), the dwelling in Svinjaricka Cukab was preserved because it was struck by a fire. "The partially collapsed and burned architectural elements covered the floors inside the house as well as artifacts, tools, and scattered vessels in the presumed outdoor area," the OAW statement said.

The dwelling contains evidence that its inhabitants were storing food, such as grain and seeds, indicating the presence of stable, settled communities rather than nomadic tribes.

PALESTINE

The 2,000-year-old entity Zionism wants exterminated

By Arthur Kemp

The ongoing Israeli genocide of the Palestinians consists of two programs: the physical extermination of those people through mass bombing, starvation and forced removals, and the erasure of the concept of the idea that "Palestine" has ever even existed.

The origin of the claim that Palestinians and Palestine never existed originates with a remark made by then-Israeli Prime Minister Golda Meir. In 1969, Meir famously told the London *Sunday Times* that "there was no such thing as Palestinians," adding, "it was not as though there was a Palestinian people in Palestine considering itself as a Palestinian people and we came and threw them out and took their country from them. They did not exist."[1]

Since then, her remarks have been repeated and amplified by numerous Zionists and Zionist apologists.

The Times of Israel—one of the leading Israeli English-language web newspapers,[2] has been one of the most prominent proponents of this idea, with one of its columnists boasting in November 2022 that Palestine was a "nation that never existed."[3]

That *Times of Israel* article, which can be taken as an accurate summary of the overall Zionist argument, went on to claim that:

> Nothing of a Palestinian nation that used to exist has ever been discovered. Not a single map discovered shows Palestine ever existed. … Nothing has ever proven the existence of what only exists in the minds of modern people. … The reason nothing exists to prove there ever was a Palestinian nation is due to the fact there never has been a Palestinian nation in the history of the world.[4]

GOLDA MEIR
Claimed Palestine never existed.

The eradication of the notion of a Palestinian people, or a Palestinian state, forms a critical element of the Zionist program to establish a Jewish supremacist state over all Palestinian lands.

Like almost everything else that emanates from the Zionist propaganda factory, this claim is a historically inaccurate, cynical and blatant lie.

It is typical of the "Big Lie" technique against which Adolf Hitler warned.[4] The Zionists hope, through continued repetition in the Jewish lobby-controlled legacy media, this lie will become widely believed.

The reality is that the name "Palestine" for that territory has been in existence for nearly 2,000 years. The Palestinians themselves have also been in existence for that amount of time, as the historical record clearly shows.

It is also not without irony that the very name "Palestine" originates with one of ancient Jewry's most formidable enemies, the Philistines.

THE ORIGINS OF THE PHILISTINES

Most people are aware of the use of the word "philistine" as a derogatory term to describe someone who is boorish, low class and culturally ignorant.[6]

However, what is not so widely known is that this derogatory term originates directly from the descriptions of the Philistines in the "Hebrew Bible" (the Tanakh).

In the Tanakh, the Philistines are regularly portrayed as an important rival of the Jews, and many of the most famous biblical clashes between Jews and their enemies involved Philistines. Two prominent examples familiar to all illustrate the point:

- The battle between David and Goliath. David is portrayed as the heroic Jew fighting and slaying the Philistine champion, Goliath;[7] and
- The famous story of Samson and

Delilah, which is based on the former's struggles against the Philistines, including his capture and destruction of their temple.[8]

The Philistines are portrayed in the Tanakh as idol worshipers and ignorant of the truth, which in turn has led to the modern meaning of "philistine." This negative portrayal is, unsurprisingly, also a bare-faced lie.

The Philistines of the biblical era were a highly sophisticated people, who were, in fact, culturally, technologically, and militarily vastly superior to the ancient Jews.

The ancient Philistines settled on the southern coast of Canaan around the 12th century B.C. and were part of the larger group of European "Sea Peoples" who raided and settled in the Middle East at that period in Mediterranean history.

This is no idle speculation. The European origin of the Philistines was proven scientifically after 2016 DNA analyses of skeletal remains in a Philistine cemetery were conducted. The cemetery, located in the present-day southern Israeli city of Ashkelon, contained over 200 burials dating from the 11th to the 8th centuries B.C.

An international team of researchers, using the latest DNA extraction techniques, conducted genetic analyses on remains from this site. Their findings, published in 2019, revealed that the Philistines originated from Europe, and southern Europe in particular, possessing a genetic signature that was not present in comparable Semitic populations of the region.[9]

The DNA study also showed that, within two centuries, this European genetic influence diminished, indicating significant intermarriage and assimilation with the local populations.[10]

The presence of the Philistines in the region had long been established via conventional archeological means. The *Pentapolis*, or "five-city confederation," was the technological heart of Philistine civilization.

Philistine Cultural Items

This selection of early Philistine pottery clearly shows Aegean and Cretan influences and an aesthetic nature. Jewish pottery at the time was, conversely, crude and nearly devoid of ornamentation.

These cities were:

- Ashdod, which served as a major port and trade hub;
- Ashkelon, a key coastal city with a strategic harbor which is still famous for its well-preserved archeological remains, including a large gate and city walls;
- Gaza, the southernmost city of the Pentapolis, serving as an important trade center connecting Egypt and the rest of the Middle East, and which gave its name to the "Gaza Strip" of today;
- Ekron (modern Tel Miqne), known for its industrial production, especially olive oil; and
- Gath (modern Tell es-Safi), the largest of the Philistine cities and traditionally associated with the giant Goliath. It contains a wealth of monumental architecture and defensive structures.

All these cities are in what is today the state of Israel, and were established hundreds of years before the first definitively Jewish settlements were established.

Archeologists can also instantly recognize and differentiate Philistine artifacts at digs in Israel. Philistine culture is known for its exquisitely crafted and patterned Aegean and Mycenaean-style pottery, which is easily differentiated from the same period's crude and undecorated ancient Hebrew artifacts.

The Philistines also established the first well-planned, fortified cities with strong walls, public buildings, and advanced water systems in the region. Excavations have revealed evidence of temples, such as those found at Tel Qasile (near present-day Tel Aviv), which feature magnificent, pillared halls. Other excavations have revealed industrial areas for wine and olive oil production, and the region's first granaries.

Most importantly, the Philistines also introduced the Iron Age to the region. This fact alone gave them a vast and overpowering military and technological advantage over their Bronze Age Semitic neighbors.

This superior culture and military ability no doubt laid the basis of the ancient Hebrew hatred for the Philistines, as evidenced repeatedly in the Tanakh and Old Testament.

It is thus darkly ironic that the origin of the name "Palestine" belongs to a group of Europeans who settled and established some of the most sophisticated settlements in Palestine, centuries before the first definitively proved Jewish presence.

In 1999, Ze'ev Herzog, the Israeli archeologist and professor of archeology at the Department of Archaeology and Ancient Near Eastern Cultures at Tel Aviv University, revealed:

> After 70 years of intensive excavation in the land of Israel, archeologists have come to a frightening conclusion: the history never happened. The deeds of the patriarchs are folktales; we did not go down to Egypt or immigrate from there; we did not conquer the land; and there is no trace of the empire of David and Solomon.[11]

Gaza served as an important trade center connecting Egypt and the rest of the Middle East.

The Philistines were so important in the creation of civilization and culture in early Palestine that, when the region came under Roman control, the word "Palestina" was formally used to name the new colony.

ROMAN ERA

The Roman conquest of the region started with the campaign of Gen. Pompey the Great in 63 B.C. His invasion reduced the ruling Hasmonean Kingdom to that of a client state, which then became part of the larger Roman province of Syria.

Internal Jewish disputes and instability led the Roman Senate to unilaterally appoint Herod as client king in 37 B.C. With extensive Roman help, Herod established a 40-year period of stability and growth in Judea.

Herod's rule was noted for building projects, including the amphitheater at the city of Caesarea Palaestinae—named in honor of Herod's patron, Emperor Caesar Augustus. This city still exists and is the largest and richest city in northern Israel.

Herod also undertook an extensive building program in Jerusalem—also with Roman technology and assistance. In 20 B.C., he ordered the building of the so-called "Second Temple" in Jerusalem. The remnants of this temple are known today as the "Western" or "Wailing" Wall, and are revered in Judaism today. It is also deeply ironic that even this Jewish holy site was built through the gift of Roman engineering, a fact that is always ignored in the modern Jewish narrative of Palestine.

After Herod's death in A.D. 4, his kingdom was divided among his sons. This led to a new bout of infighting and instability. Finally, to halt the disturbances, Rome took direct control of Judea, Samaria, and Idumea, establishing the province of Judaea.

Despite bringing all the advantages of European civilization once again to the region, the Romans soon found themselves despised by the Jews.

The First Jewish Revolt of A.D. 66–73 against Roman rule resulted in the destruction of the Second Temple in Jerusalem by Roman Gen. Titus Caesar Vespasianus in A.D. 70. Jerusalem was razed, and many Jews were killed, enslaved, or dispersed.

The Bar Kokhba Revolt of A.D. 132–135 was the final turning point in the Roman-Jewish wars. Famous English historian Edward Gibbon described events in his classic work *The History of the Decline and Fall of the Roman Empire:*

> From the reign of Nero to that of Antoninus Pius, the Jews discovered a fierce impatience of the dominion of Rome, which repeatedly broke out in the most furious

massacres and insurrections.

Humanity is shocked at the recital of the horrid cruelties which they committed in the cities of Egypt, of Cyprus, and of Cyrene, where they dwelt in treacherous friendship with the unsuspecting natives; and we are tempted to applaud the severe retaliation which was exercised by the arms of the legions against a race of fanatics whose dire and credulous superstition seemed to render them the implacable enemies not only of the Roman government but of human kind.[12]

By this time, the Philistine presence had been all but eradicated through racial intermarriage (as revealed in the 2019 DNA study referred to above and at right), but the cultural inheritance from those people was still vast.

It was for this reason that, following the suppression of the Bar Kokhba Revolt, the Romans formally renamed Judea as the province of Syria Palaestina in an acknowledgment to the original Philistines.

Thus, the name Palestine formally dates from the year A.D. 136, contrary to the modern Zionist propaganda efforts to erase it from history books.

The Jews were then largely cleared out of the province of Palestine: Jerusalem was completely razed and rebuilt as a Roman city called Aelia Capitolina. Jews were forbidden to even enter the city upon pain of death, and a temple honoring the Roman god Jupiter replaced the Jewish temple to Yahweh.

The emergence of Christianity—started by a small group of Jews in Palestine and condemned as heretical by the Jewish establishment—saw a further cultural addition to the already mixed population of the time. Important Christian communities formed in cities like Caesarea, which became a major center of Christian scholarship and ecclesiastical administration.

THE CHRISTIAN ERA

The conversion of Roman Emperor Constantine to Christianity and his A.D. 313 Edict of Milan—which legitimized that religion—saw the province of Palestine become a focal point

An archeologist excavates a Philistine skeleton in Ashkelon.

DNA Studies Reveal Origins of the Original Palestinians

In 2019, groundbreaking DNA analysis of remains from a Philistine cemetery in Ashkelon, Israel, offered significant insights into the origins of one of the most enigmatic peoples of the ancient world. The research, conducted by the Leon Levy Expedition to Ashkelon, analyzed 10 skeletons dating from the 12th to 10th centuries B.C., a period coinciding with the Philistines' emergence in the historical record. Published in *Science Advances*, the findings support the hypothesis that the Philistines were migrants from southern Europe who settled along the eastern Mediterranean coast.

The Philistines are frequently mentioned in the Hebrew Bible (Tanakh) as adversaries of the Israelites. However, their origins have long been a matter of scholarly debate, with theories suggesting Aegean, Anatolian, or Cypriot connections. The Ashkelon DNA analysis revealed a distinct genetic signature in the Philistines that links them to populations in southern Europe during the Bronze Age. This genetic influence, detected in the earliest Philistine remains, diminished over subsequent centuries, reflecting intermarriage and assimilation with local Levantine—Semitic—populations.

This study provides the first direct genetic evidence supporting the Philistines' European origin and highlights the cultural and demographic shifts that followed their migration. The findings align with archeological evidence, such as Mycenaean-style pottery, burial practices, and architectural features found in Philistine sites, which suggest a connection to the Aegean world.

The implications of this discovery extend beyond historical curiosity. They show that the ancient enemy of the Jews, as revealed in the Christian Bible, really existed, and were Europeans. for Christian pilgrims due to its association with the life of Jesus Christ.

Constantine and his mother Helena sponsored the construction of several monumental Christian churches, including the Church of the Holy Sepulcher in Jerusalem and the Church of the Nativity in Bethlehem.

After Constantine's founding of Constantinople in A.D. 330, the Roman Empire gradually split into eastern and western halves. Palestine then became part of the Eastern Roman Empire, also known as the Byzantine Empire.

THE JEWISH DIASPORA

The Jewish population of Palestine underwent significant changes during the period from Roman conquest to the establishment of the Byzantine Empire. Many Jews fled or were forcibly exiled, forming significant Jewish diaspora communities across the Roman Empire.

Many Jews fled to Europe, where they later formed the core of the Ashkenazi Jews, while others went to Babylon, Egypt, North Africa, and, finally, into Spain.

The words "Ashkenazi" and "Sephardic" are present-day reflections of this Jewish population migration: Ashkenazi is the Hebrew word for "German" and Sephardic is the Hebrew word for "Spanish."

After this great diaspora, those Jews who remained in Palestine lived in smaller, rural communities in Galilee and other areas. They were, however, a minority of the overall population, which was at that stage Christian.

It is from this time that the population of Palestine was created, out of two main components:

- A minority of European racial types (descended from the Philistines, the Romans, and, later, Christian immigrants); and
- A larger group of non-Jewish Semites.

In this regard it is important to understand that the Jews, racially speaking, were and still are a subset of the Semitic racial group.[13]

This mixture has been confirmed by modern-day genetic studies that have definitively demonstrated the mixed racial origins of the Palestinians.[14] Furthermore, their mixed racial origins are also evident in their phenotype, with blond hair and light-colored eyes not being uncommon among Palestinians.

All of this means that the people who formed the core of the Palestinian population can be said to have formally come into existence from A.D. 136 onward and represent a unique blended culture and provenance which dates back nearly 2,000 years.

At that time, the Palestinians were also predominantly Christian in religion and culture. They formed an active component of what became the Byzantine or Eastern Orthodox version of Christianity. This is still to be seen in the present-day controlling body of the Church of the Holy Sepulcher, which is governed by the Greek Orthodox, the Roman Catholic, and the Armenian Apostolic churches.

In A.D. 628, Byzantine Emperor Heraclius recaptured Jerusalem from the Sasanian Persians. In this painting by 16th-century Italian artist Ippolito Scarsella (1550–1620), the emperor is shown returning the True Cross to the city after its humiliating theft by the Persians.

BYZANTINE ERA

The Byzantine era was marked by numerous revolts led by the Jewish splinter group known as the Samaritans, in A.D. 484, 529, and 556. The Byzantines were forced to suppress these revolts but, in A.D. 614, the Sasanian Persian Empire overran the region during the momentous Byzantine-Sasanian War.

With Jewish support, the Persians captured Jerusalem, where many Christian holy sites were damaged, including the Church of the Holy Sepulcher. Jews were briefly allowed to settle in Jerusalem under Persian rule.

Byzantine forces, under Emperor

Heraclius, recaptured Jerusalem in A.D. 628 and reinstated Christian control. The Jews once again faced severe consequences for their support of the Persians, and their numbers were significantly reduced.

MUSLIM ERA

The rise of Islam in the Semitic heartland of present-day Saudi Arabia resulted in a wave of conquests throughout the Middle East and North Africa. Starting in 632 A.D., Muslim forces under Rashidun Caliph Umar ibn al-Kha first penetrated the southernmost borders of the Byzantine Empire, of which Palestine was the front line.

By A.D. 638, Muslim forces had advanced deep into Palestine, and, in that year, a negotiated surrender saw the city of Jerusalem pass from Christian to Muslim overlordship.

One of the first steps the Muslim conqueror Abu Ubaidah ibn al-Jarrah undertook was to grant Jews free access to the city once again.

The region was then reorganized, becoming part of the province of Jund Filastin under the Caliphate—once again keeping the Palestine ("Filastin") name.

The major change brought about by the Muslim conquest was cultural. Although Jews and Christians were allowed to keep their religions if they wanted, a process of Islamification was instituted.

The Umayyad Dynasty, which ruled from Damascus, developed Palestine as part of its empire. The Umayyads ordered the construction of the Dome of the Rock in A.D. 691, and the now-famous Al-Aqsa Mosque in A.D. 705 in Jerusalem.

The Islamification process slowly spread throughout the Palestinian people, and eventually led to Islam becoming the dominant religion, although a minority of Palestinians remain Christian to the present day.[15]

The advance of Islam into Palestine provoked a Christian European counter reaction. In 1099, the First Crusade captured Jerusalem, establishing the Kingdom of Jerusalem and several Crusader states. The Kingdom of Jerusalem lasted until 1187, when the mixed-race Kurdish Muslim leader Saladin recaptured the city for Islam.

The last of the Crusaders in Palestine were, however, only expelled after a 1290 invasion by the Egypt-based Mamluk Dynasty. Palestine was then incorporated into the Mamluk Sultanate.

OTTOMAN ERA

The Mamluks in turn were driven out by what was to become the most powerful Muslim faction of all, the Ottoman Turks. Ottoman Sultan Selim I went on to conquer Palestine in 1517 from the Mamluks.

Palestine then, for the first time in more than 1,200 years, lost its name and was incorporated into the Ottoman administered region of the Sanjak of Jerusalem, part of the larger province of Bilad al-Sham (Greater Syria).

ZIONISTS CLAIM PALESTINE

The name Palestine would then, once again, ironically, only be revived by Zionists in the late 1800s. This was particularly evident in the writing of the founder of modern Zionism, Theodor Herzl, in his famous book *Der Judenstaat* ("The Jewish State"), published in 1896.

Herzl mentioned "Palestine" as one of two potential locations for a Jewish state, the other being Argentina. His claim to Palestine was that it was the "historic homeland" of the Jews. Herzl wrote: "Shall we choose Palestine or Argentina? We shall take what is given us, and what is selected by Jewish public opinion."[16]

As Palestine was at that time part of the Ottoman Empire, Herzl recognized the need for Ottoman approval to establish a Jewish state there. He then brazenly proposed outright bribery, asking his fellow Jews to offer financial incentives to the ailing Ottoman Empire to alleviate its debts in exchange for granting Jewish settlement rights.[17]

In 1897, Herzl convened the First Zionist Congress in Basel, Switzerland, where Palestine was explicitly named and identified as the goal for a Jewish homeland. Herzl even went as far as to meet with Ottoman Sultan Abdul Hamid II in 1901 to secure the passage of Jewish settlers to Palestine.[18]

WWI AND THE BRITISH MANDATE

The Zionist plans to occupy Palestine then took a dramatic turn with the outbreak of World War I, when the Ottoman Empire sided with the

Central Powers.

Although on paper the Ottoman Empire was a vast state, it was woefully unprepared for modern European warfare. As a result, it quickly lost control of much of its Middle Eastern holdings. The region of Palestine was taken by a swift British attack from Egypt and, by 1917, British forces led by Gen. Edmund Allenby had captured Jerusalem.

This led to the famous Balfour Declaration of the same year, issued by British foreign minister Arthur Balfour, in which he undertook to promote a Jewish state "in Palestine," stating:

> His Majesty's government view with favor the establishment in Palestine of a national home for the Jewish people, and will use their best endeavors to facilitate the achievement of this object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish communities in Palestine, or the rights and political status enjoyed by Jews in any other country.

In return for this undertaking, International Jewry then undertook to use its influence in America to bring the United States into the war on the side of the Allies. This objective was soon achieved, a development that was to play a key role in Germany's ultimate defeat.[19]

The newly established League of Nations then formally granted Britain control of Palestine in April 1920. The mandate, known formally as the "Mandate for Palestine and Transjordan," required Britain to put into effect the Balfour Declaration's intention of "reconstituting their [the Jewish] national home in that country."[20]

At this time, the Palestinians, who had been living in the region since at least A.D. 136, formed most of the population of the "Mandate of Palestine." Understandably, they soon objected to what they correctly perceived as mass Jewish immigration into their land.

Tensions steadily rose, and, in 1936, a large-scale Palestinian uprising broke out, directed against both British rule and Jewish immigration. British forces suppressed the revolt, but then also proposed limiting Jewish immigration, a move which in turn angered the Zionists.

DAVID BEN-GURION
Declared Israel a state in 1948.

This led to the public demand by the leading British Zionist of the time, Samuel Landman, that Britain live up to its 1917 promise, because, as Landman wrote in a publicly distributed propaganda piece titled *Great Britain, the Jews and Palestine*:

> The only way to induce the American president to come into the war was to secure the cooperation of Zionist Jews by promising them Palestine, and thus enlist and mobilize the hitherto unsuspectedly powerful forces of Zionist Jews in America and elsewhere in favor of the Allies on a quid pro quo contract basis.[21]

Landman's remarkably honest piece then went on to list the exact names, dates, and places of how the Jewish lobby had dragged America in the war. He then ended by warning that the British government, in refusing to give Palestine to the Zionists, was putting Jews in Germany in danger, because, he asserted, it was "well known" in Germany that the Jews had brought America into the war.[22]

UN PARTITION AND THE CREATION OF ISRAEL

After the end of World War II, Jewish illegal immigration to Palestine dramatically increased. Finally, in 1947, the United Nations agreed on a partition plan which divided Palestine into two states—one Jewish and one Arab—with Jerusalem as an international city.

The Palestinians, knowing well that this was the beginning of their dispossession of Palestine, refused to accept the partition, and appealed to the Muslim world for help.

On May 14, 1948, David Ben-Gurion declared the establishment of the State of Israel. The next day, neighboring Arab states (Egypt, Jordan, Syria, Lebanon, and Iraq) invaded in support of the Palestinians.

The result of that war was an Israeli victory, and the further mass eviction of Palestinians from their homes. Over 700,000 Palestinians were displaced, creating the Palestinian refugee crisis which has ever since been the source of strife in Palestine.

CREATION OF THE "WEST BANK" AND THE "GAZA STRIP"

While many Palestinians fled to neighboring Arab countries, significant numbers were forced into what became known as the West Bank and Gaza Strip.

After Israel attacked Egypt, Jordan, and Syria in 1967, the Jewish state captured the West Bank (and East Jerusalem) from Jordan, and the Gaza Strip from Egypt. From that time on, both these regions have been under Israeli military occupation.

After further decades of conflict, Israel finally recognized the existence of Palestine in the 1993 Oslo Accords, which saw the Jewish state and the Palestinian Liberation Organization (PLO) agree to mutually recognize each other and to create the Palestinian Authority (PA) to govern parts of the West Bank and Gaza.

Despite these efforts at peace, the Jewish state continued to promote illegal settlements in the West Bank, culminating in the building of a huge concrete wall that blatantly stole large land segments from the Palestinians and de facto incorporated it into the state of Israel.

This creeping annexation of the West Bank continues to the present day and is a large source of anger from the already displaced Palestinian people.

It is, however, the Gaza Strip that became the prime focus for Palestinian discontent. Bearing in mind that it had been originally created by Palestinians fleeing Jewish murder gangs and state violence, the Gaza Strip turned into what has been accurately described as the world's largest open air concentration camp.

Israel strictly controls Gaza's borders, food and water supplies, electricity supply and all other aspects of life in that region.

It was little surprise that, after the hardline Hamas organization won the democratic elections for the Gaza Palestinian Authority in 2006, tensions between that region and Israel increased dramatically.

It is that conflict that culminated in the October 7, 2023 attack and the resultant ongoing extermination of the Palestinians in Gaza.

The eventual outcome of the conflict between the Jewish state and the Palestinians is yet to be decided. However, the sequence of events over a 2,000-year period conclusively demonstrates that the Zionist claim that Palestine and Palestinians have never and thus do not now "exist" is false. ❖

Great Britain, the Jews & Palestine

How America Was Dragged Into WWI by the Zionist Lobby

By Samuel Landman. This booklet, written in the 1930s by one of Britain's leading Zionists, shows exactly how the Zionist lobby manipulated America into entering World War I against Germany in exchange for the British government's plan to give Palestine to the Jews as a homeland at the end of the war. Palestine was at that time under the control of the Ottoman Empire, an ally of Germany during WWI. The deal hinged on the defeat of the Ottomans by the British, and thus its territories would thereafter pass into British control.

The booklet reveals how the Zionist movement struck a deal with the British on the matter. In return for Britain handing Palestine over to the Jews at the end of the war, the Zionists would use their power in America to bring that nation into the war to crush Germany.

The deal was done, and this gave rise to the famous "Balfour Declaration," issued by British foreign minister Lord Balfour, in 1917, which gave Palestine to the Jews.

As Landman wrote: "The only way to induce the American president to come into the war was to secure the cooperation of Zionist Jews by promising them Palestine, and thus enlist and mobilize the hitherto unsuspectedly powerful forces of Zionist Jews in America and elsewhere in favor of the Allies on a quid pro quo contract basis." The remarkably honest book goes on to list the names, dates and places of how these events occurred. However, at the end of World War I, the British government reneged on the deal, realizing it would cause endless strife with the Arabs.

It was in response to this turn of events that Landman produced this book, warning that the British government, by refusing to surrender Palestine, was putting Jews in Germany in danger because, due to the admissions of the book, it would become known that Jewish powerbrokers had brought about the defeat of Germany in WWI. A natural rise in anti-Semitism was predicted—and did occur, once the truth got out. This edition contains the full original text along with a new introduction by Arthur Kemp. The Crusades

A European reaction against Islamic aggression and invasions

By Paul T. Angel

The Islamic world and many "modern" left-wing historians often portray the era of the Crusades as a period of violent European aggression against the Muslim world. Islamists frequently refer to modern-day European states as "Crusader States" as part of an effort to perpetuate the idea that Europeans have always persecuted Islam.

However, the truth is quite different. The Crusades were not "unprovoked European aggression" but rather a response to Islamic expansion and invasion of Christian lands.

The region most affected by the Crusades—the Middle East—was not originally Muslim. In fact, the entire Middle East, including Egypt and Turkey, was entirely Christian long before the rise of Islam.

THE BYZANTINE EMPIRE'S VAST BORDERS

The Christian Byzantine Empire, known as the eastern continuation of the Roman Empire, had its capital at Constantinople (now Istanbul). The Byzantine Empire's borders stretched across large parts of the Balkans to the west and extended east and south.

At its height, the Byzantine Empire controlled all of what is today Turkey (Anatolia). To the south, the Byzantine Empire encompassed the entire Levant, including the regions now known as Syria, Lebanon, Palestine, and Jordan.

The southernmost province of the Byzantine Empire, Arabia Petraea, included portions of northern present-day Saudi Arabia. To the east, the empire's border was along the Euphrates River, including regions of what is now western Iraq.

Egypt was another major Byzantine province, with Alexandria as its key city. Additionally, the Sinai Peninsula, now part of Egypt, was part of the Byzantine Empire and geographically linked the Levant provinces to Egypt.

CHRISTIANITY DOMINANT IN THE MIDDLE EAST

All of these regions were predominantly Christian before the advent of Islam. Egypt, in particular, is considered the first properly Christian country in the world, and the surviving adherents of that tradition are known as Coptic Christians.

The Levant was also heavily dominated by Eastern Orthodox Christianity, along with smaller sects such as Syriac Christians and Monophysites, the latter being a sect that believed Jesus was only divine, as opposed to the mainstream Christian view that he was both human and divine.

The province of Arabia Petraea was similarly Eastern Orthodox Christian. Even in Saudi Arabia, the ancient heartland of the Semitic race,[1] which lay outside the Byzantine Empire's borders, significant Christian communities existed, such as in Najran (southern Arabia), and Persian Nestorian Christian communities in eastern Arabia.

Judaism was another prominent religion in Saudi Arabia, especially in the Himyarite Kingdom of Yemen. Given that today's Jews are overwhelmingly still of Semitic origin,[2] this historical fact is unsurprising. Indeed, many of the Prophet Muhammad's earliest and most zealous converts to Islam were Jewish.

ISLAM CONQUERS SAUDI ARABIA BY FORCE

It was against this polytheistic Saudi Arabian background that Islam, a monotheistic faith centered on the worship of Allah, the same God worshiped in Judaism and Christianity, emerged.

Islam was founded by one man, Muhammad. Born in Mecca (present-day Saudi Arabia) around A.D. 570 into the Quraysh tribe, Muhammad showed an early mystical inclination, often retreating to a cave, known as Hira, near Mecca, for contemplation and meditation.

It was there, in A.D. 610, that Muhammad claimed to have received the first of many revelations from the Angel Gabriel (Jibril), who, it is said, conveyed the first verses of what would later become the Koran. These

revelations continued over the ensuing 23 years.

Muhammad began preaching the message of these revelations in Mecca. A central theme of his teachings was the Tawhid, or the oneness of God—monotheism—and the need to abandon all other gods and idolatry, both of which were deeply ingrained in Meccan society.

The Quraysh leaders fiercely resisted Muhammad's message, fearing it would disrupt their economic and social order, particularly the lucrative pilgrimage trade centered on the Kaaba, a building in Mecca that housed a large number of idols.

The hostility toward Muhammad and his small group of followers forced them to flee to the neighboring city of Medina in A.D. 622, a movement known as the Hijra. This year marks the official beginning of the Islamic calendar.

In Medina, Muhammad established a community (the Ummah) based on Islamic principles and became both a spiritual and political leader.

The Meccans did not relent, sending several armed raids against Muhammad in an attempt to eradicate the upstart, self-declared prophet. Muhammad and his followers fought a series of battles with Meccan forces, including the Battle of Badr (624) and the Battle of Uhud (625).

By 630, Muhammad had attracted enough followers to form a large army. That year, he marched on Mecca for a final confrontation. Awed by the size of his force, the Meccans surrendered without a fight, and Muhammad became the master of the city.

One of his first actions was to declare the Kaaba a Muslim holy site (after destroying all the idols). The Kaaba remains Islam's holiest site and is the focus of mass Muslim pilgrimages, known as the Hajj and Umrah.

By the time of Muhammad's death in 632, much of Saudi Arabia had fallen under Islamic control, and

Nadr ibn al-Harith was a powerful Qurayshi pagan leader in what is now Saudi Arabia who resisted Muhammad's attempts to conquer and then convert the Qurayshi people to Islam. After the Battle of Badr, he and Uqbah ibn Abi Mu'ayt, another Qurayshi leader, were executed by Ali ibn Abi Talib, the cousin and son-in-law of Muhammad. This depiction of that scene is from a 1595 manuscript page from the *Siyer-i Nebi*—an epic biography of Muhammad's life—commissioned by Ottoman ruler Murad III. Due to Islamic prohibitions against depicting living beings for fear the likenesses might lead to idolatry, especially images of Muhammad (right, seated), the prophet's face is obscured with a white veil.

smaller religions and cults had been suppressed, often with violence.

After his death, the Islamic Caliphate expanded rapidly under the leadership of the Rashidun Caliphs. Caliph Abu Bakr (632–634) began by completing the conquest of the Arabian Peninsula during the Ridda Wars (632–633). In the final year of that campaign, he launched the first Islamic incursions into parts of Mesopotamia (present-day Iraq), which were conquered from the Persian Sasanian Empire.

ISLAM CONQUERS THE LEVANT BY FORCE

Abu Bakr also launched the first Muslim invasion of the Byzantine province of Syria. This campaign continued under his successor, Caliph Umar ibn al-Khattab (634–644), who intensified the invasion, directing the Muslim army to seize key cities and fortresses.

The Byzantines rushed their armies to the region but suffered four consecutive defeats. At the Battle of Ajnadayn (634), fought in what is now Palestine, the Muslim army under the famed commander Khalid ibn al-Walid routed a large Byzantine force, sending the survivors fleeing north.

At the Battle of Fahl (635), fought near the Jordan River, a regrouped Byzantine army was once again decisively defeated, securing Muslim control over the Jordan Valley.

Later that year, ibn al-Walid launched a carefully planned siege of Damascus, the capital of Byzantine Syria. Unable to resist the encirclement, the Byzantine forces negotiated a surrender, making Damascus a Muslim stronghold—a status it retains to this day as the capital of Syria.

The decisive defeat that sealed the Byzantine fate in the region came at the Battle of Yarmouk (636), fought near the Yarmouk River, a tributary of the Jordan River, in what is now the border region of Jordan, Syria, and Israel. This battle pitted a well-organized Muslim army of around 25,000 against a Byzantine force of over 100,000. Al-Walid, by now a seasoned general, employed superior tactics and exploited the Byzantine army's lack of cohesion.

The result was a catastrophic defeat for the Byzantines, leading to their withdrawal from the Levant. By this time, nearly all of present-day Syria, Palestine, Jordan, and Lebanon had fallen under Islamic control.

Only the cities of Jerusalem in the south and Antioch in the north (in present-day Turkey) remained under Byzantine control.

Jerusalem, isolated and without hope of supply or rescue from the Byzantine front line in what is now Turkey, surrendered in 637 after a short siege. The following year, in 638, the garrison at Antioch was overrun by the Muslim army.

> The Crusades were the European response to unbridled Muslim aggression in the Christian Holy Land.

The Islamic armies then completed their conquest of the Persian Sasanian Empire, which included the remainder of present-day Iraq, during campaigns from 636–637.

ISLAM CONQUERS EGYPT BY FORCE

Following the successful campaigns in the Levant, the Islamic juggernaut turned its eyes toward Egypt.

Beginning in 639, the Muslim army under Amr ibn al-As crossed from Palestine and quickly captured Pelusium, near the eastern edge of the Nile Delta—the gateway to Egypt.

Next, the Muslim army laid siege to the fortress of Babylon, near present-day Cairo, the second most powerful Byzantine stronghold, in 640. After a nearly year-long siege, the Muslims breached the fortress in April 641, placing all of Egypt, apart from a small strip around Alexandria, under their rule.

The Muslim army then turned north to Alexandria, the Byzantine capital of Egypt and a vital Mediterranean port. Sensing total defeat, the Byzantine forces opened negotiations to surrender the city. Amr agreed and, in November 641, the city formally surrendered without a fight. The terms of surrender allowed for a gradual Byzantine evacuation and guaranteed the protection of local inhabitants.

Arabs began settling in Egypt, particularly around the newly founded city of Fustat (modern-day Old Cairo), which became the administrative capital. Egypt quickly became a crucial province of the Islamic Caliphate, providing soldiers for Islamic invasions as far afield as Greece and the Balkans.

Over time, the Arabic language gradually replaced Greek and Coptic as the dominant language, and Islam became the majority religion over the next few centuries.

The Muslim expansion continued unabated, advancing westward into North Africa and Spain, eastward into Persia and beyond, and southward into Nubia.

VANISHING DHIMMIS

The Christians and Jews present in the Levant and Egypt were acknowledged by their new Islamic rulers as "people of the book" (as referenced in the Koran), since their God was the same as Allah and their religions were mentioned in the Muslim holy book.[3]

Christians and Jews were granted the status of Dhimmi, which afforded them protection in exchange for paying a special tax called the jizya.

As the government became increasingly Islamized, waves of Arab settlers moved into the region, rapidly altering the cultural and demographic landscape. Conversion to Islam was incentivized by numerous financial and social benefits, including access to trade, land ownership, and reduced taxes. Over time, Christian communities diminished through assimilation and interfaith marriages.

By the early 10th century, the Levant had become majority Muslim, followed by Egypt in the 11th century. This gradual transformation set the stage for the eventual European Christian counterattack, now known as the Crusades.

THE RISE OF THE SELJUK TURKS

The Seljuk Turks, a Turkic nomadic group, converted to Sunni Islam in the late 10th century. Energized by their new faith and often in conflict with Shiite Muslims,[4] they established the Great Seljuk Empire, a powerful state stretching from Central Asia to the Middle East. This vast empire encompassed Persia, Mesopotamia, and the eastern parts of Anatolia.

SELJUK TURKS INVADE BYZANTINE ANATOLIA

In 1071, the now-mighty Seljuk Empire invaded what remained of the Byzantine Empire, focusing on Anatolia. At the Battle of Manzikert, the Seljuks, led by Alp Arslan, decisively defeated the Byzantine forces and captured Emperor Romanos IV Diogenes.

This crushing defeat resulted in the loss of much of Anatolia and left the Byzantine Empire severely weakened. The Seljuks established the Sultanate of Rum in Anatolia, with "Rum" meaning "Roman" in their terminology.

The Seljuks then expanded into the Levant, gaining control of key regions such as Jerusalem by 1073. Soon, nearly the entire Middle East was under Seljuk control.

As a result, Christian pilgrims faced increasing difficulties traveling to Palestine due to heightened security and disruptions caused by the Seljuks. Reports of harassment and hostility toward Christian pilgrims in Jerusalem reached Western Europe, sparking growing concern among Christians for the safety of pilgrims and the preservation of Christian Holy Sites.

BYZANTINES APPEAL TO CHRISTIAN EUROPE FOR HELP

Finally, in 1095, Byzantine Emperor Alexios I Komnenos formally appealed to the pope and Western European

Together with their large force of nobles, knights, and peasant soldiers, they were able to capture Antioch and Jerusalem and establish Christian kingdoms in Palestine and Anatolia.

leaders for military aid to counter the Seljuk threat in Anatolia.

At the resulting Council of Clermont later that year, Pope Urban II called for a crusade to aid Byzantium, reclaim Anatolia, and liberate Jerusalem from Muslim control.

Thus, the Muslim seizure of Christian lands from the Byzantine Empire was the primary cause of the events that followed.

FIRST CRUSADE, 1096–1099

Motivated by religious zeal, thousands of nobles, knights, and peasants from Western Europe launched the First Crusade in 1096. The combined forces, after some initial missteps, succeeded in recapturing the citadels of Antioch in 1098 and Jerusalem in 1099, leading to the establishment of the Kingdom of Jerusalem.

Additionally, a number of other Christian kingdoms were established in the regions liberated by this crusade, including the County of Edessa (in modern-day Sanliurfa, Turkey) and the Principality of Antioch (modern-day Antakya, Turkey).

SECOND CRUSADE, 1147–1149

The Seljuks soon launched a renewed offensive and captured the County of Edessa in 1144. When news of this event reached Europe, Christian monarchs, such as Louis VII of France and Conrad III of Germany, organized a Second Crusade to retake Edessa.

This crusade was a disastrous failure, with the Crusaders failing to retake Edessa and suffering significant losses during an abortive siege of Damascus in 1148.

THE THIRD CRUSADE, 1189–1192

The Third Crusade was launched in 1189, after the Kingdom of Jerusalem was captured by a renewed Muslim offensive under Saladin, one of the most famous Muslim leaders of the Crusader era in 1187. Several notable European monarchs, including Richard the Lionheart of England, Philip II of France, and Frederick Barbarossa of the Holy Roman Empire (Germany), volunteered to take part.

However, Barbarossa drowned en route, leaving Richard to successfully capture key cities like Acre and Jaffa. Despite his victories, Richard ultimately failed to retake Jerusalem, his primary goal. A truce with Saladin allowed Christian pilgrims access to Jerusalem, but the city remained under Muslim control.

FOURTH CRUSADE, 1202–1204

The Fourth Crusade, originally aimed at recapturing Jerusalem, collapsed before it even reached the Levant. Financial complications left the Crusaders indebted to the Venetians, who demanded repayment through military assistance.

As a result, the Crusaders were diverted to sack the already vulnerable Byzantine city of Constantinople in 1204. This disgraceful act of treason severely weakened the Byzantine Empire and is widely viewed as a betrayal of Christian unity.

FIFTH CRUSADE, 1217–1221

The Fifth Crusade was an ambitious but ultimately unsuccessful attempt by European powers to reclaim Jerusalem and other Levant territories by targeting Egypt. Initiated under the papacy of Pope Innocent III, it aimed to weaken Muslim forces by first capturing the strategic city of Damietta on the Nile Delta.

Led by King Andrew II of Hungary, Duke Leopold VI of Austria, and later joined by Cardinal Pelagius, the Crusaders achieved initial success by seizing Damietta in 1219. However, internal disagreements and a failed advance on Cairo led to a catastrophic defeat.

A combination of poor planning, flooding of the Nile, and effective counterattacks by Sultan Al-Kamil forced the Crusaders to surrender Damietta in 1221, ending the campaign in failure.

THE SIXTH CRUSADE, 1228–1229

The Sixth Crusade, led by the excommunicated Holy Roman Emperor Frederick II, was unique in that it

achieved its objectives through diplomacy rather than warfare.

Despite tensions with the papacy, Frederick embarked on the crusade and negotiated directly with Sultan Al-Kamil of the Ayyubid dynasty in Egypt. The resulting Treaty of Jaffa (1229) peacefully restored Jerusalem, Bethlehem, and Nazareth to Christian control, while leaving the surrounding areas under Muslim authority.

This pragmatic agreement secured a decade-long truce and access for Christian pilgrims to the holy sites. Though Frederick's methods avoided bloodshed, they were controversial among contemporaries, and his excommunication by the Pope overshadowed his success.

SEVENTH CRUSADE, 1248–1254

The Seventh Crusade, led by King Louis IX of France, was a major but ultimately unsuccessful effort to reclaim Palestine by targeting Egypt, copying the plan of the Fifth Crusade. Louis assembled a well-funded army and captured Damietta in 1249.

However, his advance toward Cairo was thwarted by logistical challenges, including disease, flooding of the Nile, and fierce resistance from the Ayyubid Sultanate. In 1250, at the Battle of al-Mansurah, the Crusader forces were decisively defeated, and Louis was captured along with much of his army.

After paying a substantial ransom, Louis was released and spent several years in the Crusader regions of Palestine, fortifying Christian holdings but failing to achieve significant gains.

THE EIGHTH CRUSADE, 1270

The Eighth Crusade, led again by King Louis IX, was the last major Crusade initiated by European powers and marked a final attempt to regain momentum in the Crusader cause.

Louis IX, motivated by religious devotion, redirected the campaign to Tunis in North Africa instead of Palestine, hoping to establish a base of operations and convert the Sultan of Tunis to Christianity.

The Crusade, however, was plagued by poor planning and unforeseen challenges. Shortly after landing near Tunis, Louis and his army were struck by a devastating outbreak of dysentery, which claimed the king's life. The campaign ended with a negotiated peace that offered little to nothing to the Crusader cause.

NINTH CRUSADE, 1271–1272

The Ninth Crusade, led by Prince Edward of England (later Edward I), was the final major crusading effort.

Edward's campaign focused on countering the growing power of the Mamluk Sultanate, which had emerged as the dominant Muslim force after defeating the Ayyubids.

Landing at Acre, Edward launched a series of small but effective military campaigns, including skirmishes around Haifa. Despite limited successes, including a temporary truce with Sultan Baibars in 1272, Edward was unable to achieve lasting gains.

END OF THE CRUSADER STATES

The remaining Crusader states continued to decline, and, without continued support from Europe, came to an inevitable end as their territories were overrun once again.

Key cities such as Antioch fell in 1268, and the final blow came in 1291, when the Mamluks captured Acre, the last major Crusader city, after a brutal siege. The fall of Acre marked the end of Christian rule in the Levant, leaving only a few isolated island outposts, such as Cyprus, under Crusader influence.

The end of the Crusader states allowed Muslim powers to turn their attention back to what remained of the Byzantine Empire. The rise of the Ottoman Turks in the 14th century, following the decline of the Seljuk Sultanate, hastened this process.

The Ottomans seized Constantinople's most important outer defenses, Thessalonica and Adrianople, before finally laying siege to the ancient Eastern Roman city itself in 1453. The city ultimately fell to the Muslims and remains in Muslim hands today as the metropolis of Istanbul.

This fanciful illustration shows Sultan Mehmet II entering the battered front gates of Constantinople on May 29, 1453, after a 53-day siege, during which the city had been bombarded with massive Ottoman cannon and catapults. The soldiers of Mehmet the Conqueror finally breached the defenses of Constantinople after formidable Genoese commander Giustiniani was wounded, causing confusion and disarray among the defenders, which allowed the Ottomans to exploit gaps in the city's fortifications.

From there, the Ottomans instituted a nearly 600-year-long reign over the Balkans, leaving a lasting legacy of political, social, and cultural scars on the region.

THE CRUSADES AS A RESPONSE TO MUSLIM AGGRESSION

The historical record clearly shows that the Crusades were a counteraction to Muslim conquests that had overrun the Christian Levant, North Africa, and Spain during the 7th and 8th centuries. The Crusades were not unilateral acts of aggression against Muslims but were, in fact, desperate attempts to halt the very real attack on Christian civilization by militant Islam.

The later invasion of Europe by Islam under the Ottoman Empire was the ultimate result of the failure of these defensive counterattacks. This underscores the rationale behind the Crusades and serves as a testament to the consequences of their failure. ❖

The Sunnis believed that leadership should go to the most qualified individual, chosen by consensus, while the Shiites believed that leadership should remain within Muhammad's family, viewing them as divinely appointed. Over the centuries, this division has morphed into a complex mix of theological, cultural, and geopolitical differences that often have led to violence.

NEW BOOK FROM THE BARNES REVIEW BOOK CLUB

The Greatest Jesus Mystery of All Time

Where Was Christ Between the Ages of 12 and 30?

If you're a Christian, or if you're simply interested in the history of the Christian Church or religion in general, you've probably wondered why the ancient authors of the New Testament left out any mention of the whereabouts of Jesus during His teens and twenties, the all-important developmental years when adolescents transform into adults, get an education, begin work, get married, and have children. This entire piece of the life story of Jesus has been omitted from the Bible, leaving us with an incomplete biography of the most beloved and well-known figure in world history.

In this fascinating and informative book, *The Greatest Jesus Mystery of All Time*, Christian Bible scholar and award-winning historian Lochlainn Seabrook provides an in-depth examination of this lost, perhaps even censored, historical span known as "The Missing Years of Jesus." As this 2,000-year-old enigma unfolds, the author discusses various theories on why the writers of the Gospels might have "ignored" this 18-year period, why the Church may not have wanted this information published and, more importantly, where Jesus might have been during this time.

Seabrook brings to light vital clues and compelling evidence, from both biblical and extra-biblical material, showing that Jesus most likely spent many of his "Silent Years" traveling across Central Asia where, to this day—from Pakistan to China, from India to Mongolia—there is a widespread traditional belief that Christ traveled across the region in his teens and twenties, studying and teaching under various Buddhist, Hindu, and Tibetan spiritual masters.

To support these theories, Mr. Seabrook includes the complete transcript of an ancient Buddhist manuscript purported to have been written in the years following Jesus's death, which details the Master's time in such countries as India, Nepal, and Tibet.

The author, a devout Christian and a comparative religionist, does not claim to have irrefutable proof but, rather, presents his findings clearly and objectively, allowing the reader to decide for himself.

Also included are an introduction, source notes, index, and an extensive bibliography, making this a must-read for all serious students of Jesus, Christianity, and history.

This is not a heretical book, but one that tries to prove that the appeal and message of Jesus, one of the greatest teachers of all time, was considered a master teacher and sage even at a young age and thousands of miles away from his birthplace in the Mideast.

Holocaust Propaganda, Hamas & October 7

By Peter Winter

The "Holocaust" is, without question, one of the most lied about events in human history and forms a central lynchpin of the Jewish supremacist lobby's stranglehold over Western society.

When the Holocaust is closely studied and analyzed, it collapses under its own weight of half-truths, misrepresentations and outright lies. Not even counting the large absurdities (such as "mass underground gas chambers"), the more outrageous claims include, significantly, numerous claims of Jewish babies being massacred in the most horrendous ways.

While it is easy to debunk these outrageous claims, it is more troubling to consider the psychology and mindset behind them. Who, in their right mind, would even think up such a story, and then, in direct contradiction to all verifiable facts, still continue to claim that it is true, to the point of getting dissenting views criminalized?

The events of October 7, 2023, have served as a present-day example of this Holocaust mindset. The pattern of disinformation and distortions have followed the exact same playbook and have also been unquestioningly repeated by the controlled legacy media.

Not all Israelis are 100% supportive of the disproportional response their government has taken against the women and children of Gaza.

CONTEXT TO OCTOBER 7

The background to the attack on Israel by Hamas militants on October 7 is, briefly put, as follows: The inhabitants of Gaza are all refugees from their homes which originally stood inside the territory of Palestine, and which is now Israel.

The Zionists physically drove the Palestinians out of their houses, towns, and villages, through naked terrorism, violence and several wars. Each time, the Zionists were able to win those wars through superior military technology, acquired from European nations whose corridors of political power have been thoroughly occupied by their respective Jewish lobbies.

At the same time, Israel placed the Gazans under strict military control, determining how much food they could get, what medical services they were allowed, how much electricity they could have, and also controlling access to the 140-square-mile strip of land into which nearly 2 million Palestinians had been crammed.

The borders of Gaza were then surrounded by a huge wall, effectively making it an open-air prison camp.

Finally, even the faintest indication of resistance was (and is) met with a brutal, violent, and deliberately murderous response.

The number of white phosphorus bomb attacks on Gaza civilians, the indiscriminate shootings of Palestinian children (even on the beaches) and the wholesale detention without trial and torture of thousands of Gaza Palestinians, has served to ferment a climate of hostility and anger from the Palestinian side.

The total number of Palestinians killed by Zionist forces since 1948 is hotly disputed. Nonetheless, even the most conservative estimates are around 100,000—if not many more, but certainly no fewer.

It should therefore come as no surprise that the Palestinians are always on the lookout to take revenge in any way they can. They are, how-

ever, woefully under-armed and, against the superior Western-provided technology in the hands of the Israelis, have little or no chance of ever winning a conventional conflict. This is why they have resorted to suicide bombings and knife attacks.

Even these feeble acts of resistance have, however, always been met with devastating responses and further wholesale massacres by overwhelming Israeli firepower. Detentions continued unabated and, by late 2023, at least 10,000 Gazans were being held without trial in Israeli prisons.

Hamas kidnappers are shown breaking through a portion of their Gazan prison wall with a bulldozer. *The New York Times* has reported that Israel was told a year before the attack that an assault was coming and ignored warnings. Was it chutzpah, or part of a plan to finish off the Gazans?

THE OCTOBER 7 ATTACK AND OBJECTIVES

This was why the events of October 7, 2023 were of such significance for the Palestinian cause. In an elaborate system of tunnels under the nose of the Israeli prison wall guards, the Gazans set to work.

Underground, they amassed a handful of one-man-seated, lawnmower-engine-powered gliders, a few hundred motorcycles and dozens of pickup trucks. On the chosen day, bulldozers were used to break holes in the Gaza prison walls and several thousand lightly armed Hamas fighters stormed into the border areas.

The Hamas fighters were not seeking a full-scale invasion of Israel. They knew their numbers were too few, and their arms too light. Instead, they sought to abduct Israelis and take them back into Gaza as hostages.

There, the plan was to exchange the abducted Israelis for the thousands of detained Palestinians within Israel.

There had been a number of precedents behind this strategy, the most prominent of which was the 2011 exchange between Hamas and Israel of the Israeli Defense Force (IDF) soldier Gilad Shalit. The single IDF man had been swopped for 1,027 Palestinians.

The nature of the October 7 "Al-Aqsa Flood" operation and the swiftness with which it was carried out serve as proof that the Hamas militants were lightly armed with AK-47s and rocket-propelled grenade launchers at best. They carried no heavy artillery pieces or other significantly large-caliber weapons. Mobility was the key, and the plan was to storm the border, seize hostages, and flee back into the confines of Gaza.

The attack was preceded by a Qassam rocket barrage from Gaza into Israel. The Qassam missiles are homemade, unguided rockets, which are notoriously easy to shoot down and have never yet posed any major threat or inflicted serious damage on Israel.

At 7:40 a.m., the Hamas fighters stormed the border. As much of the video footage of the attack showed, the Hamas fighters were in no mood to "play fair" with their mission. Numerous Israelis were killed in cold blood in the attack, civilians and soldiers alike, armed and unarmed. Decades of hatred engendered by endless Zionist violence spilled over and blood ran in the sand.

At least 250 Israelis were taken hostage in the attack, many from a sex-, drug- and alcohol-fueled "Nova rave party" taking place near the Gaza prison walls. The attack achieved complete surprise and overwhelmed a number of Israeli military and police points. Within a day, Hamas militants had fled with their hostages in tow.

As the full extent of the attack dawned upon the seemingly incompetent Israeli military, their first reaction was to send in attack helicopters, armed with heavy-caliber missiles and long-range weaponry, in an attempt to root out the invaders.

BEHEADED BABIES IN OVENS

As the dust settled, the Zionist propaganda machine swung into action, as if on auto-cue. Within hours, news outlets around the globe were citing a report by Israeli news channel *i24News*, which published a YouTube livestream titled "Beheaded Babies and Women Found in Kfar Aza," featuring U.S. correspondent and Colorado native Nicole Zedeck.[1]

In the video, Zedeck walked through an area with body bags and, at one point, stated, "One of the commanders here said at least 40 babies were killed—some of them … their heads cut off."[2]

U.S. President Joe Biden was among those who repeated the claim that "terrorists [were] beheading children," while speaking at a meeting of Jewish leaders at the White House.

Meanwhile, mainstream news outlets, from Metro News in the UK to Sky News Australia, also reported on the alleged atrocity, with Fox News, in an October 10 headline, claiming, "At least 40 babies, some beheaded, found by Israel soldiers in Hamas-attacked village."

Israeli Prime Minister Benjamin Netanyahu's spokesperson Tal Heinrich stated to media that babies and toddlers had been found with their "heads decapitated" in Kfar Aza.[3]

The "beheaded babies" story was quickly followed with an even more dramatic report from Jewish Telegraphic Agency (JTA) journalist Benjamin Sales quoting first responder Asher Moskowitz that a Jewish baby had been burned alive in an oven by Hamas fighters on October 7.

This Holocaustian claim was once again loudly proclaimed around the world without question.

Eli Beer, founder of Israeli emergency services organization United Hatzalah, provided more details at the Republican Jewish Coalition's Annual Leadership Summit in Las Vegas on October 28. In his address to the convention, he said: "A little baby in the oven. These bastards put these babies in the oven and put on the oven. … We found the kid a few hours later."[4]

When the Israeli government and the IDF were pushed for more details on these Holocaustian atrocities, they were forced to sheepishly admit that they could not "confirm that babies were beheaded."[5]

Left-wing Jewish reporter Oren Ziv, working for Israeli news outlet *+972 Magazine*, reported that the story was without foundation, saying that, even after extensively touring the scene, "we didn't see any evidence of this, and the army spokesperson or commanders also didn't mention any such incidents. … Soldiers I spoke with in Kfar Aza yesterday didn't mention 'beheaded babies'."[6]

Similarly, the "baby in the oven" story was thoroughly investigated by several journalists and found to be completely untrue and without any foundation in fact.[7]

Hamas militia members rejoice on top off an Israeli tank captured on October 7. What they accomplished with motorcycles, makeshift "whirligigs" and zero heavy weapons was a testament to their determination and ingenuity.

HAMAS VIOLENCE WAS REAL

These gross exaggerations do not mean that Hamas fighters did not gun down civilians and young Israelis.

Video filmed by uniformed Hamas gunmen makes it clear they intentionally shot many Israelis with Kalashnikov rifles on October 7. But, like Holocaust propaganda, they have to be viewed in context to the prior events.

Every Palestinian in Gaza has firsthand seen and suffered from Zionist expulsion policies, has had relatives killed in indiscriminate Israeli bombings, ground invasions, and air strikes. The poison well of hatred that erupted on October 7 was first dug by the Zionists. It is little wonder that, when presented with the opportunity, the Hamas fighters gave back to the Israelis a small sample of the cruelty to which the Palestinians have been subjected to for the last 80 years.

The Zionist propaganda machine did not stop with "beheaded babies" and "babies in ovens," however. Next came the claims of mass rapes and, finally, images of bombed buildings and cars, both of which centered around the Nova rave party.

"MASS RAPES" PROPAGANDA EMERGES

The "mass rapes" story started with a widely publicized claim by Israeli rescue worker Chaim Otmazgin, who claimed that he had seen the body of a teenager who had been shot dead with her pants pulled down below her waist in the Kibbutz Be'eri.

Otmazgin, a volunteer with the Israeli search and rescue organization ZAKA, alerted journalists to what he had seen, and his account of "rape" then spread like wildfire in the controlled media. It was also repeated every time an image of a partially clothed Israeli woman—dead or alive—appeared in the media in connection with October 7.

Soon, the whole world had been informed that Hamas had committed mass gang rapes of Jews during the attack. This story remains one of the Zionist mainstays of October 7.

The trouble was, Otmazgin's story was untrue. Nearly three months later, ZAKA admitted that his "interpretation" of the scene was wrong. After cross-checking with military contacts, ZAKA found that a group of soldiers had dragged the girl's body across the

room to make sure it wasn't booby-trapped by Hamas. During the procedure, her pants had come down.[8]

Although Otmazgin later admitted that he was "wrong," his retraction was largely ignored by the controlled media that, to this day, continue to make the mass rapes claim on behalf of the Zionists.

A United Nations team was then sent in to investigate the claims.

The report said there was:

> … credible circumstantial information which may be indicative of some forms of sexual violence. … [This] included photos and videos showing a minimum of 20 corpses with clothes that had been torn, revealing private body parts, and 10 bodies with indications of bound wrists and or tied legs. No digital materials showed sexual violence in real time.[9]

The media coverage of this photographic evidence ignored the reality that the state of undress of many of the alleged "rape victims" was in fact a reflection of the Nova "rave party" activities before the Hamas raid started.

As numerous pre-raid photographs of the Nova rave party showed, a large number of female attendees had already divested themselves of much of their clothing and, no doubt, given the drug- and alcohol-fueled nature of the event, had been engaging in sexual activity.

Orit Sulitzeanu, the executive director of "The Association of Rape Crisis Centers in Israel," was quoted by PBS News as admitting that her organization had "spent months gathering evidence of sexual violence," sifting through many accounts emerging from the chaotic early days just after the attack. "Some of those stories that turned out not to be true were not lies," she said. They were, she said, "mistakes."[10]

Finally, there have been zero actual cases of rape lodged to date. There are no actual witnesses, or victims who have come forward. The Zionist propaganda machine has, in true Holocaustian fashion, simply claimed that all the victims had been killed and "charred beyond recognition" (a fact which would make any evidence of sexual assault impossible to find or prove) or had been "buried quickly within 24 hours" as Jewish custom dictates.[11]

Thus, just like the "special commandos" of the alleged "Nazi gas chambers," there are no actual witnesses or survivors, merely vague allegations that are expected to be taken on face value alone.

In summary, then, there is no actual evidence of these "mass rapes" or "sexual assaults."

IDF DESTROYED CARS AND BUILDINGS

The claim that the Hamas fighters bombed numerous buildings and destroyed hundreds of vehicles at the Nova rave has also been definitively debunked.

Firstly, the weaponry that the Hamas militants carried with them on their raid could never have inflicted the sort of mass damage that was claimed.

One of the most gruesome photographs released by Israeli Prime Minister Benjamin Netanyahu, for example, was of two charred corpses inside a bombed vehicle. The two corpses were, the Zionists said, killed by Hamas as the victims were driving past.

However, the damage to the vehicle, and the roof in particular, could only have been caused by a powerful missile, typical of those carried by Israeli attack helicopters, and probably a Hellfire missile, not the weapons Hamas members were armed with that day.

This "mistake" on the part of the Zionists provides the answer to the final part of the propaganda lies about October 7: that of the burned vehicles and bombed houses.

ISRAELI MEDIA ADMITS IDF KILLED JEWS

As is now well-known, the Israeli Hannibal Directive is a doctrine whereby the IDF is authorized to knowingly engage a target area even if Jews are present in the danger zone. It is named after the famous Carthaginian general who took poison rather than be captured by the Romans.

The first Israeli news source to admit that the IDF had been responsible for firing upon Jews *and* Hamas militants at the same time was the

Israeli soldiers inspect the burned hulks of cars of attendees of the Nova music festival near Israel's border with the open-air prison known as Gaza. Rather than allow Hamas resistance fighters to escape back home with prisoners, the Israeli military attacked and destroyed all moving vehicles in the area, whether their own people were inside or not.

Keshet 12 TV news service. An interview broadcast on that station shows two Israeli soldiers freely admitting that they had been ordered to shoot into a place where there were Jews as well as Hamas members.

One of the soldiers, a female, then added that she had refused to "shoot into a Jewish community," but that she was unable to stop the others.

Israeli newspapers—in Hebrew—are full of reports of damage being inflicted upon Jewish buildings and vehicles by the IDF. Most of these reports remain untranslated and unreported by the non-Hebrew-language media and are, thus, withheld from common knowledge outside of Israel.

There has to date been only one notable exception to this deliberate censorship policy: Australia's ABC News dared to buck the trend of covering up the truth in September 2024.

In an article quoting directly from the Hebrew-language *Haaretz* newspaper, ABC News said that "Israeli forces [are] accused of killing their own citizens under the 'Hannibal Directive' during October 7 chaos."[12]

ABC News said that Israeli newspaper *Haaretz* had confirmed "what many Israelis have feared since the Hamas attacks on October 7 in southern Israel. Israeli forces have killed their own citizens."[13]

The report continued by saying that, in July 2024, *Haaretz* had revealed that the commanders in the IDF gave the order to fire on troops that had been captured by Hamas at three separate locations.

One former Israeli officer, air force Col. Nof Erez, told *Haaretz* that the "Hannibal Directive" was not specifically ordered but was "apparently applied" by responding aircrews.[14]

Col. Erez said:

> Panicked, operating without their normal command structure and unable to coordinate with ground forces, they fired on vehicles returning to Gaza, knowing they were likely carrying hostages. This was a "mass Hannibal." It was tons and tons of openings in the fence, and thousands of people in every type of vehicle, some with hostages and some without.[15]

Ultra-Zionist Sen. Tom Cotton (R-Ark.) has introduced legislation in Congress that aims to ban the U.S. federal government from using the term "West Bank," and instead use "Judea" and "Samaria," terminology much preferred by Israel.

In addition, Israeli air force pilots described to the *Yedioth Ahronot* (Y-Net) newspaper the firing of "tremendous" amounts of ammunition on October 7 at people attempting to cross the border between Gaza and Israel.

Reporter Yoav Zeitoun said:

> Twenty-eight fighter helicopters shot over the course of the day all of the ammunition in their bellies, in renewed runs to re-arm. We are talking about hundreds of 30-millimeter cannon mortars and Hellfire missiles. …[16]
>
> The frequency of fire at the thousands of terrorists was enormous at the start, and only at a certain point did the pilots begin to slow their attacks and carefully choose the targets.[17]

The ABC report also translated an article written by Y-Net investigative journalist Ronen Bergman who said:

> [The] IDF instructed all its fighting units in practice to follow the "Hannibal Directive," although without clearly mentioning this explicit name. … The instruction is to stop "at all costs" any attempt by Hamas terrorists to return to Gaza.[18]

Bergman's investigation found that at least 70 vehicles were destroyed by Israeli aircraft and tanks to prevent them being driven into Gaza, killing everyone inside, Israelis and Hamas fighters alike:

> It is not clear at this point how many of the abductees were killed due to the activation of this [Hannibal] order on October 7.[19]

In one case, as reported by the Hebrew-language media, Israeli civilians were killed when an IDF tank was ordered to fire upon a house in the Kibbutz Be'eri after "a prolonged firefight with around 40 Hamas gunmen who had been holding 15 hostages inside and outside."

In total, at least 101 Jews were killed in that kibbutz alone at the end of the fighting.[20] Note that inhabitants of Israeli kibbutzes in areas set up near the border with Gaza are in actuality heavily armed militant settlers. When Hamas fighters neared the kibbutzes or fired upon them, Jewish settlers responded in self-defense with weapons fire of their own.

Finally, many Jewish survivors reported in interviews that their fellow Jews had in fact been killed by the IDF. One notable example was one Yasmin Porat, who was living at the Kibbutz Kabri on the day of the attack. When interviewed on the Kan Israeli Public Broadcasting Corporation's *This Morning* show, hosted by veteran Israeli journalist Aryeh Golan, Porat repeatedly said that Jews had been killed by the IDF in the "crossfire":[21]

> **Yasmin Porat:** And then they hear me and stop firing. I see on the lawn, in the garden of the people from the kibbutz. There are five or six hostages lying on the ground outside, just like sheep to the slaughter, between the shooting of our [fighters] and the terrorists.
>
> **Aryeh Golan:** The terrorists

shot them?

Porat: No, they were killed by the crossfire. Understand there was very, very heavy crossfire.

Golan: So our forces may have shot them?

Porat: Undoubtedly.

Golan: When they tried to eliminate the abductors, Hamas?

Porat: They eliminated everyone, including the hostages. Because there was very, very heavy crossfire. I was freed at approximately 5:30. The fighting apparently ended at 8:30. After insane crossfire, two tank shells were shot into the house. It's a small kibbutz house, nothing big. You saw it on the news.

Golan: Yes.

Porat: Not a large place. And at that moment everyone was killed. There was quiet, except for one survivor that came out of the garden, Hadas.

Golan: How were they all killed?

Porat: From the crossfire.

Golan: Crossfire, so it could also be from our forces?

Porat: Undoubtedly."[22]

[In the case of such firefights, it is thus easy to understand why some bodies inside the dwellings would be charred or burned should the Hamas fighters have fired rocket-propelled grenades into the structures from whence weapons fire was emanating or Israeli tank shells exploded inside a dwelling.—Ed.]

YET ANOTHER FAKE ATROCITY STORY

From all this evidence, it is clear that the events of October 7, 2023, transpired very differently from the story that was put out by the Zionists, and which was parroted by the pro-Israel controlled media, foreign leaders, U.S. politicians and even the American president himself.

The parallels with the original "Holocaust" stories are also explicit, even down to the tactics employed. Once again, the impartial observer is left to consider the motivations and psychology of the people making up these stories.

In the case of the Holocaust, the main motivations have been to entrench the Jewish lobby's power in Western nations, and thereby to support the state of Israel.

In the case of the October 7 attack, the main motivation has been to use it as a reason to finally eradicate the residents of the Gaza Strip once and for all, and move on to the final annexation of the West Bank and the final expulsion of the Palestinians from their ancestral homeland.

Only time will tell if this final objective is reached. In the interim, those who can see these events for what they are should do whatever they can to bring the facts to the public's attention, before this too becomes another myth which is illegal in more than a dozen nations to question. ❖

UN Secretary-General Antonio Guterres warned reporters that the situation in Gaza was turning into a "graveyard for children." That warning came in November 2023, just a month after the Israeli bombing campaign began. In the year since, Israel has killed an estimated 50,000 inhabitants of Gaza, and some say the number of dead could be 200,000.

OPERATION HANNIBAL

You'll help TBR survive and we'll give you the whole, unadulterated truth about what happened Oct. 7, 2023

On October 7, 2023, Hamas militias broke through the massive prison wall surrounding the Gaza Strip (that 140-square mile outdoor prison camp that is actually part of historic Palestine), and attacked Israel. According to initial reports, these fighters then proceeded to slaughter innocent Israeli civilians, gang-raping and then killing scores of Israeli women, even going so far as to behead little Jewish babies, several of whom were alleged to have been cooked alive in ovens.

We were told that these heavily armed fighters killed everything in their path, wantonly murdering all Israelis they came across. Western news outlets and the U.S. president added credence to these claims by repeating them often.

This propaganda tale had dire consequences for the people of the Holy Land. The "surprise" attacks were used by Israel to launch one of the most deadly military operations carried out in recent memory. Israel claimed that 2,000 or so Israelis were

massacred on October 7. This was then used to justify the genocide of the inhabitants of what was left of the Gaza open-air "concentration camp." Israeli PM Benjamin Netanyahu ordered attacks from land and air, and, in one year, killed an estimated 50,000 people, most of them women, children and the elderly.

Surely, "our" leaders and the Western news media knew the truth. They have satellites and drones and reporters galore to uncover the truth.

But truth is in very short supply for Western political leaders and the legacy news media. Sadly, none but a few courageous reporters in the left-wing news media, allegedly nominally "pro-Palestinian," had the guts or the interest in investigating these claims for fear of being labeled anti-Semites—a death knell for anyone who wants to make his living in the Zionist-dominated global media apparatus. Thus, even these organizations stayed silent, for the most part.

This brings us to Asa Winstanley, a fearless journalist living in London and writing for a group called *The Electronic Intifada*. His report on the Hamas attacks obliterates the carefully crafted Israeli propaganda. This is not to say that hundreds of Israelis did not die during the attacks, but that possibly a majority of what we initially heard about the assault was not true.

In response, on October 17, 2024, British police raided Winstanley's home and seized all of his electronic devices. Winstanley's crime, in the eyes of Israeli and Western authorities,

was a report he assembled, using data taken mostly from prominent Hebrew-language newspapers (including *The Times of Israel* and *Haaretz*) that exposed a dirty little Israeli secret known as Operation Hannibal.

Operation Hannibal is the code name given to Israel's shocking strategy to kill its own citizens and soldiers should they be captured so they cannot be held for ransom or used as bargaining chips in future negotiations between Israel and its foes. This information is so appalling, many normal humans cannot believe it. But here it is, in black and white, based almost entirely on surprisingly honest reporting found in Israel's own Hebrew-language news outlets.

OPERATION HANNIBAL

How Israel Murdered Hundreds of Its Own People on Oct. 7, 2023

INTRODUCTION

By now, everyone has heard that, on Oct. 7, 2023, Hamas fighters broke out of Gaza, invaded southern Israel, and slaughtered 1,200 innocent Israelis.

On that day, stories leaked by the Israeli military told of beheaded Israeli babies, raped Israeli women—even one Israeli baby who was reportedly cut from a pregnant woman and burned alive in an oven.

Eventually, even Israeli reporters had to admit that these lurid stories never happened—yet the tall tales continue to be repeated—even by President Joe Biden—to justify Israel's ongoing genocide in the Gaza Strip in Palestine.

What has not received much media attention, however, are credible reports that the Israeli military could be responsible for a significant number of Israeli deaths on that day.

Days after Hamas fighters attacked Israeli soldiers, security officers, and citizens, AFP investigative reporters began to hear reports that, as part of its official heavy-handed response, the Israeli military had responded to the guerrilla attack with heavy munitions, including tanks and attack helicopters, firing directly into areas where Israeli citizens were holed up, often hiding from the fighting.

The following report from online news agency **"The Electronic Intifada"** offers a different take on the events that day, assembling highly detailed accounts gleaned from much-more-honest translated Israeli newspaper articles.

In this 12-page shocking report, you will read multiple credible accounts of how the Israeli military killed fellow citizens and soldiers, sometimes accidentally and sometimes on purpose via "Operation Hannibal" tactics.

The Western mainstream media has refused to report these findings to the American people, so we have taken it upon ourselves to get that information out there to as many people as possible in the hopes that this will help put an end to the bloodshed in that region.

By Asa Winstanley
The Electronic Intifada

On Oct 7, 2023, Palestinian fighters, led by Hamas, launched an unprecedented military offensive out of the Gaza Strip. The immediate goal was to inflict a shattering blow against Israel's army bases and militarized settlements that have besieged Gaza's inhabitants for decades—all of which are built on land that Palestinian families were expelled from in 1948.

The bigger goal was to shatter a status quo in which Israel, the United States and their accomplices believed they had effectively sidelined the Palestinian cause, and to bring that struggle for liberation back to the forefront of world attention.

"Operation Al-Aqsa Flood," as Hamas called it, was, by any objective military measure, a stunning success. It was said at Israel's military headquarters that day that "the Gaza Division was overpowered," a high-level source present later recalled to Israeli journalists. "These words still give me the chills."

Covered from the air by armed drones and a barrage of rockets—which opened the offensive at 6:26 a.m. exactly—Palestinian fighters launched a lightning raid over the Gaza boundary line. The Israeli army bases were conquered in hours. Some of the settlements still had an armed Palestinian presence two days later. The military communications infrastructure was instantly smashed. Simultaneous attacks took place by land, air and sea. Palestinian drones took out tanks, guard posts and watchtowers.

Caught completely unprepared, most of the Israeli soldiers manning the bases were either killed or captured and taken back to Gaza as prisoners of war. A reported 255 Israelis were captured, including soldiers and civilians. Since then, 154 of them have been released, mostly by Hamas in November's prisoner exchange.

A $4.5 Trillion War Machine in Support of Genocidal Israel

By James Van Deventer

The United States of America has spent an incredible $4.5 trillion, has lost more than 8,000 soldiers killed and 53,000 seriously wounded in a devastating series of 14 wars in the Middle East since 1948—all in support or on behalf of the state of Israel.

In addition, since its founding, Israel has received approximately $310 billion (inflation-adjusted) in total economic and military aid from the United States, making it the largest cumulative recipient of U.S. "foreign aid."[1]

These statistics are a testimony to the power of the Jewish lobby over the U.S. government—and also of how long their ability to direct American foreign and domestic policy has existed.

WAR 1: THE ARAB-ISRAELI WAR, 1948

On May 14, 1948, just 11 minutes after David Ben-Gurion declared the establishment of the State of Israel, the United States, under President Harry S. Truman, became the first country to officially recognize Israel.

The United States was also instrumental in the UN Partition Plan for Palestine (Resolution 181), adopted on November 29, 1947. This plan recommended the partition of Palestine into separate Jewish and Arab states and was a precursor to Israel's declaration of independence.

The United States imposed an arms embargo on the region, restricting the sale of weapons to both Jews and Arabs. Despite the embargo, the nascent Israeli forces acquired arms indirectly from Czechoslovakia, including rifles, machine guns, and Messerschmitt fighter planes, with tacit U.S. acknowledgment of this arrangement.

Prime Minister Mossadeq under house arrest in Ahmadabad in 1965. He died there in 1967. In October 2023, the CIA finally acknowledged its role in the dirty-tricks operation to oust him and destroy his reputation.

In addition, the U.S. government deliberately turned a blind eye to the large number of American Jewish organizations that helped fund these arms purchases and facilitated the smuggling of weapons to Israel. These actions, illegal under the Neutrality Act (1794, as amended), went unprosecuted, as did the equally illegal participation by American Jews in the 1948 war as volunteers in the Mahal (foreign volunteers fighting for Israel).

The United Jewish Appeal (UJA) raised millions of dollars in America, much of which went to Israel for military purposes, also in open contravention of the law, and with the tacit approval of the U.S. government.

Since then, the Jewish lobby's control over U.S. foreign policy has only strengthened. The U.S. has utilized its veto power in the UN Security Council to block resolutions perceived as unfavorable to Israel. Since 1972, the U.S. has vetoed at least 53 UN Security Council resolutions critical of Israel. Notably, on November 20, 2024, the U.S. vetoed a resolution demanding an immediate ceasefire in Gaza.

WAR 2: THE IRANIAN COUP D'ÉTAT, 1953

By 1953, the nation of Iran had democratically elected a nationalist leader, Prime Minister Mohammad Mossadeq. His government, while not seeking direct conflict with Israel, made its support of the Palestinians clear, and provided aid in various formats to the people that Israel had displaced from Palestine.

This immediately made Mossadeq a target: The CIA, along with British intelligence, orchestrated a coup codenamed Operation Ajax to overthrow him, and to reinstate Shah Mohammad Reza Pahlavi. (The British primarily became involved because Mossadeq

had nationalized the Anglo-Iranian Oil Company, now better known as British Petroleum, or BP).

As later revealed in CIA documents[2] which were declassified in 2013, the coup was orchestrated by CIA chief Kermit Roosevelt Jr. (the grandson of Theodore Roosevelt) and Britain's MI6. According to the CIA papers, the cost of this exercise was approximately $1 million.

The tactics used included funding a disinformation campaign, spreading rumors to discredit Mossadeq as weak, corrupt, and pro-Communist; the bribing of key Iranian officials, military officers, and politicians to support the coup; and the funding of protests and staged violent demonstrations to create chaos, portraying Mossadeq as unable to maintain order.

Finally, a coup in August 1953 saw military forces arrest Mossadeq, who was then placed under house arrest until his death in 1967.

The Shah returned to power with U.S. and UK backing, becoming an autocratic ruler heavily reliant on Western support. The Shah then immediately established discreet military, economic, and intelligence ties with Israel, completely negating any threat to the Jewish state.

However, the Shah's extremely oppressive regime, supported by U.S. arms and intelligence, fueled anti-American sentiment. This resentment ultimately culminated in the 1979 Iranian Revolution.

WAR 3: THE LEBANON CRISIS, 1958

In 1958, the government of Lebanon was under the control of a Maronite Christian, President Camille Chamoun. His pro-Western orientation and his firm opposition to Egyptian President Gamal Abdel Nasser's pan-Arabism and the formation of the United Arab Republic (UAR) between Egypt and Syria in 1958 resulted in Lebanon establishing covert links with Israel, with the latter nation providing intelligence and logistical support, facilitated through the United States.

News of these links inevitably became public, and Chamoun instantly became highly unpopular with the Muslim population, which made up 60% of Lebanon in 1958. When Chamoun sought a second term in office, unrest erupted.

In order to prop up the Chamoun government, President Dwight D. Eisenhower ordered the deployment of 14,000 U.S. troops to Lebanon.

The crisis de-escalated with the election of compromise candidate Gen. Fuad Chehab as Lebanon's president, followed by a peaceful transfer of power. The U.S. intervention successfully prevented the collapse of the pro-Western Lebanese government, and maintained the neutral Lebanese policy toward Israel.

> American deaths resulting from the treacherous attack by Israel on the *Liberty* totaled 34 men.

The cost of the undertaking, officially known as Operation Blue Bat, was estimated by the Department of Defense to have been $225 million. This venture also saw the first American death in combat in the Middle East, and the first three wounded.

WAR 4: THE SIX-DAY WAR, 1967

The Six-Day War of June 1967, fought between Israel and the neighboring Arab states of Egypt, Syria, and Jordan did not see direct U.S. involvement—except for the infamous attack on the USS *Liberty* by Israel.

Nonetheless, America's diplomatic, political, and military support-level involvement in the Six Day War was significant both before, during, and after the conflict, all in support of the Israelis.

The United States provided intelligence to Israel, including satellite imagery and reports on Arab troop movements. This proved to be the most significant factor that allowed Israel to start the war with a surprise attack, as the Jewish state was in possession of a complete and detailed knowledge of Arab military strength, positions, and strategies.

This war also marked the first time that the United States replaced France as Israel's primary supplier of arms. Finally, after Israel's swift victory, the United States used its veto power in the UN Security Council to block several resolutions condemning Israel for instigating the unprovoked war.

American deaths resulting from the treacherous attack by Israel on the *Liberty* in 1967 totaled 34. Another 171 Americans were injured in the attack. Damage was estimated at approximately $10 million. Despite this act of betrayal, U.S. support for Israel grew even stronger, and the incident was completely covered up.

WAR 5: THE YOM KIPPUR WAR, 1973

The Yom Kippur War of October 1973 was fought between a coalition of Arab states led by Egypt and Syria against Israel. In this conflict, the U.S. played a critical role through the provision of intelligence, military support, and diplomacy in support of Israel.

Egypt, under President Anwar Sadat, and Syria, under President Hafez al-Assad, sought to reclaim the Sinai Peninsula and the Golan Heights respectively, both territories lost to Israel in the 1967 war. The U.S. gave advance warnings of the Arab troop mobilizations to Israel but, despite this, the Arab forces initially made significant territorial gains.

Seeing that Israel was on its back foot, the U.S. moved quickly to intervene. Within days, the U.S. launched Operation Nickel Grass, a massive airlift of military supplies to Israel.

The operation delivered an estimated 22,325 tons of military equipment, including tanks, ammunition, and spare parts, all of which ensured that Israel could stave off defeat. The operation cost U.S. taxpayers approximately $2.2 billion.

The resupply operation was critical to Israel's recovery from its initial losses. With U.S. support, Israel was able to launch counteroffensives, crossing the Suez Canal into Egypt and advancing deep into Syrian territory. A ceasefire was eventually forged.

In response to this U.S. support for Israel, Arab members of the Organization of the Petroleum Exporting Countries (OPEC) imposed an oil embargo on the U.S. and other Western nations in 1973. This embargo caused a global energy crisis, led to sky-high oil prices, and caused severe disruption across Western nations.

Despite this, the U.S. government remained steadfast in its support of Israel—or, rather, it remained steadfastly under the control of the Jewish lobby—and the OPEC boycott was only ended after intense diplomatic efforts by Jewish-American Secretary of State Henry Kissinger.

His efforts led to the signing of the 1974 Sinai Interim Agreement, which saw Egypt regain control over most of the Sinai Peninsula, and a separate ceasefire agreement between Israel and Syria. The OPEC boycott was then lifted in March 1974.

WAR 6: THE IRAN-IRAQ WAR, 1980–1988

The downfall of the Shah of Iran in the Revolution of 1979 had temporarily weakened that state through the chaos that followed. Seeking to exploit this disorganization, Iraq, under Saddam Hussein, launched an invasion of Iran in 1980, motivated primarily by longstanding territorial disputes, particularly over the Shatt al-Arab waterway.

Saddam, a Sunni Muslim, also feared that the Iranian Revolution would spread and incite the majority Shia Muslim population of Iraq against his government.

The United States was faced with a dilemma: both Iran and Iraq were anti-Israel, and so there was, from the Jewish lobby's point of view, no "good side" to support.

This led to an initial policy of U.S. neutrality in the conflict, a strategy that lasted until 1982, when Iran made significant territorial gains and started advancing into Iraq.

At that stage, fueled by increasingly vocal protests against the U.S. and Israel in Iran, which portrayed those nations as "great" and "little" Satan, respectively, the United States adopted a policy of supporting Iraq, which was more secular, against Iran.

The main motivation for this decision was that the U.S. hoped that Saddam's willingness to be friendly toward the U.S. could be used to change his attitude toward Israel.

As a result, the U.S. began providing Iraq with indirect economic and military assistance, including satellite imagery and tactical information to help target Iranian forces. The U.S. also facilitated the sale and transfer of equipment that could be used for both civilian and military purposes.

> This embargo caused a global energy crisis, led to higher oil prices, and caused disruption across the West.

By 1983, Donald Rumsfeld, then a special envoy, visited Baghdad to meet in person with Saddam, signaling improved U.S.-Iraq relations.

The U.S. had also imposed an official arms embargo upon Iran, but Israeli officials, including David Kimche, director-general of Israel's Foreign Ministry, made a formal and secret proposal to the Reagan administration.

Kimche's plan was to exploit divisions within the Iranian leadership and improve Israel's regional security by influencing the war between Iran and Iraq. This could be done, he told Reagan administration officials, by secretly selling weapons to Iran.

The U.S. government immediately agreed to the Israeli plan—even though it was in contravention of its own official arms embargo policy against the new Islamic Republic of Iran.

Israel then facilitated the transfer of U.S.-made weapons, including TOW anti-tank missiles and Hawk anti-aircraft missiles, to Iran. In some cases, Israel provided the arms directly from its stockpiles, with the understanding that the U.S. would replenish its inventory at a later stage.

Israeli arms dealers and intelligence officials, including a "terrorism advisor" to two Israeli prime ministers, Amiram Nir, played active roles in negotiations with Iranian representatives. They coordinated logistics, ensuring weapons reached Iranian buyers while maintaining plausible deniability for the United States.

The weapons were then sold to Iran at inflated prices, and the excess funds were diverted to support a "right wing" anti-Sandinista rebel group in Nicaragua, the "Contras"—all in violation of U.S. law.

This secret program, later to become known as the Iran-Contra Affair, was eventually exposed and resulted in the indictment and conviction of several U.S. officials.

While Israel's role was integral, the Jewish state avoided any major backlash as the controlled media instead focused on the players in the Reagan administration, such as Col. Oliver North.

The media also ignored the real meaning of the Iran-Contra Affair, namely, that Israel possessed such influence within the U.S. government that it was able to induce senior ranking officials to break their own laws to support Israeli interests.

The U.S. involvement in the entire Iran-Iraq conflict cost U.S. taxpayers in excess of $5 billion.

WAR 7: THE MULTINATIONAL FORCE IN LEBANON, 1982–1984

By 1982, Lebanon's ongoing internal strife had finally erupted into open warfare between various squabbling groups of Christians, Muslims, Palestinians, and Syrians.

The conflict intensified after the

1982 Israeli invasion of Lebanon, which the Jewish state had launched to expel the Palestine Liberation Organization (PLO) from southern Lebanon.

The U.S., as usual, immediately intervened to support Israel, and created a "Multinational Force" (MNF), comprised of troops from the United States, France, Italy, and, later, the UK. The MNF was supposedly formed to ensure that all PLO fighters would be "evacuated" from the Lebanese capital of Beirut, following a U.S.-brokered ceasefire.

Initially, 800 U.S. Marines were deployed to Beirut as part of the MNF, but were withdrawn once the PLO fighters had been evacuated to Tunisia, Yemen, Sudan, Jordan, and Syria.

A short period of peace followed, but was abruptly shattered following the assassination of Bashir Gemayel, a key Lebanese Christian leader and president-elect, in September 1982. His death triggered massacres at the Sabra and Shatila refugee camps, where Christian militias, protected by Israel Defense Forces (IDF) units, murdered hundreds of Muslim Palestinian refugees forced out of Israel.

In response to the massacres, the MNF re-entered Beirut with an expanded mandate to stabilize the city and restore order. As U.S. involvement grew, so did the number of American soldiers—and, simultaneously, so did anti-American hatred.

In April 1983, a truck bomb destroyed the U.S. embassy in Beirut, killing 63 people. In response, the U.S. Navy, positioned offshore, started bombarding those parts of Beirut and other regions of Lebanon where, it was claimed, "anti-American" (actually anti-Israeli) forces were concentrated.

These attacks did not go unanswered and, on October 23, 1983, a suicide bomber drove a truck loaded with explosives into the U.S. Marine barracks at Beirut International Airport, killing 241 American servicemen. A simultaneous attack on the French barracks killed 58 French soldiers.

The devastating blow persuaded President Ronald Reagan to order a complete withdrawal of all American forces in February 1984. Other MNF contingents also departed soon after, leaving Lebanon in a state of turmoil.

In total, the U.S. suffered 266 military deaths and 146 wounded in this abortive operation. It also cost taxpayers in excess of $1.2 billion.

WAR 8: THE GULF WAR, 1990–1991

In the interim, Iraq, under Saddam, had started providing direct material, military and financial support to the Palestinians in their ongoing war of liberation against Israel.

Iraq provided arms, ammunition, and military equipment to Palestinian militant groups such as Fatah and the Popular Front for the Liberation of Palestine (PFLP). Palestinian fighters received training in Iraqi military camps, starting after the end of the Iran-Iraq War in 1989.

> Israel's rift with Iraq was due to Saddam's support for the people suffering under Israeli rule in Palestine.

The increase in active support for the Palestinians immediately made Saddam a prime target of Israeli aggression—and, therefore, U.S. aggression.

By August 1990, a major dispute between Iraq and Kuwait over oil production and debt repayment had reached the breaking point. Iraq accused Kuwait of "slant-drilling" across international boundaries to tap into Iraqi oil fields, thereby stealing Iraqi resources, and undermining Iraq's economy.

When the situation was not resolved, Saddam invaded and annexed Kuwait. This was the opportunity that the United States had sought, and a plan was immediately set in motion to attack Iraq.

After easily obtaining international consensus on the matter, the U.S. deployed over half-a-million troops to the Persian Gulf region, alongside forces from 34 other nations.

Operation Desert Storm then began in January 1991, with an extensive aerial bombing campaign, followed up a month later with a land-based invasion of Kuwait. The campaign only lasted a few days, as the Iraqi forces stood no chance against the advanced weaponry deployed by the United States and its allies. Even so, some 294 U.S. personnel were killed in the 100-hour war, which cost the U.S. Treasury $9 billion.

Although, as always, America's intervention took place with the ultimate goal of protecting Israel, it was well understood on all sides that direct Israeli involvement would split the anti-Iraq alliance.

As a result, U.S. and Israeli leaders ensured that Israel remained on the sidelines, even when Iraq launched 39 Scud missiles at Israel in February 1991 in an attempt to provoke an Israeli response.

The Scud attack also, however, led to the U.S. placing Patriot missile batteries and stationing American troops directly in Israel, marking a significant increase in American-Israeli "cooperation."

WAR 9: THE AIR WAR AGAINST IRAQ, 1991–2003

For the next 12 years, the United States maintained an almost constant air war against Iraq, establishing "No-Fly Zones" over large parts of that nation's territory. Along with aircraft from the UK and France, the U.S. Air Force flew almost continual missions over Iraq, bombing anything it deemed hostile.

The U.S. bases in Saudi Arabia and other Gulf states used to enforce the no-fly zones sparked tensions with local populations. Most notably, the Saudi Islamist Osama bin Laden and his al Qaeda organization specifically cited the U.S. military presence in Saudi Arabia as a key grievance.

The no-fly zones were also not

authorized by the UN, leading to international criticism. France stopped participating in the campaign in 1996 for this very reason.

The cost to the American Treasury for this war came to over $12 billion.

WAR 10: THE WAR IN AFGHANISTAN, 2001–2021

On September 11, 2001, Bin Laden's al Qaeda launched a surprise—and devastating—terrorist attack upon America, destroying the World Trade Center in New York and striking the Pentagon in Washington, D.C. with the use of hijacked airliners.[3]

In a later statement, Bin Laden specifically stated why the attacks took place:

> The American people have chosen, consented to, and affirmed their support for the Israeli oppression of the Palestinians, the occupation and usurpation of their land, and its continuous killing, torture, punishment and expulsion of the Palestinians. …
>
> The American people are the ones who pay the taxes which fund the planes that bomb us in Afghanistan, the tanks that strike and destroy our homes in Palestine. …
>
> These tax dollars are given to Israel for it to continue to attack us and penetrate our lands. … The Jews have taken control of your economy, through which they have then taken control of your media, and now control all aspects of your life making you their servants and achieving their aims at your expense."[4]

Bin Laden therefore made it very clear: Al Qaeda attacked America because it was serving Jewish interests in the Middle East, and had allowed Jews to "take control of the media" and "all aspects" of American life.

Bin Laden was living in Afghanistan in 2001, under the protection of the Taliban, when the September 11 attacks took place. The United States then demanded that the Taliban hand him over and dismantle al Qaeda's operations in Afghanistan.

The Taliban refused, and, in October 2001, the U.S. launched "Operation Enduring Freedom"—the invasion of the vast nation of Afghanistan as part of America's "war on terror."

Kabul, the Afghan capital, fell within weeks, and an "Interim Afghan Government" was installed by the U.S. to try and win over the Afghan population. Billions of U.S. tax dollars were spent on reconstruction, infrastructure, and governance reforms.

The Taliban, however, had simply retreated from the cities, and, in much the same way that they had fought the Soviet Union in the 1980s, launched an insurgency war against the American and Allied occupiers.

By 2009, all efforts to quell the insurgency had failed. In that year, President Barack Obama authorized a "surge" of 30,000 additional troops, bringing U.S. forces in Afghanistan to a peak of 100,000 in 2011.

> "The Jews have taken control of your economy, through which they have then taken control of your media."

All these efforts ultimately came to nothing. By 2020, the U.S. had been forced to sign a peace agreement with the Taliban, which was followed by the chaotic withdrawal of American forces the next year. The Taliban then returned in triumph to Kabul and achieved complete victory.

Over 2,400 U.S. troops had been killed, and more than 20,000 seriously wounded in the 20-year war. In addition, the total cost of this failed conflict came to an astronomical $2.3 trillion.

WAR 11: THE IRAQ WAR, 2003–2011

In the interim, Saddam Hussein had stepped up his support for the Palestinians. When the Second Intifada, or young Palestinian uprising, had started in 2000, Saddam had responded by giving $25,000 in cash to the family of each Palestinian killed by Israeli forces.

This reward system caused a dramatic upsurge in attacks on Israel, as young Palestinians were encouraged to participate in the war, safe in the knowledge that, if they were killed, their families would become, by Palestinian standards, extremely wealthy. This was the major reason for the dramatic upsurge in suicide bombings within Israel at the time.

This tactic gained widespread attention and condemnation from the U.S. and Israel, and marked Saddam for final elimination.

A staggering raft of lies was then developed by Israel and its proxies in the British and U.S. governments to falsely link Saddam to al Qaeda.

The British government produced a "dossier" of Iraq's supposed crimes in February 2003, which contained a complete catalogue of Iraqi "weapons of mass destruction" (WMDs).

This dossier was later shown to have been a complete fabrication, mostly made up of decade-old lies which had literally been cut and pasted off the internet.

U.S . Secretary of State Colin Powell used material from this fake dossier during his infamous February 2003 presentation to the UN Security Council, along with equally fabricated "intelligence," including photographs of old Iraqi trucks which he claimed before the UN were "mobile chemical weapons laboratories."

President George W. Bush in person announced that Iraq had tried to buy "uranium from Africa" with the intention of making a nuclear weapon. The documents he quoted from were all later shown to be crude fakes of Israeli origin.

Based on these lies, and without UN permission, the U.S. and its allies launched what they called Operation Iraqi Freedom in March 2003.

This campaign saw Iraq physically invaded and destroyed, with Saddam eventually being captured and executed after being handed over to tribal enemies.

Needless to say, no WMDs were ever found in Iraq. The entire war had been based on lies, and its true motivation—that of destroying an enemy of Israel—was swept under the carpet. It was no coincidence that the Palestinian suicide bombing campaign in Israel completely halted after the invasion of Iraq.

Iraq collapsed in anarchy, with disaffected Sunnis, former government loyalists, and Islamist groups, including al Qaeda in Iraq (AQI), launching an extended insurgency war against the American-led forces and their puppet Iraqi government. The latter organization, being under the control of the U.S. military, was, of course, neutral toward Israel.

By 2006, U.S. casualties had exceeded 2,500 deaths, with no clear path to stability. "Dubya" Bush announced a surge of 30,000 additional troops in that year, also to no avail.

The U.S. officially ended combat operations in August 2010, and finally withdrew in 2011, leaving Iraq effectively in ruins and having killed about 1 million Iraqis in the process.

Over 4,500 U.S. service members were killed in the war, and more than 32,000 were wounded. The U.S. spent an estimated $2 trillion on the war and its aftermath—all just to destroy Saddam's government because it had funded Palestinian resistance to the state of Israel.

Furthermore, the power vacuum left by Saddam's fall and the marginalization of Sunnis in Iraq contributed directly to the rise of the Islamic State (ISIS) in 2014.

WAR 12: THE SYRIAN CIVIL WAR, 2011–PRESENT

With Iraq destroyed, the next most powerful enemy on the U.S.-Israeli hit list was Syria.

That nation, under the leadership of Bashar al-Assad and his father, had maintained a long-standing policy of opposition to Israeli aggression, and support for the Palestinians.

In particular, Syria's al-Assad was known for his close links to Gaza's Hamas and Lebanon's Hezbollah—an alliance that put Syria firmly into the international Jewish lobby's crosshairs.

In March 2011, protests erupted in Syria as part of the "Arab Spring." This "democracy movement" in the Arab world turned out to have been fed and sustained by, among others, two Bush-administration-funded "pro-democracy" groups, the Middle East Partnership Initiative (MEPI) and the Freedom Agenda.

These programs, obviously intended to destabilize Arab states, succeeded for a while in disrupting many of the target nations. Victims included the longtime enemy of Israel, Libya's Muammar Qaddafi, among others.

In Syria, the "protests" quickly and mysteriously developed into a full-blown civil war, as the "protesters" acquired copious amounts of weapons seemingly out of nowhere.

By 2013, the U.S. had directly intervened in the conflict, providing weapons to the Syrian "rebels" through covert programs like the CIA's Timber Sycamore initiative. Large numbers of these weapons went straight to ISIS in eastern Syria.

Next, a series of fake allegations surfaced claiming that Syria had used chemical weapons against civilians—directly echoing the fake WMD allegations made against Saddam.

The al-Assad government denied all the allegations, and allowed international inspectors inside the country to review the claims. No evidence was ever found to back them up.

In an attempt to halt the lies, the Syrian government, which had always acknowledged that it possessed chemical weapons but had never used them, then voluntarily agreed to dismantle all such facilities under a U.S.-Russia brokered agreement. Despite this, the claims of "chemical attacks" persisted.

As a result of the war, Syria's ability to confront Israel directly was considerably weakened, and the government's main focus switched to fighting internal enemies and the organization ISIS, which had emerged from the American destruction of Iraq.

Syria was able to call on its allies, Iran and Hezbollah in Lebanon, to help fight the ISIS threat, and large numbers of soldiers from both Iranian Revolutionary Guard Corps (IRGC) and Hezbollah played an important role in the ultimate defeat of ISIS.

However, the presence of these latter two groups in Syria provided Israel with an excuse to start a protracted bombing campaign against that nation. In reality, the Israeli bombing—conducted with U.S. supplied aircraft and weaponry—was indiscriminate and clearly designed to weaken the Syrian state.

The United States then committed ground troops to the war in Syria in support of the "rebels" who had been formed into the Syrian Democratic Forces (SDF). At its peak, the U.S. had about 2,000 troops in Syria, primarily in northeastern areas controlled by the SDF.

With the aid of Hezbollah, the IRGC, and, eventually, Russia, the Syrian government was able to defeat all the major Islamist groups by 2019. However, late in 2024, the Islamist "rebels" regrouped and, mysteriously armed with American weapons, took advantage of Hezbollah's withdrawal to fight the Israeli invasion of Lebanon to relaunch an invasion of central Syria. This offensive was successful and led to the fall of the al-Assad government on December 8, 2024.

For its part, Israel has conducted hundreds of airstrikes in Syria and provided direct support to Syrian "rebels" operating near the Israeli-Syrian border. Israeli hospitals have also provided free treatment to wounded "rebels," and Israeli special forces have regularly undertaken covert operations inside Syria.

U.S. involvement in the Syrian "civil war" has to date cost the U.S. Treasury some $54 billion.

WAR 13: THE YEMEN CIVIL WAR, 2015–PRESENT

The southernmost state on the Saudi Arabian Peninsula, Yemen, was shaken in 2012 by "Arab Spring" protests against President Ali Abdullah Saleh. He resigned rather than battle on. His successor, Abdrabbuh Mansur

Hadi, also found it impossible to keep a hold on the reins of power.

A Shia Muslim tribe in the north, the Houthis, took advantage of the power vacuum to seize control of northern Yemen, including the capital, Sanaa, in 2014.

In March 2015, a Saudi-led coalition intervened militarily to restore Hadi's government. The war then became a proxy conflict between Sunni Saudi Arabia and Shiite Iran, two longtime foes in the Muslim world.

The involvement of Iran in this conflict was the signal for U.S. intervention, acting, as always, on behalf of Israel to "contain Iranian expansion." The United States has provided billions of dollars in arms to Saudi Arabia and the United Arab Emirates (UAE), including advanced fighter jets, precision-guided munitions, and air defense systems, all of which have been used in the war against Yemen.

U.S. personnel also provide logistical and intelligence support for Saudi-led airstrikes, including targeting assistance and aerial refueling missions—despite those bombings being indiscriminate and causing significant civilian casualties.

In addition, starting with the Obama administration, hundreds of U.S. cruise missile strikes have been launched against targets in Yemen, often inflicting devastating civilian casualties and inciting the local population further against America and the West, in general. This is the primary reason why the Houthis opened a front against Israel and Western shipping in the Gulf after the events of October 7, 2023, and the subsequent attempted final eradication of the people of western Palestine which began thereafter.

So far, U.S. involvement in Yemen has cost the U.S. Treasury some $5 billion in direct intervention and "aid." The Houthis remain undefeated.

WAR 14: MILITARY AID TO ISRAEL AFTER OCTOBER 7, 2023

Since the Hamas attack on Israel of October 7, 2023, the U.S. has significantly increased military aid to the Jewish state. Weapons supplied and paid for by U.S. taxpayers have included at least 5,000 unguided Mk82 bombs, 5,400 Mk84 bombs, 1,000 small-diameter GBU-39 bombs, 57,000 rounds of 155mm artillery shells, tens of thousands of smaller-caliber rounds, and in excess of 14,000 tank shells.[5]

All of these weapons have been used to smash and bomb Gaza to smithereens, and kill over 50,000 Palestinians, including thousands of children. Over 104,000 Gazans have been seriously injured.

The real toll is likely higher, according to the Palestinian Health Ministry, as thousands of bodies are buried in the rubble of what remains of Gaza.

Combining direct military aid and arms sales, the total U.S. aid to Israel since October 7, 2023, has amounted to approximately $33.18 billion.[6]

NOT ONE WAR FOUGHT IN AMERICA'S INTERESTS

These 14 wars, their human and financial cost, when reviewed as a single narrative, are shocking. However, it is even more tragic when it is realized that not one of these wars has been waged to protect Americans, or American interests.

Every single one of them, every soldier killed, and every dollar spent, has been for the benefit of Israel alone. ❖

End Times Warfare

The Eschatological Beliefs of the Great Religions

BY HERVÉ RYSSEN

Eschatology is the study of "End Times" doctrines. All three of the great monotheistic religions, i.e., Judaism, Christianity and Islam, contain a belief that the world as we know it was created by God, and that this same world must sooner or later come to an end. This theme of the end times and the coming of the Messiah are also found in Judaism—the "Mother Religion"—as well as Islam, which also draws its inspiration from the Old Testament. And yet, these three religions are completely incompatible with each other. Why? For the pure and simple reason that their vision of the future diverges on this fundamental point: At the end of time, one—and only one—religion is to triumph. In the end, the religion whose goals are the clearest and whose faith the most ardent will bear away the victory. Which will it be? *End Times Warfare*: softcover, 189 pages, #855, ***$25*** minus 10% for TBR subscribers plus $5 S&H inside the U.S. Available exclusively in English from TBR, P.O. LETTERS TO THE EDITOR

THE CARTO LEGACY

In reference to your September/October 2024 issue in which you honered TBR's founder, I believe Willis Carto was the most substantive publisher of the 20th century. In my very early 20s, I was given a newsletter from the Institute for Historical Review (IHR), which at first glance I dismissed as fascist propaganda. Being born in Chicago and raised by a liberal mother, I'd been conditioned not to question many subjects. World War II was the good war, Franklin D. Roosevelt saved the world, Germans were bloodthirsty hatemongers, the Holocaust should never be questioned, and so on.

I looked into the claims made in the IHR newsletter, which led me to reading books from Noontide Press, reading *The Spotlight* newspaper and, later, American Free Press newspaper, and other "alternative media" deemed "radical" by the "experts" at the Anti-Defamation League and Southern Poverty Law Center.

Very shortly, I realized the alternative media were outliers telling uncomfortable truths, and the "mainstream" media were really nothing more than hateful propagandists.

I tried to win family members over, which led to much strife, though older family members who lived through World War II were quietly sympathetic to my conservative awakening. Without Willis Carto, I would still be an ignorant liberal eternally duped by neoconservative/neoliberal propagandists.

Thank you for continuing the legacy of Willis Carto. I hope The Barnes Review and your other publications influence future generations. You do important, mostly thankless work.

A CORRECTION

I wanted to point out a correction for the November/December 2024 issue of The Barnes Review. In the article "The Columbians," page 67, in footnotes 8, 13 and 18, the web addresses should read www.publiclibrary.cc. That's the website of the Public Library of Anniston-Calhoun County Alabama, so I recognized it right off.

LOUIS & JOAN

I very much enjoyed reading in the November/December 2024 TBR about King Louis IX and St. Joan of Arc, by Anna Schumacher and Rémi Tremblay, respectively. But I thought I would share with readers a little bit more about each of these holy persons, who each altered the world of their time so tremendously.

Modern Cultural Communists have tried to taint St. Louis with charges of anti-Semitic racism and imperialistic antecedents of colonialism. But the truth is that his view was simply Catholic, and enemies of the Catholic faith were enemies of Catholic France. Zionist falsehoods are refuted by the fact that he was, on many occasions, godfather to Jews who converted and were baptized. A first-cousin of King St. Ferdinand III of Castile and Leon, he likewise sought to rid the world of the Mohammedan scourge. Nevertheless, he was a sought-after mediator, peacemaker, and just judicial reformer. For example, he ended a century of strife with England through the Treaty of Paris with Henry III. Foremost, as Tremblay writes, he was a devout Christian, uttering on his deathbed the Psalm-verse, "Lord, I will enter into Thine house; I will adore in Thy holy temple and will give glory to Thy name."

Joan the Maiden was of other station—a peasant—but entirely as devout in hearing Mass, fasting, and doing penance. The saint never used her sword to wound or kill, but only struck the flat of it on the backs of prostitutes to drive them from towns and soldiers' camps. She was adamant in stopping swearing and blasphemy. The general nicknamed "La Hire" was infamous for his horrible oaths; yet, the very first time "La Pucelle" demanded he cease, he conformed. She permitted him only to swear by his staff (rod of office). For the wounded or dying, friend or foe, she was ever a charitable comfort and nurse.

During her trial, not a single witness could be produced to say something against her holiness of life. Asked by Charles VII what reward she would have for her work, she demanded only that her hometown of Domremy be freed forever from taxation—which happened until the French Revolution.

Her death for her faith in God brought even her persecutors to profound tears. Her life brought even a cynical, irreligious Mark Twain not only to deepest admiration but to write what he considered his best book, titled simply *Joan of Arc*.

A FALSE CENTER

This letter is in reference to your May/June 2024 "For the Love of Dixie" issue of TBR. First, I applaud TBR for providing a forum for alternative views on history, and I know that World War II and the Civil Wart are bread-and-butter topics of politically incorrect historical debate. But White nationalism needs to get over this pro-Confederacy bulls***. (I censored myself for a pro-family magazine.)

I don't say *pro-Southern* bulls*** for a reason. The South and Southern Whites constitute a unique, native American White ethnicity, an ethnocultural organism. I say "pro-Confederacy" BS because the Confederacy was not an institution created by Southern Whites. It was a Judeo-Masonic tyranny that reduced White working people to the half-free status

Continued on page 76

of Medieval European serfs, only a half-step above Negro slaves.

As detailed in the Nation of Islam book *The Secret Relationship Between Blacks and Jews*, which TBR once carried, or Michael Hoffman's *They Were White and They Were Slaves*, slavery was a product of international Judaism.

After the Roman Empire was dissolved in A.D. 475, the cult of Judah continued its slave trade amongst the German kingdoms in Europe, while the conquered people of Rome became bound to the land and made into serfs.

Slavery had been largely unknown amongst ethnic Germans and their relatives the Gauls and Kelts before Judaism brought it in. Then, for 1,000 years, one White ethnicity after another was enslaved—the Slavs most prominently, hence the names "slaves."

The Church, which by the 11th century A.D. was trying to enslave Europe in its own way, limited slavery to non-Christians, while leaders like William the Conqueror abolished it or rolled it back in places like England.

But, by the 15th century A.D., slavery was largely abolished in Europe—except for Scandinavia and Denmark.

As White chattel slavery was abolished, the institution of Negro slavery developed, conducted first by Spain and Portugal with Church support because the Blacks were "heathens."

White slavery in Europe had been about driving down the costs of agricultural labor. Just look at the conditions that led to the collapse of Louis I's empire in 9th-century-A.D. Europe. Black slavery in America had the same purpose. In the United States, the North was settled mainly by free farmers, mainly German and Scandinavian. The South was settled by a handful of brutal tyrants who imported enslaved Whites—criminals or bondsmen—and enslaved Africans.

After the Whites were nominally freed, the Judeo-Masonic Southern aristocracy cared for them only as a bulwark against Negro rebellion.

The "Virginia" founding fathers, like George Washington and, particularly, Thomas Jefferson (and Madison and Monroe, etc.), idolized the Roman Republic precisely because they lived like Livy's Patricians—a giant slave plantation—and look how that system worked for Rome.

When TBR glorifies the Confederacy, you are not glorifying "White supremacy." The Judeo-Masonic Southern aristocracy brutally exploited its White workers and bought and bred Negroes without any concern for how their actions would impact Whites. They use "Whiteness" to make themselves supreme, and they left behind a shameful legacy of corruption and tyranny in the Southern states, plus a Black population that is nationally homeless and desperately in need—still, after 160 years—of its own country.

The racial nationalism that "Southern-ness" represents today is good. But it is not the Confederacy. As Julius Evola said, "We have to abandon false centers to restore a traditional outlook." Like the Italian Risorgimento, the Confederacy is a false center.

SPURRING MEMORIES

It seems like a dream now, but I saw it for myself. I have just finished reading yet again Mike Walsh's books *Witness to History* and *Life in the Reich*. What a treasure they are.

His descriptions of Germany in the six-year period leading to the start of shooting at the end of the 1930s is valuable to me because it summarizes precisely what it was like in Germany at the time. In those books, the author stresses the near miraculous change in Germany from hopelessness, dejection, abject squalor, abuse, and poverty to the heights of wealth, exuberance, universal happiness, and then the tragic destruction of Germany in those books. I know what I am talking about because I lived through it as a child. The quality of life in Germany after Hitler took over was unheard of

in the known history of mankind. And it all happened in a little over two years. It's lonely now, at age 92, as many of the people who saw it all are passing away, quickly. Thank God for Walsh's willingness and ability to testify to this story's reality.

HOLY LAND FACTS

With the tragic invasion of Israel by the terrorist organization Hamas on October 7, the eyes of the world are looking at the country of Israel. Unfortunately, there is much information regarding the Palestinian Arabs that I feel it is time to bring the historical facts to the American public.

During World War I, the British Egyptian Expeditionary Force conquered Egypt and entered Jerusalem on December 6, 1917. It then occupied the entire Levant after defeating the Turkish forces at the Battle of Megiddo in September 1918. This led to the capitulation of Turkey on October 31, 1918, ending World War I.

At the Paris Peace Conference, held from 1919 to 1920, the Treaty of Versailles was signed. Just 21 months after the conclusion of World War I, the League of Nations was founded on January 10, 1920, at the conference with 42 member nations. The League of Nations began to distribute the land of the Ottoman Empire. The League granted mandates to Great Britain for the three newly created countries of Iraq in 1920, Jordan in 1921, and, for the first time in modern history, identifying a country as Palestine in 1923.

Under the Mandate, the British government was charged with the formation in Palestine of a "Jewish state as a homeland for the Jewish people of the world and the new country of Palestine, in accordance with the Balfour Declaration of 1917." The new country of Palestine was to become an independent country at the conclusion of the British Mandate, which occurred in 1948.

The Balfour Declaration was a brief correspondence written in 1917, during the height of World War I by British Foreign Secretary James Balfour to Baron Rothschild, the head of the Bank of England, expressing the British government's support for the establishment of a Jewish "home" in the region called Palestine.

At the time of the establishment of the new country of Palestine in 1923, its population was as follows: Those identified as Arab totaled 950,000 of which 403,795 were Muslim and 430,659 were Christian, and those identified as Jews totaled about 15,000 natives and 75,000 recent immigrants, for a total of 90,000 Jews.

Once the English gained control of the newly created country of Palestine in 1923, the Jewish Zionists (those Jews desiring a Jewish home in Palestine) began to harass the Arab population with two terrorist organizations: the Irgun, founded in 1931, whose leader was Menachem Begin (a future prime minister of Israel), and the Stern Gang, founded in 1933. Throughout the 1930s and early 1940s, these two gangs raided small towns and villages, killing thousands of Palestinians and causing many thousands of native Arab Palestinians to evacuate their homes and flee the country. From 1939 and onward, the two gangs also targeted the British Mandate forces.

After the conclusion of World War II in August 1945, on October 24, 1945, the United Nations was founded with 51 charter nations.

As a result of the existing situation in Palestine, the UN recommended the partitioning of Palestine upon the conclusion of the British Mandate. On November 29, 1947, the UN General Assembly adopted a plan known as Resolution 181(II). The resolution recommended the creation of an independent Arab state, called Palestine, and a new independent Jewish state, called Israel, from the original territory of Palestine established in 1923. Also, a Special International Regime for the Cities of Jerusalem and Bethlehem was included because of those two cities' significance to three major religions: Christian, Jews, and Muslims.

The newly created Arab state of Palestine was to have a territory of 11,100 square kilometers or 42% of the total land mandated to the British. The newly created Jewish state of Israel was to have a territory of 14,100 square kilometers or 56% of the total land mandated to the British. Jerusalem and Bethlehem, with their adjoining areas, occupied the remaining area, or about 2%. This distribution of land ignored the fact that, at this time, there were many, many more Arab Palestinians than Jews.

When the British Mandate over Palestine was terminated on May 14, 1948, imminently Resolution 181 (II) was imposed. The new states of Israel and Palestine were declared to be

independent states, and the Zionists finally achieved their goal of a homeland. Palestine became an independent state for the first time in history.

Unfortunately, the independence only included 42% of their original land when the country was mandated to the British. Interestingly, the native Arab Palestinians living in the territory given to the Jews were not considered citizens of Israel by the new government. They were told they could migrate to the new Palestinian territory or to other countries. Those Arab Palestinians, who remained in Israeli territory, have been treated as immigrants with minimum rights ever since.

That was the situation when the independent countries of Israel and Palestine were established in May 14, 1948 by a UN partitioning. Seventy-seven years later, the original land mandated to the British in 1923 as the country of Palestine is now a war-torn country with 100% being under Israeli control.

There were 7.5 million Jews in Israel by 2022. By the year 2023, it was estimated that, since the early 1930s, over 6 million Palestinian Arabs now reside in refugee camps located as follows: 10 in Jordan, nine in Syria, 12 in Lebanon, 19 in the West Bank, and eight in the Gaza Strip living in the most extreme conditions without any hope of salvation.

In 2020, Donald Trump made Jerusalem the capital of Israel.

MADE A MISSISSIPPI BOY HAPPY

The November/December TBR issue is an excellent compilation of mostly unknown and suppressed history. The interview with Memphis attorney Keith Alexander was most refreshing for this ol' Mississippi boy.

WITHOUT TBR …

Honestly, without The Barnes Review, the world would be so much dumber. Without TBR, I would not know the truth about the "Holocaust," or about what happened to the Germans after World War II or about so many White heroes. I don't agree with you on everything, but thank God in Heaven above somebody has the guts to publish something that doesn't just echo the "Court Historians," as you call them, who are mostly full of [expletive deleted]. I also know what a struggle it has been. That's why I am making TBR the beneficiary of my investment account. TBR must survive!

Books from Historian Michael Walsh

IT'S HERE! Witness to History: The Reich Legend Uncensored

RESCUED! By Mike Walsh. *Witness to History* was 25 years in the making with one purpose in mind: a single, comprehensive book that divulges previously censored information while effectively debunking the propaganda of the victors. At the same time, the author puts into perspective the catastrophic 20th century by presenting the big picture surrounding the so-called Russian Revolution of 1917 up to and through the attempted genocide of the people of defeated Germany. In this book, Walsh gives those who made this epoch their chance to tell us their unfiltered, spin-free comments in their own words. *Witness to History* is that book with the actual words of literally hundreds of eyewitnesses to the events of WWII—from high-ranking world leaders and military men to the average citizen on the streets. Softcover, 416 pages, illustrated, #995, **$35**.

Life in the Reich: Hitler's Germany—1933–1945

By Mike Walsh. The quality of life in the Third Reich was far superior to elsewhere in the developed world. Ordinary German workers enjoyed a lifestyle previously reserved for the upper classes of the West. Germany led the world in fashion, medicine, cinema, lifestyle, manufacturing, transport infrastructure, public facilities, science, healthcare and education. For good reason, the Germans were the cheeriest people on Earth. The claim that this was achieved through investment in militarism is absurd. Despite being war economies, the debt-ridden U.S. and European Union suffered the collapse of their infrastructure whilst their indebted populations even now live hand-to-mouth. Prosperity in the Reich set an example that exposes the failures of the mutually supportive capitalist and Communist systems. A taboo topic for media and palace publishers, *Life in the Reich* was removed by Amazon because it dared to show Hitler's Germany as it was and not as the propagandists would have us believe it was. Mainstream media and court publishers consider this a taboo topic because they don't want you to know—in case you draw the right conclusions. Softcover, 120 pages, #960, **$18**.

Heroes Hang When Traitors Triumph: Martyrs of World War II

By Mike Walsh. Character assassination inevitably follows a defeat in war. Had peace terms with National Socialist Germany been equitable, it is likely that non-German figures since denigrated would be more accurately portrayed by modern media. Had Hitler's Germany defeated the forces of the British, Soviet and American empires, then one can presume London's Whitehall would be Adolf Hitler Esplanade whilst Hyde Park would have been renamed Lawrence of Arabia Park. Norway's monuments would celebrate Vidkun Quisling and the revered writer Knut Hamsun. Romania would pay tribute to Corneliu Codreanu whilst in Ireland, Britain and New York, instead of statues to Lenin, the name of Irish-American William Joyce might be affixed to great shopping edifices. *Heroes Hang When Traitors Triumph* gives a different perspective of these vilified foes. Softcover, 115 pages, #961, **$20**.

Adolf Hitler: My Last Testament

By Mike Walsh. Adolf Hitler said he was dumbfounded as "an enormous human dragon slowly uncoiled itself before me." The young laborer's description of a protest march calling for work and bread perhaps inspired Hitler to join the revolt against the oppression of the working class. Whatever challenges Germany faced, the highly decorated war veteran would not blame the Jews, for he had earlier remarked that anti-Semitism was repugnant. There is much that is enigmatic about this man who became almost a religious figure. No other leader in history has achieved more in uniting social classes and inspiring those of various religions and races. So far, an estimated 750,000 book titles have been published on The Third Reich. Hitler's *Mein Kampf* is more widely read today than ever before. Yet, few books actually record the rise of the Third Reich in Adolf Hitler's own words. Drawn from his speeches and media interviews *My Last Testament* is Hitler's self-assessment, but it also includes personal observations about the Führer from many others as well. As such, it is an invaluable first-hand source of information for scholars of the period. Softcover, 195 pages, #962, **$25**.

The Poisonous Mushroom

Among the most controversial and anti-Semitic of Nazi publications was a book for children, published in 1938 under the title *Der Giftpilz*—or *The Poisonous Mushroom*. Here, the perceived Jewish threat to German society was portrayed in elemental terms. Ernst Hiemer put together 17 short morality stories intended to warn children of the dangers allegedly posed by Jews. Jews were stereotypically depicted as conniving, thieving, treacherous liars who would do anything for personal gain. Though aimed at children 8 to 14, Hiemer's lessons were intended for all readers. Long out of circulation and banned in Germany and elsewhere, this historic edition reproduces full color artwork by German cartoonist Philipp Rupprecht ("Fips"). The book was repeatedly cited at the Nuremberg Trials as evidence of "Nazi cruelty," and was used by prosecutors to justify a death sentence for its publisher, Julius Streicher. Edited by Thomas Dalton. Softcover, full color, 72 pages, #1000, **$17**.

The Riddle of the Jews' Success

Jewish power, critics say, derives from Jewish money. But how do Jews become so wealthy? What, exactly, is the secret to their remarkable success? Around 100 years ago, Theodor Fritsch began to closely observe Jewish business practices, with the aim of truly understanding how this alien on German land had acquired so much wealth so quickly. Fritsch had ample, first-hand experience dealing with Jews, and he came to develop a keen insight into their tactics—the very things that led to their fabulous "success," he believed. Long out of print and shunned by mainstream scholars as anti-Semitic, this book, edited by Thomas Dalton, discusses a whole range of Jewish practices, all of which have echoed down to the present. Most striking of all, we obtain here a firm grasp on exactly how coarsened modern life has become, thanks to un-Christian commerce. In a straightforward and clear manner, Fritsch offers the facts as he saw them. Softcover, 254 pages, #999, **$25**.

Unmasking Anne Frank: Her Famous Diary Exposed as a Literary Fraud

As a 13-year-old Jewish girl living in wartime Amsterdam, Anne Frank hid out with seven others for more than two years. During this time, she kept a diary of her thoughts, feelings and experiences. Eventually, the Frank family was discovered and deported. Anne later died of typhus in Bergen-Belsen. But there is a problem. Anne's tale is rife with absurdities, logical problems, inconsistencies and incoherent claims. Here, Japanese researcher Ikuo Suzuki deconstructs the famous dairy. In the process, he reveals that the notorious diary was likely written by a middle-aged Jewish man who worked with Anne's father, Otto, to foist upon the public a deceptive and misleading story of a young girl who perished in a German camp. Here, for the first time, is a highly readable critique of the global bestseller *The Diary of Anne Frank*. Softcover, 192 pages, #998, **$22**.

Protocols of the Elders of Zion: The Definitive Edition

As mysterious as it is notorious, "The Protocols" has been called the most influential piece of anti-Semitic literature in history. Here we find an express desire for world domination, along with a plan to attain it. In the Protocols' world-to-come, there will be a Jewish king of the world who will guide all humanity on behalf of Jewish interests. Serving at his behest will be the detested Goyim, who will gratefully submit to their ruler. Written in the form of meeting minutes, this document purports to be a transcription of a talk by an unnamed influential Jew, speaking around the year 1900. It first appeared in Russia in 1902 and then, in its final version, as part of a book by Sergei Nilus. But little beyond this is certain. It was denounced as a "forgery" in 1922—but is it? And what does that mean in this context? This new English translation includes commentary from Henry Ford, Alfred Rosenberg, Julius Evola and others. Softcover, 278 pages, #997, **$27**.

One of the Most Popular Holocaust Books Ever Is Back in Stock from TBR Book Club!

The Six Million: Fact or Fiction?

Revised, edited, updated, and expanded, this work is without a doubt the single most important Revisionist examination of the legend of the "Six Million" Holocaust as yet published. Just a few of the amazing revelations contained in this sixth edition include:

• Zionists and Nazis cooperated before the war on writing Germany's racial laws—and in the setting up of Jewish settlements in Palestine;

• Zionists offered to fight for Germany against Britain in WWII;

• Nazi policy was first aimed at encouraging Jews to emigrate, and then, after the war broke out, to evacuating them east of the Urals;

• Official German records show that there were 4.5 million Jews under Nazi control, and, of that number, 4.3 million lodged claims as "Holocaust victims" after the war;

• The Soviet Union used torture to produce the lion's share of "confessions" extracted from Germans to support the "extermination" allegations;

• The shocking lies and distortions contained in the two Demjanjuk trials;

• The Jewish lead prosecutor in the "Einsatzgruppen" trials publicly admitted to having witnessed torture and personally used death threats to extract confessions from German prisoners;

• Exactly what Adolf Eichmann confessed to;

• The Auschwitz Camp Museum has formally admitted that the "gas chamber" it has shown to millions of tourists is actually fake;

• Original German plans of Auschwitz show no "gas chambers";

• Forensic chemical examination of Auschwitz has disproved the use of Zyklon-B in the so-called "ruined gas chambers";

• Offical Polish university archeological digs at Belzec and Sobibor have failed to find any evidence of "gas chambers," and how a similar dig at Chelmno contradicted "eyewitness" testimony;

• The "gas chambers" at Majdanek have glass windows, baths, and real showers for the "victims";

• The "carbon monoxide" gas bottles on display at Majdanek, still connected to a "gas chamber," are engraved and marked as "carbon dioxide";

• Details of the "Star of David gas chamber tile" hoax at the 2013 Treblinka archaeological dig;

• A delousing chamber at Dachau is called a homicidal gas chamber;

• German POWs were forced to alter a shower room at Sachsenhausen to support a Soviet show trial. The forgery was so crude that the Communists knocked down the building in 1952.

• The Bergen-Belsen camp is reviewed, with an explanation of the typhus epidemic that swept the camp in the last months of the war and created the horror images of emaciated dead bodies now associated with "the Holocaust."

• This new edition also deals with the "eyewitness survivor" memoirs and their outright lies and forgery, starting with a superbly illustrated exposé of the faked memoirs of "Nazi hunter" Simon Wiesenthal and many others.

• Finally, the last section discusses the all-important question of how and why the Holocaust storytellers have gone through so much trouble to make up the incredible story of "the Six Million."

The Blood Mystery

Here is a work from a brave researcher from France who lived in the late 19th century. We are happy to offer the reader in this volume the full translation of Henri Desportes's most renowned work, *Le mystère du sang chez les juifs de tous les temps*, translated as *The Blood Mystery Among the Jews of All Times*, a seminal study of Jewish ritual murders that was published as a second edition in 1890. Desportes (real name: Célestin Henri Déporte) was a Catholic priest and writer, born in 1865 in the Normandy region of France. He died in 1939.

In *The Blood Mystery*, Desportes takes the approach of performing a historical survey of the ritual murder phenomenon, then dives into specific historical cases and answers the perennial claims of critics. At one point, he considers himself compelled to say: "The Jews do not change. All the revelations, the ancient chronicles, the records of the Trent and Damascus trials, the book of the Moldovan Rabbi, etc. etc. tell us about the same turpitudes. The custom of using Christian blood is very old. It already existed before the total scattering of the Jewish nation, it continued to be practiced until recently, in compliance with Talmudic and rabbinical laws, and it is definitely practiced even today, wherever an Orthodox Jew lives. … The Jews do not change: this was, is and will always be the case." This edition contains a preface by Édouard Drumont, the famous French author and journalist. Translated and edited by JR Books Online and printed by TBR's Operation Book Rescue. Softcover, 271 pages, indexed, #994, **$30**.

Why the Jews Should Be Kept Out of England

William Prynne (1600–1669) was an English lawyer, author, polemicist, political figure and a prominent Puritan opponent of church policy under Archbishop of Canterbury William Laud. Although Prynne's views were Presbyterian, he became known in the 1640s as an Erastian, arguing for overall state control of religious matters. In 1656, a proposal was made in the Parliament of England to lift the 13th-century residency ban for Jews. This prompted Prynne to write *A Short Demurrer to the Jewes Long Discontinued [Barred] Remitter into England*, a remarkable legal treatise against the proposal. It was printed in 1656 shortly before the Whitehall Conference and became influential in strengthening the public opinion against the readmission of Jews. In particular, Prynne strongly doubted that the Jews could be converted to Christianity if allowed back.

The return of the Jews to England was heavily promoted by Manasseh ben Israel, the famous Portuguese rabbi and author, while Oliver Cromwell desired their conditional readmission. In the end, the Parliament did not support any such proposal. The Jews only came back to England in large numbers with the restoration monarchy of Charles II (1660–1685). In his treatise, Prynne was mostly reciting from what he considered the uncontested legal record of England and other countries. He cited ruinous Jewish usury, forgery of coins and royal charters, general criminality, ritual murders, etc. as main reasons why the 1290 expulsion had happened and why the Jews should not be readmitted in his time. This publication will be of interest to anyone fascinated by Puritanism, Protestantism or Jewish history in particular and Revisionist history in general. Transcribed and edited by JR Books Online and printed by TBR's Operation Book Rescue. Softcover, 220 pages, indexed, #1014, **$25**.

WITNESS TO HISTORY

THE REICH LEGEND UNCENSORED

Witness to History was 25 years in the making with three goals in mind. First, a single, comprehensive book that divulges previously censored information while effectively debunking the propaganda of the victors. Second, to put into perspective the catastrophic 20th century, one needs to understand the big picture surrounding the so-called Russian Revolution of 1917 up to and through the attempted genocide of the people of defeated Germany. Finally, it is useless to compile a book based on one historian's spin. It seemed far better to give those who made this epoch their chance to tell us the unfiltered, spin-free story in their own words. *Witness to History: The Third Reich Uncensored* is that book, with the actual words of literally hundreds of eyewitnesses to the events of World War II—from high-ranking world leaders and military men to the average citizen on the streets.

CHAPTERS INCLUDE: A Russian Revolution Without Russians; The Enemy at the Gate; Jewish Power in Germany; Adolf Hitler and Genuine Democracy; Money Changers Driven from the German Temple; The Good Life in the Reich; Religion in National Socialist Germany; Prime Minister and Statesman David Lloyd George; 1936 Berlin Olympics; German Pleas for Peace Rejected; 1933: The Race Nation Declares War on Germany ; With These 26 Soldiers I Will Conquer the World; But by Jingo When We Do; Blessed Be the Peace Movement; Poland Provides Excuse for War; Bolshevik Russia Prepares to Invade the Reich; U.S. Blockade of Japan Forces Pearl Harbor Retaliation; A Most Uncivilized Means of Warfare; The Conquerors' Bloodlust; Germans Correct in their Behavior; A Christian Nation Martyred; Whilst God's Back Was Turned; Genocide by Starvation; The Vultures Circle and Descend; Brothers-in-Arms in Atrocities—The Allies; Allies Slaughter on Industrial Scale; To the Victors Go the Slaves; Prisoners of War; The Holocaust Controversy; Nuremberg Trials on Trial; Last Letter to Churchill from Herman Göring; Last Letters of the Martyrs; Final Words of Those Condemned; and an extensive Bibliography.

NEW BOOK FROM TBR BOOK CLUB IN TIME FOR CHRISTMAS

The Greatest Jesus Mystery of All Time

Where Was Christ Between the Ages of 12 and 30?

If you're a Christian, or if you're simply interested in the history of the Christian Church or religion in general, you've probably wondered why the ancient authors of the New Testament left out any mention of the whereabouts of Jesus during His teens and twenties, the all-important developmental years when adolescents transform into adults, get an education, begin work, get married, and have children. This entire piece of the life story of Jesus has been omitted from the Bible, leaving us with an incomplete biography of the most beloved and well-known figure in world history.

In this fascinating and informative book, *The Greatest Jesus Mystery of All Time*, Christian Bible scholar and award-winning historian Lochlainn Seabrook provides an in-depth examination of this lost, perhaps even censored, historical span known as "The Missing Years of Jesus." As this 2,000-year-old enigma unfolds, the author discusses various theories on why the writers of the Gospels might have "ignored" this 18-year period, why the Church may not have wanted this information published and, more importantly, where Jesus might have been during this time.

Seabrook brings to light vital clues and compelling evidence, from both biblical and extra-biblical material, showing that Jesus most likely spent many of his "Silent Years" traveling across Central Asia where, to this day—from Pakistan to China, from India to Mongolia—there is a widespread traditional belief that Christ traveled across the region in his teens and twenties, studying and teaching under various Buddhist, Hindu, and Tibetan spiritual masters.

To support these theories, Mr. Seabrook includes the complete transcript of an ancient Buddhist manuscript purported to have been written in the years following Jesus's death, which details the Master's time in such countries as India, Nepal, and Tibet.

The author, a devout Christian and a comparative religionist, does not claim to have irrefutable proof but, rather, presents his findings clearly and objectively, allowing the reader to decide for himself.

Also included are an introduction, source notes, index, and an extensive bibliography, making this a must-read for all serious students of Jesus, Christianity, and history.

This is not a heretical book, but one that tries to prove that the appeal and message of Jesus, one of the greatest teachers of all time, was considered a master teacher and sage even at a young age and thousands of miles away from his birthplace in the Mideast.

Mystery of the Magi

The Quest to Identify the Three Wise Men

Modern biblical scholars tend to dismiss the Christmas story of the "Wise Men from the East" as pious legend. Matthew's gospel offers few details, but imaginative Christians filled out the story early on, giving us the three kings, guided by a magical star, who join the adoring shepherds in every Christmas creche.

For many scholars, then, there is no reason to take the gospel story seriously. But are they right? Are the wise men no more than a poetic fancy?

In an astonishing feat of detective work, Dwight Longenecker makes a powerful case that the visit of the Magi to Bethlehem really happened. Piecing together the evidence from biblical studies, history, archeology, and astronomy, he goes further, uncovering where they came from, why they came, and what might have happened to them after eluding King Herod.

In the process, he provides a new and fascinating view of the time and place in which Jesus Christ chose to enter the world.

The evidence is clear and compelling. The mysterious Magi from the East were in all likelihood astrologers and counselors from the court of the Nabatean king at Petra, where the Hebrew messianic prophecies were well known. The "star" that inspired their journey was a particular planetary alignment—confirmed by computer models—that, in the astrological lore of the time, portended the birth of a Jewish king.

The visitors whose arrival troubled Herod "and all Jerusalem with him" may not have been the turbaned oriental kings of the Christmas carol, but they were real, and, by demonstrating that the wise men were no fairy tale, *Mystery of the Magi* demands a new level of respect for the claims of the gospel.

Christmas Before Christianity

How the Birthday of the 'Sun' Became the Birthday of the 'Son'

No one knows what day Jesus was born, his birthday was not celebrated in the 1st century, Christmas is not mentioned in the Bible, and the holiday was banned by English and American Christians in the 1600s. Why, then, do we observe His birthday on December 25? A clue comes from the early Church Fathers, who declared that "Christianity has always existed and was practiced by pagans long prior to the birth of Jesus." Thus, according to Church authorities, Christianity, and in turn Christmas, predated Christ. How is this possible?

Award-winning Christian Bible scholar Lochlainn Seabrook provides the answer in his fascinating and exhaustively researched book *Christmas Before Christianity*. The spiritual truths that form the basis of Christianity were already well known to prehistoric peoples, who held a special reverence for the Sun, which they variously called *Krs*, *Crs*, *Hrs*, *Krst*, *Karas*, *Karast*, *Kris*, *Krish*, *Krist*, and *Chris.* During the Graeco-Roman period, these words, along with the many religious beliefs and myths that accompanied them, were absorbed as *Chrestos* or *Christos*, which became "Christ" in modern English, assimilating the prehistoric Sun God into the ancient Son God.

Ten years in the making, *Christmas Before Christianity* is a fast-reading but in-depth 300-page work based on comparative religion and comparative mythology (as well as archeology, social anthropology, and etymology), that explores the vast pre-Christian foundations of humanity's most popular holiday, including the many pagan gods, goddesses, myths, rituals, legends, ceremonies, customs, and beliefs that contributed to its creation and development.

Every facet of Christmas is examined, from the religious views of prehistoric vegetation cults with their emphasis on astrology and a female supreme being, to the astronomical origins of the Nativity story and Santa Claus; from the practice of decorating Christmas trees, hanging stockings, lighting candles, burning the Yule log, singing carols, and exchanging gifts, to the traditions of displaying holly, wreaths, and mistletoe, drinking cider and eggnog, performing pantomime, and giving out Christmas cards. Though Seabrook examines the origins of Christmas traditions of countries and societies all over the world, special emphasis is laid on ancient Egypt, from where many of our modern traditions can be traced.

"Robert Sirico claims that we still face some of the economic problems and decisions (and, I would add, those of daily life) that are represented in the parables. Therefore, "the parables … contain some obvious economic dimensions and reveal a great deal about both the way we live and the way we ought to live."—Paolo Santori

The Economics of the Parables

Timeless and moral economic wisdom for life's choices and changes derived from the parables of the New Testament by famed free market advocate and Catholic priest Robert Sirico.

Libraries are filled with books on the parables of Christ, and rightly so. In the words of Pope Emeritus Benedict XVI, "While civilizations have come and gone, these stories continue to teach us anew with their freshness and their humanity." Two millennia later, the New Testament parables remain ubiquitous, yet few have stopped to glean from one of Christ's most prevalent analogies: money.

In *The Economics of the Parables*, Rev. Robert Sirico pulls back the veil of modernity to reveal the timeless economic wisdom of the parables. Thirteen central stories—including "The Laborers in the Vineyard," "The Rich Fool," "The Five Talents," and "The Faithful Steward"—serve as his guide, revealing practical lessons in caring for the poor, stewarding wealth, distributing inheritances, navigating income disparities, and resolving family tensions.

As contemporary as any business manual and sure to outlast them, *The Economics of the Parables* equips any economically informed reader to uncover the enduring financial truths of the parables in a reasonable, sensible, and life-empowering manner.

ARMINIUS: THE LIBERATOR

Two thousand years ago, the mighty Roman Empire—just like many Western democracies of today—was marked by decline, decadence, greed and corruption. The once noble and altruistic attitude of the *civis romanus* had given way to the coarsest and most selfish of morés. The Roman middle class had almost totally vanished. An oligarchy, making a show of ostentatious wealth, brutality and perversion, had seized control.

ARMINIUS: THE LIBERATOR is the story of a young Germanic prince, trained to serve the Roman Empire, who united the tribes of Germania in 9 A.D. to crush three Roman legions, thereby changing the course of history. Its later cultural and social emanations would radiate from Europe to North America, Australia and other regions, and have lasted more than 2,000 years—so far.

ARMINIUS: THE LIBERATOR is the true story of one man's incredible quest to defy an oppressive, all-powerful empire and lead his people to freedom. It is also one of the most amazing love stories of all time. Arminius met and eloped with the proud and beautiful Thusnelda against her father's wishes. Her father would later betray them to the Romans—a traitor to his family and to all of his people.

In the end, Arminius was pitted against his own brother, Flavus, who ignobly remained subservient to his Roman masters. In a dramatic confrontation across the German River Weser, Arminius pleaded for unity of all Germanic tribes. Many agreed with his entreaty.

This epic illustrates amazing parallels. Arminius's victory is a lesson to be learned by our people for our times—that unity and clear-headed focus are crucial to understanding, confronting and somehow overcoming political tyranny and rampant corruption. Written and illustrated by Ernst A. Schomer

A History of the World in 100 Animals … in Color

Fully illustrated in color, a fascinating exploration of the 100 animals that have had the most profound influence on humanity throughout the ages.

We are not alone. We are not alone on the planet. We are not alone in the countryside. We are not alone in cities. We are not alone in our homes. We are humans and we love the idea of our uniqueness. But the fact is that we humans are as much members of the animal kingdom as the cats and dogs we surround ourselves with, the cows and the fish we eat, and the bees that pollinate so many of our food-plants.

In *A History of the World in 100 Animals*, award-winning author Simon Barnes selects the 100 animals who have had the greatest impact on humanity and on whom humanity has had the greatest effect. He shows how we have domesticated animals for food and for transport, and how animals powered agriculture, making civilization possible.

He posits that the wholesale slaughter of bison in North America in the 19th century, for example, was responsible for the United States becoming "the nation it is today" because it removed a major resource for American Indians; that a plague spread by fleas in 14th-century Europe led to changes in religion after the Black Death; and that "whales changed human possibilities" thanks to the oil made from their blubber, which "provided a genuinely bright source of illumination" and made the night a time for productivity.

He explains how pigeons made possible the biggest single breakthrough in the history of human thought. In short, he charts the close relationship between humans and animals, finding examples from around the planet that bring the story of life on Earth vividly to life, with great insight and understanding.

Throughout, the author demonstrates many lessons humans can learn from the animal kingdom: the platypus, for example, shows that "there are creatures queerer than we are capable of supposing," and the realization of dolphins' intelligence has led to "rethinking about the place of humans in the world." Vivid illustrations are a bonus to Barnes's moving prose, as when he notes that the saola, a forest-dwelling bovine discovered in Vietnam in 1992, was "the land's last secret. The age of finding is over; we are already deep in the age of losing." Haunted Heritage

The European Roots of Halloween

In this exploration of the origins of Halloween, we embark on a journey to uncover the true essence of this Aryan holiday. In the darkness of October nights, beneath the glow of jack-o'-lanterns and the rustle of fallen leaves, a tale of ancient roots and modern transformation unfolds. Halloween, once a sacred event deeply rooted in ancient Celtic and Aryan customs, has undergone a dramatic evolution over the centuries. Today, as we don costumes and indulge in sugary treats, it's all too easy to overlook the intricate cultural history that forms the foundation of this celebration. In this book, we will also delve into the layers of commercialism, religious resistance, and political correctness that have veiled Halloween's true essence. From its origins as Samhain, a sacred holiday marking the end of the harvest season and the onset of winter, to its evolution into a night of revelry and mischief, Halloween's journey is intricate.

By unraveling the threads of ancient Celtic, Germanic and Slavic influences, we gain a deeper understanding of the complexity of beliefs and customs woven into the fabric of ancient fall festivals. Through this exploration of diverse cultural influences, we can truly appreciate the depth and richness of this haunting holiday.

Join us on a journey through the shadows of history and folklore as we uncover the hidden truths and sacred traditions at Halloween's heart. A JOURNAL OF POLITICALLY INCORRECT HISTORY

November/December 2024 ❖ Volume XXX ❖ Number 6

Table of Contents

Louis IX: King of France and Friend to the Poor

By Anna Schumacher

4 Over the centuries, many kings and queens have focused more on amassing wealth and power, rather than looking to the well-being of their subjects. Not so with Louis IX of France, who should be remembered as one of the greatest rulers of the Middle Ages. He ended trial by ordeal, sponsored the building of Sainte-Chapelle and had a deep concern for the common folk.

St. Joan of Arc: Her True Story

By Rémi Tremblay

10 Her critics claimed she was a madwoman who heeded the advice of the devil. Others saw her as she was: an extraordinary and saintly young woman who paid the ultimate price for her love of France and disdain for invaders.

A Review of Volume II, Part 1 of *March of the Titans*

By Marc Roland

22 We have dedicated much space in previous issues to Arthur Kemp's new multi-volume Prometheus Edition of *March of the Titans*, and rightly so. Here we give you a glimpse inside Volume II, Part 1, which focuses on the European nation states from Switzerland to Russia—all from a White perspective.

The Curious Origins of Feminism

By Thomas Redfern

32 Though many believe it was a 20th-century invention, in reality the beginnings of feminism hail back much further, to the very first "Cultural Communists." This author says the roots of feminism actually stretch back to England of the 1660s.

Teach Honest Mideast History

By John Wear, J.D.

40 The Academic Engagement Network (AEN) pledges an even hand when teaching the modern history of the Middle East. But how can that be so when AEN refuses to address longstanding and valid Palestinian grievances against the supremacist state of Israel?

Has Western Civilization Passed From Its Fall to Its Winter?

By Paul T. Angel

46 Many people write TBR reminding us how prescient were the works of George Orwell. True, Orwell seemed to be looking into a crystal ball when he wrote *1984*, but are they ignoring another sage—Oswald Spengler—who was, judging from his two-volume masterwork *Decline of the West*, equally as prophetic?

The Hampton Roads Conference: When Lincoln Rejected Peace

By Marc Roland

50 In February 1865, with the Southern resistance crumbling and Northerners protesting the horrifying bloodletting, Abe Lincoln agreed to peace talks with Confederate representatives. But was Lincoln really interested in peace, or just quelling growing, popular Northern opposition to the fratricidal conflict?

Uncensored Interview With Radio Host Keith Alexander

Interview conducted by James Edwards

54 In this uncensored interview, Memphis radio show host, lawyer and historian Keith Alexander speaks with TBR's James Edwards on a wide variety of "sensitive" topics that will be of great interest to all TBR readers.

The Rise and Fall of the Columbians

By Marc Roland

60 In this article, which continues our coverage of American National Socialist movements, we learn much about the Columbians. Despite being overt "Nazis," their popularity grew and grew, worrying authorities.

The Evolution of Charles Beard

By Antonius J. Patrick

68 The journey to truth can be a long one. Highly respected historian Charles A. Beard, like Harry Elmer Barnes, began to refine his opinions about who was really guilty for instigating World War I and World War II.

PERSONAL FROM THE EDITOR

Santa Claus: What a Bum

I give up on Santa Claus. Year after year, he never gives me what I ask for on my Christmas list. Last year I asked, yet again, for one simple thing: peace on Earth—somewhere, anywhere. I even pared it down: "Dear Nick, take your pick. If global peace is too much to ask for, how about a little less suffering in Eastern Europe and/or the Holy Land?" But things have only gotten worse—much worse. As a matter of fact, we are only one small misunderstanding or a human error away from a nuclear war. People tell me I should not be submitting my Christmas list to Santa, and go directly to a higher power. Something tells me He is pretty busy these days, what with the billions of people on planet Earth in need of dire and immediate help. But we all know, prayer certainly doesn't hurt. I'll try it.

As this is the season of forgiveness, redemption and hope, in this November/December issue of TBR, our first set of articles deals with the courageous and miraculous lives of three Christian saints. I believe it is important for us to remember and honor our Christian European ancestors, though I realize that many readers may not be Christian, and perhaps scoff at the idea that miracles are, indeed, real and occur on a daily basis.

I am no theologian, but I do believe miracles can happen, whether they be of divine or human design. And we need a miracle or two right now. It pains me deeply to see so many of our brothers and sisters in eastern Ukraine, for instance, being blown to bits in another needless, manipulated war that only exacerbates the demographic problem afflicting the West today. Count up the men we've lost via war in the past 164 years—from North America to Europe to East Asia. If we had sought peace, instead of war, we wouldn't be in this demographic death spiral.

The Holy Land—the birthplace of Jesus Himself—has been turned into a massive slaughter house. The Prince of Peace is not happy, I'll wager. Interestingly, we hear very little about dead Ukrainians, dead Russians or dead Palestinian Christians and Muslims. Almost all we do hear about, however, are dead Israelis—even as the Grim Reaper sharpens his scythe to take more goyim lives. Why is that? (That's a rhetorical question.)

This brings me to a special 12-page report TBR has crafted based upon the exceptional work of a group of investigators that calls itself The Electronic Intifada (TEI). After careful examination of the facts, including meticulous translations from multiple Hebrew-language newspapers published in Israel, some shocking truths have emerged regarding the attacks launched on Israel by Arabic militias on October 7, 2023.

What was reported in the Western press—though they surely knew the truth—turns out to be mostly balderdash. What you'll find is that there is more truth in Israeli newspapers and news outlets than you will ever get from the Western mainstream press. Why is that? (That, too, is a rhetorical question.)

Read that editorial, and help TBR survive at the same time. ❖

—Paul Angel, Executive Editor

How Bad Has the World Been Conned?

On October 7, 2023, Hamas militias broke through the massive prison wall surrounding the Gaza Strip (that 140-square mile outdoor prison camp that is actually part of historic Palestine), and attacked Israel.

According to initial reports, these fighters then proceeded to slaughter innocent Israeli civilians, gang-raping and then killing scores of Israeli women, even going so far as to behead little Jewish babies, several of whom were alleged to have been thrown into microwave ovens and baked.

We were told that these heavily armed fighters killed everything in their path, wantonly murdering every Israeli they came across with unbridled abandon—a modern-day invasion second only to the rampaging Mongol hordes of Genghis Khan.

The Western public swallowed the bait and sucked it down in one big gulp, hook, line and sinker. It didn't hurt that conservative news outlets and the president of the United States added credence to these claims by repeating them over and over and over again, and then some more.

This propaganda tale had dire consequences for the people of the Holy Land. The "surprise" attacks were used by Israel to launch one of the most deadly military operations carried out in recent memory. Israel claimed that 2,000 or so Israelis were massacred on October 7. This was then used to justify the near-total annihilation of the inhabitants of what was left of the Gaza open-air "concentration camp." Israeli Prime Minister Benjamin Netanyahu ordered attacks from land and air, and, in one year, killed an estimated 40,000 people, most of them non-combatants—women, children and the elderly.

Some United Nations casualty experts claim that the true death toll could be three times higher than that, and this may be proven once all the rubble is cleared, and death by disease and starvation are factored in.

Surely, "our" leaders and the Western news media knew the truth. They have satellites and drones and reporters galore to uncover the truth.

But truth is in very short supply for Western political leaders and the legacy news media. Sadly, none but a few courageous reporters in the left-wing news media, allegedly nominally "pro-Palestinian, had the guts or the interest in investigating these claims for fear of being labeled anti-Semites—a death knell for anyone who wants to make his living in the Zionist-dominated global media apparatus.

Thus, even these organizations stayed silent, for the most part.

This brings us to Asa Winstanley, a fearless journalist living in London and writing for a group called The Electronic Intifada. His report on the Hamas attacks obliterates the carefully crafted Israeli October 7 propaganda. This is not to say that hundreds of Israelis did not die during the attacks, but that the vast majority of what we initially heard about the October 7 assault was not true.

In response, on October 17, 2024, British police raided Winstanley's home and seized all of his electronic devices. According to the Committee to Protect Journalists (CPJ):

> The CPJ calls on British authorities to cease using counter-terrorism laws to intimidate the press after police raided the London home of a journalist on suspicion of "encouragement of terrorism."
>
> According to Winstanley's employer, Palestine-focused news site "The Electronic Intifada," the raid was in connection with Winstanley's social media posts and reporting on Palestine.

But Winstanley's greatest crime, in the eyes of Israeli and Western authorities, was a report he assembled, using data taken mostly from prominent Hebrew-language newspapers (including *The Times of Israel* and *Haaretz*) that exposed a dirty little secret known as Operation Hannibal.

Operation Hannibal is the code name given to Israel's shocking strategy to kill its own citizens and soldiers should they be captured so they cannot be held for ransom or used as bargaining chips in future negotiations between Israel and its foes. This information is so appalling, many normal humans cannot believe it. But here it is, in black and white, based almost entirely on surprisingly honest reporting found in Israel's own newspapers and news sites.

KING LOUIS IX

Father of the poor and loyal servant of France

By Anna Schumacher

On April 25, 1215, Poissy, France had the immense privilege of witnessing the birth of Louis, the son of Catholic parents King Louis VIII and Queen Blanche of Castile.[1] The child of many rosaries and desires, Louis was born after 12 long years of infertility.[2] As such, it is not surprising that Catholic Queen Blanche would invest with greater than usual fervor in his education and upbringing, ensuring his morals and decorum were of the highest standard. It is related by the Lord of Joinville, an intimate companion of the king for 22 years, that Queen Blanche made him cultivate a daily habit of prayer, and surrounded him with religious teachers. She often expressed that she would prefer him to be dead rather than to commit a grave offense against God or man.[3]

Such a sentiment, inculcated into him from a tender age, would certainly make a deep impression upon his young heart. This holy fear of God, deeply rooted in his soul, would undoubtedly serve to contribute to the future King Louis IX's just and kind manner of rule over the people of France. His kingship was distinguished for his avid support for charity toward the poor and suffering, and his stern treatment of the Jews of France. In addition to his many virtues thus far presented, honesty and integrity characterized his leadership. He corrected and punished the guilty without prejudice and with a sincere desire that, in all things, justice and truth would prevail.

The mother of King Louis IX, Queen Blanche of Castile, was twice called upon to lead France during her son's reign—once when Louis was deemed too young to rule (1226–34), and again when Louis was off crusading (1248–52).

Historically, hypocrisy is a well-known vice among those who profess to be Christians, especially those of the upper classes. It is not infrequent that their external acts of piety leave one with the impression that they are good and, yet, their behavior toward their fellow men reveals something quite the opposite. This was not so with King Louis IX.

Faithful to his cultivated habit of prayer since childhood he attended official prayers at the church every day while king. He also frequented sermons with his children, not only for their edification but his, as well.[4] Additionally, he attended Mass twice a day. There are many occasions in his life in which this habit of devotion to divine service can be shown to influence his conduct.

One day, King Louis IX is said to have proposed a question to Lord John of Joinville, asking if he would prefer to be afflicted with leprosy or to commit a grave sin. Being unwilling to lie, Joinville admitted he would prefer to commit numerous grave faults rather than be afflicted with such a disease. The King replied:

> You talk like a hasty rattlepate, for there is no leprosy so foul as deadly sin, seeing that a soul in deadly sin is in the image of the Devil. And, truly, when a man dies, he is healed of the leprosy of the body, but when a man dies who has committed deadly sin, great fear must he need have lest such leprosy should endure so long as God shall be in Heaven.[5]

This serves to demonstrate that his detestation of wrongdoing is sincere and ardent, which may be further proven in the following story. Lord

John of Joinville relates an incident that he witnessed shortly before he and the king departed for the Crusades. Joinville came across three dead men. He learned that they were notorious robbers who had attacked a Catholic priest, and were brutally murdered by that same priest. When Louis had this priest presented in front of him, he declared the following: "Sir Clerk, your prowess has lost you your priesthood; and for your prowess I retain you in my pay, and you shall accompany me overseas. I deal thus with you, in order that my followers may see that I will not uphold them in any of their wickedness."[6]

Despite being of the same Catholic faith, Louis did not allow the guilty party's connections or status to influence his punishment.

Besides his confessors, Louis chose a few morally just people to earnestly and without hesitation entreat him to amend himself should they witness any fault in his behavior.

One of Louis IX's confessors, Geoffrey of Beaulieu, witnessed that the king was accustomed to receiving such corrections with great mildness and humility.[7]

The same confessor tells us that Louis, upon his return from the last Crusade in which he participated, decided to extend his inward humility to his outward apparel, wearing clothes that were dignified yet much less ornately detailed and costly. He was accustomed to donate portions of his more costly garments to the poor. Desiring that the poor should not lose any profit from his new, simpler style of dress, he ordered his almoner—an official distributor of alms—to supply the recipients with an amount of money equaling the difference between the more elaborate clothing and the simpler garb.[8]

The great affection and care that King Louis possessed for those dear to him were very great. Among those particularly dear to him were the poor and desolate.

With respect to his children, he was accustomed to ensuring that they attended religious services regularly, inculcating in them the morals that his mother had instilled in him in his youth. In the evenings, Louis would educate his children on the praiseworthy actions of just emperors and kings, desiring that they would imitate them. Endeavoring to dissuade his children from all manner of wickedness, especially his eldest, who would be his successor, Louis wisely taught them stories of prosperous men who lost their kingdoms through lewdness, greed and the violent, forceful theft of others' property.[9]

It was Louis' wish to ensure that the poor and unfortunate in his country were not deprived of any kindnesses or privileges given to those of his household. Every day wherever he was, he ensured that 120 poor people would be nourished with quality food in his own home, the King often being the one to serve them himself. He would then send them away with money to alleviate their poverty.

> It was Louis' wish to ensure that the poor and misfortunate were not deprived of any privileges.

In addition to this, he generously gave copious amounts of financial support to all sorts of people and institutions including widows, the helpless elderly, poor married couples, poor women in childbirth, asylums and poor colleges. His love for integrity extended so far as to found and fund a community house that would provide all temporal necessities to women who had fallen into licentiousness due to extreme poverty. In founding such a house, it was also his intention to restore to their lives a sense of moral honor and justice. Such is the testimony of the Lord of Joinville.

There were some in Louis' family who would protest his exceedingly generous almsgiving. The following was his customary reply: "I would much rather be extravagant in alms, for the love of God, than in the pomp and vainglories of this world."[10] It must have been a great consolation for the people of France to know that their king preferred to give a munificent portion of his riches toward relieving the suffering of the afflicted, instead of the frivolous parties and lavish celebrations associated with so many other European monarchs of past ages.

Geoffrey of Beaulieu testifies to the same charity of King Louis toward the poor. In secret, the King would choose three impoverished men every week to wash, kiss their feet, give them money and serve them meals.[11] Needless to say, the charity of King Louis was quite authentic, seeing that he did not think it beneath his honor to act in such a manner.

King Louis IX considered it his duty to treat the Jews of France sternly. In 1244, it was made known to him by Pope Innocent IV that the Talmud (*The Teaching*) of the Jews contained blasphemies against Jesus and His Mother, as well as a rule of life that has as its end the abuse of Christians.

For instance, the Talmud refers to Jesus Christ as a fool, insane, a conjurer, a magician,[12] and as being buried in Hell.[13] The Jews in the Talmud refer to the Virgin Mary as a prostitute.[14] Among the wrongs against Christians (*Goi* or *Goyim*)[15] enumerated in the Talmud are the license to commit usury when dealing with Christians[16] —a crime which the King ordained to be condemned across France, applying to all of his subjects.[17] A Jew may also pretend to be a Christian in order to deceive the same, according to the Talmud.[18]

Further, a Jew may lie in order to condemn a Christian, as it states in *Babha Kama* (133a):

> Our teaching is as follows: When a Jew and a Goi come into court, absolve the Jew, if you can, according

> to the laws of Israel. If the *Goi* wins, tell him that is what our laws require. If, however, the Jew can be absolved according to the gentile law, absolve him and say it is due to our laws. If this cannot be done, proceed callously against the Goi, as Rabbi Ischmael advises.[19]

In his letter to King Louis, Pope Innocent IV ordered him to have all copies of the Talmud in France burned, so as to eliminate their doctrines and to prevent the Jews from continuing in their wicked behavior.[20] Louis happily obeyed the order, and the books were successfully gathered under pain of death and burned.[21] Expressing how King Louis believed the Jews were to be dealt with most effectively, the Lord of Joinville relates that the former expressed it in this way: "No one ought to argue with them unless he be a very good scholar; but a layman, if he hear the Christian law defamed, should undertake its defense with the sword alone."[22]

On his deathbed, King Louis IX wrote a letter of instruction to his firstborn son and successor Philip III, later known as Philip the Bold. This letter contained valuable instructions on how Philip could succeed as a monarch. Repeating his exhortations from Philip's childhood, King Louis urged the former to remain steadfast in his devotion to the divine services: "Hear divine service devoutly, with thy heart and with thy lips, especially at the mass when the Sacrament is performed."[23]

Again we hear the king's love for his subjects, especially the poor, in exhorting his son to the same:

> Let thy heart be gentle and compassionate towards the poor and mean and unhappy; and comfort and aid them in so far as thou art able. Uphold the good customs of thy kingdom, and put down the bad. Be not covetous towards thy people, nor take upon thee to levy imposts and tallages.[24]

The royal father emphasized in his last teachings that his bailiffs and provosts must be honest and genuinely

This depiction of Louis IX originally appeared in the illuminated manuscript known as *The Bible of Saint Louis*, circa 1230. Though not a complete "Bible," per se, it did offer paired parables from the Old and New Testaments, alongside images explaining the contemporary importance of the scenes portrayed. It is thus surmised that this manuscript may have been used to guide the young king in making compassionate, moral decisions. For 800 years, it has been kept in the Cathedral of Toledo. At the time, the French and Spanish royal houses were inextricably intertwined by marriage.

St. Louis Builds Sainte-Chapelle

In 1239, after years of negotiations, Louis IX acquired the Crown of Thorns from Emperor Baldwin II of Byzantium. By 1241, Louis had acquired 22 relics, including a highly coveted fragment of the True Cross. These acquisitions cost 135,000 *livres tournois*—half the annual income of the kingdom.* To house and protect these holy relics, Louis IX built a small cathedral (one might actually call it a massive reliquary box). His efforts resulted in the creation of Sainte-Chapelle ("Holy Chapel") on the Ile de la Cité sitting in the center of the Seine River in Paris. It is considered by many to be the epitome of High Gothic architecture (in the Rayonnant style), which is characterized by massive stained glass windows through which the maximum amount of sunlight could shine, filling the chapel with rainbow-colored light. It took centuries for European architects to figure out how to make the walls of cathedrals as thin as possible without them collapsing. Once this problem was solved, using external piers, groin vaulting and, in the case of larger cathedrals, flying buttresses, Gothic architects could then fill the walls with gorgeous stained glass windows, delicately carved colonnades, and ornately decorated ceilings. without greed:

> Be diligent to have good provosts and good bailiffs, and frequently inquire into their behavior, and into the behavior of thy household, whether there be in them any vice or over-great covetousness, or falsehood, or trickery. Take care that the expenditure of thy household be moderate.[25]

The sentiments of one on his deathbed are said to be of the greatest sincerity. The pious monarch instructed his son during his life, and even upon his death, to follow the same directives Louis had during his own life. Such a powerful example given to his son during life, and reiterated at his death, would make a deep impression on any son.

Among his last words were ones concerned about the welfare of his people. Shortly before Louis drew his last breath, the Count of Alencon related to the Lord of Joinville that the following was Louis' ardent prayer: "May the Lord sanctify and watch over our people."[26] Thus in life and in death, did King Louis treasure his subjects. ❖

St. Joan of Arc

THE TRUE STORY OF AN EXCEPTIONAL WOMAN

This illustration by Albert Lynch, published in *Figaro Illustré* magazine in 1903, depicts an armored Joan of Arc holding a banner in front of Notre Dame Cathedral in Paris. According to tradition, one side of her banner read "Jhesus Maria" (Jesus Mary), while the other depicted Our Lady enthroned and the coat of arms of France. The banner also featured an image of Jesus holding the world and blessing a lily, with two angels kneeling beside Him. In Christianity, the lily represents resurrection, purity, hope and rebirth.

By Remi Tremblay

Apart from heads of state, few historical figures have garnered as much discussion and acclaim as Joan of Arc. Her extraordinary story, intimately intertwined with the conclusion of the Hundred Years' War, has been eloquently retold by prominent figures such as George Bernard Shaw and revered authors like Shakespeare. Whether Joan of Arc was divinely inspired or not remains a subject of interpretation; however, indisputable is her ability to instill fervor and unite the French troops and also the entire populace in support of the dispossessed King Charles VII.

Regardless of the veracity of her claims regarding the voices that guided her, Joan of Arc's quest and her very existence were undeniably extraordinary. In an era where women rarely led armies onto the battlefield, she stands as a unique and courageous figure who left an indelible mark on history.

A TORN EUROPE

To grasp the essence of her narrative, it is crucial to contextualize it within the tumultuous backdrop of her time. Much like the present day, Europe was fractured by internal conflicts. Christianity itself was divided, witnessing strife between the Teutonic Knights and Poles, the Hussite war unfolding in Germany, and perpetual conflicts between Venice and Genoa. Monarchy and traditions were being

openly contested by "free thinkers." Meanwhile, the English King harbored ambitions of extending his influence across Europe. With a thriving trade network, he aspired to unite three key capitals under his crown: London, Paris and Jerusalem.[1]

All of this was happening as the Muslim threat became increasingly omnipresent, both in Spain and in the East. Constantinople had not yet fallen, but it only had a few years left.

While the threat loomed in the East, the two most powerful nations of the time, France and England, found themselves locked in a bitter struggle throughout the Hundred Years' War.

France itself was divided, with some merchants siding with the English crown. Some bourgeois counties followed the lead of Philippe of Burgundy and joined the English party. France seemed to be in a lethargic state. Everything seemed to be lost. Nothing but a miracle could save France.

This painting by Jean-Jacques Scherrer (1855-1916) depicts a victorious Joan entering Orleans to the acclaim of the people, 1429.

A HUMBLE BEGINNING

Just as Christ was born in humble surroundings, Joan of Arc hailed from modest beginnings. Born on January 6, 1412,[2] in the small village of Domrémy, her parents were Jacques d'Arc and Isabelle Romée. They were not impoverished, as the family owned a house, and Jacques held the elevated position of a "plougher," surpassing a mere farm worker. Joan had three brothers and a sister, although little is known about the eldest, Jacquemin. Her two other brothers joined her in her quest, while her unfortunate sister perished while giving birth after Joan departed.

Her childhood was unremarkable, and she never acquired the skills of reading or writing, as her time was consumed by household chores and later fieldwork. Despite this, she became proficient in the art of prayer, dedicating much of her time to this spiritual practice.

THE VOICES

Around the age of 12 or 13, Joan experienced a pivotal moment in her life. The archangel St. Michael manifested before her, urging, "Joan, be virtuous and devoted, attend church regularly."[3]

She later recalled:

> When I was 13 years old, I began to hear a voice from God that has helped govern me. The first time I heard this voice, I was quite frightened. Then there came this voice about midday, in the summertime, in my father's garden. … After I heard this voice three times, I knew that it was the voice of an angel.
>
> This voice has always kept me well, and I have always understood it well. … It taught me to lead myself well, to attend church. She told me that I, Jeanne, had to come to France. …The voice told me that I would lift the siege placed on the city of Orleans.

From 1425 to 1428, the young girl encountered numerous such celestial visits. Joan said that St. Catherine and St. Marguerite also appeared to her, imparting valuable guidance on practicing a devout Catholic life. In 1429, a notable shift occurred in the messages she received. Her divine voices implored her to liberate Orleans from English domination. Her initial task was to reach Robert de Baudricourt, the captain of King Charles VII.

JOAN'S QUEST

Under the pretense of visiting relatives in Burey-en-Vaux, she made her way to the castle of Vaucouleurs, seeking an audience with the king. Initially met with mockery, she confided in a cousin about her mission, who then introduced her to a bewildered Baudricourt, who was unsure of how to proceed. On February 23, 1429, she embarked on her journey to Chinon, covering the distance in

11 days. During this time, news of her arrival spread rapidly. Upon reaching Chinon, she patiently awaited an audience with the king. This eventually took place after a brief delay.

However, the king had chosen to test the young woman and appeared in humble attire among other better-dressed lords. Joan, nevertheless, recognized him and respectfully addressed him as the legitimate heir. Initially denying his royal identity, he was met with Joan's confident assertion that he alone was the rightful heir to the throne. They engaged in a conversation about his impending coronation in Reims and the ongoing siege of Orleans.

To further validate her divine mission, she presented him with evidence that only he could affirm. Some have suggested that Joan spoke to him about a private prayer he had offered to God on November 1, 1428—a prayer he had never disclosed to anyone. However, the nature of Joan's revelation on that day remains unclear, but Charles himself was satisfied.

Still, if Charles was willing to trust the young shepherd, his decision had to be based on a more sound footing than that. After all, he was risking the destiny of his kingdom.

The king opted to bring Joan to Poitiers, where theologians would scrutinize her mission. Over the course of several days, they asked questions to ensure she was not being deceived by the Devil. In response to a Dominican who questioned why the French should engage in battle if God had already determined the outcome, she replied: "In the name of God, the men-at-arms will fight, and God will give Victory."

During the thorough interrogations, she delivered four prophecies:

- The expulsion of the English from France;
- The lifting of the siege of Orléans;
- The reconquest of Paris; and
- The return of the Duke of Orleans from England.

The theologians acknowledged that her mission and voices appeared credible. Subsequently, the king decided to place trust in her. Joan received a white suit of armor, two pennants, and the privilege of being accompanied by her two brothers, Pierre and Jean. She adopted a knight's appearance by cutting her hair short, a detail later held against her by accusers in a subsequent trial.

For her sword, she requested the one she claimed would be found in the Sainte-Catherine-de-Fierbois church. Her voices had guided her to believe that a sword was buried there, beside the altar. Following her instructions, priests excavated the sword, with five small crosses carved into it.

> Joan aimed to have Charles VII crowned, but Reims was under the control of allies of the English.

Joan also insisted on having her own banner—a white flag adorned with lilies representing the French king. On one side, the Lord King held the world with two angels surrounding him. On the other was depicted a silver dove clutched a small banner reading "*De par le Roi du Ciel*" ("By the King of Heaven"). This flag became the rallying point for the French on the battlefield.

LEADING THE ARMY

Attributing the French defeats to sin, she urged soldiers to purify themselves and arranged open-air masses for the French warriors. On April 29, 1429, she initiated an assault on Orléans to break the siege. Despite being wounded by an arrow, she pressed on relentlessly through multiple waves of attacks until the French successfully breached the English encirclement and entered the city. On May 8, after a 209-day-long siege, victory was complete. The English troops fled.

Despite the jubilation, Joan prophesied at that moment that she had only one year left to live. Aware of this limited time, she cautioned the king to employ her talents judiciously.

As she led French forces, the legend of Joan spread nationally and internationally. Revered as a divine gift by the French, she was viewed as a diabolical figure by the English and their allies. Despite her devout Catholicism, charity to the poor, and frequent prayers, she had a taste for luxury, rich fabrics, pure-blood horses, and celebrations, a fact used against her in later accusations. Her speeches, while humble, did not shy away from the fame she achieved.

Focused on her primary goal, Joan aimed to have Charles VII crowned, but Reims was under the control of the Duke of Burgundy, an English ally. The army, reinforced by volunteers, marched toward Reims, encountering little resistance. On July 17, Bishop Regnault de Chartres officially crowned Charles VII in Reims.

From there, Joan continued her campaign, facing minimal opposition until Paris. Despite being wounded by a crossbow, she persisted until forced to retreat. The king's advisors grew wary, and a defeat in Paris led to doubts about Joan's infallibility. Despite her successes, the King demobilized part of the army, fueling skepticism.

CAPTURED AND TRIED

On April 15, 1430, in Melun, Joan allegedly learned through her voices that she would be taken prisoner before St. John the Baptist Day (June 23). Attempting to defend Compiegne, she was captured on May 24, left isolated when the city gates closed before she could enter. Taken prisoner, the English celebrated, while the French held religious ceremonies.

The French establishment could have negotiated her release, but the king abandoned her. Suggestions of exchanging her for renowned English

The Roots of the Hundred Years' War

The roots of the first Hundred Years' War can be traced back to the Norman conquest of England in 1066. By tradition, the Normans were vassals of the king of France, establishing the expectation that the English king should be a vassal of the French king. Tensions heightened when Eleanor of Aquitaine married Henry Plantagenet (Henry II), consolidating their possessions and governing a territory that encompassed Great Britain and parts of continental Europe, including regions in modern-day France.

Strain between the two crowns intensified, and, upon the death of Henry II's son Richard Lionheart, French King Philippe Auguste seized English continental possessions, leading to various conflicts between the two kingdoms.

Louis IX eventually resolved the conflict by allocating contested territories to Henry III, who reciprocated by ceding some disputed counties. However, tensions resurfaced under Philippe IV (known as "le Bel"), particularly concerning Guyenne. The real complications arose when Philippe's three sons, who successively reigned over the kingdom, failed to produce a male heir to continue the dynasty.

CHARLES VII

With no male heir in Philippe's lineage, Edward III, son of Philippe le Bel's daughter Isabelle and the king of England, emerged as the only candidate. An assembly of barons, however, chose to support Philippe Valois, son of Philippe le Bel's brother Charles Valois. Philippe Valois provocatively targeted Edward III, sparking hostilities that escalated into a full-scale war. France and England then became embroiled in a prolonged conflict marked by internal strife, with nobles who opposed the crown seeking external alliances, even betraying their own people.

One notable ally of the English crown was Charles VI, considered mad, who declared that, after his reign, the king of England would legally become the king of France. Charles VII, the son of the king, resisted this betrayal and rallied troops against the English and their French collaborators. In seeking support in his effort to reclaim France, Charles VII found a valuable ally in the Scottish Stuart dynasty.

Despite English Regent Jean de Bedford leading the invasion and the siege of Orléans, it was during this turbulent period of the Hundred Years' War that the epic tale of Joan of Arc unfolded. ❖

Capt. Talbot were dismissed. Sent to the castle of Beaulieu, she tried to escape, leading to her transfer to Beaurevoir. There, Joan was sold to the English for 10,000 pounds.

Held in Rouen in a cage, bound by hands, feet and neck, she was transferred to Paris, a city controlled by the English. The English then sought to try Joan for heresy in an effort to discredit Charles VII. Pierre Cauchon, bishop of Beauvais, along with collaborators of the English at the University of Paris, agreed to host the trial, scheduled to start on January 9. There would be two judges, Bishop Cauchon and Jean Lemaitre from the Inquisition, and an unprecedented 100 advisors, including several English ones.

The challenge in studying this trial lies in the fact that it was initially transcribed in French and promptly translated into Latin by Thomas de Courcelles, whose clear bias against Joan is evident. Despite this, it remains, along with the trial transcript from the rehabilitation proceedings of 1456, one of the few direct sources we have about the French heroine.

Accusers sought to demonstrate that Joan was, knowingly or not, influenced by the Devil. Her entire life, including her childhood in Domrémy, was scrutinized with numerous intricate questions. Remarkably, the young and uneducated Joan swiftly responded to her accusers, refusing to bow before Cauchon and insisting that her voices were better equipped to defend her and her message than any lawyer. In the face of her tormentors, she displayed quick-wittedness and used irony to ridicule them. For many, her trial became a testament not only to her sanctity but also to her exceptional intellect, inspiring renowned author Robert Brasillach to dedicate a play to her trial.

Despite successfully countering most charges, the question of her male attire remained held against her. Joan also made prophecies that did not materialize. This included her claim that France would be liberated within seven years. In truth, Charles VII reclaimed Paris just five years later.

The interrogation concluded on March 17, and, 10 days later, the official charges were presented, marking the beginning of the actual trial. Despite her requests, Joan was denied the opportunity to attend Mass, even

Joan of Arc Listening to the Voices, a painting by Eugène Thirion (1876), is housed in the Chautou Church of Notre Dame, Yvelines, northern France. The portrait depicts Joan in bewilderment after allegedly receiving a message in her father's garden from a voice she attributed to St. Michael. Later, the voices—said to include those of St. Margaret and St. Catherine—told her to seek out the Dauphin (Charles, the heir apparent to the French throne and the future Charles VII), and to tell him that it would be she who would lead his troops to victory over invading English forces. Her ultimate goal was to have Charles crowned king of France. Joan was later captured by English forces, convicted of heresy, and burned at the stake at age 19, May 30, 1431 in Rouen. In 1920, Joan was canonized by Pope Benedict XV.

during Easter.

On the day of her sentencing, Joan discovered that she would be burned at the stake. In panic, she wavered, but the judges offered to spare her life if she signed a prewritten admission of wrongdoing and resumed dressing as a woman. Hastily agreeing, she signed the statement with a simple X before returning to the English jail.

Accounts of her captivity vary among historians, with some suggesting the English forced her to wear men's clothing to reinforce her lack of remorse, while others propose she chose to don the attire herself, conveniently left nearby. The next day, she appeared before the judges once again dressed as a man, sealing her fate.

ENTERING ETERNITY

Ordered to be burned alive on the Old Market Square in Rouen, Joan was granted the opportunity to have communion, implying that Cauchon did not view her as a heretic. Tied to a post with a hat bearing the words "heretic, relapse, apostate, idol-worshipper," the parallel with the crucifixion of Christ is poignant. As the flames engulfed her, she prayed to Jesus and St. Michael, forgiving her tormentors and seeking forgiveness for any wrongs she may have committed. The executioner, complying with an English request, ensured she would die from burns, not suffocation, adding little wood to ensure nothing but ashes remained.

Later, it was reported that her heart had not burned, and an English soldier claimed to have seen a dove emerging from her burning body. Upon hearing this, a secretary of the king of England lamented, "We are lost! We have burnt a Saint." Even the priests who had condemned her were said to have shed tears during the execution.

In 1450, when Charles VII finally captured Rouen, he called for a reexamination of Joan's trial. The pope agreed and, on July 7, 1456, an official verdict in Rouen declared Joan innocent. However, regarding the truth of the voices she claimed to have heard, the judges abstained from giving a judgment. This marked the beginning of her rehabilitation within the Catholic Church. On January 27, 1894, Pope Leo XIII declared Joan a "true servant of God," emphasizing that she was chosen by God

to "reclaim the freedom and glory of the religion whose interests were threatened."

On January 6, 1904, Pius X proclaimed her a model of virtue. Finally, on May 16, 1920, Joan was canonized as a saint by Benedict XV, following the confirmation of miracles attributed to prayers directed to her.

Monsignor John Wright elaborated on Joan's mission, asserting that it extended beyond France:

> Every nation needs to rediscover the sense of loyalty as illustrated by Joan of Arc—loyalty to ideas rather than ideologies, and to the supreme ideal rather than deceptive causes.

Contrary to misconceptions, Joan was not anti-English. Her mission was aimed at liberating French territory from foreign occupation, not ensuring total victory over England. She explicitly stated, "I have come to drive the enemy out of all France." Hence, the moral essence of her teachings was not against the English but, rather, in favor of the well-being of all within their homeland. This is why nationalists revere her as a heroine. ❖

The Maid of Orléans: A Celebrated Folk Hero

A revered figure, Joan of Arc quickly became a celebrated hero in Orleans, with May 8 marked as a day to honor her for liberating the city, an extraordinary tradition lasting 600 years—only interrupted by significant historical events such as the French Revolution, the two world wars and, more recently, the Covid pandemic, as noted by Olivier Bouzy, a historian of medieval studies and scientific director of the Jeanne d'Arc Center in Orleans.

Earliest extant representation of Joan of Arc is shown in an illustration by Clément de Fauquembergue, 1429.

During the 19th century, Joan evolved into a symbol of patriotism and hope, particularly amid the tensions between France and Germany. Political movements also found a stake in her legacy, with the left viewing her as a commoner persecuted by the Catholic Church and abandoned by the king, while the right embraced her as a saint and defender of the monarchy.

Unsuccessfully, Joseph Fabre, a radical deputy from Aveyron and future author of the *Procès en réhabilitation de Jeanne d'Arc* ("The Rehabilitation Trial of Joan of Arc") tried in 1884 and 10 years later to make Joan of Arc's feast day the feast of "popular patriotism." In 1914, nationalist Maurice Barrès succeeded in promoting Joan of Arc as a national hero in the context of World War I, a position finally confirmed by the French Republic in 1920.

In the early 20th century, Charles Maurras's Action Francaise took a prominent role in shaping Joan's memory, organizing annual patriotic marches in her honor and casting her as a nationalist icon in the public consciousness. The Patron Saint of France enjoyed renewed fame.

A surprising turn occurred in 1980 when Joan of Arc became an unexpected presidential candidate. Jean-Marie Le Pen, former leader of the National Front (NF), unable to meet the candidacy requirements, urged his supporters to write in Joan of Arc on the ballots.[1] The NF had previously joined the annual monarchist procession for Joan of Arc, starting in 1987. In 1988, amidst election rounds, the NF initiated celebrations for Joan on May 1, creating two distinct commemorations for the saint. In May 2023, French President Emmanuel Macron prohibited all demonstrations in her honor, aiming to counter the ascent of the populist right. ❖

William of Norwich & the 'Blood Libel'

In the Middle Ages, many Christians were convinced that Jews were engaged in heinous acts of ritual human sacrifice, referred to as "the blood libel." The first accusation of the blood libel occurred when a small boy was found dead in the woods of Norwich, England, in 1144, allegedly with signs of ritual torture upon his corpse. But was there really any solid evidence to pin the crime on local Jews? Almost all of what we know about this case comes from Thomas of Monmouth, a Benedictine monk who investigated the incendiary case.

By Mike Mains

William of Norwich was a 12-year-old boy who was brutally murdered on March 22, 1144, the Wednesday before Easter. No one was ever arrested or prosecuted for William's murder, and his death has been a source of controversy for centuries. What really happened?

We find some answers in *The Life & Miracles of St. William of Norwich*, the full text of a 12th-century Latin manuscript by Thomas of Monmouth, a Benedictine monk who arrived in Norwich in 1149, five years after William's murder. Upon arriving, he began his own intensive investigation into the crime. That investigation lasted more than 20 years.

Thomas questioned and spoke with people familiar with the event, including many who knew William personally, including William's own mother and brother. His manuscript is a meticulously researched document of historical facts. The first third of the book deals with William's murder. The remainder of the book goes into great detail in describing numerous miracles attributed to the intercession of the martyr William.

A medieval illustration shows William being stabbed with a knife in imitation of the wounds Christ received when a Roman soldier pierced his side with a lance to make sure he had expired. If Jews were not responsible for the torture and murder of William, then there was a murderous psychopath loose in Norwich at the time.

It must be noted that the Priory at Norwich commissioned Thomas not only to investigate the murder but to verify, as best as possible, the spate of miracles said to have occurred in Norwich after William's gruesome death. Thus, the Catholic Church did have a motive for a "favorable" conclusion of the matter.

At the time, the priory had taken possession of William's remains. Should the priory be able to prove William was a saint and see him canonized, the priory stood to gain much financially. The possession of relics, and the money to be made from pilgrims visiting a saint's shrine, would mean prestige and profit for the priory.

So, when investigating this case today, one must grapple with that fact and that the crime occurred more than 1,000 years ago. Thus, the best way to analyze the facts we have from Thomas's account is to take a page from the book of famed mythical detective Sherlock Holmes.

Holmes is a fictional character, to be sure, but he was based on a

real person, a surgeon named Dr. Joseph Bell. Author Arthur Conan Doyle studied under Bell, and many of Doyle's fictional detective's deductions and declarations came straight from Bell. This includes a quote from *The Hound of the Baskervilles*: "We are coming now into the region where we balance probabilities and choose the most likely."

In reviewing Thomas's detailed accounts, we will apply the same rationale that Holmes and Bell expounded. We need to "balance probabilities and choose the most likely" as to who or whom actually murdered young William. In doing so, we will be doing the work that the sheriff of Norwich refused to do at the time.

THE TESTIMONY

William was last seen alive on Tuesday, March 21, 1144, when his cousin spotted him being led by a stranger into the home of a Jewish man named Eleazar. From that point on, the boy was never seen again.

Three days later, on Good Friday, March 24, Aelward Ded, one of the most eminent and wealthiest citizens of Norwich, was traveling in an area called Thorpe Wood and spotted Eleazar and another man on horseback. Eleazar had a large sack tied over his horse's neck.

Aelward asked the men what they were doing so far from home, and he touched the sack that Eleazar had tied over his horse. To his surprise, the sack felt like a human body. Eleazar and his friend then took off in a fearful gallop and disappeared into the thick of the woods.

That evening, a fiery light blazed in the sky above the woods. This was seen by numerous witnesses. In the morning, a nun named Lesarda, disturbed by the strange light of the night before—which she took as a sign from heaven—went into the woods to investigate. A man named Henry de Sprowston did the same. They

The website of the Holocaust Memorial Museum in Washington, D.C. tells us: "The first case of the blood libel in Europe in the Middle Ages was that of William of Norwich in 1144. The Jews of Norwich, England were charged with ritual murder after the body of a young boy was discovered stabbed to death in the woods. In this case, the Jews of Norwich were alleged to have 'bought a Christian child before Easter and tortured him with all the tortures wherewith our Lord was tortured, and, on Long Friday, hanged him on a rood [crucifix] in hatred of our Lord'. Subsequent cases were recorded in: Gloucester, England (1168); Blois, France (1171); Saragossa, Spain (1182); Bristol, England (1183); Fulda, Germany (1235); Lincoln, England (1255); and Munich, Germany (1286). Medieval poet Geoffrey Chaucer's 'The Prioress's Tale' (in *The Canterbury Tales*) also invokes the blood libel motif, describing Jews as aroused by satanic urges to murder Christian children." The Murder of Andrei Yushchinsky

A Study in Three Parts

Shortly before World War I, the Russian Empire was shaken by the bestial murder of Andrei Yushchinsky, a 13-year-old boy whose exsanguinated body, bearing all the traces of ritual murder, was found in March 1911 on the outskirts of Kiev. The ensuing trial, held in the autumn of 1913, attracted wide attention across Europe—and even the United States. A Jew named Mendel Beilis was the ony defendant. Although he was eventually acquitted by the jury, yet the same verdict also insisted it was a ritual murder, one committed in a Jewish brick factory. This book was written by G.G. Zamyslovsky, a member of the Russian State Duma. In addition to the description of Yushchinsky's murder, it contains much valuable information, including a detailed account of two famous ritual murder trials that took place in Russia in the 19th century. Also included in the book is the expert opinion of Roman Catholic Priest I.B. Pranaitis, a high authority on the Talmud. He was fully convinced that Jewish ritual murders were real and had been practiced for many centuries.

each discovered William's body.

The young boy had been murdered with unusual cruelty. An instrument of torture called a teazle was fixed to his mouth. His body appeared to have been plunged into boiling water. He was riddled with numerous stab wounds, including a deep stab wound on his left side that reached almost to his heart. The boy's left hand and left foot were pierced with nails, and his head was shaved and punctured by numerous thorns, many of them still embedded in his skull. Based on the wounds and the timing of the death, which occurred only days before Easter, it appeared that William had been the victim of a ritual murder performed in mockery of the Crucifixion of Jesus.

Word of the murder spread like wildfire through the town and "struck the heart of all who heard it with exceeding horror." When William's mother heard of her son's death, she "swooned away as if she were dead." Upon recovering, she ran "weeping and wailing through the streets like a mad woman."

Aelward Ded was summoned by Sheriff John and forced to take an oath not to reveal that he'd seen Eleazar on horseback, carrying what appeared to be a body hidden inside a sack near the same woods where William's body was found.

Despite that, local priest Godwin Sturt publicly accused Eleazar and other local French-speaking Jews of William's murder and called for justice. Parish Bishop Eborard agreed and, by his order, the dean of Norwich summoned Eleazar and several other men to appear the following day. Instead, Eleazar and his companions went to Sheriff John, who promised to protect them. He offered them refuge in the local castle and told them not to answer any legal summons.

The situation devolved into a standoff. Bishop Eborard, the citizens of Norwich and the local priest demanded justice. Eleazar and his Jewish friends remained safely behind the castle walls and refused to answer the summons, fearing they might be convicted of the heinous crime.

Meanwhile, Bishop Eborard decided to have William's body moved from the woods where it was buried to the local church for a ceremony, followed by burial in the Monks' Cemetery. On April 24, 1144, "The mass of requiem was solemnly sung by the monks, and the whole church was filled from end to end with the crowds of citizens."

To their astonishment, when the body of the young martyr was brought in, it was said to be incorrupt, according to witnesses.

As Thomas recounts:

> For though 32 days had passed since his death, he was found to be unchanged and without corruption in any part. For, while under the hands of those that lifted him, he was so supple in his fingers, arms and other limbs that you would have judged him to be sleeping rather than dead.

A WITNESS TO MURDER

An eyewitness to William's murder eventually came forward, a Christian maid who worked for Eleazar. She testified that, on March 22, the day of William's death, she saw the boy fastened to a post in Eleazar's house while he was being tortured by Eleazar and several other men.

The maid then insisted she had been ordered to bring them a pot of boiling water to pour over the many streams of blood running down William's body. In addition to that, William's older brother Robert said he was offered money by the men accused of William's murder to stay quiet and not push for an investigation.

Still, no one was arrested for the murder of William. Thomas writes that Sheriff John was bribed with 100 marks, a sizable sum in those days, to protect Eleazar and his accomplices and to prevent prosecution of the case.

DIVINE JUSTICE

While the murder of William of Norwich remained "unsolved," a violent death did befall the prime suspect, as Eleazar was himself murdered a

short time later. Like William, his body was left in the woods by the killer, and no one was ever convicted of the crime. It is unknown if he was killed by a co-conspirator or a local denizen looking for vengeance.

In another act of apparent divine justice, the duplicitous Sheriff John "began to suffer from internal hemorrhage and, although he felt the wrath of God manifestly upon him, he was still wholly hardened and would not yet repent." He died a short time later.

It appears convincing, based on all available evidence—and there is more evidence in Thomas's manuscript than space will allow me to discuss here—that William of Norwich was killed by Eleazar and an unknown number of accomplices in an act of ritual murder, Jewish or otherwise.

That fact is corroborated by Theobold, a Jew who converted to Christianity and became a monk:

> [He confessed], in the ancient writings of his fathers, it was written that the Jews, without the shedding of human blood, could neither obtain their freedom, nor could they ever return to their fatherland. Hence it was laid down by them in ancient times that every year they must sacrifice a Christian in some part of the world to the Most High God in scorn and contempt of Christ. (See pp. 59–60.)

According to Theobold, lots were cast, and it was decided that the sacrifice for the year 1144 would take place in Norwich, and that "all the synagogues in England signified, by letter or message, their consent that the wickedness should be carried out."

Theobold said in his own words:

> I was at that time in Cambridge, a Jew among Jews, and the commission of the crime was no secret to me. But, in the process of time, as I became acquainted with the glorious display of miracles which the divine power carried out through the merits of the blessed martyr William, I became much afraid, and following the dictates of my conscience, I forsook Judaism, and turned to the Christian faith.

A PUZZLING CASE

The allegation that William of Norwich was ritually murdered has been handed down for the past 1,000 years, based on Thomas of Monmouth's manuscript. Unfortunately, there is no other evidence besides his allegations to prove the case one way or another. It is one of the most puzzling cases of history, which is now unlikely to ever be fully solved.

MIRACLES UNCEASING

The remainder of Thomas's book contains testimony after testimony of healing miracles that occurred in Norwich which Catholic authorities insist are due to the intercession of the Martyr William. The list of ailments miraculously healed is simply incredible to behold: toothaches, joint pain, headaches, deafness, poor vision, ulcers, dysentery, heart disease, fevers, dropsy, insomnia, madness, restoration of sight to a blind man, recovery of a young boy on the brink of death, deformed cripples unable to walk completely cured, and so on.

It is also claimed spiritual healing took place. So many people were said to have recovered from incurable illnesses that this led to many conversions and acts of repentance.

The Catholic Church has canonized many martyrs as saints with substantially less evidence of miracles than have been claimed for William of Norwich. However, the controversy over his death has so far prevented the Church from canonizing the young English boy. ❖

The Life and Miracles of St. William of Norwich

By Thomas of Monmouth

Was an innocent boy in 12th-century England brutally murdered by Jewish fanatics? This book is the full manuscript of Benedictine monk Thomas of Monmouth who, in A.D. 1173, chronicled the murder of William of Norwich. Thomas claimed William, a 12-year-old tanner's apprentice, had been ritually murdered by Jews in contempt of the Christian faith. It's the first such account, specifically that of Jewish ritual murder of a child, in the historical record. Let each reader decide based on all the available evidence. This edition is complete and unabridged as translated by Cambridge academicians Jessopp & James in 1896, and includes a restored page.

The Cid Campeador and the Waning of the Crescent in the West

By Henry Butler Clarke. Written in 1897, here is the story of Rodrigo Díaz de Vivar (c. 1043-1099), a Castilian nobleman and military leader in medieval Spain. The Moors called him El Cid. The Christians called him *El Campeador*. Here is the Cid's story—and that of Spain—from the Muslim conquest to the time of the Cid himself, until his death in A.D. 1099. Chapters cover the Saracen conquest, the ancestry of the Cid, his legendary accomplishment, the reign of Don Sancho, the banishment of the Cid, his exile, the conquests of the Saracen princes, conquests in Andalusia, the unification of Spanish forces, the revolution at Valencia, the Cid's victory, the last battle, his death. Appendices: Combats between noblemen; Laws of banishment; and the ritualistic controversy. Softcover 382 pages, 20 illustrations, #820, **$25.**

The Crusaders: The War for the Holy Sepulchre

By Alfred J. Church. The Crusades were not "bald Christian aggressions against the Muslims." Here is a wonderful retelling of the stories of the First, Third and Eighth Crusades, narrated by a fictional "wandering Jew" (cursed to live until the Second Coming of Christ). The author explains how the Islamic military conquest of huge areas of the Byzantine empire sparked off the call to crusade, and then weaves the story of some of the most famous characters and events of the Crusades. From the dizzying successes of the First Crusade to the recapture of Jerusalem by the Muslims, the reader will meet Richard Lionheart, Duke Godfrey, Saladin, King Louis of France and others. The reader also discovers the full tragedy of the ill-fated "Children's Crusade" and more. Softcover, 175 pages, #746, **$20**.

MARCH OF THE TITANS

The European Nation States, from the Atlantic to the Urals—Part 1: Iceland to Germany

A REVIEW OF VOLUME II, PART 1 OF *MARCH OF THE TITANS: THE PROMETHEUS EDITION*

By Marc Roland

The recently released, first installment of Arthur Kemp's *March of the Titans: The Complete History of the White Race*, was a hard act to follow. But no less monumental is Volume II: *The European Nation States from the Atlantic to the Urals, Part One: Iceland to Germany*. Gorgeous photography, high production values, and the elegant, if succinct, deeply researched chapters are all on par with the scope and magnificence of the subject.

The shared Aryan origins of each nation are described, followed by their early struggles for survival, rise to greatness and current level of their racial health, which varies considerably from one Western European country to the next. While the Nordic character of Iceland's resident population is still intact, "as early as 2010, Whites were already a minority in Brussels." Kemp writes:

> The flooding of Belgium by non-White immigrants inevitably resulted in all manner of social problems, including increased crime and Islamic terrorism. Brussels was the scene of major Islamist bombings in 2016, which struck at the airport and public transport system.

GIANBATTISTA CONFALONIERI
"Lisbon more Black than White."

Non-Aryan immigration is not a recent phenomenon for other European peoples. *The King's Fountain*—a painting depicting daily life in late 16th-century Lisbon—portrays a surprising number of Black Africans, among them, an apparent nobleman. "This is likely to be João de Sá Panasco, who worked his way up from slave and jester to gentleman," Kemp explains. "According to Cristóvão Rodrigues de Oliveira, an official of the Archbishop of Lisbon, by 1551, Africans represented 10% of the population of the city, counting for 9,950 of its 100,000 inhabitants.

Gianbattista Confalonieri, the papacy's Italian representative to the royal Portuguese court, resided in Lisbon from 1595 and 1596. His first-hand description of life in the capital left no doubt as to its situation at that time. Much to Confalonieri's unpleasant surprise, the city sometimes seemed more Black than White:

> While the Romans tried to lead Rome by force of arms, all the dominated peoples, or the greater part of them, the Lisboners, since they trade with the Indies and have subjugated these peoples, have introduced into this city an infinite number of peoples, who are all Black. So much so that it can be said that this city is more Black than White, and that there is no house where there are not two, three, or even whole families. …
>
> Sometimes, these Black women marry White men and vice versa, and their children are called Mulattoes, because they are not Black and even less White, but light black, or off-white. They all become Christians, or rather, many of them consider themselves Christians.

In this Flemish oil painting, *Chafariz d'El Rei*, known as "The King's Fountain" and completed in 1580 by an unknown artist, Lisbon appears populated by numerous Black and Brown residents. At right, the Negro on horseback is Joao de Sá Panasco, who became a "knight," thereby demonstrating the upward social mobility made available to non-Whites in Portugal before the close of the 16th century. As indicated by the latest DNA population studies, their acceptance, beginning 400 years ago, forever changed the racial integrity of the Portuguese people. Portugal's standing in the world plummeted soon thereafter.

Kemp continues:

> The increase in the African population in Lisbon led to the 1593 creation of the *Bairro do Mocambo* ('Mocambo Neighborhood'), named after an Angolan word meaning small village or place of refuge. Located on the outskirts of Lisbon, the neighborhood signaled the existence not only of captives but also of freemen among the population of the city.
>
> Some of the freed slaves rose socially, as was the case of João de Sá, a slave who, after being in the service of a nobleman, worked at King João III's court. Due to his sense of humor, de João III awarded him freedom and the Hábito da Ordem de Cristo ('Habit of the Order of Christ'), a high distinction for any man of the time.
>
> Later historians use this considerable weight of evidence to indicate that vast numbers of Africans were absorbed into the native Portuguese population, creating a distinct class of people of racially mixed origin in that country.
>
> There can be no doubt that racial mixing did take place and that there is today a significant element of the population of Portugal which is of racially mixed descent. This fact has now been conclusively demonstrated by modern genetics. The assimilation of such a large number of Africans into Portuguese society unquestionably had a retarding effect upon the ability of that nation to maintain its leading role in world affairs, and it is no coincidence that Portugal's place as the leading European nation in the age of exploration had been completely usurped by other European powers by the late 16th and early 17th centuries.

The Portuguese Golden Age of Discovery and social florescence occurred from the late 14th to early 16th centuries, when the resident population was almost entirely White. With its progressive dilution, the country slid from cultural prominence over the next 400 years to become the continent's third-rate civilization. Its sub-standard leaders plummeted to new depths of naivete when they allowed themselves to be conned by hollow British promises of abundant foreign aid, if they would declare war on Germany—which had done no harm to Portugal—in 1916: Of that war, Kemp says:

> Portuguese forces faced significant losses, with estimates of around 7,000–8,000 killed, 13,000-15,000 wounded, and about 6,000-7,000 taken prisoner.
>
> However, the immediate postwar period was marked by several failed attempts to restore the monarchy and ongoing political instability. This culminated with the assassination of President Sidónio Pais in 1918, which plunged the country into turmoil.

Thankfully, other European peoples were blessed with race-conscious

representatives. In the very same year that Portuguese soldiers were being needlessly slaughtered on the Western Front. Arthur Griffith, founder of *Sinn Fein*, the Irish independence movement, is quoted by Kemp to have declared:

> The charges sworn to by German soldiers and civilians, men and women, against the English and French Black troops are appalling. The nations who introduced into a European war these Asiatic and African savages will stand condemned at the bar of posterity for the worst act ever committed by White men against the White race. Europe is the White man's land and the introduction of savage Asiatics and Africans into Europe on a war between civilized powers is unparalleled in European history since anno domini. It is a betrayal of the White race, and an infamy pregnant with the grim and horrible danger and woe in the future.

Better known in the outside world was Gen. Charles de Gaulle, though his views on race were pointedly neglected by mainstream historians.

Kemp quotes the French president as having stated in 1959:

> It is very good that there be yellow Frenchmen, Black Frenchmen, Brown Frenchmen. They prove that France is open to all races and that she has a universal mission—but on the condition that they remain a small minority. Otherwise, France would no longer be France. We are, after all, primarily a European people of the White race, of Greek and Latin culture, and of the Christian faith. Do not let anyone tell you otherwise!
>
> The Muslims—have you gone to see them? You have seen them, with their turbans and their djellabas? You see well that these are not French people. Advocates of integration are birdbrains, even if they are researchers. Try to mix oil and vinegar. Shake the bottle. After a bit, they will separate once again. Arabs are Arabs; the French are French. Do you believe that the French nation can absorb 10 million Muslims who, perhaps tomorrow, will be 20 million and the day after 40 million? If we adopt integration, if all the Arabs and Berbers of Algeria were considered as Frenchmen, what would prevent them from coming to settle in mainland France where the standard of living is so much higher? My village would no longer be called Colombey-les- Deux-Eglises, but Colombey-les-deux-Mosquees ("Colombay of the Two Churches" and "Colombay of the Two Mosques," respectively).

Queen Elizabeth I was already concerned at the number of what she called "blackamoors" in England. By her time, there were an estimated 20,000 colored people in London alone.

But the poisoning of France began long before de Gaulle was born. Kemp points out:

> In 1848, the French Second Republic formally extended the rights of full French citizenship to all the inhabitants of Saint-Louis, Dakar, Gorée, and Rufisque. Africans from the four communes who were able to pursue higher education could become part of the class termed Évolués ("evolved"), and were granted full French citizenship, with the right of residence in France.
>
> This policy, which was also applied elsewhere as France expanded its colonial holdings in Africa, laid the basis for the large African population of pre-World War II France.
>
> This assimilation policy became formal after the end of that war when the French parliament passed the Loi Lamine Gèyoi (the "Lamine Guèye law"), which formally and unilaterally granted French citizenship to all inhabitants of France's overseas colonies.
>
> The French government then started allowing French-speaking Black Africans and non-White Algerians into France, mainly for use as labor, but also as army troops, in order to make up population shortfalls.
>
> According to official French statistics, some 3 million North African/Arabic mixed-race and African Blacks, all from the French colonies, immigrated into France during the period 1919–1927. [This figure is probably an underestimation, as it does not consider illegal immigration, which probably accounted for at least a half million more.]
>
> By the second decade of the 21st century, it was estimated that in excess of 25% of France's population was of Third World origin, and increasing rapidly. It is widely predicted that France will lose its White majority population by 2045.

While mid-16th-century Lisbon was deteriorating into an African ghetto, the same transfiguration was similarly under way in London. According to Kemp:

> In 1555, the first Black slaves were imported into England, with the towns of Liverpool and Bristol becoming the major English slave-trading ports. By the 1590s, there were officially 20,000 Blacks in London. Queen Elizabeth I was greatly disturbed at this influx and, in 1596, ordered the deportation of several of them to Spain in exchange for British prisoners of war held there.
>
> This order, dated July 11, 1596, stated "that there are of late diverse blackamoors brought into this realm, of which kind of people there are already here too many, considering how God hath blessed this land with great increase of people of our own nation as any country in the world."

Finally, in 1601, Elizabeth ordered the expulsion of all Blacks from England, who, she said in the expulsion order that 'the great number of Negroes and blackamoors which are carried into this realm, that the said kind of people shall be with all speed avoided and discharged out of this, her majesty's realms.' This single act—a remarkable but little-known incident—meant that, despite small numbers of black slaves remaining in England, there was never again a significant black presence in England until the late 20th century.

By far the most important change to affect Britain since the 1960s has been the start of mass Third World immigration to that country. Initially, this process started with the importation of blacks from the Caribbean, then Asians fleeing anti-Indian violence in Central Africa, to the point where at the beginning of the second decade of the 21st Century, millions of non-Whites from all parts of the world have completely occupied all the major British cities and turned Whites into minorities in those areas. This process will lead to White British people becoming a minority by the year 2040 or 2050.

Such generally unknown information and often suppressed quotations lavished upon *March of the Titans* make Volume 2 particularly engaging, because Kemp weaves them into his narrative of our civilization from its ancient origins and grand development into a present-day crisis of potential, even imminent extinction, unless our race can come up with a 21st-century equivalent of Queen Elizabeth or even Charles de Gaulle.

An even greater Frenchman would be preferable, another "Charles," as Kemp describes:

In the first six days of the Battle of Tours in October 732, the archers and cavalry of the Moors had the advantage, but, on the seventh day, the fighting was mainly hand-to-hand combat. Here, the greater physical stature of the Europeans gave them the advantage.

Charles earned the name "The

An engraving depicts Christian missionary St. Boniface cutting down the sacred Great Oak tree of Geismar, Hesse, in A.D. 724. The oak tree was sacred to the god Thor, and was one of many pagan sites the Christians destroyed in their ultimately successful campaign to extinguish the pagan religions. Similar acts of desecration were carried out against numerous non-Christian sites all over Europe, but particularly in Germany. Although the event symbolized the triumph of Christianity, it also served to increase the growing resentment against his Christian missionary work and Boniface personally. In 754, while preparing for a confirmation ceremony in Frisia, he and his companions were attacked and killed by a group of pagans. The Church quickly venerated him as a saint.

Hammer" at this battle in recognition of the mighty and fatal strokes with which he personally killed dozens, if not hundreds, of Moors. Having failed to break the White lines in the hand-to-hand combat, the Moorish alliance retreated.

Here, their multiracial and multiethnic origin took its toll on their cohesion. The Moorish units, comprised of men from Arabia, Africa and parts of Asia, were stunned by their first major defeat and broke up in disarray, each blaming the other, giving victory to the Franks who never pierced the Moorish lines.

Charles Martel's greatest achievement was the defeat of the Muslim invasion of France. This single act prevented the mixed-race Arabs and North Africans from penetrating Western Europe and turning it into another Middle East. Charles Martel can truly be credited with saving White Western Europe from destruction at that point in history—the various White Christian elements which made up the powers that finally defeated the Muslim invasion. It was the eventual unification of all these disparate kingdoms that led the Spanish to expel the Muslims after 700 years.

Public schools no longer teach Martel's decisive victory to make White students proud of their racial heritage, but to instead inculcate them with guilt for the unforgivable disgrace of enslaving Black people.

With regard to the Islamic invasion of Spain, Kemp points out:

Slavery was a common practice in Moorish ruled Al-Andalus, as it was in many parts of the medieval world. Slaves in Moorish Spain came from various backgrounds, including Europeans, Africans and people from other regions. Africans were brought across the Sahara or via the trans-Saharan trade routes. Some were prisoners of war, while others were part of the broader slave trade networks of the time.

Their status under the Moors varied: some worked in agricultural fields, others served in households, and some held positions of relative influence, such as in the military or administration. The roles and treatment of slaves varied depending on their position, their master's status, and the prevailing social norms. Islamic law, which governed Al-Andalus, had specific regulations regarding the treatment of slaves. In common with other Islamic societies of the time, slaves could often earn or receive their freedom.

Freed slaves, or "manumitted slaves," were frequently integrated into society, sometimes achieving significant economic and social status. In Muslim-ruled Spain, slavery was widespread, with individuals enslaved through raids and trade networks across Africa and Europe.

Charles Martel (688-741) wields his war hammer at the Battle of Tours, in 732. His victory halted the Umayyad invasion of Gaul, saving Western Europe from a non-White tribal coalition led by Arab caliphs.

The same public schools which extol the virtues of inter-racial "diversity" are historically contradicted by Kemp. He gives the example of Scotland in the mid-18th century. Kemp says:

The Scots [had] remained almost completely racially homogeneous. They produced a disproportionately large number of the greatest men of the British scientific, cultural and intellectual revolution that put the United Kingdom on the road to world dominance.

Prominent Scots included the economist Adam Smith, the philosopher David Hume, the writers James Boswell and Robert Burns, and the author Sir Walter Scott—to name but a few. Scotland's textile, steel and shipbuilding industries contributed largely to Britain's dominance during the days of the empire, and Scottish soldiers played significant roles in many military exploits.

Studies on Scottish DNA have confirmed the historical movements that led to the creation of the indigenous Scottish people. A 2019 study comparing modern Scottish population genetics to that of ancient DNA extracts found that genetic patterns were similar to those in historical groups like the Gaels, Picts, Britons and the Norse. Kemp tell us:

The study showed that the six major population clusters—in the Borders, the southwest, the northeast, the Hebrides, Orkney and Shetland, had changed little over the past 600 years, indicating a highly stable population. Unsurprisingly, Orkney and Shetland had the highest levels of Viking (Norwegian) ancestry outside Scandinavia.

Viable comparisons between the Scots and racially mixed populations anywhere do not exist. Quite the opposite; modern parallels prove the contrary. For example, so long as its combat troops were predominately White—from 1783 to 1945—America emerged victorious from every war in which the nation had been engaged. Beginning with racial integration of the armed forces in 1950—from the Korean conflict to the present—the U.S. never won another war.

"The British and American war in Afghanistan was a complete failure," Kemp states, "as the enemy, which they were supposed to dislodge, the Taliban, took power immediately once again upon the Western withdrawal from that country."

Both the U.S. and UK are victims of the same terminal disease of racial dissolution poisoning all White nations, no matter how relatively small or

isolated. Kemp explains:

> Sweden's reputation as the most peaceful nation on Earth has been completely overturned as a result of mass Third World immigration, which has turned large parts of some major cities, such as Malmö, into non-White ghettos, which regularly erupt into anti-White violence and are plagued by serious criminal activity. An October 2003 press report, for example, revealed that, in the first nine months of that year, there had been 134 bomb attacks in Sweden, up from 90 for all the previous year. Furthermore, the report stated, there had been 289 shootings in Sweden in the first nine months of 2023, and 391 in 2022.
>
> Sweden has also become the "rape capital" of Europe, with official statistics showing that 82% of people sent to jail for gang rape are "foreign born." The media will almost always refuse to point out that this violence comes exclusively from non-White immigrants and their descendants.

Nor is Holland exempt from the worst ravages of colored invasion and occupation, as Kemp demonstrates:

> The impact of Third World immigration into the Netherlands has been significant, as evidenced by 2013's demonstration in Amsterdam against a traditional Dutch Christmas character known as Zwarte Piet ("Black Peter"). Zwarte Piet is part of the annual Feast of St. Nicholas, celebrated on the evening of December 5, where treats are handed out to children. Although there is no connection to Africans, Third World immigrants have objected to the character purely on the basis that the character has a blackened face. This is a good example of how a culture changes as the population changes.

And that is *March of the Titans*' central theme: the displacement, the genetic genocide of an entire people by its deadliest opponents, the murderers of its posterity. Whether Arthur Kemp's original masterpiece will endure as a proud monument to the White race or become its tragic obituary, time will tell. ❖

King John Signs the Magna Carta

King John of England reluctantly signs the Magna Carta at Runnymede, June 15, 1215. Prior to endorsing the document, English monarchs, claiming the divine right to rule, had been above the laws of the land. However, the excesses of the monarchy under King John "the Bad" finally united all the powerful feudal nobles, church leaders and the mass of people to act. While the king was waging a disastrous war in France, the leading barons of England met secretly and swore they would compel him to respect the rights of his subjects.

When John returned, they presented him with a series of demands. With no supporters left, and with the explicit understanding that, if he failed to sign the charter, he would be deposed or worse, John gave his assent.

The document had 63 sections. Although much of it deals with feudal rights and duties, it also includes provisions that protect the rights of the Church, merchants and townspeople. It also gave barons the right to declare war on the king if he did not follow the charter's provisions. Two of the clauses dealt with the exploitation of the English people by Jewish moneylenders. Clauses 10 and 11 mention the problem of Jewish exploitation by name, stating that children and widows would not be liable for debts to Jews incurred by their deceased elders or spouses. In 1290, Jews would be expelled from England for their alleged financial misconduct.

March of the Titans

Three of the planned five volumes of the newly expanded, full-color Prometheus Edition of *March of the Titans* are now in stock. Here they are:

Volume I
The Rise of Europe

From the Earliest Times to the Fall of the Roman Empire

The expanded text—with every chapter having been fully rewritten and updated, and with many new chapters added as additional archaeological discoveries and facts have emerged—has now been divided into four separate volumes, each addressing a specific era.

Volume I begins with three brand new chapters that reveal: 1) How modern science has conclusively proven that race is determined by genetics alone; 2) How race influences the rise and fall of civilizations; and 3) The precise archeogenetic origins of the White race.

Utilizing the most recent archeological evidence, Volume I offers a comprehensive overview of prehistory, including the Upper Paleolithic and Neolithic Ages. It then examines the Old European civilizations in Europe, presenting new archeogenetic and archeological evidence that elucidates their racial origins and notable achievements.

The subsequent section reviews the Indo-European Invasions of Europe and the Middle East/Far East, accompanied by new genetic evidence that traces the migrations of these peoples from their homeland above the Black Sea to the farthest corners of Europe—and even to present-day China.

Following this, the edition thoroughly examines the fate of the Indo-Europeans in the Middle East, presenting irrefutable DNA evidence and detailing how this affects the current racial composition of that region.

Ancient Egypt is then explored, starting with groundbreaking archeogenetic findings that show the founders of ancient Egypt were a White population. This civilization later declined after becoming genetically diverse due to a significant influx of Semitic and African peoples. The full-color illustrations in this detailed chapter highlight the racial transition in Egyptian society.

The narrative then shifts to Classical Greece. Leveraging the latest archeogenetic evidence, this section reveals the racial origins of the prominent Grecian civilization, the Mycenaeans. Furthermore, it explains how the Classical Grecian civilization emerged and eventually declined due to racial fatigue from constant warfare and the substantial importation of racially alien slaves.

Next, the period of King Philip's Macedonian dominance over Greece and the entire Middle East by his son Alexander the Great is detailed. This expanded section reinforces the multiracial composition of Alexander's empire and elaborates on its fragmentation into rival factions following his passing.

The subsequent sections cover the Roman Republic era, the Roman Empire, its bifurcation into Eastern and Western domains, and the collapse of both segments in various new and augmented chapters. Additional chapters discuss Roman civilization and culture; the transitions led by Julius Caesar and Octavian Augustus from the Roman Republic to the Roman Empire; and a pivotal new chapter on Rome and the onset of Christianity. There are also considerable enhancements to the chapters on Rome's interactions with the Celts, Germans, and the Middle East—with the later ringing the racial death-knell for the Empire.

The narrative then moves to the first significant non-White invasion of Europe, detailed in a revised chapter on the Hun invasions and their atrocities in Europe, which occurred a few decades prior to the Western Roman Empire's fall.

In addition, the archeogenetic and archeological evidence shows that, just before the Western Roman Empire's collapse, a staggering 80% of Rome's inhabitants were of Middle Eastern racial origin.

To conclude, an enlarged section on the Byzantine Empire narrates its history until its fall in 1453. A remarkable addition to this section is an archeogenetic study that unveils the Byzantine Empire's racial composition, which mirrored the racial demographic shift in Rome during the Western Empire's final days to that of a minority white population.

Hardback, high-quality stock, 308 pages, full color throughout, 581 color illustrations and maps, #1015, $56.

Volume II—Part 1
The European Nations States From Iceland to Germany

Volume II, Part 1, of the Prometheus Edition of *March of the Titans: The Complete History of the White Race* starts with the religious and cultural development of Europe following the fall of the Roman Empire.

First, it examines the origin of Christianity and the exact method of that religion's violent and coercive spread into Europe from the Middle East. It then reviews the effect of Christianity on European society and culture, particularly how it plunged Europe into a nearly 1,000-year-long Dark Age, during which all the classical advances in science, philosophy, and culture were violently suppressed.

Next, the twin events of the Renaissance and the Reformation are studied. The Renaissance, or "rebirth" of Classical pre-Christian rationality, science, and learning, led directly to the Reformation. This major split in Christianity between Catholicism and Protestantism sparked a series of major Christian wars, which resulted in the extermination of untold numbers of Europeans—and at least half of all Germany—causing an incalculable loss in European numbers and setting the continent back once again by hundreds of years.

This volume then continues by outlining two Great Race Wars waged against Europe by nonwhite invaders after the fall of Rome: the combined Bulgar, Avar, Khazar, and Magyar invasions; and the Islamic Moorish invasion of Iberia and parts of France. These sections provide the first genetic evidence of where exactly these racial groups originated, who they were, and how largely incorrect confusion over the identity of the Khazars and Magyars became prevalent.

Next, this volume provides a country-by-country racial history of Iceland; Ireland, Wales; Scotland; England; the United Kingdom; Portugal; Spain; France; Belgium; Luxembourg; the Netherlands; Norway; Sweden; Finland; Denmark; and Germany. Each nation has its own distinct chapter which shows how its population was shaped by its individual racial history. To underline this narrative, each country chapter ends with a fully referenced DNA survey of that nation. In addition, this volume contains expanded and separate chapters on the Vikings and their worldwide adventures and explorations, and the story and legacy of Napoleon Bonaparte.

Most importantly, revealed in this work is the one true cause of the rise and fall of the world's greatest empires—that all civilizations rise and fall according to their racial homogeneity and nothing else–a nation can survive wars, defeats, natural catastrophes, but not racial dissolution.

Hardback, 8.5 x 11, high-quality stock, 380 pages, full color throughout, #1025, $56.

Volume II—Part 2
The European Nations States Switzerland to Russia

The main themes of this volume are the racial, social, and political consequences of two major non-White invasions of Europe: the Mongol invasion of Eastern Europe, and the Ottoman Turk invasion of southeastern Europe. The Mongol invasion created the Khanate of the Golden Horde in the region now known as Ukraine and southern Russia. This racially alien state waged almost constant warfare on the formative European peoples to the north, resulting in a centuries-long conflict that stifled the political, economic, and social development of all of Russia. This, in turn, ultimately created the social conditions that led directly to the Bolshevist Revolution and its dreadful consequences.

The nearly 1,000-year-long invasion and war by the mixed-race Ottoman Islamic empire created havoc in the Balkans, racially, socially and politically. It resulted in the complete Islamification of three separate nations in the region, the creation of a significant mixed-racial element, and extensive political instability, which ultimately led to the outbreak of the First World War.

The Ottoman's destructive march into the heart of Europe was only finally stopped in 1683 at the gates of Vienna by a European force made up of several nations—one of the few times in European history that white peoples had actually unified in the face of a common threat to their existence.

This volume then provides a country-by-country racial history of Switzerland, Post-Roman Italy, Poland, Czechia, Slovakia, Austria, Hungary, Slovenia, Croatia, Bosnia and Herzegovina, Serbia, Kosovo, Montenegro, North Macedonia, Albania, Romania, Moldova, Bulgaria, Post-Classical Greece, Malta, Lithuania, Latvia, Estonia, Belarus, Ukraine, and Russia.

Each nation has its own distinct chapter which shows how its population was shaped by its individual racial history. To underline this narrative, each country chapter ends with a fully referenced DNA survey of that nation.

In addition, this volume contains six expanded and separate chapters on Russia, broken up into the five distinct historical periods of that nation and its expansion into the Far East and Central Asia. The true cause of the Soviet Union's breakup—the inability of a multiracial state to have long-term sustainability—is also revealed, along with the fact that the present-day Russian Federation is headed inexorably down that same path.

Finally, this volume provides a complete overview of the course and impact of the Crusades—a European reaction to the Muslim invasions of the Middle East and North Africa, and a chapter dealing with the historical quirks that created the four microstates of Europe (Andorra, Liechtenstein, San Marino, and the Vatican).

Most importantly, revealed in this work is the one true cause of the rise and fall of the world's greatest empires—that all civilizations rise and fall according to their racial homogeneity and nothing else–a nation can survive wars, defeats, natural catastrophes, but not racial dissolution.

Hardback, 8.5 x 11, high-quality stock, 510 pages, full color throughout, 634 dramatic illustrations and maps, #1027, $56.

Gladiators Riding Rhinos?

The trailer for *Gladiator II*, the sequel to the blockbuster *Gladiator* (2000), shows a gladiator riding a rhinoceros in the arena. But, according to *The Conversation*, there were no documented cases of warriors riding rhinos while fighting other gladiators. A rhino did, however, make an appearance in the Colosseum during its grand opening in A.D. 80. This rhino did not fight gladiators, but confronted other beasts, including a bull, a bear, a lion, and two steers. Rhinos instead were included in menageries so that onlookers could marvel at these exotic creatures. From the outset of the Republic, the Romans were enthralled by foreign beasts. The first documented case of animals put on display was in 275 B.C. at an exhibition of captured war elephants. In 186 B.C., the first staged animal hunt (*venatio*) occurred in which lions and leopards were hunted. Beast hunts were subsequently institutionalized at state festivals in 169 B.C. Once Rome made its imperial transition, tens of thousands of animals were transported from Africa and other foreign lands to be slaughtered for entertainment. Interestingly, the individuals fighting these beasts were not gladiators but specialized hunters (*venatores*). Venatores would battle rhinos, bulls, elephants and bears among other beasts with spears.

T-Rex: Apex Scavenger

No dinosaur has been as culturally prolific as *Tyrannosaurus rex*. It towers above its Cretaceous counterparts as the consummate apex predator and has been a staple character in countless entertainment productions. From captivating novels to blockbuster films. T-Rex evokes a sense of fear unmatched by any other animal. However, new findings from Chinese paleontologist Zhao Bi indicate T-Rex was not a predator but a scavenger. Zhao argues that T-Rex's bone structure made it hard to engage in vigorous running and hunting activities that most apex predators display. These findings add another twist to a long-standing debate in paleontological circles about whether T-Rex was an apex predator or a full-fledged scavenger. The debate seems settled.

Mandatory Service Killed in UK

Former United Kingdom Prime Minister Rishi Sunak's brief stint in office may be viewed as a footnote in history after his Tory Party went down in flames during the 2024 United Kingdom general election of July 4, 2024, when the Labor Party trounced it. However, on the campaign trail in late May, things got spicy when Sunak rolled out a plan to restore a form of compulsory national service. Under this program, 18-year-old British citizens would be compelled to sign up for the military, the cyber defense force or participate in community volunteer work. Sunak argued that this program would make British society "more cohesive" while also bolstering the UK's national security needs. The plan would have gone into effect by 2029-30 had Sunak's party come out victorious during the 2024 election. Those 18-year-olds who opted to serve would do so for 12 months. Those who chose to do community volunteering would spend one weekend per month doing that work. Sunak's plan ended up being completely scuttled by the Labor victory at the polls—and for good reason. What White man would want to be forced to serve a state that imports millions of Third-World migrants, a goodly number of whom are making life miserable for average Brits?

Check Your Privilege

On Oct. 15, German airline Lufthansa agreed to pay a $4 million fine over a case where more than 100 Orthodox Jewish travelers were prevented from boarding their flight. The incident took place in May 2022, when many of the male Jewish travelers, donning traditional Orthodox garb, refused to wear masks in accordance with German Covid laws, and then began acting in an unruly fashion. The Jews were subsequently barred from boarding a connecting flight in Frankfurt. This incident prompted the U.S. Department of Transportation to slap Lufthansa with a record-breaking $4 million fine for allegedly discriminating against Jewish passengers. Funny how that works. During the Covid-19 era, when some gentiles refused to wear masks, they were fined and arrested. But, for a protected class, all punishment is avoided and they instead profit. This chosen class enjoys many political privileges in European polities that the goyim could never dream of. In this case, Lufthansa did not want to be accused of racism or anti-Semitism, so it naturally bent the knee and paid the hefty fine. This is what real privilege looks like.

Anglo-Saxon a Racist Term

In an epoch of rampant political correctness, mere words make leftists throw fits. Now, they are offended by the term Anglo-Saxon. "Anglo-Saxon" refers to White people from Germanic tribes from the 5th century to the Norman Conquest of 1066 who resided in and controlled territories of present-day England and Wales. The term Anglo-Saxon has been used in academia without issue for decades. In recent years, the politically correct

have argued the term "Anglo-Saxon" has racist connotations—all part of a concerted effort to deconstruct the identities of White Europeans. Early in 2024 the Cambridge University Press renamed its long-running *Anglo-Saxon England* journal to *Early Medieval England and Its Neighbours*. The International Society of Anglo-Saxonists changed its name to the International Society for the Study of Early Medieval England five years ago due to the "problematic connotations" of the term. What's next? The erasure of words such as "English" and "British" from common parlance? If the PC police have their way, their wish of erasing Anglo-Saxon icons and figures could come to fruition.

Caribbean Promised Land

During the 1660 and 1700s, piracy had become so profitable in the Americas that the island of Jamaica was ruled by buccaneers and swashbucklers rolling in gold. Some pirates centered in Jamaica at the time included Blackbeard, William Kidd, Henry Morgan, Calico Jack and Anne Bonnie, to name but a handful. This also included famed Jewish pirate Moses Cohen Henriques who, along with a large contingent of his brethren, thrived in Jamaica. According to *Smithsonian* magazine, though there are only "200 Jews" living in all of Jamaica today (referred to as "Jewmaicans"), there are "21 Jewish burial grounds," indicating a much larger Hebrew population inhabited the island in the past. Says writer Ross Kenneth Urken, "In the 18th century, the French Enlightenment writer Guillaume-Thomas Raynal advocated that Jews adopt Jamaica as a homeland in the Caribbean since it had already become a locus of Semitic commerce." Today, Jamaica is being touted as a destination hotspot for Jewish families from across the globe who want to explore this unlikely "promised land" in the Caribbean. In 1692, a tidal wave caused by a massive earthquake completely deluged the bustling pirate city of Port Royal, the major hub of criminal activity in the region, sending two-thirds of Port Royal permanently beneath the waves.

A Surprising Critic of Israel

In the West, the "special relationship" with Israel is often taken for granted. There's an assumption that Western countries must never criticize Israel publicly, much less take punitive actions against it. In a post published on X on Oct. 12, Madoc Cairns, the editor of Plough Publishing House, disproved this notion. Cairns shed light on some forgotten facts concerning former UK Prime Minister Margaret Thatcher, who served from 1979 to 1990, and her relations with Israel. Cairns observed that Thatcher's government "ordered an oil and weapons embargo in 1982, expelled Israeli diplomats in 1988, and never passed up on an opportunity to mention the terrorist pasts of Israeli prime ministers [Menachem] Begin and [Yitzhak] Shamir." Moreover, the British government expelled 1,988 Israeli diplomats after using a Palestinian as a double agent to expose several of the diplomats as Mossad spies. In Azriel Bermant's *Margaret Thatcher and the Middle East*, the Israeli researcher observed that the Iron Lady "had been unsympathetic toward Begin at the outset because of his record of violence during the British mandate." One could only imagine the type of criticism a politician in the West would receive these days if they tried the same thing.

Banned Play Makes Comeback

Female English playwright Aphra Behn (1640–1689) may be long gone, but one of her most controversial plays, *The Amorous Prince*, will be brought back from the grave and will be performed for the first time in over 350 years. At the time of its only production, *The Amorous Prince* was viewed as too radical and polemical for audiences due to how it confronted certain taboo aspects of gender and sexual norms. The play was the first time a female played a "breeches part"—a female actor playing the role of a man on stage. Behn broke the mold by becoming the first English woman to earn a living through her literary works by writing under her own name, and she served as a role model for future female authors. One of the most interesting facets of Behn's life was her brief foray into espionage, when she served as a spy in Antwerp for King Charles II. More than 350 years later, the Canterbury Players are bringing back *The Amorous Prince* to the main stage. With how raunchy and degenerate most popular culture has become in the present, T*he Amorous Prince* may appear rather tame in comparison to its contemporary counterparts.

AI Helping History in China

Artificial Intelligence (AI) is helping preserve Chinese history by protecting the country's oldest wooden pagoda in the Shanxi province of northern China. AI is being used to improve the understanding of the Sakyamuni Pagoda—a tower that is 220 feet tall. The pagoda was built during the Liao Dynasty (916–1125) and has endured earthquakes, wars and other calamities for nearly 1,000 years. The Sakyamuni Pagoda, which is colloquially known as the Yingxian Wooden Pagoda, has been the region's most notable landmark for centuries. Despite its amazing resilience, the pagoda has started to develop a slight lean in its structure. In April, Chinese technology company Lenovo Group and Tsinghua University's School of Architecture released a virtual reality program that replicates the structure. Mao Shijie, the Vice President of Lenovo Group and head of Lenovo Research Shanghai, revealed that the project to save the pagoda is using state-of-the-art AI-Generated Content (AIGC) technology, allowing for the pagoda to be digitally reconstructed within the span of 10 hours. By wearing virtual reality glasses, visitors and experts can go through a simulation, climbing the pagoda and exploring the inside of it.

'Shaking All Over'

The Curious Origins of Feminism

By Thomas Redfern

The role of feminism in the long and complex war on Western civilization has been widely recognized by traditionalists. Much less widely known are the curious facts about the actual origins of this movement.

According to some feminist ideologues, hints of feminism go back as far as the ancient Greek political philosopher Plato. They also point to the emergence of a handful of proto-feminist female writers during the Renaissance era.

But, like most advocates of eccentric ideas, modern feminists are desperate to find "roots" in order to give their precepts some sort of respectability. This means that they are all too ready to present isolated passages out of context, or to exaggerate. In any case, none of these claimed feminist forebears had any influence, so, for all intents and purposes, they can be discounted.

Marx and Engels infamously called for the abolition of the family in their 1848 *Communist Manifesto*. This fact is often put together with the predominance of far-left Jewesses in the feminist wave of the 1960s to portray feminism as part of a "Jewish plot" against Western society. The overwhelmingly Jewish identity and motivations of the '68ers—originally a left-wing West German student movement—is an undeniable fact, but this should not be allowed to obscure the fact that the key players in the early and decisive stages of the feminist revolution were neither Communist nor Jewish.

MARGARET FELL
"Mother of Quakerism."

An honest assessment of the facts reveals that the groups most to blame for feminism were heretical Christians (overwhelmingly Quakers), mostly hysterical upper-class women with too much time on their hands, and Big Business interests seeking to drag women from their traditional roles in order to expand the pool of cheap labor.

The whole sorry tale can most realistically be traced back to the 17th century and the year 1666. This was when a high-profile Lancashire Quaker woman, Margaret Fell, published a series of radical feminist writings, causing quite a controversy.

Born Margaret Askew into a family of local gentry, she married Thomas Fell, a barrister, in 1632, and became the lady of Swarthmoor Hall.

Her husband was a member of the so-called Long Parliament, until it was dissolved by Oliver Cromwell over its notorious corruption. Margaret was won over to the heretical sect when founder George Fox visited the wealthy family home on 1652. Swarthmoor Hall became a center of Quaker activity, and Margaret served as an unofficial secretary for the new movement, which was known officially as the Society of Friends.

They shunned the Old Testament and most of the New, except for Matthew's "Sermon on the Mount" and the Book of John. Their "meetings" were assertively egalitarian, without priests or any formal organization. Members sat in silence until moved by the spirit to speak.

After her husband's death in 1658, Margaret was so involved in Quaker campaigning she became known as the "Mother of Quakerism." She was arrested in 1664 for failing to swear an oath of loyalty to Charles II, and for allowing cult meetings to be held in her home.

Apart from their rejection of authority (clerical as well as civil), the sect became known and widely

The English co-founder of the Society of Friends, George Fox, preaches in a tavern, circa 1650.

despised as "enthusiasts." Enthusiasm is a state of religious excitement in which those affected actually twitch and shake in a sort of delirium. The early members of the Society of Friends were noted for the paroxysms of violent shaking when they believed they had been possessed by the spirit of God—hence the nickname "Quakers." It is surely no accident that the woman feminists claim as the first of their kind was literally hysterical.

Fell was imprisoned from 1664 until 1668, during which time she wrote various pamphlets, including "Womens Speaking Justified, Proved and Allowed of by the Scriptures." In this short publication, Fell bases her argument for equality of the sexes on one of the basic premises of Quakerism, namely spiritual equality.

Her belief was that God created all human beings; therefore both men and women were capable of possessing the "Inner Light" and the ability to become prophets. Fell has been described as a "feminist pioneer," and her ideas were carried on by several of her daughters and by a succession of other Quaker women, including Dorothy White, Hester Biddle, Sarah Blackborow, Rebecca Travers and Alice Curwen.

Despite this intellectual continuity, however, their proto-feminism might have come to nothing had it not been supported by a quirk of economic history.

Most early Quakers were involved in small-scale local trade as farmers and skilled artisans. As the Industrial Revolution unfolded in Britain in the 18th century, many Quakers poured their energies and talents into innovative business ventures. Like other Nonconformists (and Catholics), they were barred from universities and most professions, so business was a natural outlet for their talents. They also often had ready access to advice, support and start-up resources within their community, as Quakers had become a close-knit network of mutually supportive families, many of whom were involved in interconnected business ventures.

Between them, the Quakers and their Nonconformist brethren had a huge impact in the early Industrial Revolution. (Nonconformists were Protestant Christians who would not "conform," i.e., submit, to the power of the state church in England.) At one stage, the two groups comprised nearly 50% of all the entrepreneurs in Britain. That trend rapidly took hold in the American colonies, as well.

The Quakers' special insistence on fair dealing and honesty often gave them the edge over even other Nonconformists, earning them the trust of much of wider society. Thus, a mixture of pressure from hostile authorities and their own reputation gave the Quakers a unique head start when it came to thriving in the Industrial Revolution.

Quakers such as the Darby family pioneered the mass production of iron, and there were mining and metal production concerns, all central to the new era. Alongside older occupations, such as wool and cloth production, craft and shopkeeping, and

farming, they made shoes, domestic china, cast-iron utensils, engine and railway components, medicines, chocolate, ships and much else. The Quaker Edward Pease opened the Stockton and Darlington Railway in northern England in 1825. It was the first modern railway in the world. The 18th century also saw the rapid growth of Quaker banks, such as Barclays and Lloyds in Britain, and Western Union in North America.

The Quaker network and associated business activity quickly became trans-Atlantic. During the 17th and 18th centuries, many British, Irish, and German Quakers went to the new colonies along the eastern seaboard of North America, especially to Pennsylvania. Indeed, the colony of Pennsylvania was founded by William Penn in 1682 as a safe place for Quakers to live and practice their faith.

Quaker women there went on to play a key role in the development of the first feminist ideas in colonial America.

Philadelphia merchants traded in both directions with their counterparts in Britain, in many sectors. Nurserymen traded in plants. The Nantucket whaling industry, providing fuel for lamps, was largely a Quaker enterprise.

A key factor in the appeal and growth of feminism among the Quakers was the way in which women in well-to-do families were expected to behave. They were made to stay at home while their husbands and brothers went to work. Looking as we do in the rear-view mirror of the Industrial Revolution, we tend to think of this as a very old and "traditional"—perhaps even a "natural" arrangement. In fact, however, this was not the case.

Prior to the Industrial Revolution, the family home was the workplace for the vast majority of people. Whether in workshops or on farms, men, women, and children all participated in a way of life in which work, the daily routines of family life and moments of relaxation and pleasure—along with church on Sundays and involvement in religious festivals—were all experienced by the family as a whole.

JEREMY BENTHAM
Proponent of women's rights.

Naturally, there were occupational exceptions, generally reflecting greater male physical strength—such as fishermen, brick masons, specialized woodsmen and the like. Even within the home, innate and unquestioned differences between male and female naturally had a big impact on who did what, but most families shared the labor that bought their daily bread.

To give just one specific example, in the cottage forges that made chains in the Black Country (named for the coal soot that covered everything) west of Birmingham, men made heavy chains for things such as ship anchors, while their wives and older children toiled to make dog chains and the like.

Before factories appeared, most textile manufacture (including the main processes of spinning and weaving in the important and widespread textile industry) was carried out under the "putting-out" system. Since textile workers rarely had enough capital to be self-employed, they would take raw materials from a merchant, spin or weave the materials in their homes, and then return the finished product in exchange for a piece-rate wage. The system vanished during the Industrial Revolution as new machinery using water or steam power replaced human energy, and work moved from the home to the factory.

Before this huge change, hand spinning had overwhelmingly been women's work. It could take as many as 10 spinners to provide one handloom weaver with yarn, and men did not spin, so most of the workers in the textile industry were women.

The new textile machines of the Industrial Revolution first depressed the wages of hand-spinners and then destroyed the occupation altogether. Mechanization did the same for other jobs traditionally done by women at home, such as lace-making. Thus, the innovations and specialization of the Industrial Revolution broke ancient patterns of female employment.

The attendant division between home and workplace hit Quaker families even earlier than it affected most of the rest of the population. Additionally, the unusually high average prosperity of the Quakers meant that their womenfolk were not forced by poverty to seek low-paid and often dangerous work minding machines in the new manufacturing industries.

Hence, while most working-class women were struggling to survive the extra poverty imposed by mechanization and the enclosure of vast tracts of common land, it was very different among the Quakers. Many of their women, already imbued with ideas of equality, suddenly found themselves left at home by husbands whose work away from the house gave them the leisure and wherewithal to meet and talk and to feed one another's resentments and theories. "The devil makes work for idle hands," indeed.

Feminism began to expand into society more generally during the so-called Age of Enlightenment. This was the upsurge of liberal ideas that sprang from the poisoned intellectual soil of Freemasonic lodges.

Many Enlightenment theorists wrote enthusiastically of the rights of women, including Jeremy Bentham

ELITE LADIES had the time and means to concentrate on women's rights, while ladies of the working classes did not, as they were too busy toiling at their jobs to pay the bills and/or raising families. Left to right: Mary Wollstonecraft, Abigail Adams, Catharine Macaulay and Hester Biddle.

(1781) and M.J.A. Nicolas de Caritat, Marquis de Condorcet (1790).

The experience of Quaker women being left at home by husbands going to separate places of work was spreading throughout "polite" society. Poor women, of course, had no choice but to labor in the same early industrial hell-holes as their husbands and barely grown children. But, for women of the wealthier classes, the boredom of privileged idleness soon created a ready market for the ideas of feminist theorists and anti-slavery campaigners.

To be fair, a few of them involved themselves in efforts to relieve the desperate poverty of the local poor, but most preferred to keep the dirt, disease, and roughness of reality at a safe distance.

The ideas promoted by wealthy 19th-century feminists were also popularized heavily by liberal men. English utilitarian and classical liberal philosopher Jeremy Bentham advocated for complete equality between the sexes, including the rights to vote and to participate in government. It was he who came up with the concept of gender-neutral pronouns: "When both sexes are meant to be intended, employ not the word man but the word person."

At least as influential as Bentham was the French mathematician and liberal politician the Marquis de Condorcet, who agitated for equality of women and the abolition of slavery.

Hoping for a reconstruction of society, Condorcet took a leading role when the French Revolution swept France in 1789. He championed many liberal causes, and, as a result, in 1791, Condorcet was elected as a Paris representative in the Legislative Assembly. He soon thereafter became the secretary of the Assembly.

Predictably, his pitifully naïve hopes of building a rational and humane society through a sort of semi-Communism were drowned in the rivers of blood spilled by the anti-Christian and anti-human "revolution" his waffling and politicking unleashed.

Condorcet advocated women's suffrage for the new government, writing an article for the *Journal de la Société* de 1789, and by publishing *De l'admission des femmes au droit de cité* ("For the Admission to the Rights of Citizenship for Women") in 1790.

As the revolutionary regime became steadily more extreme, Condorcet was branded a traitor. He was arrested in October 1793 and died of poison in prison in an apparent suicide. The phenomenon of leftist revolutions devouring their own children did not, however, die with him.

Female feminists who developed such ideas included Mary Wollstonecraft, Abigail Adams, Catharine Macaulay, and Hedvig Charlotta Nordenflycht. Wollstonecraft came from quite humble origins, but most of the rest—and their followers—were upper-class ladies. From the start, feminism was part of the broader liberal project—a rebellion by a wealthy, spoiled, entitled and out-of-touch elite, against tradition and the realities of nature.

Wollstonecraft called the French Revolution a "glorious chance to obtain more virtue and happiness than hitherto blessed our globe." Together with English radicals such as Thomas Paine, she journeyed to Paris to experience the wonders of the new regime for herself.

Once there, she was steadily disillusioned. While the "moderate" liberal Girondins were often feminist, the more radical Jacobins refused to give women the vote, denounced "Amazons," and made it clear that women were supposed to conform to Jean-Jacques Rousseau's ideal of helpers to men.

As the daily arrests and executions of the Reign of Terror began, Wollstonecraft came under suspicion. She was, after all, a British citizen known to be a friend of leading Girondins.

On October 31, 1793, most of the Girondin leaders were guillotined. When Gilbert Imlay, an American businessman, blockade-runner, author, and diplomat, broke the news to Wollstonecraft, she fainted. (Imlay was, at the time, a lover of Wollstonecraft, and their physical liaison resulted in the birth of a child, Fanny Imlay.)

Wollstonecraft called life under

the Jacobins "nightmarish." There were gigantic daytime parades requiring everyone to show themselves and lustily cheer lest they be suspected of inadequate commitment to the republic, as well as nighttime police raids to arrest "enemies of the republic."

Wollstonecraft survived thanks to a fictitious marriage to Imlay. Some of her friends were not so lucky. Many, like Paine, were arrested. Some were even guillotined.

As well as her feminist writings, Wollstonecraft wrote *An Historical and Moral View of the French Revolution*. While she condemned the Jacobin regime and the Reign of Terror, she argued that the revolution was a great achievement, which led her to stop her history in late 1789 rather than write about the Terror of 1793–94.

Toward the end of her short life (she died at age 38), Wollstonecraft wrote a series of increasingly depressed and needy letters to Imlay, who had saved her earlier with his claims they were married. She attempted suicide several times before settling down with anarchist intellectual William Godwin. She died shortly after giving birth to their daughter, Mary, who, many years later, as Mary Shelley, wrote the classic novel *Frankenstein*.

Meanwhile, Quakers were particularly active in the anti-slavery movement, which became a major focus for liberal ideas and activities in the young United States. As early as 1811, Elias Hicks published a pamphlet arguing that slaves were "prize goods"—that is, products of piracy—and, hence, profiting from them violated Quaker principles.

Quaker women such as Lucretia Mott and Susan B. Anthony joined the movement to abolish slavery, hoping to cooperate politically with non-Quakers in working against the institution.

To their chagrin, however, they found that many of the wealthy men involved in the non-Quaker side of the broader anti-slavery movement were far from keen on seeing women in such an active civic role. Finding that they were often excluded from abolitionist activities, many Quaker women changed their focus over the years to the right of women to vote and influence society.

MARQUIS de CONDORCET
Early male feminist.

By the middle of the 19th century, feminist notions had, however, spilled out widely beyond the Quaker sect. The women's suffrage movement was heavily dominated by the wives and daughters of upper-class men. The Women's Social and Political Union, for example, was packed with well-connected, wealthy, and titled women.

Modern accounts of their campaigns invariably give the impression that these early enthusiasts were trying to achieve equality with men. This is simply untrue.

These wealthy females were campaigning for well-to-do and educated women such as themselves to have equality with the wealthy and educated men of their own class. In 1851, however, a mere 14% of all men could vote. Even by 1910, this figure had only increased to 60%.

The privileged women arguing for a widening of the electorate wanted the right to vote for themselves, but not for their poorer sisters toiling in the mills or below the stairs in their own homes, let alone their wretched menfolk behind the plow or in the foundries and mines.

In *The Woman Racket: The New Science Explaining How the Sexes Relate at Work, at Play and in Society*, author Steve Moxon notes that the Victorian era Women's Social and Political Union specifically argued that the vote "should be extended to women through an education qualification. The converse of this was also argued, and quite openly—that uneducated men should be denied the vote."

Given their founding myth of human equality, it is unlikely that the Quaker women who basically founded feminism would have agreed with this class-ridden approach. Leadership of the feminist movement, however, was now in rather different hands. That, unfortunately for society as a whole, did not make it any the less subversive. ❖

The Greatest Jesus Mystery of All Time

Where Was Christ Between the Ages of 12 and 30?

If you're a Christian, or if you're simply interested in the history of the Christian Church or religion in general, you've probably wondered why the ancient authors of the New Testament left out any mention of the whereabouts of Jesus during His teens and twenties, the all-important developmental years when adolescents transform into adults, get an education, begin work, get married, and have children. This entire piece of the life story of Jesus has been omitted from the Bible, leaving us with an incomplete biography of the most beloved and well-known figure in world history.

In this fascinating and informative book, *The Greatest Jesus Mystery of All Time*, Christian Bible scholar and award-winning historian Lochlainn Seabrook provides an in-depth examination of this lost, perhaps even censored, historical span known as "The Missing Years of Jesus." As this 2,000-year-old enigma unfolds, the author discusses various theories on why the writers of the Gospels might have "ignored" this 18-year period, why the Church may not have wanted this information published and, more importantly, where Jesus might have been during this time.

Seabrook brings to light vital clues and compelling evidence, from both biblical and extra-biblical material, showing that Jesus most likely spent many of his "Silent Years" traveling across Central Asia where, to this day—from Pakistan to China, from India to Mongolia—there is a widespread traditional belief that Christ traveled across the region in his teens and twenties, studying and teaching under various Buddhist, Hindu, and Tibetan spiritual masters.

To support these theories, Mr. Seabrook includes the complete transcript of an ancient Buddhist manuscript purported to have been written in the years following Jesus's death, which details the Master's time in such countries as India, Nepal, and Tibet.

The author, a devout Christian and a comparative religionist, does not claim to have irrefutable proof but, rather, presents his findings clearly and objectively, allowing the reader to decide for himself.

Also included are an introduction, source notes, index, and an extensive bibliography, making this a must-read for all serious students of Jesus, Christianity, and history.

This is not a heretical book, but one that tries to prove that the appeal and message of Jesus, one of the greatest teachers of all time, was considered a master teacher and sage even at a young age and thousands of miles away from his birthplace in the Mideast.

Classic Essays on the Jewish Question: 1850 to 1945

Edited and compiled by Thomas Dalton, Ph.D. Uncensored essays from Richard Wagner, Fyodor Dostoyevsky and Theodor Fritsch to virtual unknowns like Frederick Millingen and Wilhelm Marr discuss the most taboo subject of all. Their words are compelling and "racist." Now, for the first time, 16 classic essays on this issue are compiled into a single volume. These essays are difficult to find for obvious reasons. These kinds of essays are not only frowned upon in America, several states are pushing for a ban if not future criminalization for those distributing them. In Europe, as we all know, dozens of nations have passed laws making open discussion of this issue a criminal offense. When found, these essays are almost always incomplete. When found complete, they are poorly translated and edited. The aim of the present book is to alleviate this shortcoming and to offer full information so readers can decide for themselves if the authors contained herein are blazing "anti-Semites" or actually have a reasonable cause for concern. Jewish Freemasonry

By Édouard Drumont & Nicolae Paulescu. Introduction by Dr. Alexander Jacob. The two principal anti-Masonic texts presented in this edition shed some light on the Jewish origins and ambitions of the Freemasons. The first text is from French journalist Édouard Drumont's famous work *La France Juive: Essai d'histoire contemporain* (1886), while the second is from the Romanian political scientist Nicolae Paulescu's *The Hospital, the Koran, the Talmud, the Kahal and Freemasonry* (1913). Both authors discuss the contrast between the "character" of the Masonic ethos and the social doctrines of the Catholic Church. The authors allege a prime goal of Masonry has always been to replace Christianity as a political force in the West. Softcover, 136 pages, #928, **$15**.

Jewish Domination of Weimar Germany

By Eckhart Verlag and Francis Dupont. This was the National Socialist government's first English-language attempt to explain the rationale behind its legislative moves to restrict Jewish influence in Germany after 1933. Using official pre-Nazi-era demographics, this work showed that Jews were massively over-represented in all fields of German social and economic life—except farming and creative work. It lists the ownership of media in Weimar Germany, the financial scandals, Communist and other political subversion, degenerate theater, sexual perversion, school indoctrination and media bias. Softcover, 96 pages, #670, **$14**.

Jewish Austria

By François Trocase. This is the abridged 1942 edition, completely reset with new illustrations, by Léon de Poncins of François Trocase's 1899 study of the end of the Austro-Hungarian Empire. It provides a crucial insight into the role played by one group in the collapse of this venerable Catholic empire at the heart of Europe. More focused than Édouard Drumont's historic survey *La France Juive* (1886), Trocase's work presents a detailed analysis of the economic and social conditions of the Austrian Empire in its last days. His investigation of the *modus operandi* of Jewish powerbrokers has an urgent relevance to the economic and political conditions of Western states. How did they gain such power? How did they undermine the Church? What control did they exercise on politics, finance and society? What was the relationship between Jews and socialism? Also a section on the "anti-Semitic" movement in Austria. Softcover, 97 pages, #904, **$12.50**.

Jewish Fanaticism

By Hervé Ryssen. Judaism is essentially a universalistic political project with the objective of world unification, the prelude to global pacification. It is a long-term project and the aim is not simply to convert the world to Judaism, but rather to incite the other peoples to abandon their racial, national and religious identities so as to favor the spirit of "tolerance" between men. The Jews thus feel compelled to engage in perpetual agitation intended to convince the world to adopt their project. They are a people of propagandists. It is not by chance that they are so influential in the

mass media of all democratic societies. The incessant guilt-tripping campaigns directed at Europeans of all stripes and for all crimes, whether real or imagined, relating to slavery, colonialism, pillaging the Third World or Auschwitz, have no other aim, when all is said and done, than to eradicate all sense of collective identity. Softcover, 449 pages, #873, **$30**.

The Jewish Mafia: The Great International Predators

Hervé Ryssen details Jewish crimes including: sex slavery, global organ trafficking, organ transplant industry, "Torah Nostra," Murder Inc., Meyer Lansky, "invisible" mafia, pillage of Russia, fall of the Oligarchs, crime from Berlin to Marbella, Organizatsiya, crime in Antwerp, Vilnius, Bangkok and Bogota, Israeli mafia, diamond scams, revolutionary funding, illegal drug trade, porn industry, illegal immigrant trafficking, Atlantic African slave trade, Christian slaves of the Middle Ages, aesthetic surgery racket, Lipsky's swindles, Jacques Crozmarie, the ARC scandal, horse racing and garage rip-offs, the VAT fraud, crime in England, the U.S. and France, the pillaging of vanquished countries and much more. Softcover, 381 pages, 475 endnotes, #731, **$35**.

Israel's Billions: Jewish Swindlers and International Financiers

By Hervé Ryssen. Jews have been expelled from every country they have ever lived in, at all periods of history. Sometimes they have been massacred. The principal impetus was usury, ruining peasants and tradesmen while disproportionately enriching the Jewish communities in all the cities. The receiving of stolen goods is another accusation, as well as their manifest hatred of the Church and the *goyim* in general. All over Europe, they engaged in smuggling, debasing the coinage, washing ducats in acid, using yellow arsenic to give brass the color of gold, to swindle and deceive the Christians in a thousand ways. Very little has changed in this regard, except that these swindles have acquired a scope unprecedented in history since the turn of the 20th century. Softcover, 279 pages, #833, **$25**.

A History of Anti-Semitism

By Hervé Ryssen. The history of Judaism is that of a sect constantly at war with the rest of humanity. According to prophecy, after the great war against the last enemies of Israel, the Messianic times will be a blessed time for the Jews. All the Earth will be unified, and the Jews will be recognized by all as God's chosen people. To succeed in reaching this universal peace and hasten the coming of the Messiah, fanatical Jewish sects must work unceasingly to destroy all the differences among men—nations, races, religions and local customs. It is this messianic tension which motivates their energy. It is on the ruins of the nations that the long-awaited world government will be erected. If you look around the Western world in particular, you can see that this aim is coming true. Softcover, 453 pages, #768, **$35**.

Psychoanalysis of Judaism

By Hervé Ryssen. Jews are possibly the most successful religious and cultural group on the planet. In America, they are the kings of media, Hollywood, the music industry and Wall Street. They have the most powerful and determined lobbies in the world, working not only for their own national interests, but the interests of the state of Israel. Israeli leaders have openly admitted that they "own" the U.S. Congress. So what makes Jews so successful? How have they been able to wield such influence over the non-Jewish nations in which they dwell? How have they convinced so many that their suffering is "the worst"? How have powerful organizations managed to get the world's tech companies to suppress criticism? Softcover, 461 pages, #846, **$30**.

The Jewish Hand in the World Wars

By Prof. Thomas Dalton. Throughout history, Jews have played an exceptionally active role in promoting and inciting war, says the author. With their influence in government, we find recurrent instances of Jews promoting hardline, uncompromising stances and actively inciting people to hatred. The author maintains that Jewish misanthropy, rooted in Old Testament mandates, and combined with a ruthless materialism, has led them, time and again, to instigate warfare if it served their larger interests. This fact explains much about the present-day world. This book examines in detail the Jewish hand in the two world wars. Along the way, Dalton dissects Jewish strategies for maximizing gain amidst warfare, reaching back centuries, i.e., how to thrive iand profit from mayhem. Softcover, 198 pages, #790, **$32.50**.

True History of the Middle East Needs to Be Openly Taught

SHOULD CRITICISM OF ISRAEL and its holocaust of the Palestinian people be a part of the narrative of the Academic Engagement Network (AEN)? Yes, it should. Nationalist thinker John Wear explains why, and exposes the prating hypocrisy of its "no hypocrisy" leaders. We hear fine words from such leaders as AEN President Mark Yudof, but is it all just empty rhetoric?

By John Wear

The Academic Engagement Network (AEN) website says that the network is an active organization of American college and university faculty opposing the Boycott, Divestment and Sanctions movement.[1]

Mark Yudof, chair of AEN's Advisory Board, states that:

> [AEN's narrative] should emphasize democratic participation and civil rights; tolerance; equality for people of all races, ethnicities and sexual orientations; human rights; freedom of expression and academic freedom. If Israel or its neighbors fall short of these expectations, criticism is quite warranted and legitimate and should be a part of the narrative. No hypocrisy, no double standards.[2]

ETHNIC CLEANSING

There were 600,000 Jews and 1.3 million native Palestinians in Palestine in December 1947. Jews owned less than 7% of the land, and almost all the cultivated land was owned by Palestinians. Because of this demographic and geographical balance, the Palestinians regarded any plan that did not allow them to decide their future as being unacceptable and immoral.[3]

MARK YUDOF
Opposes boycott of Israel.

The United Nations decided to appease Jewish leader David Ben-Gurion by allowing unlimited immigration of Jews and granting 55% of Palestine's land to the new Jewish state. The Jewish community knew when it agreed to this United Nations (UN) plan that the Palestinians would reject such an unfair agreement. Israeli propaganda, however, has repeatedly used its acceptance of the UN plan and the Palestinian rejection to indicate Israel's peaceful intentions toward the Palestinians.[4]

At one time, the Arab world did not have the military means to stop Zionist military aggression. Three months before Arab armies entered Palestine in May 1948, the Zionist military forces began to ethnically cleanse Palestinians from their houses, fields and land. In the process, Zionist military forces added another 23% of Palestine's land to the 55% granted to them by the UN. The Israeli state comprised almost 80% of Palestine by January 1950.[5]

Documents released in 1998 from the archives of the Israel Defense Forces proved the planned massive expulsions of Palestinians.[6]

The Zionist takeover of Palestine was aided by detailed files on every Palestinian village, prepared by the Haganah, the main Zionist underground militia in Palestine. These files, which included aerial photographs indicating the best access and entry points to each village as well as the number of weapons held in each home, enabled the Zionists to know how to best attack Palestinian villages.[7]

There were at least 33 massacres of Palestinian villages during Israel's "War of Independence." Zionist forces

were larger and better equipped than their opponents and, by the end of the war, over 750,000 Palestinians had been ruthlessly expelled from their homes.[8] Israeli historian Tom Segev writes, "Israel was born of terror, war and revolution, and its creation required a measure of fanaticism and of cruelty."[9]

Entire cities and hundreds of villages were left empty and repopulated with new Jewish immigrants. The Jewish immigrants numbered 100,000 in April 1949, most of them survivors of the war in Europe. The Palestinians lost everything they had and became destitute refugees, while the Jewish immigrants stole Palestinian property and confiscated everything they needed.[10]

Israeli historian Ilan Pappé writes that the Zionist takeover of Palestine "was a clear-cut case of an ethnic cleansing operation, regarded under international law today as a crime against humanity."[11]

Norman Finkelstein writes:

> The injustice inflicted on Palestinians by Zionism was manifest and, except on racist grounds, unanswerable: their right to self-determination, and perhaps even to their homeland, was being denied.[12]

Finkelstein concludes that "the scholarly consensus is that Palestinians were ethnically cleansed in 1948."[13]

Israel claimed that the majority of Palestinian refugees fled "voluntarily" and were not expelled. However, Israel refused to allow Palestinians to return to their homes as demanded by a UN resolution shortly after the 1948 war. The "state of Israel" was thus clearly founded through the ethnic cleansing of the indigenous inhabitants.[14]

INJUSTICE CONTINUES

Israel's creation has been justified by claiming that "Jews" have a right of return to their homeland. However, since most Israeli Jews are Ashkenazi Jews, whose immediate ancestors never lived in Palestine, this claim is not valid.

Honoring Victims of the Nakba

Last year, 2023, marked the 75th anniversary of the mass eviction of Palestinians known as "the Nakba" or "the Catastrophe." The UN Committee on the Exercise of the Inalienable Rights of the Palestinian People commemorated this tragic anniversary of the Nakba at UN Headquarters in New York. Interestingly, while the UN threw a big gala to keep Israeli crimes of the past in the minds of people today, celebrating the Nakba in Israel itself is a crime. In truth, Israel does not care what the UN says. Stretching back to 1947, the state of Israel has been condemned in hundreds of resolutions by the UN. From 1967 to 1989, the UN Security Council adopted 131 Security Council resolutions directly addressing behavior by Israel in the Arab-Israeli "conflict." In 2023, Israel was sanctioned by the UN for its behavior 14 times. Resolutions against the rest of the world totaled seven. Israeli spokesmen identify anti-Semitic sentiment—not their own murderous actions—as the true cause of all these sanctions. Above, Palestinian singer Sanaa Moussa performs during the special commemoration of the Nakba held in the General Assembly Hall.

Geneticist Dr. Mazin Qumsiyeh writes:

> The Zionist concept of "return" is flawed, at least with respect to Ashkenazi Jews. … Return implies that one's ancestors originated from the area in question.[15]

[Approximately 65% of "Israelis"—that is, Israeli "Jews"—say they are either secular or atheists, while only 30% practice the religion of Judaism, so "right of return" is clearly not a matter of religion.—Ed.]

Israeli leaders established a racist nation set up exclusively for Jews. A Palestinian who was born within the boundaries of what is now Israel cannot return to his homeland and become a citizen of Israel. By contrast, a Jew born outside of Israel can immigrate to Israel and be granted instant citizenship with numerous benefits. Israel has segregated housing areas, schools and recreational facilities where Palestinians are not allowed. The legality of marriage between Jews and Palestinians is also not recognized by Israeli law.[16]

The ethnic cleansing of Palestinians continued in June 1967 after the Six-Day War. Israel conquered and occupied the West Bank from Jordan, the Gaza Strip from Egypt and the Golan Heights from Syria. These territories are still occupied by Israel today.[17]

Approximately 300,000 Palestinians fled or were driven into exile as Israel conquered the West Bank and Gaza. Hundreds of villages were systematically razed, and over 2,000 Palestinian homes were demolished or sealed without charges or trial. The Israeli government confiscated fully 50% of the land and 80% of the water reserves in these territories. Approximately 100,000 Jews settled in the West Bank and Gaza to replace the many exiled Palestinians.[18]

Palestinian Gaza has been turned into a massive prison ghetto. Surrounded by electronic fences and military posts, tightly sealed from the outside world, Palestinians in Gaza are forced to live in extreme poverty.

Israeli linguistics professor Tanya Reinhart wrote in 2002:

> What we are witnessing in the Occupied Territories—Israel's penal colonies—is the invisible and daily killing of the sick and wounded who are deprived of medical care, of the weak who cannot survive in the new poverty conditions, and of those who are approaching starvation.[19]

Israeli leaders have proceeded to implement throughout the West Bank their model of control perfected in Gaza. Since May 2002, Israel has been constructing a wall in the West Bank, which will make this system of control a reality when completed. Along the route under construction, Israel is dispossessing Palestinian farmers of their land and pushing them into small enclaves between fences and walls.

> The BDS movement is a nonviolent way for people to educate others and put pressure on Israel.

Eventually, the West Bank Palestinians will be surrounded on all sides, as is currently the case in Gaza.[20]

The Israeli Knesset has also enacted numerous laws in recent years that discriminate against Palestinians. The Nakba Law of 2009, for example, stipulated that whoever would commemorate Israel's day of independence as a day of mourning would be arrested.

This law was slightly revised under international pressure: Arrest was replaced by the denial of public funding to any entity that commemorates the Nakba. Since virtually all Palestinian institutions and homes remember and commemorate the Nakba, this law is highly discriminatory against Palestinians.[21]

Nakba Day, or *Yawm an-Nakba*, Day of the Catastrophe, commemorated on May 15, marks the displacement of the natives that followed the 1948 Israeli independence declaration.

ISRAEL'S HUMAN RIGHTS RECORD

Palestinians have faced ongoing terrorism from Israel in times of peace and war. A partial list of some of the more notable massacres of Palestinians by Israeli Jews includes the events at Sharafat (1951), Qibya (1953), Kafr Qasim (1956), Al-Sammou (1966), Sabra and Shatila (1982), Oyoun Qara (1990), the Al-Aqsa Mosque (Temple Mount killings, 1990), the Ibrahimi Mosque massacre (Cave of the Patriarchs massacre, 1994), Qana (1996) and the 2023 Jabalia refugee camp slaughter. Israel also bombed and invaded Lebanon in the 1980s (and is doing it now), with estimates of civilian casualties exceeding 15,000.[22]

Israel has assassinated hundreds of Palestinian leaders. Many of these leaders had never been associated with violence or terror of any kind; they were simply writers or clerics who, by their words, inspired their countrymen to seek freedom. The assassinations of Palestinian leaders have often killed innocent bystanders.[23]

Tens of thousands of Palestinians have also been tortured in Israeli jails. A Jewish human rights group in Israel confirmed in a 60-page report that 85% of Palestinian prisoners undergo torture while in custody. Many thousands of these prisoners have died while in Israeli custody.[24]

The UN Committee Against Torture recently cited continued complaints of torture by the Israeli Security Agency and Israel's refusal to implement the UN Convention Against Torture in occupied Palestinian territories.[25]

Tanya Reinhart wrote in 2002 that Israel's "separation" can no longer be compared to the apartheid of old South Africa. Reinhart quotes South Africa's Ronnie Kasrils, a leading light in the ANC's "armed struggle" and former minister of Intelligence Services, as follows::

> The South Africa apartheid regime never engaged in the sort of repression Israel is inflicting on the

> Palestinians. For all the evils and atrocities of apartheid, the government never sent tanks into Black towns. It never used gunships, bombers, or missiles against the Black towns or Bantustans. The apartheid regime used to impose sieges on black towns, but these sieges were lifted within days.

Reinhart adds that, unlike Israel, South Africa never applied a systematic policy of bringing the Black population to starvation.[26]

In 2017, the Council of Europe's Parliamentary Assembly passed a resolution condemning Israel's unlawful killings of Palestinians in the so-called buffer zone between the Gaza Strip and Israel. The resolution was based on a report compiled by Swedish Assembly member Eva-Lena Jansson. Jansson's report stated:

> Cases of the deliberate fatal shooting of individuals who posed no imminent danger to life amounts to an appalling pattern of apparently systematic unlawful killings. … It is estimated that over 12,620 houses were totally destroyed [in Gaza] and 6,455 severely damaged; 17,650 families or about 100,000 persons were displaced.[27]

The report stated that—even before the post-October 7, 2023 attack by members of Hamas and the brutal Israeli response—Gaza had become so uninhabitable that many of its residents joined the influx of refugees into Europe. The resolution called for an end to Israel's blockade on Gaza, voicing alarm over the deteriorating humanitarian situation.[28] Since then, things have gotten markedly worse for the people of Palestine.

Retired Harvard law professor Alan Dershowitz, however, wrote that Israel's record on human rights is "generally superb."[29] Israel's human rights record has been monitored by a multitude of independent organizations with autonomous research and field staff. Contrary to Dershowitz's claim, all of these human rights organizations consistently document egregious human rights violations on the part of Israel.[30]

Norman Finkelstein writes:

> Either mainstream human rights organizations and independent experts have engaged in a vast anti-Semitic conspiracy to defame Israel, or Dershowitz has egregiously misrepresented the factual record. No third possibility exists.[31]

BDS MOVEMENT

The Boycott, Divestment and Sanctions (BDS) movement is a nonviolent way for the international community to educate others and put pressure on Israel in a manner similar to that used against South Africa's former apartheid leaders. According to Jewish Israeli BDS activist Jeff Halper, Israel's occupation and border wall classify as apartheid because they meet precisely the definition of the word: the separation of populations in a state in which one population permanently dominates another.[32]

Jewish American BDS activist Anna Baltzer explains why BDS is needed:

> When a country violating human rights does not respond to decades of pressure through diplomatic efforts, international law, or rulings by the International Court of Justice, another level of pressure is needed. … [W]hen member states repeatedly violate resolutions, the UN often imposes sanctions like those … imposed on Sudan for occupation in Darfur.
>
> Israel has now violated more UN resolutions than any other country in the world. Nevertheless, any UN proposal to remove international complicity in Israel's transgressions has been systematically opposed by the U.S. through its veto in the UN Security Council. The question is not whether Israel should be singled out for BDS, but whether it should be immune to the standard to which other countries are held.[33]

The world cannot wait for Israel to begin to treat Palestinians fairly. Israel will not change unless it has to. Norman Finkelstein wrote in 2003:

> [I]srael will withdraw from the Occupied Territories only if Pales-

End Times Warfare

The Eschatological Beliefs of The Great Religions

Eschatology is the study of "End Times" doctrines. All three of the great monotheistic religions, i.e., Judaism, Christianity and Islam, contain a belief that the world as we know it was created by God, and that this same world must sooner or later come to an end. This theme of the end times and the coming of the Messiah are also found in Judaism—the "Mother Religion"—as well as Islam, which also draws its inspiration from the Old Testament. And yet, these three religions are completely incompatible with each other. Why? For the pure and simple reason that their vision of the future diverges on this fundamental point: At the end of time, one—and only one—religion is to triumph. In the end, the religion whose goals are the clearest and whose faith the most ardent will bear away the victory. Which will it be? *End Times Warfare*: softcover, 189 pages, #855, ***$25*** minus 10% for TBR subscribers plus $5 S&H inside the U.S. Available exclusively in English from TBR, P.O. Germany's War

The Origins, Aftermath and Atrocities of World War II

By John Wear. *Germany's War* documents that the Allied leaders were primarily responsible for starting and prolonging WWII—costing millions of lives. FDR's numerous provocations forced Germany to declare war on the U.S.A. despite Hitler's desire for peace. Also covers Stalin's plan for European conquest, America's second crusade, how WWII was planned and instigated, the Allied conspiracy to prolong the war, the Allied POW camps that killed a million Germans, the appalling plight of expelled Germans, history's most terrible peace, crimes committed in German camps, the alleged genocide of 6 million Jews, and more. tinians (and their supporters) can summon sufficient force to change the calculus of costs for Israel: that is, making the price of occupation too high. The historical record sustains this hypothesis.[34]

CONCLUSION

The historical record indicates that Israel is a racist nation formed through the ethnic cleansing of the indigenous Palestinian inhabitants. Israel has engaged in numerous acts of violence, terror, discrimination, and repression against its native Palestinian citizens. Israel has violated more UN resolutions than any other country in that global body, and has not responded to decades of diplomatic efforts to change its policies toward the Palestinians.

The AEN has the opportunity to make these important facts known to university students. However, with pro-Zionist advisory board members such as Mark Yudof, Lawrence Summers and Deborah Lipstadt, these facts will probably not be a part of AEN's narrative. Yudof's statement that no hypocrisy or double standard will apply to Israel will almost certainly be empty rhetoric. ❖

Has Western Civilization Passed from Fall to Winter?

By Paul T. Angel

A recurring theme here at THE BARNES REVIEW has been the decline of Western civilization. For that reason, TBR has not been afraid to confront subjects like the planned elimination of the White race, out-of-control immigration into the Western world, perpetual war, the worldwide war against Christianity, the evils of the banking system, the Marxist breakdown of the family and much more. TBR sadly has the often-sorrowful job of documenting what we wish we were not witnessing.

The decline of Western civilization is clearly before us. But, like a termite infestation, the damage has already been done by the time symptoms are seen by the average person. One man—a sage, some insist—could, however, see the potential damage long before others even grew suspicious.

In fact, many of the events we are now witnessing were predicted in 1918 in a German book titled *Der Untergang des Abendlandes* ("The Downfall of the Occident"). That book, written by philosopher and historian Oswald Spengler, is better known today as *The Decline of the West*.

With the wounds of World War I and that war's effects upon Germany clearly visible in his mind's eye, Spengler wrote this two-volume history of the world. Intertwined within its chapters, "Spengler the philosopher" points out the causes and effects of the "Great War," explaining to his readers that all historical events are a series of chain reactions that can, one day, bring about the end of a civilization.

Oswald Spengler (1880-1936) believed he could predict when and why the great civilizations of man rose and fell.

Spengler had his critics; all geniuses do. Couple that with the fact he was an inspirational contemporary of Adolf Hitler, whose rise Spengler predicted (though not by name), his prescient work has thus largely been ignored by politically correct academics, Court Historians, philosophers, and politicians who should otherwise have learned from reading it.

Spengler divided his history into eight primary cultures or civilizations. These were Babylon, Egypt, India, China, Central America (Mayan and Aztec), the Greco-Romans, the Arab world and, finally, Faustian civilization (we call it Western civilization). He believed each of these civilizations went through, or would go through, predictable "seasons." Each experienced a spring, summer, fall, and winter.

A civilization's spring is the formative time when the characteristic identity of the people begins to take root.

This is followed by a cultural "summer"—the period of "civilization" itself. A civilization's summer is when the people are inspired by their own art, architecture and religion. "Spring" and "summer" are the organic stages of a civilization when it is expected to grow, expand and blossom.

"Fall" and "winter" are the inorganic stages. Just as crops planted in spring grow over the summer and are then harvested in fall, civilization's creativity and the fruits of its efforts should be reaped at this stage. The life and growth that were so vibrant in the spring and summer, however, are fading. In the "fall," civilization stiffens. It becomes overpopulated and "metropolitan." Unlike the spring, the fall is uninspired, and slowly withers. Then winter comes.

According to Spengler, in the eight civilizations he studied, each of the first three seasons lasted for roughly 250 years each. Given that consistency, he boasted that, by using his "civilization model," he could make accurate predictions about the length of time a civilization would survive and when it might collapse. Obviously, some

civilizations do not follow this exact timeline, but will evolve and devolve from spring to winter. Spengler's predictions on the topic were so accurate, they still amaze readers today.

Spengler called Western civilization Faustian (after the German folklore story of Faust, a man who sold his soul to the devil in exchange for knowledge, pleasure, and power) because of the West's desire to constantly push ahead, even at great cost.

He also believed Western civilization had entered its spring before A.D. 1000, as that civilization's spring came on the heels of the apocalyptic winter experienced by the Roman Empire's collapse. Those who follow this worldview are known as Faustians.

Faustians see the beginnings of a new culture when it develops its own unique flavor. Architecturally, for example, building styles shifted from Romanesque to Gothic as the people of the new civilization began to honor their monotheistic God with more and more elaborate and exquisitely beautiful houses of worship.This is especially evident in the age of the Gothic cathedrals. Epic sagas such as *Beowulf* began a new style of literature.

After Rome collapsed culturally and politically, the people of the new civilization—referred to as barbarians by the old Romans—had many tribes with many chieftains and kings, but no major political states or empires had yet arisen.

As Western civilization moved into its "summer," we saw a "ripening consciousness" among the people. Novels such as *Don Quixote* were written, and Europeans composed plays that have endured for centuries. Architecturally, stately palaces of intricate and exotic styles were built.

Ornate and elaborately detailed art was created, and some of the greatest musical composers the world has ever known were producing sophisticated masterworks for full orchestras.

Centers of political power were changing, as well. Spengler says this "season" of Western civilization saw an increase in "conflicts between aristocracy and monarchy," as the "political centers shifted from castles and estates to cities."

From A.D. 900–1500, Spengler says, European tribalism gave way to rising nation states and larger kingdoms. From 1500–1800, these evolved into a world of nation-states, more like we know them today.

This was Western civilization's summer. Then came "fall." The new nation-states, Spengler says, "struggle between the aristocracy and the bourgeoisie, revolutions, and Napoleonism," starting with the American Revolution and continuing into World War I.

During this time, Western civilization became "metropolitan." It overpopulated its cities; unrest among the people was fueled.

In Western civilization's "fall," true art began to die out in favor of degraded "art for the masses." Even though the "fall" is the beginning of a downward trajectory, the harvest of previous generations is still being reaped. So, to all appearances, civilization is peaking. But it is not. It has already started its decline, its creative force sapped.

Spengler says that World War I brought our Western civilization into that transition time when "fall" turns into "winter." Spengler writes of the "dawn of megalopolitan civilization." He described the "extinction of spiritual creative force," and said that "life itself becomes problematical."

He describes what's left of our culture as the "ethical-practical tendencies of an irreligious and unmetaphysical cosmopolitanism."

Over the coming decades, Spengler predicted the lowering IQs of our people, followed by a lack of interest in reading and, therefore, in thinking. Without the resistance of a thinking people, Spengler believed, governments

The Importance of Race in Civilization

By Wayne Macleod. A grand overview of the relationship between civilization, culture and race. Using historical examples, the author shows that different races create different civilizations, each a reflection of their own inner values. These civilizations and cultures only come to an end when the originating races are destroyed—through physical integration and racial miscegenation. According to the author, "Culture is primarily artistic, that is born from the soul of a people, who may utilize many tools in the pursuit of their achievements. Needless to say, the better the tools the higher the Culture, but, in all cases of Western history, the discoveries of ancient or contemporary peoples that aided Western Civilization were attained by Europeans themselves, never were they the result of culture mixing." become autocratic and tyrannical.

Art devolves even further into "meaningless subjects of fashion." An example would be the infamous piece of photographic "art," made by Andres Serrano, known as *Immersion*. It features a crucifix in a pail of urine. Predictably, the "artwork" drew fawning praise from "progressives."[1]

The older population dies in civilizational winter and, Spengler says, it fails to pass on to the younger generations the myths and cultural pride that the shared civilization was founded upon. Many of the younger people, Spengler believed, would come to see those civilizational accomplishments and the memories of them as meaningless relics of an antiquated era. We are now experiencing what Spengler called the "spread of the final world sentiment."

Spengler also predicted that Marxism would infect the world. He was right. Even as Communism appeared to be dead and dying, its little sister, Socialism, took its place at the table.

But what comes next? According to Spengler, the countryside and then the cities will depopulate. While the readers of his day said "never," one need only look at America's Rust Belt—Detroit, for instance—to prove Spengler's prescience.

This was all predicted by Spengler in 1918, yet the words in *Decline of the West* read like a headline in many of today's newspapers.

The "winter" of Greco-Roman politics was evidenced by a shift from the Roman Republic into the despotism of "Caesarism," says Spengler. As this happened, the idea of representation, or, as Thomas Jefferson put it, "the consent of the governed," broke down, and there was a shift to "politics" by bribery, coercion, and force.

Since the U.S. government and Constitution were modeled on Greco-Roman precursors, it's only natural that we would begin to witness its breakdown in a very similar manner. In fact, there are many similarities between the two parties that dominate our political landscape and the two major parties that dominated the political landscape of Rome. The Optimates and Populares were the Republicans and Democrats of their day.

When there are only two parties, the checks and balances devolve into gridlock. As a result, representative government eventually stops working and politics by censorship, threat, graft, and force rule the day. Greedy government officials line their pockets rather than serve the public, having long ago lost touch with the plebes they are supposed to serve.

Again, Spengler's predictive model seems to have forecasted the current economic and political situation in the Western world. If that is correct, we now only await the rise of a dictator to smash the crumbling edifice, as Spengler warns. This figure is more likely to come today in the form of the United Nations, the World Monetary Fund or the World Health Organization, and not a modern-day "Hitler."

> To Oswald Spengler, democracy was the government of a civilization in decline.

SPENGLER & DEMOCRACY

As you know by now, Spengler did not have a very high opinion of democracy. To him, democracy was the government of civilizations in decline. As mentioned, he believed the American Revolution marked the beginning of the "fall" of Western civilization, though our original republican form of government in the United States—in which our rights came from God—was much different than the "democracy" we have today, in which even rights enshrined in the Constitution may one day be voted away by the mob and the pliable accomplices they elect to office.

Spengler viewed democracy as the weapon of choice for the money interests, who spend their wealth buying news outlets to create the illusion there is actual "consent of the governed." Essentially, according to Spengler, "democracy" means living under the thumb of plutocrats. Their money manipulates the media to generate the propaganda needed to imprison and control the thoughts of the non-moneyed peons.

Spengler rightly saw the "isms" of the left that have dominated the last century—equalism, feminism, Communism, Socialism etc.—for what they were: tools of the moneyed elite to seize power from the masses.

As democracy breaks down, the government becomes increasingly authoritarian, the money powers gain more control over the government and, eventually, destroy it.

As our "democratic" government, driven by greed, crumbles under its own corruption, "we the people" no longer see the point in elections. Knowing our leaders refuse to guarantee an honest vote count, the best candidates stop running. They also know they will be smeared.

Blood then becomes the only force that can conquer money. This is where we currently are in Spengler's prophecy for the Western world.

Just as our beloved Western civilization was built upon the ashes of the ancient Greek and Roman civilizations that preceded it, a new civilization is being built upon the ashes of our own. It will be, to quote George Bush and Henry Kissinger, a "New World Order." But that need not necessarily be evil and bad. Ultimately, that will be decided by the people. The harvest is determined by the seeds, and it is in winter that the seeds are prepared for spring planting. ❖

Immersion (also referred to as *Piss Christ*) is a 1987 photograph by American "artist" Andres Serrano. It depicts a small plastic crucifix submerged in a small glass tank of the artist's urine. Shockingly, the piece was a winner of an "Awards in the Visual Arts" competition, sponsored and awarded, inevitably, by the U.S. government.

Abraham Lincoln Rejects Peace at Hampton Roads Conference

What motivated Lincoln to meet with peace representatives?

By Marc Roland

Even well-informed students of the War for Southern Independence are unfamiliar with the Hampton Roads Conference. That is because the secret talks are defined and thus minimized by conventional historians as having been nothing more than a futile exercise in Abraham Lincoln's peace-loving generosity, crushed by the bellicose intractability of Jefferson Davis.

This consensus version of what occurred is radically contradicted by the first book-length history of the Hampton Roads Conference. While author Col. Lochlainn Seabrook's abundantly documented examination of the high-level meeting convincingly debunks mainstream interpretations, he also reveals how 1865's diplomatic encounter was an American crossroads between constitutional liberty and alien domination.

Bizarre as it seems, peace negotiations got underway when the U.S. president sat down with the Confederacy's vice president at the same time their respective armies were decimating each other. With the end of hostilities allegedly in sight and Union forces everywhere successful, why should the imminently victorious Lincoln have bothered to personally meet the second-most-powerful man in the government of his enemy? Because things were not entirely as they seemed.

FRANCIS P. BLAIR

By organizing the Hampton Roads Conference, Francis Blair (1791–1876) believed he was helping to end the war. Afterward, however, he became disillusioned with the Union cause he initially supported due to the U.S. government's Reconstruction atrocities visited upon the prostrate South.

Civilian discontent with the war had already broken out. In New York City, the draft riots, which had been brutally suppressed by federal forces, caused sufficient bloodshed and simmering animosity to fuel inevitable waves of recurring dissent. Refueled now by the war-weariness spreading throughout the Union, a Northern implosion of some kind appeared in the offing. Lincoln was especially troubled that the civil unrest rippling through the entire Union would spread. If his long-term insistence on the Confederacy's dissolution had to be put aside in order to avoid a domestic collapse of the North, so be it.

While the Rebels were no longer winning battles, Yankee casualties continued to mount, as the bitter fighting dragged on. Lincoln was under increasing pressure to end it as soon as possible, if only to preserve the South intact. Its physical destruction was of no use to him. He believed the postwar U.S. economy would depend upon exploitation of the militarily prostrate but still agriculturally rich Southlands, after the conclusion of combat operations.

These were the urgent, if unspoken, motives that brought Lincoln to Hampton Roads.

Its conference was the brainchild of Francis P. Blair, an influential Washington, D.C. journalist born in Virginia, where he had developed a personal friendship with Jefferson Davis. Blair nonetheless supported Lincoln for president and favored the North after the war began. These attributes evidently qualified him as a diplomatic go-between at home among both Blue Bellies and Johnny Rebs.

Eventually horrified by the conflict's

developing carnage, he proposed that both of them suspend hostilities at once to combine their forces for an invasion of Mexico, where the French had violated the Monroe Doctrine in April 1864 by installing a puppet emperor, Maximilian I, to rule over Middle America. [See TBR's July/August 2015 edition for more on the saga of Maximilian I.—Ed.] Blair argued that achieving a shared victory south of the border would erase former animosities, enabling Northerners and Southerners to settle their differences without further bloodshed.

He first presented his idea to Lincoln, who saw in the wild scheme potential cover for terminating hostilities before the anticipated outbreak of renewed popular unrest across the North. Lincoln issued Blair a passport to Richmond, allowing him to meet with the Confederate president, who reacted to the Mexico proposal by saying, "I am willing now, as heretofore, to enter into negotiations for the restoration of peace."

Lincoln would not allow such a meeting to be conducted in Washington, D.C., however, because doing so would acknowledge the Confederacy as a separate nation. Accordingly, the conference was held in federally occupied Virginia, in the upper deck saloon of a 587-ton paddlewheel steamer, the 181-foot-long *River Queen*, anchored in Hampton Roads about 275 yards offshore. This ensured privacy for the delegates. Incidentally, "Roads" is an abbreviation for "roadstead," signifying a protected stretch of water for immobilized vessels.

On February 3, 1865, Confederate States of America Vice President Alexander H. Stephens stepped aboard the *River Queen* with C.S.A. Assistant Secretary of War John A. Campbell and Confederate Sen. Robert M.T. Hunter. They amiably shook hands with President Lincoln and Secretary of State William H. Seward.

Not even a single bodyguard was onboard. Besides the direct participants, only one infrequent servant was present during the next four hours of talks.

THE PEACE COMMISSION.
Flying to Abraham's Bosom.

Published in 1865, this Northern newspaper cartoon pokes fun at the Confederate representatives of the Hampton Roads Conference.

The five men met "to discuss terms upon which the war might be brought to a close." But Lincoln made sure from the outset that there was to be no discussion. "He lay down three indispensable conditions of peace," Seabrook writes. These included dismantling the Confederate States of America, freeing all slaves, and total disarmament. His ultimatum left no room for negotiation. The Southerners were appalled. Seabrook reports:

> Hunter remarked with intensity that to give up all arms and all guarantees to fair treatment was "unconditional submission." Seward replied that they did not use that word; the South would have all the safeguards of the Constitution and the courts. Lincoln said that, in the exercise of powers delegated to him by the various confiscation and penal acts, he would be very lenient.

The Southern commissioners were

naturally distrustful and unwilling to take either enemy politician at his word without any written assurances.

Seabrook informs us that "Stephens asked the president to reconsider the possibility of an armistice and received a noncommittal answer." An "armistice" in Lincoln's mind was synonymous with "capitulation" and could only be considered after every rebellious state was absorbed by the Union.

In desperation, Campbell brought up Blair's proposal to combine Confederate and Northern armies in a joint invasion of Mexico, as a means of achieving peace and reunification.

Lincoln brushed aside the harebrained scheme, saying that:

> [T]he right to declare war lay with Congress. In any case, he had no intention of making such a convention without first securing an unconditional recognition of the Union. To do otherwise would be to recognize the Confederacy and the justice of their status in rebellion against the national authority.

Lincoln appeared somewhat less inflexible regarding slavery. He said that the Emancipation Proclamation was nothing more than a "war measure" that would cease when the war ended. The South, after rejoining the United States could easily defeat the 13th Amendment by "voting it down as members of the Union. The whole number of states being 36, any 10 of them could defeat this proposed amendment."

The previous year, Davis schooled a Northern newspaper reporter when he said, "We are not fighting for slavery. We are fighting for independence. Slavery never was an essential element."

Lincoln was nonetheless adamant. According to Seabrook, Lincoln took the position that:

> [T]he North and the South belonged to "one common country," [ergo] secession was illegal. Thus, the Southern states had violated the Constitution, which prevented him from agreeing to any terms with the Confederacy.

In fact, Seabrook points out:

> There was (and is) no ban on secession in the U.S. Constitution. Secession is tacitly sanctioned by the 9th and 10th Amendments. Within the purview of this article of the Constitution, the states are independent, distinct and sovereign bodies—that is, in their reserved powers, they are as sovereign, separate and supreme as the government of the United States in its delegated powers.
>
> One of these powers is the right of the people to alter or abolish any form of government, and to institute a new one such as to them shall seem most likely to affect their safety and happiness; that power is neither "delegated to the United States by the Constitution," nor prohibited by it to the states.

But Lincoln was not to be deterred. Seabrook tells us:

> No terms or proposals of any treaty or agreement looking to an ultimate settlement would be entertained or made by him with the Confederate states, because that would be a recognition of their existence as a separate power, which under no circumstances could be done, and, for this reason, that no such terms would be entertained by him from the states separately, that no extended truce or armistice, as at present advised, would be granted without a satisfactory assurance in advance of a complete restoration of the authority of the United States over all places within the states of the Confederacy.

Thus, the summit meeting at Hampton Roads was not a conference for negotiating an end to the war, but an ultimatum of "unconditional submission" directed at the Southern delegates, who had come aboard the *River Queen* expecting a Lincoln more interested in peace than subservience.

Learning of his intransigence, Davis "attributed this change in his policy to the fall of Fort Fisher, North Carolina,

on January 15, 1865." Davis said:

> The fall of this fort was one of the greatest disasters that had befallen our cause from the beginning of the war—not excepting the loss of Vicksburg or Atlanta.
>
> Forts Fisher and Caswell guarded the entrance to the Cape Fear River and prevented the complete blockade of the port of Wilmington, through which a limited foreign commerce had been carried on during the whole time.
>
> It was by means of [smuggling cotton] that we had been enabled to get along financially as well as we had; and, at this point also, a considerable number of arms and various munitions of war, as well as large supplies of substance, had been introduced.
>
> All other ports except Wilmington had long since been closed by U.S. naval siege. The closing of the port of Wilmington was the complete shutting out of the Confederate States from all intercourse by sea with foreign countries. The closing of this port, therefore, and the great advantage against us secured by it, was the cause of a change in policy on the part of the [Lincoln] administration in Washington.

In other words, because enemy capture of Forts Fisher and Caswell sealed off the South from the outside world, their loss ensured the swift end of the war. Lee surrendered just two months after the Hampton Roads Conference, thereby freeing the Great Emancipator from any need to negotiate peace, and allowing him, as victor, to dictate terms.

Coverage of the meeting in the Northern press became official American history. Seabrook writes:

> One of the most notable mainstream lies invented about the conference is that an emphatic Lincoln told the three Confederate commissioners that he would write "Union" at the top of a blank piece of paper, and they could fill in whatever terms they wanted to bring the war to an immediate close.
>
> Simultaneously, Lincoln is said to have offered the South $400 million (the equivalent of $1 billion in today's currency) in compensation for the slaves, if only it would lay down its arms and rejoin the Union.

Seabrook explains how Lincoln was falsely depicted as the great peacemaker by Northern propagandists. Seabrook writes:

> [Lincoln] not only instigated the conference, but made overly generous offer after overly generous offer to the Southern "insurgents," as to how they could easily end the war overnight with a mere signing of the pen. The "erring South" refused all of the lenient and humanitarian attempts at peace offered by a "frank, honest and kind-hearted" Lincoln.

Conversely, President Davis was depicted as a "blood-lusting warmonger who arrogantly and stupidly spurned the U.S. president's magnanimous liberality."

In reality, Davis himself "had no power to accept or reject any terms offered," as Stephens tried to explain:

> [T]he conference was not for the purpose of making peace terms, but to ascertain terms on which peace might be procured, and, of course, the Confederate Congress had the decision in its hands. Yet, Mr. Davis has been blamed for not accepting peace terms, which were never offered.

Had Lincoln offered reasonable peace terms at Hampton Roads, rather than his unremitting insistence on "unconditional submission," the war could have concluded nearly five months before the last Confederate general—Stand Watie—surrendered. Thousands more lives on both sides would have been spared had Lincoln used the Hampton Roads Conference for a real peace overture and not propaganda to pacify Northerners outraged by the seemingly endless carnage. ❖

Confederate Vice President Alexander H. Stephens said: "The greatest curse that can befall a free people is civil war. Our liberties, once lost, may be lost forever. If our entire system of free institutions, as established by our common ancestors, is to be subverted, and an Empire is to be established in their stead; if that is to be the last scene of the great, tragic drama now being enacted: then, be assured, that we of the South will be acquitted, not only in our own consciences, but in the judgment of mankind, of all responsibility for so terrible a catastrophe, and from all guilt of so great a crime against humanity."

Memphis Attorney & Historian Keith Alexander—Uncensored

WHAT FOLLOWS IS AN INTERVIEW with Keith Alexander, a longtime Southern rights activist, historian, and attorney from Memphis, Tennessee. Alexander is, along with TBR Editorial Board member James Edwards, a co-host of the fully uncensored, politically incorrect radio program *The Political Cesspool*. We know you'll find what Alexander has to say about the Civil Rights movement, Cultural Marxism, school integration, and other "sensitive" topics of great pertinence, and well worth the read.

James Edwards: You grew up in the 1950s and 1960s, which was a different world than those born into today's multicultural hellscape have experienced. For the benefit of readers who weren't around to experience it, what did they most miss out on?

Keith Alexander: The existence of a vast blue-collar middle class, for starters. A guy with a high-school education could get an industrial job that paid enough for him to get married, buy a modest home, have kids, and give his family a middle-class life on one income. This was standard across the United States in the 1950s and 1960s. It lasted into the 1970s in Southern cities like Memphis because the South was about 10 years behind liberal bastions like California. But even rural towns usually had at least one local factory that could provide such employment.

Culturally speaking, marriage was the norm and divorce was rare, and usually considered scandalous when it occurred. I grew up in a working-class neighborhood. Each Sunday morning all the fathers, dressed in coats and ties, loaded up their wives and children and headed to church. Wives might have a seasonal or even a part-time job, but their primary job was raising the children and keeping house. Families had dinner together most evenings. It was wonderful.

KEITH ALEXANDER

Edwards: What is radical egalitarianism, and what have been some of the stops along its destructive path?

Alexander: Radical egalitarianism differs from mere egalitarianism when it refuses to be tempered by common sense and obvious empirical evidence of human differences. For instance, when leftist ideologues refuse to acknowledge the scientifically quantified studies confirming differences in average IQs between the different races, they have crossed over the frontier from egalitarianism into the realm of radical egalitarianism, which degrades and destroys order and proper societal function. Radical egalitarianism must be resisted if we are to maintain a fair and efficiently functioning society.

Surrendering to radical egalitarianism will transform America into a Third-World nation. Several of the stops along the road to radical egalitarianism's ascent and degradation of our culture were feminism, no-fault divorce, the sexual revolution, the so-called Civil Rights movement, drug culture, the homosexual/LGBTQ movement, and the "transgender" movement, among others. The "woke" agenda and all of its manifestations are intended to marginalize, ostracize, and, eventually, destroy the founding stock of Europe and America.

Edwards: The left has been engaged in a tireless "Long March through the institutions," as mentioned by paleoconservative thinkers like William Lind. What does he mean, and which institutions have been targeted?

Alexander: This is a term derived from Cultural Marxism. It is one of three key concepts defining the methodology of Cultural Marxism, the other

President Lyndon Baines Johnson turns to shake hands with Martin Luther King Jr. after LBJ signed the Civil Rights Act of 1964. This act was passed to "prevent discrimination based on race, color, religion, sex, and national origin." According to historian Keith Alexander, however, the law "deprives Whites of equal protection under the law and resulted in a new regime of mediocrity that governs every major institution of our nation and is another key element in turning America into a Third World nation."

two being "Critical Theory" and "Cultural Pessimism." In the Civil Rights movement, for example, Critical Theory analysis was applied to public primary and secondary education, higher education, state governments, and voting procedures. The "theory" was to subject the institutions to a barrage of relentless, destructive criticism in a completely negative manner while never admitting any goodness or benefits in them.

The "Long March" went through the media, academia, the government, the courts, the prosecutorial system, the arts, the private sector, and even the churches. The desired result of this drumbeat of criticism was the inducing of "Cultural Pessimism" in Whites, who were thereby convinced of their inferiority and innate evil by their authority figures.

Cultural Marxism is important because it is the template for all the destructive societal change we have experienced in America since the early 1930s and in Western Europe since the end of World War II. These changes are celebrated by the left as the triumph of liberalism, which has greatly diminished our quality of life.

All the societal institutions that contributed to setting Western cultural, moral, and ethical standards have been targeted and then taken over.

Cultural Marxism is a variant form of Marxism developed in Germany in the 1920s by Marxists disappointed by the failure of Communism to take over all of Europe as predicted after World War I. How did Marx and Engels get it wrong?

A think tank called The Frankfurt School, located within the University of Frankfurt, concluded that Marx and Engels were wrong in assuming that the major fault line in human society was "class." Instead, they concluded that race was much more significant, and revolutions should be targeted at aggravating racial animus. This was the blueprint for the Civil Rights movement in America and the current immigration crisis in America, Europe, and other Western nations.

Edwards: You have often pointed out that America's hard turn to the left noticeably began on May 17, 1954. Why was the *Brown v. Board of Education* decision such an ominous event in American history?

Alexander: The *Brown* decision was a milestone for radical leftist change in America. The Civil Rights movement created the blueprint for change followed by successive waves of radical egalitarian movements that followed. *Brown* established the use of "lawfare" as the most effective way

to make sweeping societal change that circumvented the will of the vast majority of the people.

In practical terms, it undermined the existence of the blue-collar middle class in America and the reliable path it provided for upward social mobility. This was done by ruining the quality of public education through racial integration. The key to sustaining a blue-collar middle class with realistic prospects for upward social mobility was easy access to high-quality, free public education. This prospect was destroyed by the racial integration decreed by *Brown*, which was undemocratically forced on Americans by an oligarchy of unelected judges.

When *Brown* really began to gain traction with court-ordered bussing, the newly integrated public schools were a disaster. Conscientious parents realized that consigning their children to such schools was the equivalent of casting them into a danger zone. The alternative was to send your children to private schools, a massive unbudgeted expense.

The days of having large families were over, and many blue-collar White families began only having the number of children they could afford to send to private schools. This led to the phenomenon of "White flight," or Whites moving to newly created suburbs with schools far away from the dangerous social experiments. This led in turn to orderly neighborhoods in the city being turned into ghettos.

Those who moved to the suburbs often sold their homes at a loss, and bought their new homes at a premium, thereby depleting their resources and wrecking their retirement plans. The blue-collar middle class was under assault and quickly evaporated. While the prospects for working and middle-class Whites were diminishing, Black prospects were on the rise due to affirmative action policies that gave them unmerited access to selective colleges, universities, and professional schools.

All of this was a radical change from the bucolic days of America in the 1950s, when the streets were safe, and crime was rare. Life was good—much better than now for everyone—even Blacks. When I was a child, everyone from the children of millionaires on down attended public schools. If you went to a private school, that meant you were either a Roman Catholic or a problem child. This interaction lessened class divisions among Whites and promoted upward social mobility. That's all gone now.

BERCHTOLD BRECHT
"Change the electorate."

Edwards: In what ways were the Voting Rights Act of 1965 and the Immigration and Nationality Act of 1965 harmful to the interests of founding-stock Americans?

Alexander: The Voting Rights Act of 1965 has led to a massive leftist transformation of our laws and government that, if not stopped, will result in irreparable changes that will permanently cast Whites into the role of a persecuted minority in a nation founded by their ancestors.

The legislation was advertised by the left as safeguarding the so-called sacred principle of "one man, one vote," but what if the man can't be bothered to vote? This was the problem the left encountered. It was assumed that Black interests in the South would transform the politics of the South if only Blacks were allowed to vote. The problem liberals failed to acknowledge was that Blacks were already voting freely in most of the South at that time. Blacks in places like Memphis had been voting since the early 1900s, but often had to be bribed with concessions to do so. The problem of Blacks not voting required a new system that at least tacitly allowed "proxy voting" on behalf of reluctant Black voters. The 1965 Voting Rights Act, wrapped sanctimoniously in one-man, one-vote rhetoric, eventually allowed for expansive early voting periods, unfettered absentee voting, mail-in voting, and other remedies that virtually invited voting fraud.

Republican politicians know that if they scrutinize these votes too closely, they'll be accused of "racism." The charge of racism is like kryptonite to Republican politicians.

The Immigration and Nationality Act of 1965 soon made such shenanigans obsolete—not only in the South but nationwide. As Berchtold Brecht, a Communist Jewish/German playwright, said in the late 1940s, "If you don't like the election results, change the electorate," and that's exactly what the left is doing by Third-World immigration legitimized under the Immigration and Nationality Act of 1965.

These immigrants are almost always non-White, and their numbers assure that states like California will stay permanently in the blue column, while other states wait to be flipped. The Voting Rights Act of 1965 and the Immigration and Nationality Act of 1965 are simply more weapons in the vast leftist arsenal to punish and dispossess the founding stock of America.

Edwards: How have so-called "affirmative action" and today's "diverse workplace" impacted society?

Alexander: Affirmative Action and the goal of achieving a "diverse workplace" exemplify government policies that weaken America and make us less competitive in world markets. Affirmative Action and diversity are meant to replace merit as the guiding principle for determining who is chosen for positions of authority,

responsibility, and power, as well as who is selected for admission to select colleges, universities and professional schools. Affirmative Action was a policy enacted in 1969 by Alfred Blumrosen and the Equal Employment Opportunity Commission (EEOC).

The EEOC was and still is a bureaucratic agency tasked with enforcing the 1964 Civil Rights Act—a monstrosity of a law reputedly as thick as the phonebook. The supposed purpose of this law is to ensure that race has no role in determining who is selected for key desirable jobs and positions but, instead, requires employers, admissions committees, and human resources departments to not only consider race but give preference to Black applicants over Whites in determining who is hired or admitted. This not only deprives us, generally, of having the best and brightest in charge, but it also unconstitutionally deprives Whites of equal protection under the law. It has resulted in a new regime of mediocrity that governs every major institution of our nation—and is another key element in turning America into a Third-World nation.

Edwards: The nuclear family is the building block of any healthy society. How have radical feminism and no-fault divorce further assaulted this institution?

Alexander: Just as the Civil Rights movement was not pro-Black but anti-White, so also the feminist movement was not pro-woman but anti-male. To destroy America, the Cultural Marxists needed to destroy the American family. A closer look at feminism shows that it was primarily populated in its leadership by Jewish lesbians.

Normal women know that they need men. Not only are men essential to propagating humanity, but they are also a natural complement to women for successfully raising children to adulthood. Feminists are just another example of mankind presuming they know better than God.

The no-fault divorce movement was just as essential to the destructive ends of the Cultural Marxist scheme to destroy God's order and reduce

R.L. DABNEY
Southern theologian.

White birth rates by making men and women competitors rather than partners. By loading the dice against men by making women's interests paramount over those of men, no-fault divorce makes men wary of marriage, and sometimes understandably so.

Any man ensnared in a court proceeding against a feminist woman and her feminist lawyer before a feminist judge will learn quickly that Mr. Lincoln didn't free all the slaves.

Men understand that no-fault divorce can destroy their lives if they marry the wrong woman. He can lose his fortune, his business, his peace of mind, his livelihood, his children—and even his freedom.

Another problem with all of this is that we need our young adults to get married posthaste and have plenty of children, and that is not happening, either. Be sure to pray for God's guidance when choosing a wife.

Edwards: Give us a parting shot in summation.

Alexander: The great 19th-century Southern theologian R.L. Dabney once commented that "American conservatism is merely the shadow that follows radicalism as it moves forward toward perdition." Victories for the good guys have been few and far between since Dabney's day.

Many people retain a false impression about the true nature of many liberal initiatives such as, for example, the Civil Rights movement. It is commonplace for many so-called liberals and even conservatives to imagine that the Civil Rights movement was and still is righteous and holy.

In the Gospel of Matthew, the verses read, "A good tree cannot bring forth evil fruit; neither can a corrupt tree bring forth good fruit." Apply this test to the *Brown* Supreme Court decision, or the Civil Rights movement generally. Did public school racial integration in America produce good fruit or corrupt fruit?

The answer is obvious. It ruined one of the best public education systems in the world and reduced it to one of the worst, but, like the emperor's new clothes, this is a truth few in public life want to acknowledge publicly. It may seem to be paved with good intentions but, according to the old saying, so is the pathway to hell.

How many of the sanctimonious politicians who celebrate the *Brown* decision each year send their children to schools in the Washington, D.C. public school system? Actions speak louder than words. Call out this hypocrisy every time you can. Elites can casually ruin your life while sparing themselves of the consequences.

Many Americans have concluded that it is easier to go along with the leftist flow of America. They are reluctant to be identified as opposing those supposedly on "the right side of history" and wish they could get on with their lives—making money, watching their favorite sports team, and drinking beer.

But the left, running out of causes to promote, has decided to make "transgenderism" a civil right and force it down the throats of not just Americans but also the rest of the world.

We must resist this and every other part of their program with every fiber of our being. Liberalism is truly the modern face of evil. No good fruit comes from the tree of liberalism. ❖

Twelve Years in Hell: Victorian Southerners Expose the Myth of Reconstruction

By Lochlainn Seabrook. Southerners viewed Reconstruction as a Yankee Communist revolution. This revolution was a war planned far in advance to destroy the South. The architect of Reconstruction, Abraham Lincoln, privately planned to subjugate and then totally Northernize the South. After Lincoln's assassination, Reconstruction was taken over by Socialists and Communists, all radical members of the then-left-wing Republican Party. As part of Reconstruction, the North repeatedly violated the Constitution, committed robbery, destruction and seizure of private property, rape and murder. Simultaneously, legally elected Southern officials were thrown out of office and replaced by "progressives." To maintain control, Grant's radical government weaponized the police, the courts and the military. Many of the social, racial and economic problems plaguing the U.S. today began during Reconstruction. Now the left is using the same 1870s-era tactics. Softcover, 520 pages, #1022, **$35**.

I, Confederate: Why Dixie Seceded and Fought in the Words of Southern Soldiers

Did the Southern Cause died on April 9, 1865 with Lee's surrender? No, the Southern Cause is flourishing today! How can this be if the North won the war? What was and is the Southern Cause? And why were millions of people of all races willing to fight for it? You'll find the answers to these questions, as well as discussions on related topics (the Constitution, nullification, sectionalism, slavery etc.) in Lochlainn Seabrook's *I, Confederate*. Seabrook provides excerpts from the writings, speeches, letters and poems of 200 Southerners (mostly former C.S.A. soldiers), who describe, in their own words, the reasons they took up arms against their Northern cousins. Seabrook also includes writings from Southern and Northern civilians and Union veterans who also supported the campaign that Southerners referred to as "the bedrock of the Southern Confederacy." Illustrated with rare Confederate photos, preface, introduction, notes, index and bibliography. Softcover, 376 pages, #1023, **$27**.

The Hampton Roads Conference: The Southern View

The most important meeting of the Civil War took place in Virginia in February 1865. Yet it receives barely a mention in most history books. Known as the Hampton Roads Conference, in attendance were Confederates Alexander Stephens, John Campbell and Robert M.T. Hunter. On the other side were Lincoln and Seward. The meeting opened with "kind-hearted Lincoln" offering generous promises to the "erring South," including $400 million in compensation for slaves—if the seceded states would return to the Union. The Confederates, however, viewed the meeting as a negotiation between "two countries," demanding the North recognize their independence. Lincoln refused and demanded complete surrender. Four hours later the meeting adjourned. Lochlainn Seabrook includes 32 analyses that set the record straight on the myths about this meeting. Softcover, 294 pages, #1024, **$25**.

Dixieland Deceived: The Grand Conspiracy Behind the Civil War

The brotherly bloodbath of 1861-1865 wasn't really, in its true essence, a "civil war" as much as it was an attack launched upon the United States from an invisible foreign power with traitorous agents and sincere dupes operating in both the North and South. It was "the usual suspects" based in Rothschild's Europe and aligned with the plantation aristocracy based in the South. It was this elite who finally executed America's greatest disaster. And it was the determined leadership of President Abraham Lincoln that thwarted the elaborate scheme of this deadly cabal in the end. Exploding the Official Myths of the Lincoln Assassination

Like many major historical events, Lincoln's assassination had an official public story and a secretive back story. Author James Perloff dismantles the official story told for 160 years in this new book made possible by the digitization of handwritten 19th-century documents and previous, under-reported research. Among the questions answered: Why was Lincoln assigned a disreputable bodyguard who deserted his post before the assassination, yet was never punished?; Why was Booth sure he needed only a one-shot derringer to kill the president?; Why were the only actual assassination attempts against the men who opposed the brutal Reconstruction of the South?; How was the Ford's Theatre Presidential Box modified before the event?; Why

did D.C. telegraph wires shut down after the assassination?; Why did Stanton take charge of the investigation instead of the attorney general?; Why was Booth's escape road the only road left unpatrolled?; What did Booth tell Southerners his real reason was for leaving a card at VP Andrew Johnson's residence on the day of the assassination?; Why was Booth's diary never entered in evidence at trial, kept secret for two years and, when finally exposed, why were 86 pages missing?; and many more. The Honorable Cause: A Free South—Twelve Southern Essays

The Honorable Cause: A Free South is a collection of 12 essays written by pro-Southern and pro-secession activists. It places into context what it means to be "Southern" and why Southern identity is so important. It explores secession and how to achieve political and social liberation for the South. This book is intended to inspire emotion and thought. The authors want the reader to internalize the content and see a free and independent Dixie as the most honorable outcome for a unique people. The Honorable Cause: A Free South answers questions on our own terms and in our own way. Finally, it details how the South can achieve status as a nation-state, with a right of self-determination. Softcover, 301 pages, #988, **$25**.

The Sequel to Appomattox: A Chronicle of the Reunion of the States

By Walter Lynwood Fleming (1919). When the armies of the Union and of the Confederacy were disbanded in 1865, there were still many problems that pressed for solution. The surviving Confederate soldiers came straggling back to their devastated homes. Everywhere they saw widows and orphans. They found property destroyed, the labor system disorganized and the inhabitants suffering from want. They found the White people demoralized and the Blacks free, bewildered and disorderly. Organized government had lapsed with the surrender of the Confederate armies. Beneath a disorganized society lay a devastated land. The accumulated capital of the South had disappeared in worthless Confederate stocks, bonds and currency. The banks had failed. Two billion dollars invested in slaves was wiped out. Factories had been destroyed by Federal raiders or seized, sold or dismantled because they had furnished supplies to the Confederacy. Mining industries were paralyzed. It was months before courthouses, state capitols, and school buildings were again made available for normal use. How could all of this devastation be undone? Reprint. Softcover, 322 pages, #989, **$21**.

Ousting the Carpetbaggers from South Carolina

By Henry Tazewell Thompson (1926). South Carolina has been stigmatized as "the nest wherein was hatched the snake of Secession," and it was the purpose of Reconstruction to mete out retribution upon her people and to ensure victory for the most radical wing of the Republican Party. Thus, at the point of the bayonet, a condition developed without parallel in history: The best and noblest citizens of the state were subjugated to a position of inferiority to their former slaves. This book is a history of the political revolution of 1876 in which South Carolinians, led by Gen. Wade Hampton and his Redshirts, united to throw off the oppressive yoke of "Carpetbagger" government and halt unquenchable Black revenge. Reprint. Softcover, 182 pages, #990, **$21**.

The Impending Crisis of the South: How to Meet It

By Hinton Rowan Helper. One of the most influential anti-slavery books in pre-Civil War America, this book was written by a Southerner who understood the relationship between race, civilization, culture, political power and demographics. By assembling official statistics from slave-owning and non-slave-owning states, the author proved conclusively that the presence of Black African slaves was not, as the South's leaders claimed, vital for their economy but, in fact, exactly the opposite. Helper showed that by all measures—economic, social, political, agricultural yield per square mile, education, literacy, infrastructure and many other indicators—the use of Black slaves by the South was an impediment upon economic growth that had severely retarded the entire development of all the Southern slave states. The book conclusively proves that slavery—and the presence of large numbers of Africans in the South—was a significant barrier to the economic advancement of Whites. The book also reveals that the officially endorsed abolitionist movement had two goals—the emancipation of African slaves—and their immediate deportation back to Africa or somewhere else where they would be permanently isolated from White America. Softcover, 294 pages, #1021, **$30**.

Authentic History: Ku Klux Klan, 1865–1877

The only officially authorized history of the original Ku Klux Klan, written by the daughter of the founder of the KKK in Alabama, Susan Lawrence Davis. Many fascinating truths including: The KKK was financed from England by the Jewish former Secretary of State for the Confederacy Benjamin P. Judah; The KKK's chief chaplain was a Roman Catholic; The KKK's chief Justice was North America's 33rd Degree Masonic leader; The hood was in fact outlawed by the original organization because so many people were using its disguise to commit crimes in the name of the KKK; The original KKK's primary activity was political in nature and focused on restoring White rule to the Southern states; When official KKK posses were formed, they were under strict orders not to dispense mob justice or engage in whippings, lynchings or other abuses; When rogue elements and non-KKK members performed atrocities in the KKK's name, the leadership ordered the organization to disband, citing abuse of its name as the reason for its closure. This work also reveals the mindset that lay behind the slave-owning era: a false belief that the Blacks were "content" and "loyal" under White rule—and that only a few Southerners supported the view of Lincoln. He believed, namely, that the Black presence posed a long-term demographic threat. Softcover, 229 pages, #1020, **$25**.

The Columbians

LAST YEAR, AUTHOR KARL HAEMERS delved into the history of National Socialist movements in America in a multi-part series published in TBR. In the May/June 2023 issue, Haemers touched briefly on a group known as the Columbians. Believing the Columbians deserved more attention, author Marc Roland offers us this more detailed look at the group.

By Marc Roland

America was—putting it mildly—a disappointment to servicemen coming back home after World War II. Military contracts were canceled, drying up government spending, which alone had bailed the United States out of the Great Depression. Reviving a moribund economy through the mass production of war-related manufacturing was, after all, the real and prime motivation for America's foreign entanglement in armed struggle. Sure enough, home-front prosperity flowed with blood money.

But, when the killing stopped, the ratio of U.S. Debt-to-Gross Domestic Product (GDP) jumped from 42% in 1941 to 106% in 1946, shrinking GDP by 11%.[1] The resulting recession was exasperated by unemployed ex-armed forces personnel competing to their disadvantage for jobs with better-trained, more experienced civilians.

Many felt let down or ignored by the government they served so loyally overseas. After all, for five years they had been incessantly inveigled by Hollywood propagandists and politicians to enthusiastically support "rescuing" "small, defenseless peoples" like the Czechs and Poles from "Nazi rapacity." When, however, Josef Stalin grabbed Czechoslovakia, Poland, and most of Eastern Europe, the same, strident agitators who had shrieked for "liberating" the Continent from the Third Reich were strangely silent, thereby showing their true color: red.

Copies of this Columbian poster appeared in the windows of Atlanta homes in neighborhoods threatened by black violence.

After participating in the fratricidal, racially suicidal genocide in Europe, White U.S. veterans returning to the old neighborhoods in big cities like Chicago, Detroit, Cleveland, and Atlanta were appalled. There they found their once-familiar streets repopulated with great mobs of "Negroes," as they were then called, lured from the Deep South to work in Northern armaments factories.

Was this the United States for which more than 418,000 Americans gave their lives in World War II?[2]

That question particularly concerned 31-year-old Emory Burke, even though he was not a veteran. In fact, he had been rejected by his local draft board after bluntly informing his inquisitors that the Allies should immediately negotiate peace with the Axis powers, before Western civilization, of which both were part, was destroyed. Although his opinion would prove tragically prescient, at the time, it struck Birmingham's Selective Service reviewers as borderline treasonous.

Long before, the Alabama boy had educated himself by studying such textbook classics as *Conquest of a Continent* and *The Leopard's Spots*.[3] The grim fate their authors projected for the future of the White race was suddenly contradicted on January 30, 1933 by Adolf Hitler's "seizure of power" in Germany. High school senior Burke joyfully embraced it as a world revolution to save Aryan mankind everywhere on Earth from otherwise certain extinction. Determined to do his part, young Burke sought out the Grey Shirts, an openly National Socialist group in New York.

In the next century, one biographer said of Burke: "He lunged headlong into social activism while still a teenager, feared no man, and was daring in castigating America's enemies."[4]

His comrades, such as Homer Loomis, Holt Gewinner and John H. Zimmerlee, recalled many years later how Burke had "all the right stuff," as

From left to right, Columbian officers Holt Gewinner, John H. Zimmerlee and George Bright stand with Homer Loomis, co-leader of the Columbian Workers Movement of America, at its first public meeting in Atlanta, Georgia, on August 26, 1946. Columbians like Bright were hounded by federal agents long after the CWMA ceased to exist. In October 1958, he was wrongfully arrested and tried for bombing an Atlanta synagogue. He was eventually acquitted.

a meticulous organizer and captivating speaker. This also included: an encyclopedic grasp of ideology and history; a kind and generous nature; and a passion for the White race that motivated him to action.

Grey Shirts leader Hubert Schmuederrich was a dedicated activist but, after some years of doubtful progress, Burke amicably parted ways with Schmuederrich to join the kindred and more promising American Nationalist Party. Burke wrote for its magazine *The Storm*, and made his first speeches, one of which was delivered beneath a large banner admonishing his listeners to "Remember! Huey Long was killed by a Jew."[5]

Such public activism was no longer possible after Pearl Harbor. The nationwide climate of anti-German and anti-Japanese hysteria branded anyone a traitor who did not gush with jingoistic enthusiasm for the war. Prominent dissenters who did not back down were condemned on bogus charges, effectively decapitating their organizations, among them, the Grey Shirts.

Schmuederrich was taken into custody by Federal Bureau of Investigation agents and imprisoned for the duration of the war, ostensibly because he refused to register for military duty under the Selective Service Act.[6]

After three years, he was deported to Allied-occupied Germany, where he was yet again incarcerated, this time at Ludwigsburg for the crime of having publicly preferred prewar to postwar Germany.

Eventually released because of failing health, Schmuederrich died soon after from kidney failure. Before being arrested in April 1942, he wrote somewhat cryptically on the back of his photograph regarding a future White victory: "It will come by a rebellion."[7]

Although such a prospect seemed utterly dashed by the outcome of World War II, the irrepressible Burke was not discouraged. While former leaders of the obliterated Third Reich were still testifying at the first Nuremberg Trials, he persuaded a few of his Grey Shirt and American Nationalist Party comrades to join him in forming the most overtly National Socialist-style organization of its kind since the German American Bund. This later iteration would be formally called The Columbian Workers Movement of America (CWMA), better known, simply, as the Columbians.

Burke explained:

> "Columbia," is the poetical name of America. I designed the flag of the organization. Its background is the battle-flag of the Confederacy: the square, four-foot-by-four-foot flag of Lee and Jackson, with the red field and the blue cross of St. Andrew.
>
> Over this background of the organization's flag is a large, white disc, and inscribed upon it is a red lightning bolt. As we today sleep

> within the vicious embrace of alien octopus coils, the lightning bolt and its thunder must awaken us to the heavy duties involved in the survival—spiritually and physically—of our people and race. This is the meaning of the lightning-bolt symbol. I also designed a lightning-bolt lapel insignia and shoulder insignia.[8]

A contemporaneous newspaper article reported how "a jagged red streak is the Columbians' insignia, a symbolic thunderbolt that proclaims the arrival of a new organization in the Southland."[9]

The Columbians opened a headquarters by leasing three rooms on the second floor of a downtown office building at 82 Bartow Street in Atlanta, Georgia, "where the short-lived and anecdotal pre-war National Fascist Party had lived." All the rooms "had a cots-and-barracks atmosphere about them. In one room was a lithograph of Lee and his generals. On the wall opposite were the Stars and Stripes and the Stars and Bars, with the Columbians' banner in between." The article added that a "Confederate flag hangs outside the headquarters."[10]

According to historian and BARNES REVIEW contributor Rémi Tremblay:

> At least one member was present in the headquarters at all times, day and night, to answer calls and, doubtless, defend the premises. This street-side office also housed a militant library of some 50 books, including *Mein Kampf*.[11]

The Columbians published a newspaper called *The Thunderbolt*, subtitled "The White Man's Viewpoint." In its first issue, they proclaimed their views and intentions in uncompromising language:

> The long-awaited White man's movement to save first the South and then the nation has at last begun on August 16, when the state of Georgia granted a charter to the Columbians Inc., a patriotic and political group pledged to organize and create voting solidarity among all White American citizens who are adherents of the true American spirit—belief in the integrity of our blood. The Columbians Inc. absolutely repudiate the un-American idea of the melting pot. The object and purpose of the movement is to encourage our people to think in terms of race, nation and faith, and to work for a national moral reawakening in order to build a progressive White community that is bound together by a deep spiritual consciousness of the past and a determination to share a common future.[12]

From its inception, the CWMA was conceived as a public-action, populist phenomenon aimed at fulfilling specific political agendas for the implementation of its program by running in and winning local, then statewide and, ultimately, national elections. These goals might only be accomplished through appealing directly and effectively to the White working class, whose members suffered most from the pangs of liberal democracy. Personal experience had taught Burke and his old comrades, however, that their traditional opponents would physically attack the new movement at every opportunity, necessitating an organization of monitors fierce enough to properly protect their leaders.

> It seems incredible that a transparently Nazi organization was so well received just after World War II.

Accordingly, a bodyguard in heavy GI boots and wearing khaki shirts emblazoned on the upper-left sleeve with the red thunderbolt patch was trained in the art of self-defense and known as the "Thunderbolt." Aware, too, that they could expect determined opposition from mainstream politicians, the Columbians vowed to strictly behave as law-abiding citizens at all times, under all circumstances, no matter how irksome. They upheld constitutional guarantees of free speech and the right to participate in public elections for government offices, just like any other Americans.

Beginning in mid-summer 1946, the Columbians began distributing leaflets to promote their first public meeting. On August 26, a respectable turnout of 300 listeners filled Atlanta's East Point Auditorium to hear Burke announce the CWMA program. He had the eloquence of conviction, as remembered even 60 years later:

> A credible speaker, Burke would roll up his lips, grit his teeth and, in a rasping voice, condemn, by name, those committed to overthrowing the nation. He had a temper, which showed when he would describe how immigrants were assaulting the country, or minorities taking jobs and offices. He insisted on nothing short of an America which "looked like George Washington." Even being considered a "radical" and "hothead" never dampened Burke's ardor.[13]

He was nothing, however, if not forthright. He declared to his East Point Auditorium listeners:

> We are not a secret order. We are a Nationalist movement that stands up to speak for the White masses, organizes them and shows them how they can take control and have a better life. We're political. To take control, we must first convert a neighborhood, then win over an entire city, then the state government and, finally, the national government.
>
> The CWMA welcomes all members of the White man's community, whatever their religious differences may be. The only thing that matters is that we stand together for our common racial survival. I believe that America today is a battlefield on which two forces are vying for mastery. These forces are the authentic American spirit and the anti-American, anti-Western spirit of invasion and materialism. I believe that the issue that most clearly marks the battle line between these

two opposing forces that are shaking the world is that of race. I believe that the idea of racial purity was born of the authentic American spirit, and that those who defend this sacred idea count among their fellow soldiers the spirit of our great dead.

I believe that the idea of racial amalgamation is the fruit of this anti-American, anti-Western, alien spirit, and that those who carry the banner of this idea are in mortal conflict with the depths of the American soul. I believe the time has come for every man to step forward and enlist in the struggle on the side of the American spirit, or on the side of the foreign, Asian spirit. I pledge to fight in the ranks of those who believe in the sacred American ideals of race, nation and faith.[14]

Burke was followed by Homer Loomis, with whom he shared CWMA command:

The two races cannot live together in this country without an eventual racial fusion, a mulatto America. We have a choice between bastardization and separation. The color line is blurring under the influence of damn liberals. We are faced with mongrelization, which is the death of the White race. All the great civilizations of history were deeply conscious of their race and the color of their skin, including the Egyptians, Chinese, Japanese, Medes, Persians, Babylonians, Assyrians, Greeks, Romans, and even the cultureless Mongols. Their societies maintained themselves on a functional social, political and cultural basis, as long as they resisted interbreeding with foreign and hostile peoples.

I love the spiritual and physical characteristics of my race. I will, therefore, fight to ensure that they are not replaced in our descendants by the characteristics of non-White people. Unity within the social group is the basis on which all future progress must rest. Only if the individual members of our social groups resemble one another sufficiently, physically, to be able to intermarry freely with their fellows, can a civilized society continue to exist. It is the bond of a common race that has kept great civilizations together throughout history. Those that have mixed their blood with inferior peoples have collapsed. America is not exempt from the repetitive cycle of internal destruction. We must, as a people, either recognize it and live, or ignore it and pass away. We Columbians choose to live by fighting for our race.[15]

Arrogantly Defies Georgia

Columbians Bid For Aid Of Hoosiers

Nazi-Type, Storm Troop Organization Eyes 'Ripe Midwest'

Membership applications for the Columbians Inc., Nazi-type storm-trooper political party which arose recently in Georgia and whose political theory has been labeled as even more vicious than that of the Ku Klux Klan, are being circulated in Indiana, The Star learned yesterday.

Action of the Indiana General Assembly will be sought to outlaw the Columbians as well as the Klan, Governor Ralph F. Gates said last night when informed of the Georgia party's plans.

IN A TELEPHONE interview, thin-faced Emory Burke of Atlanta, president of the Columbians, admitted reports that membership blanks were being circulated in Indiana. He refused to reveal how many. "I don't know," he said.

"This is only the beginning, however," he boasted.

"We plan to organize from Atlanta to Chicago. The Midwest is ripe for such a thing."

The Indiana General Assembly in January will be asked to pass a law outlawing the Ku Klux

Founder of the Columbians Emory Burke is shown tearing up a copy of the Georgia Charter of Organization after being informed the state was planning to make the Columbians "illegal."

The ultimate solution to the dilemma posed by Blacks in America was their repatriation to Africa, where they would be first-class citizens of their own country, not second-class citizens in America. Loomis believed this was an easily accomplishable task. Referring to the recently concluded war, Loomis declared:

It's not as impossible as skeptics say. If, in just four years' time, the United States could send almost 1.9 million soldiers to kill their fellow White men in Europe, then surely we can resettle all 15 million of our Negroes in Africa during peacetime conditions. This is not a scheme dreamed up by some extremist Columbian. On the contrary, the concept itself comes from a Black man, Marcus Garvey, supported by some 2 million Negro followers.[16]

But even if such a task proved twice as difficult, it must still be undertaken, because the alternatives would be so much worse. A segregated America could only

The Columbians attracted the support of some prominent public figures, such as U.S. Gen. George Van Horn Moseley (1874–1960), holder of the Army Distinguished Service Medal and commander of the Order of the Crown of Italy. "We pay great attention to the breeding of our hogs, our dogs, our horses and our cattle," he observed, "but we are just beginning to realize the effects of absorbing objectionable blood in our breed of human beings. The pages of history give us the tragic stories of one-time leading nations that imported manpower of an inferior kind and then intermarried with this inferior stock. Those nations have either passed out of separate existence entirely, or have remained as decadent entities without influence in world affairs." > temporarily postpone the inevitable, life-threatening difficulties inherent in two irreconcilable peoples restricted within the same, national boundaries. No! We must have an all-White America for avoiding such unnecessary challenges to our survival.[17]

The audience interrupted both presentations with loud applause, frequent cheers and several standing ovations. The previous year—just 16 months earlier—America's war against Hitler had come to an end. Popular patriotism had thoroughly demonized him and all his works. In the context of the times, it seems incredible that a transparently Nazi organization could have been so enthusiastically received by an American cross-section of middleclass workers, veterans, students, and housewives.

True, CWMA spokesmen refrained from mentioning the Führer and did not display his swastika. But, audience members of the immediate postwar period could hardly have failed to recognize the Columbian twin thunderbolts and their conspicuous identity with the SS runes, or the khaki-shirted security squad's obvious resemblance to German brown-shirted Stormtroopers. The incongruous acclaim showered upon Burke and Loomis may only be understood as a suppressed racial instinct that overrode years of brainwashing.

Nor was the East Point Auditorium event a fortuitous fluke. Even the CWMA's harshest critics conceded that it struck a chord of sympathy with Whites of postwar America's middle class.

Tremblay points out:

> Many felt abandoned by politicians who were beginning to tout racial integration.
>
> Veterans and blue-collar workers joined the Columbians. The organization grew rapidly. Uniformed members formed patrols in White working-class neighborhoods, where waves of black crime were becoming more frequent and police presence was low. Columbian patrolmen specialized in "citizen's arrests" when they observed infractions, as the civil code allowed American citizens to arrest a potential criminal when he was seen committing a crime.
>
> Appreciating the reassurance provided by these semi-official law enforcement officers, many residents posted a sign in their window with the Columbian symbol and the slogan, "Zoned as a White Community." This slogan was not insignificant, as it laid the foundations for a physical separation of the races, with Black and White zones. In short, an ethnic nationalism that went beyond simple segregation.
>
> The Columbians attracted supporters from all over the United States, and enjoyed the sympathy of several major prewar figures, such as Gen. George Van Horn Moseley, who many, before World War II, saw as the providential man who could have had the stature to seize power.[18]

Even the Atlanta chapter of the AFL Plumbers and Steamfitters Union opened its facilities to weekly CWMA meetings.

The greatest success of its kind Burke and Loomis enjoyed occurred on October 18, 1946, when they were enthusiastically praised by over 3,000 persons attending an outdoor meeting. Spurred by this sizeable outpouring of approbation, they stepped up the pace of their activities. Sound trucks echoed the Columbian program across the city. There were "impromptu rallies in mill neighborhoods and frequent demonstrations, marching in lockstep through the streets of Atlanta" against only sporadic opposition, the Columbians were more often welcomed by spontaneous displays of support.[19]

But it was this growing public acceptance that frightened their enemies. Tremblay tells how, "elected officials, members of the press, and local ministers all condemned the organization as a public menace requiring immediate attention."[20]

On October 28, to commemorate the 24th anniversary of Benito Mussolini's March on Rome that gave Fascism its first national victory, Loomis and several Thunderbolt guardsmen picketed against the latest Black incursion into a White neighborhood.

With lightning speed, Thunderbolt bodyguards dealt with those trying to disrupt Columbian meetings.

They were arrested by city police, who clearly violated their constitutional right to freely and peaceably assemble in public.

Three days later, around 400 so-called "anti-Fascist activists"—as Communist terrorists typically refer to themselves—attempted to sack the Bartow Street headquarters, jubilantly ripping down the Confederate flag flying out front over the main entrance, and casting it into the gutter. Several dozen Thunderbolt men counter-attacked with blackjacks, pushing the Marxist mob back away from the headquarters and littering the street with broken Reds.

Police and ambulances belatedly arrived to scrape the quivering bodies off the pavement. Within the next 48 hours, a second bout took place when Loomis led a countermarch. Hundreds of thugs, "mostly linked to Jewish movements, charged the demonstration," which they could not stop.[21]

These physical confrontations having failed to inhibit the Columbians, the enemy resorted to subterfuge, the dark arts of which they are past masters. Operatives from yet another Jewish-sponsored group, The Non-Sectarian Anti-Nazi League, employed dirty tricks to disrupt the Columbians:

> An organization financed by British services during the war to block non-interventionists and linked to B'nai B'rith, [The Non-Sectarian Anti-Nazi League] managed to defrock two members of the organization by bribing them. They then publicly denounced the Columbians for secretly planning violent acts, a charge which the principal members denied wholeheartedly. One of the two self-denying members retracted his statements.[22]

Where street violence and bribery could not separate the Columbians from their growing following among fellow White Americans, the political establishment marshaled all its propaganda and judicial forces. Prominent *Washington Post* columnist Edward T. Folliard rejoiced that:

> [B]oth of the city's newspapers—the *Constitution* and the *Journal*—are crusading against them, after first maintaining a hush-hush policy for fear of giving them free advertising. Virtually all civic and patriotic organizations are fighting them. Protestant clergymen have denounced them as prototypes of Hitler and

his Nazis. The official organ of the Catholic Laymen's Association of Georgia, *The Bulletin*, has joined in the fight.

[Folliard did not deny] the fact that Atlanta's police have gone all out to harass them.[23]

A writer for the *Georgia Encyclopedia* confirmed criminal police behavior:

> The Columbians were uniformly condemned by the city's press and targeted for arrest by its political establishment. In November, state officials moved to revoke the group's charter. Burke and Loomis both were indicted on charges of incitement to riot and usurping police powers only two weeks later.[24]

The defense clearly showed in court how, in every violent encounter, the Columbians legally defended themselves from others who invariably initiated each attack. Moreover, no words uttered by any CWMA speaker nor published in the pages of its *Thunderbolt* newspaper could be reproduced to show how they urged listeners or readers to commit criminal actions of any kind.

Columbians had only made citizen's arrests in those areas of Atlanta where Black crime—particularly burglary and assault against White residents—was rising and police presence was insufficient. Georgia's citizen's arrest laws allowed private citizens to personally apprehend anyone engaged in criminal activity or, if they had reasonable cause, to believe the suspect committed a felony. After making an arrest, the citizen had to take the accused to a magistrate or peace officer without delay. These stipulations were strictly followed in every citizen's arrest made by the Columbians, as even several police officers testified.

Suddenly, Georgia Assistant State Attorney Dan Duke, without warning or provocation, punched Burke in the face, knocking him to the floor and opening a bloody gash over one eye. The proceedings dissolved in chaos. Although the assailant committed this serious offense in the judge's chambers, he was neither arrested nor charged with felonious assault.

An article in *The Canberra Times* of November 26, 1946, explains: "Later the judge said he would not take any cognizance of what had occurred, as his back was turned at the time and he did not see anything."

This is obviously impossible to believe, as the attack occurred in the locked judge's chambers. According to the article, Duke had punched Burke because, "by implication, Burke had accused him of not being of pure Anglo-Saxon strain."

Under any other circumstances, Duke's criminal assault on Burke would have immediately put an end to the trial. Instead, Burke and Loomis were found guilty on February 15, 1947. According to author Edward Hatfield:

> Area newspapers cheered their conviction, and state Solicitor General E.E. Andrews concluded that the trial broke the "backbone" of the organization. Indeed, the group's membership declined precipitously. The group's swift prosecution by Atlanta officials demonstrated the efficacy of the moderate consensus that would later earn the city its reputation as "the City Too Busy to Hate."[25]

Apparently, Atlanta was too busy to hate violent criminals, even as the city allowed them to displace the city's predominantly White and law-abiding residents in 1970. A mere four years later, "the City Too Busy to Hate" had earned a new nickname: "the Murder Capital of the United States."[26] After the turn of the century, in 2009, Atlanta's violent crime rate was double the national and state averages.[27]

> In the 1940s, Burke was one of the first to recognize the demographic storm threatening the U.S.

Almost 80 years ago, when the Columbians warned what was coming, Atlanta's total number of residents in the metropolitan area, where crime was in the lower, single-digit rates, had a White population of 74%.[28]

Today, with a 38.9% White population, the most common violent crimes in the city are aggravated assaults committed almost entirely by its Black majority, with important assistance from Atlanta's 26,800 Hispanics. The metropolitan area's Latino population is expected to nearly double to 21% by 2050.[29]

Loomis was sentenced to 30 months in a public work camp (otherwise known as a Georgia chain gang) and Burke to three years in prison. He appealed unsuccessfully.

In 1950, he entered the penitentiary but served only 16 months, thanks to pressure from the Free Emory Burke Committee, led by the indefatigable Gen Van Horn Moseley. Faithful to his ideals, Burke continued until his death at the age of 87 to be an activist, lecturing for various like-minded groups. Emory Burke is one who can and should be remembered, as he was one of the first in the 1940s to recognize the demographic storm threatening to overwhelm the West.[30] ❖

The Debate Over Huey Long's Killer

About the only thing we can say for certain about the assassination of Huey P. Long is that he was not killed by a Jewish doctor named Dr. Carl Austin Weiss. The official story is that Weiss approached Long in the halls of the Louisiana State Capitol Building in Baton Rouge and shot Long, and then Long's guards shot Weiss. Some say that Weiss approached Long, confronted the senator—possibly punching him in the mouth—and then the bodyguards let loose with multiple fire, cutting Weiss to pieces. Then, so the story goes, Long was wounded in the crossfire from his bodyguards' weapons and subsequently died later in a hospital after what may have been a bungled effort by his doctors to save his life. There are some who have suggested that Long's doctors were told to bungle their efforts. It's true there were people—even including some in Long's own inner circle—who wanted him dead.

In this version of events, Long's associates were concerned that the Roosevelt administration was about to lay down a series of criminal indictments against Long and others in his administration, and that Long's associates felt if he were out of the way, the Roosevelt administration would stop the persecution. In the end, that didn't happen. A number of Long's associates were indicted and sent to prison.

But, as far as Huey's death is concerned, the fact is that a number of quite rational authors have had spirited debates as to what exactly happened the day Huey Long was shot. However, I want to lay to rest just one myth about Huey's assassination: Despite repeated statements over the years, Weiss was not Jewish and doesn't even appear to have been of Jewish descent.

While the most famous surviving photograph of the young doctor does portray a young man with dark curly hair and a visage that many would say was "Jewish," the truth is, Weiss was the grandson of a Bavarian German Roman Catholic immigrant who had been a church choirmaster. Weiss himself was the valedictorian at the Roman Catholic parochial school he attended. In addition, the Weiss family, generally, appear to have been church-going Roman Catholics. Weiss himself was buried in a Roman Catholic religious service.

While it is entirely possible that Weiss's family—on the paternal side—was Jewish at some point, there is no published evidence to affirm that. And, while Weiss is a common Jewish name, it is also very much a traditional German name, as many German and Jewish families named Weiss will attest. And there is no evidence, either, that Weiss had Jewish blood on his mother's side.

There are many who will find this revelation about Dr. Weiss hard to digest, considering the many years of misinformation about this topic, but facts are facts.

There could be—and have been—many variations on the stories surrounding possible plots (real and contrived) against Huey Long. The fact is, the murder of Huey Long removed the greatest threat ever faced by Franklin Delano Roosevelt and the powerful Wall Street interests Long had opposed his entire career. ❖

The Revisionist Evolution of Historian Charles A. Beard

By Antonius J. Patrick

Introduction

On November 27, 1874—almost exactly 150 years ago—Charles A. Beard was born near Knightstown, Indiana. By the close of his life in 1948, Beard was considered the foremost American historian of the first half of the 20th century, and his works and life still receive discussion to this day.[1]

Beard is mostly remembered for his iconoclastic study *An Economic Interpretation of the Constitution of the United States*. In addition, and sometimes with his wife, he wrote a series of books on American and European history and was awarded a number of prestigious academic honors and appointments, including a position on the editorial board of the *Political Science Quarterly* and president of the American Historical Association in 1933, where he delivered his famous address "Written History as an Act of Faith."

The importance of his book on the Constitution is recognized to this day, as it was one of the first studies to demonstrate that there was more to the making of the document than the founding fathers' attempt to "form a more perfect union." Beard contended that the system of government that they created was also highly favorable to their financial interests.

An Economic Interpretation of the Constitution remains relevant today for it opened the door to later critiques of the Constitution and the republic it established, which is now burdened by trillions of dollars in debt and has become a worldwide empire interfering in the lives of countless people. Despite the founders' failure to produce a long-lasting, limited federated system of government, the Constitution is still beloved and treated as Holy Writ by most conservatives and, surprisingly, many libertarians.

CHARLES BEARD
Complex historian.

Beard's view on the Constitution raised quite an uproar among his colleagues and the political class at the time. How could anyone not see the altruistic motives of the document's framers, who sought to do what was only best for the American people?

Beard's interpretation of the Constitution eventually gained grudging acceptance among the historical establishment. However, his opposition and exposition of the bellicose foreign policy of the Franklin Roosevelt administration prior to World War II has been mostly ignored. Yet, his books and articles on foreign policy, which have proven over time to be highly prescient, should, like *An Economic Interpretation of the Constitution*, receive equal if not more attention, given the chaotic state of the world due mostly to the actions of the United States.

THE MAKING OF A REVISIONIST

Beard fell in line with most of academia, and was an ardent supporter of American intervention in World War I. It would not be until the early years of the 1920s that Beard changed his view. This shift set him on a course to become a prominent voice of non-interventionist American foreign policy in the years to come.

Although he eventually adopted the Revisionist position on World War I, it was surprising that he was not skeptical from the outset of U.S. participation in it, and did not see that it was more than just "making the world safe for democracy." His book on the Constitution showed that the protection of the financial interests of the framers played an

Charles A. Beard (1874–1948), shown above, like many of the historians of his era—even Harry Elmer Barnes—at first believed Germany bore sole responsibility for starting World War I and, later, World War II. After getting the chance to examine primary documents, both changed their minds and came to realize that much of what they had previously accepted as fact regarding "war guilt" was nothing more than war propaganda.

overlooked role in the political system they created. If the Entente Powers lost, or if there was an unfavorable settlement, it was widely believed at the time that American financial interests, which had invested heavily in the Allied cause, would suffer tremendous losses.

While Beard came over to the anti-interventionist camp, like many of his fellow Revisionists, he did not see the decisive role that ideology played in Woodrow Wilson's fateful decision. It was the president's contempt of Austria-Hungary—at the time one of the last vestiges of Christendom and aristocratic governance, in general, versus the democratic nation-state that America embodied—that drove Wilson to intervene, despite no existential threat to America's national security.

The eminent anti-egalitarian social critic Erik Ritter von Kuehnelt-Leddihn describes this crucial aspect of America's 28th president:

> Austria was far more wicked than Germany. It existed in contradiction of the Mazzinian principle of the national state, it had inherited many traditions as well as symbols from the Holy Roman Empire … its dynasty had once ruled over Spain … it had led the Counter-Reformation, headed the Holy Alliance, fought against the *Risorgimento*, suppressed the Magyar rebellion under Kossuth … and morally supported the monarchial experiment in Mexico.

Kuehnelt-Leddihn continues:

> Hapsburg—the very name evoked memories of Roman Catholicism, of the Armada, the Inquisition, Metternich, Lafayette jailed at Olmütz and Silvio Pellico in Brünn's Spielberg fortress.[2]

"Such a state," Kuehnelt-Leddihn asserts, "had to be shattered; such a dynasty had to disappear."[3]

Despite his pro-war views and before he became a Revisionist, Beard was outspoken in defense of the free speech rights of those who opposed U.S. participation in the war. For this unpopular stance, the historian was criticized in the press and even at Columbia University, where he taught. To his outrage, Beard was required to explain his views to a hostile Columbia board of trustees.

The acrimony between the school and Beard escalated when, in 1917, after the United States had entered the war, Columbia fired two anti-war professors, James McKeen Cattell and Henry Wadsworth Longfellow Dana.[4]

Despite America's participation in the war—which Beard pushed for—he, nevertheless, defended Cattell and Dana. He realized the hypocrisy in "fighting to safeguard democracy and America's cherished liberties," yet one of the nation's leading universities was persecuting two of its members for expressing their right of free speech. Still, Beard

did not change his position on the war, although he may have begun to have doubts.

The dismissal of Cattell and Dana was the final straw for Beard. He resigned his position in protest, ending his contentious tenure at Columbia, never again to return to academia. The incident showed that the nation's leading educational establishments had long been propagandists for the U.S. government, with the sycophancy only accelerating as the years have passed.

The affair reveals the type of person that Beard was, and which he would show over the course of his life. Despite the attacks by the press, academia, and politicians, the historian displayed great courage in sticking to his convictions. Very few of his stature have stood up for their principles as Beard did, especially if one looks at the recent "Covid-19 epidemic," where hardly any of those who knew better tried to stop the insanity that was taking place.

One of the first works that set Beard on his Revisionist path was the extremely influential series of articles by Sidney B. Fay that appeared in the *American Historical Review* in 1920. It eventually became part of his book *Origins of the World War* (1928). Fay was one of the first to look at the diplomatic documents of Austria, Germany and Russia (which the Bolsheviks happily supplied) that provided a much-needed balance to the one-sided Allied account of how hostilities began.

They showed that the Allies were just as culpable for the war's outbreak as the Central Powers. Such a revelation undermined the "war guilt" clause of the Versailles Treaty, which placed the blame for the conflict's outbreak solely on Germany.

In his must-read biography of Beard, Richard Drake wrote of the impact of Fay's work on the historian's thinking:

> Fay's articles successfully challenged the conventional picture of France, England and Russia as purehearted innocents fiendishly set upon by the congenitally sinister Germans, as the Treaty of Versailles, with excessive compression about the conduct of the victors, presented matters in the clause assigning full and eternal blame to the defeated foe.[5]

The enormously influential British author John Maynard Keynes, whose economic theories continue to be followed by policymakers to this day, wrote a truthful account of the Versailles Treaty entitled *The Economic Consequences of the Peace* (1919). Keynes understood the grave injustice of the settlement, which he compared to what Rome did to Carthage after the Punic Wars. The economist predicted that Germany would be turned into an economic basket case, and that another war would most likely be to reverse and avenge the humiliation of the treaty.

> By 1922, Charles Beard had almost come full circle to a Revisionist viewpoint on World War I.

Beard believed that *The Economic Consequences of the Peace* was "the definitive analysis of the postwar settlement," and "that the war had been about the furtherance of militarism and imperialism, not their extinction."[6]

By 1922, Beard had almost come full circle to a Revisionist viewpoint on the war. In a speech given at Amherst College, the historian dismissed the Allied propaganda of German militarism and its autocracy as a cause for the war and instead pointed to the devastating archival evidence that showed that all the belligerents had driven "Europe into the abyss." The war was "motivated by the same lust for strategic and economic advantage, with no scruples at all regarding the means to attain them."[7]

In his speech, America, too, was blamed for its own form of imperialism and war profiteering. While Beard did not allude to it, later research would show that, even before its official declaration of war, the Wilson administration was deeply involved behind the scenes prolonging the conflict when a settlement could have been reached and the prewar political landscape salvaged. The president's promise to the Allies that he would get the country into the war after his 1916 re-election not only meant more slaughter and destruction, but the end of the old political order—a goal Wilson wanted to see through.[8]

BEARD AND BARNES

By the time Harry Elmer Barnes's *The Genesis of the World War* was published in 1926, Beard was firmly in the Revisionist camp. Like Beard, Barnes had supported U.S. intervention and Wilson's decisions throughout the conflict. Later, he, too, had become convinced of the president's duplicity and the Allied guilt in igniting the conflagration after reading the first wave of Revisionist scholars. This included Keynes, Fay, Raymond Beazley, Edmund Dene Morel, and Max Montgelas.[9]

Barnes was quite forward in his denunciation of Wilson, calling his pledge to keep the United States out of the war a deliberate lie. He also noted the hypocrisy of one of the president's reasons for entering the conflict: "The German submarine warfare was a legitimate retaliation against the British violations of international law … against which Mr. Wilson refused to protest with adequate persistence and firmness."[10]

Beard and Barnes would grow closer in the following decade, as both saw the actions of the FDR administration leading the country into another major conflagration. Barnes did not take any classes from Beard

during his studies at Columbia, where he earned his Ph.D. in 1918. It is likely, however, that Beard was "the highly competent critic who prefers not to be mentioned by name" whom Barnes referred to in his acknowledgments to the *Genesis of the World War*.[11] Beard was a keen observer of the developments in Yugoslavia, and had written *The Balkan Pivot* in 1929.

Both great scholars were in agreement on why America became involved in the struggle, the role of the Allies in starting the conflagration, and the draconian Treaty of Versailles that they, along with a number of others, believed would lead to another war. "Beard shared unreservedly Barnes's Revisionist views," writes Richard Drake, "of the war's origins and America's involvement in it. Thereafter, they would reinforce each other's arguments about these two subjects."[12] Both saw that:

> America's intervention had absolutely nothing to do with the president's assurance about how the country would be making the world safe for democracy and everything to do with safeguarding the investments of American bankers and financiers in the Allied cause.[13]

While financial considerations were certainly a cause, it was the former Princeton political science professor's fanatical desire to transform what was left of the Christian hierarchical social order of the Old World to his liking that brought America into the war.

While *An Economic Interpretation of the Constitution* would remain his most notable achievement among academia and the reading public at large, it was World War I that had the most profound impact on Beard's life as he saw it as "the greatest calamity ever to befall Western civilization." He would "spend the rest of his life trying to identify the tragic flaw that had caused Europe's downfall, and to understand the American side of the horrific story."[14]

BEARD AND WORLD WAR II

Prior to his two masterful studies on FDR's foreign policy—*American Foreign Policy in the Making, 1932-1940* (1940) and *President Roosevelt and the Coming of the War*, 1941 (1948)[15]—Beard spent most of his later scholarly years aimed at keeping the United States from making the same mistake as it did in 1917. His theoretical endeavors, such as *A Foreign Policy for America* and advocacy of "continentalism," were outlining a theoretical program of neutrality.

In *Giddy Minds and Foreign Quarrels*, published, ironically, in September 1939 with the start of what would become World War II, Beard sketches the history of U.S. foreign policy from the time of George Washington to Theodore Roosevelt. The nation decidedly remained neutral, at least in regard to overseas affairs. Of course, the U.S. government had no qualms about making war on its own citizens when the South valiantly attempted to secede from the Union, or the many incursions that it made in Latin America with its relentless drive to remove Spain's political presence from the Western Hemisphere.

Beard describes this period of what he called that "'wonderful' century of 'peace, religion, and international good faith':"

> [T]he Government of the United States kept aloof from the aggressions, wars, and quarrels of Europe. It proposed no world conferences for correcting the wicked, settling conflicts, and curing unrest in the four corners of the earth. From time to time, it is true, groups of American people held meetings in favor of one country or party or another, but even they did not try to force their Government to play the role of universal preceptor and manufacturer of rules for settling everybody and everything under threats of armed intervention.[16]

In one of the few acknowledgments by the historian that ideas

have a transformative effect on history,[17] Beard contends that the end of an America First foreign policy came in the 1890s led by the ideology held and eventually spread by four individuals: Alfred Thayer Mahan, Theodore Roosevelt, Henry Cabot Lodge, and Albert J. Beveridge. "These [four] were," in Beard's eyes, "the chief manufacturers of the new doctrine correctly characterized as 'imperialism for America,' and all of them were primarily phrase-makers."[18]

Whether Beard realized it or not, it was ideology which also made the "wonderful century" that he so esteemed. The dominant idea that shaped the era was anti-statism with its components of laissez-faire, trade and commerce with all, non-interventionist foreign policy, and a monetary system based on hard money. The American Revolution and later the War for Southern Independence were decentralization movements which sought to break away from larger political entities—the British Empire and the U.S. federal government.

In the American Revolution, the ideas of Locke, Jefferson, the Englishmen John Trenchard and Thomas Gordon's *Cato Letters*, among others, inspired the colonists.[19] American Southerners voiced the same arguments as their forefathers did in their valiant effort to secede from the North.

Unfortunately, a conservative backlash quickly ensued, and the decentralized anti-statist mentality that drove the American Revolution was replaced by the adoption of the Constitution which created a powerful central government and destroyed much of the autonomy that the individual states enjoyed under the Articles of Confederation. Beard saw as much in his own analysis of what took place in Philadelphia in 1789.

In *Giddy Minds and Foreign Quarrels* and throughout his works in the 1930s, Beard chronicled each bellicose foreign policy step that the Roosevelt Administration took, making it inevitable that war would not be avoided: massive armament spending, the provocative 1937 "quarantine speech," the institution of a peacetime draft, the freezing of Japanese assets, the undeclared war on German ships and submarines, etc. All of this led to an unmistakable conclusion as Beard incisively states in *Giddy Minds and Foreign Quarrels*:

> President Roosevelt's foreign policy is clear as daylight. He proposes to collaborate actively with Great Britain and France in their everlasting wrangle with Germany, Italy and Japan. He wants to wring from Congress the power to throw the whole weight of the United States on the side of Great Britain and France in negotiations, and in war if they manage to bungle the game. That using measures short of war would, it is highly probable, lead the United States into full war must be evident to all who take thought about such tactics.[20]

FDR collaborated actively with Great Britain and France in their everlasting war on Germany.

Beard, of course, did not just stop with a critique of FDR's reckless foreign policy activities but proposed a sensible and proven alternative that would ensure peace and prosperity for Americans, which is still applicable to this very day:

> It is the doctrine formulated by George Washington … and followed … [by] the United States until near the end of the nineteenth century, when the frenzy for foreign adventurism burst upon the country. This doctrine is simple. … We should promote commerce, but force 'nothing.' We should steer clear of hates and loves. We should maintain correct and formal relations| with all established governments without respect to their forms or their religions.[21]

While many modern-day conservatives and neocons talk incessantly about their admiration for the nation's founding fathers and the system of government they set up, almost all never speak of the founders' views on foreign policy, despite the historical evidence of its overall beneficial effects, as Beard notes:

> This policy was stated positively in the early days of our Republic. It was clear. It was definite. It gave the powers of the Earth something they could understand and count upon in adjusting their policies and conflicts. It was not only stated. It was acted upon with a high degree of consistency until the great frenzy overtook us.[22]

While the vast majority of Americans at the time saw the U.S. involvement in World War I as an aberration and agreed with Beard and his fellow "isolationists" about keeping the nation neutral, the cunning Roosevelt was doing everything in his power to provoke an attack. Pearl Harbor shattered forever Beard and the country's hopes of an America dedicated to commerce and peaceful co-existence.

CONCLUSION

Why should Charles Beard be remembered 150 years after his birth?

While Beard's debunking of the U.S. Constitution is important for those who consider the document severely flawed and the basis for the nation's current political, economic, and social woes, more important are his works on foreign policy, as America is now, more than ever, engaged in conflicts the world over. The cost of maintaining U.S. hegemony is bankruptcy at home and the distinct possibility of igniting WWIII.

Like his friend Harry Elmer Barnes, Beard had hoped to bring "history in accord with the facts," which is why his life should be studied and become a model for those who

hope to bring sanity to American foreign affairs. ❖

Haunted Heritage

The European Roots of Halloween

In this exploration of the origins of Halloween, we embark on a fast-paced journey to uncover the true essence of this Aryan holiday. In the darkness of October nights, beneath the glow of jack-o'-lanterns and the rustle of fallen leaves, a tale of ancient roots and modern transformation unfolds. Halloween, once a sacred event deeply rooted in ancient Celtic and Aryan customs, has undergone a dramatic evolution over the centuries. Today, as we don costumes and indulge in sugary treats, it's all too easy to overlook the intricate cultural history that forms the foundation of this celebration. In this book, we will also delve into the layers of commercialism, religious resistance, and political correctness that have veiled Halloween's true essence. From its origins as Samhain, a sacred holiday marking the end of the harvest season and the onset of winter, to its evolution into a night of revelry and mischief, Halloween's journey is intricate.

By unraveling the threads of ancient Celtic, Germanic and Slavic influences, we gain a deeper understanding of the complexity of beliefs and customs woven into the fabric of ancient fall festivals. Through this exploration of diverse cultural influences, we can truly appreciate the depth and richness of this haunting holiday.

Join us on a journey through the shadows of history and folklore as we uncover the hidden truths and sacred traditions at Halloween's heart.

Note: This is not a dense historical treatise but an enjoyable overview of not only the Aryan celebrations and customs that have been incorporated into Halloween, but an examination of the many creatures that have come to be associated with the holiday and from where they originated. This includes the roots of the vampire and werewolf legends, medieval traditions, Colonial American experiences, Mary Shelley's Frankenstein monster, the globalization of Halloween and the modern-day over-commercialization of this once sacred holiday.

LETTERS TO THE EDITOR

SECRET SERVICE CO-OPTED

I can't prove it to the burden level of a criminal jury trial, but I think the Secret Service is largely run by and for the agenda of the globalists and organized Zionist interests, i.e., the "Deep State." They were very negligent in protecting Donald Trump.

Even if infected with "wokeism," and they employ every affirmative action protected group out there, no one could be this consistently incompetent unless that was the goal.

TWO-TIERED JUSTICE

Free speech is dead in the United Kingdom. Recently, actor Kevin Sorbo posted an item on social media detailing the messed-up way the British legal system is punishing "dissidents" versus how they punish "criminals." The UK government says, "We have dedicated police officers who are scouring social media. Their job is to look for [hate] material, and then follow up with ID, arrests and so forth."

One UK White man was given 15 weeks in jail for posting a "racist comment" online. He merely pointed out that allowing so many foreigners into England is causing real trouble.

Another UK White man received 24 months in prison for selling anti-immigration stickers.

At the same time, a Muslim man convicted of participating in the prolonged gang rape of a 12-year-old girl received 180 hours of community service and no prison time!

SOCIAL CREDIT

Before World War I, Scottish engineer Clifford Hugh Douglas (1879–1952) gave a great deal of thought to the causes of war, the ups and downs of financial systems, employment and unemployment, and, generally, the causes of strife in society.

He analyzed the flaws in the financial system and determined how they might be solved. Private banks control the economy and society. Usury and compound interest were not the only problems in the system, he concluded. He noted the gap between commercial production and the failure of purchasing power to acquire the entirety of production and the ramifications of this problem. Douglas noted that, during the 10 years of the depression, there was no money and then, suddenly—and almost magically—there was more than enough to fund World War II and the death and destruction of that and ensuing wars.

The system he developed has been called "Applied Christianity" by Geoffrey Dobbs, but was called Social Credit for many decades.

Consider that God provides us with everything we need to flourish on this beautiful planet. Natural resources, know how, and many hands that can provide for all personal and societal needs. Money is a necessary and useful invention to access production in our complex economies, but, in our current set-up, it is created out of thin air and managed by individuals who control privately owned banks. We are in their stranglehold, but there is an elegant and natural solution in Douglas's monetary reforms.

Douglas concluded that, to balance a primarily autarkic system, steps could be taken to create an "all for one and one for all" financial system that truly was at the service of individuals in society. Dividends would be issued to each citizen as a co-owner of natural resources and current and past development. The dividend would allow all of us to meet our material needs. After all, didn't God create the world for all of his children?

Douglas's first book, *Economic Democracy*, was published in 1920 and, for decades, we called the monetary reform system "social credit." The Soviet Communists of the era rejected the system, recognizing that Douglas's monetary reforms would lead to decentralization and freedom from the tyranny of the banking system.

We think it's not a coincidence that the Chinese government chose to award those citizens who obey state regulations most dutifully a "social credit" score. This is enforced with a widespread and technologically advanced societal surveillance system.

This is why we call our social credit plan "Douglas Social Credit," so as to differentiate our model from the social control mechanism first dreamed up in China. The Chinese idea of social credit is now rapidly spreading throughout the Western world.

The Pilgrims of St. Michael, in Quebec, Canada, a Catholic organization, has been advancing Douglas's teachings since the 1930s. Founded by Louis Even, they have formed the Louis Even Institute for Social Justice, and now publish a magazine five times each year in four languages. See online for michaeljournal.org. Instruction in Douglas's proposals is offered annually in beautiful Quebec.

Quebec is rich in heritage and tradition, and we host people from around the world who are interested in a better way to structure a national economy and a just society.

Another friend of Douglas's teachings is Oliver Heydorn. He is the author of *The Economics of Social Credit and Catholic Social Teaching* and other books on the topic. Oliver just returned to Canada following a stint in Australia where the Australian League of Rights also teaches the Douglas Social Credit model.

We think that the reforms in the financial system we are advocating will change the world. The model is the path to a life of practical Christianity and a life lived under the golden rule (Mathew 7:12).

LBJ'S MISTRESS SPEAKS

I have a suggestion for TBR's Operation Book Rescue. *Texas in the Morning* seems to be out of print. Single copies are upward of $250. It is more recent history than what I see in TBR's book republishing effort, and some might characterize the book as conspiracy genre. Being written by the mistress of LBJ, the reviews also point out some salacious aspects of their relationship that are in the book. This is of importance if one wants to know more about the character and soul of the subject individual, as opposed to mere entertainment.

DEEPER MEANING OF FABLES

I'm on a quest for books, including fairytales, that delve into the identities of those who, throughout history, have always incited wars and emerged as the sole victors, leaving both sides of the conflict the losers.

The first ones that come to my mind are the Talmud, the Torah (think the Old Testament Book of Esther), and more recent books like "The Brave Little Tailor" by the Brothers Grimm. Both of those, I believe, are fictional tales about those behind the scenes pulling the strings.

There must be more tales and fables from all over the world and throughout mankind's history, not just in Germany, that mention the "eternal" hidden enemies that are always looking to undermine White Christian nations.

I have had many erudite Jews say straight out, in one form or another, "We are the hidden hand. We are the corrosive factor in society." One even used what must be an ancient term when he said, "We have the king's ear, and it is he who is surely the only one to survive." Others admit, "It is we who destroyed the Germans."

Bottom line: Can you help with book titles or fables that show that, since ancient times, Jews were the ones who got brother to fight brother, with both brothers the losers and the instigators ending up with the proverbial spoils of war?

You can publish this as an invitation to your readers to help find serious books showing that the invisible hand has existed since the beginning of documented history.

[If any readers wish to reply, email Paul@BarnesReview.org. The Jewish Virtual Library does contain the following list of European tales discussing the topic. They include: "The Jews' Stone," "The Girl Who Was Killed by Jews," "Pfefferkorn the Jew at Halle," "The Bloody Children of the Jews," "The Imprisoned Jew at Magdeburg," "The Lost Jew," "Malchus at the Column," "Buttadeu," and "The Eternal Jew on the Matterhorn."—Ed.]

LISTEN CAREFULLY

As I was shaving this morning, I thought again of that recent debate between Black female conservative commentator Candace Owens and Rabbi Boteach Schmuley. Owens, lately, has been focusing on the pedophile aspect of a group of Jews called the Sabbateans, who morphed into a group of "intellectuals" and were the founding members of leftism in Eastern Europe. Today, they are known as "Frankists."

As the rabbi was calling Owens all kinds of names, he accidentally solved the issue of why the Catholic Church has been plagued with pedophile priests. He said, "Candace keeps focusing on the Frankists. Well, let me tell you, there are no Frankists left because they all converted to Catholicism." If she would have said it, she would have opened herself up to even more criticism but it was, in fact, Schmuley who let the camel's head into the tent.

This was all very interesting. If one is simply paying attention, is quiet and contemplative, and listens as people like Rabbi Schmuly talk, they will actually offer dribs and drabs of truth, if you are willing to work to connect the dots.

NEVER AGAIN—KIND OF

"Israelis are Jewish Nazis!" Notwithstanding the fact that some Jews suffered horribly during the "Holocaust," that does not absolve them from, in turn, visiting a genocidal holocaust on Gentiles some 80 years later in Palestine. Contemporary Jews utter the vow "never again" to attest to their promise that the global Jewish community will never countenance a similar holocaust happening again on their watch.

However, this vow appears to apply only to Jews, not Gentiles. Jews, raised on uncompromising ethnocentrism, only look out for their own.

More than 90% of Jewish Israelis support Netanyahu's genocidal ethnic cleansing of Palestinian Gentiles—Muslims and Christians alike—even though there is convincing evidence that Netanyahu knew about and approved of the false-flag attack on Israel on October 7, 2023. To date, over 40,000 Palestinian Gentiles have been killed by Israel, the majority of whom being women and children. Very oddly, only a minority of the dead in Gaza have been military-aged men—men who the Israelis could claim were Hamas militants.

Furthermore, well over 100,000 Palestinian Gentiles have been injured, some severely, and this only takes into account the injured Palestinians that we know about It does not factor in the tens of thousands of dead Palestinians buried underneath the rubble of their destroyed domiciles. Speaking of which, 75% of Gazan Palestinian homes have been destroyed, and water, food, medical supplies, and fuel have been interdicted by Israeli.

Besides merely killing Palestinians, the Israelis also want them to suffer in extremis. The 1.25 million Palestinians trapped inside the de facto open-air Gaza concentration camp are now completely destitute. Photos of dead Palestinian children and pictures of the razed apartment blocks cannot help but call to mind photos of Jews and Jewish children being

sent to Nazi concentration camps four score years earlier. The Biden/Harris administration, in concert with traitorous congresspersons eager to receive substantial campaign contributions from Jewish plutocrats, have sold their soul for 30 pieces of silver. In exchange for generous campaign financing, all these politicians have to do is unabashedly support and approve Jewish Israeli genocide targeting essentially defenseless Gazan civilians.

This is a very dark chapter in American history, especially since we are bankrolling the Israeli genocide with our tax dollars. If the United States stopped providing military and economic grants to Israel, this war would end tomorrow.

We now appear to live in an age when terms such as "good" and "evil" have either lost all meaning or mean the opposite of what they originally stood for. Shame on Israel for orchestrating the ethnic cleansing of Gaza so as to secure a racially and ethnically "pure" (sic) Jewish state.

Shame on the Jewish community that countenances and approves the remorseless ongoing holocaust of Palestinian Gentiles. And shame on the United States for acquiescing to this unforgivable evil.

NO ISRAELI ELECTRONICS

I don't follow the Boycott-Divestment-Sanctions movement, and I've never had an issue with any Israeli products in the past. However, in the future, there is absolutely no chance I will ever buy or utilize any Israeli product, or any electronic product that has passed through the state of Israel that is capable of containing explosives, and I very much doubt I am alone in this.

TRUTH IGNORED IN HOLLYWOOD

Over the years, I've have watched many Hollywood movies about World War II. In them, I have seen lie after lie about the Germans. The movies would have us think that Jews were stopped from leaving Germany. That is not true. The issue was that countries had already taken in their quota of Jews. After the war, the United Nations Relief and Rehabilitation Administration tried to get multiple countries to take in immigrant Jews. Nobody wanted them. Instead, they flooded Palestine with these refugees.

Yes, bad things happened in the wartime work camps. St. Maximilian Kolbe took the place of another prisoner in a "starvation cell." In Dachau, they had a block for priests where clergy who spoke out against Hitler were kept. The movie *Angel of Auschwitz* was about Natasza Pelinski, who was a Polish Catholic midwife who delivered an estimated 3,000 babies in the camp. All the babies survived, but how? Why weren't they "gassed"? If there was no food, how did the mothers produce milk?

Of course, as in all wars, toward the end, food shortages cripple the losing nation. Did the Allies think of this as they bombed cities with civilian populations? I highly doubt it.

THE GREAT DIVIDE

In the last 160 years since the Civil War, Whites have lost more people to war than any other peoples on Earth. These wars were not fought to further our ideals, goals or way of life, but for the agenda of others who are not acting in our best interests but theirs.

We seem to have lost all power everywhere in the world. We actually have our own men and women dumbing themselves down and giving up any and all superiority our people had left. Many are on their knees serving other races and the goals of the financial elite. That's why we must stop focusing on the past the way we do and put everything we've got into the present to preserve our future.

But, without today, there is no future. It will all be gone. Yes, history is our teacher but, if we continue to talk, read, and listen without putting action to our thoughts, it's all the work of dreamers. The only thing that comes to a dreamer is sleep.

What if we all went to a certain state and made it our own, maybe a rural state like West Virginia. Let's say we share our goals for the future. We could start winning elections in the local county government, and the state government and then, eventually, we send our like-minded brothers and sisters to represent us at the federal level.

We need proud and strong men and women in office who are not afraid to represent White objectives.

If this could work—and we could do it in states such as Texas, Kentucky, Wyoming, Montana etc., in 20 years or so we could change America and restore our political power.

The Great Divide is this: We have got to stop helping everyone else in the world and worry about our people. When someone speaks of the "urgent" need to help Israel or Palestine or Sudan or Nigeria et al., ask, "What about us?" Sooner or later, the day will arrive when they come for us. And you can bet there will be nobody on the streets protesting for you "Whities." The present is here. The future is not. Act now.

Books from Historian Michael Walsh

IT'S HERE! Witness to History: The Reich Legend Uncensored

RESCUED! By Mike Walsh. *Witness to History* was 25 years in the making with one purpose in mind: a single, comprehensive book that divulges previously censored information while effectively debunking the propaganda of the victors. At the same time, the author puts into perspective the catastrophic 20th century by presenting the big picture surrounding the so-called Russian Revolution of 1917 up to and through the attempted genocide of the people of defeated Germany. In this book, Walsh gives those who made this epoch their chance to tell us their unfiltered, spin-free comments in their own words. *Witness to History* is that book with the actual words of literally hundreds of eyewitnesses to the events of WWII—from high-ranking world leaders and military men to the average citizen on the streets. Softcover, 416 pages, illustrated, #995, **$35**.

Life in the Reich: Hitler's Germany—1933–1945

By Mike Walsh. The quality of life in the Third Reich was far superior to elsewhere in the developed world. Ordinary German workers enjoyed a lifestyle previously reserved for the upper classes of the West. Germany led the world in fashion, medicine, cinema, lifestyle, manufacturing, transport infrastructure, public facilities, science, healthcare and education. For good reason, the Germans were the cheeriest people on Earth. The claim that this was achieved through investment in militarism is absurd. Despite being war economies, the debt-ridden U.S. and European Union suffered the collapse of their infrastructure whilst their indebted populations even now live hand-to-mouth. Prosperity in the Reich set an example that exposes the failures of the mutually supportive capitalist and Communist systems. A taboo topic for media and palace publishers, *Life in the Reich* was removed by Amazon because it dared to show Hitler's Germany as it was and not as the propagandists would have us believe it was. Mainstream media and court publishers consider this a taboo topic because they don't want you to know—in case you draw the right conclusions. Softcover, 120 pages, #960, **$18**.

Heroes Hang When Traitors Triumph: Martyrs of World War II

By Mike Walsh. Character assassination inevitably follows a defeat in war. Had peace terms with National Socialist Germany been equitable, it is likely that non-German figures since denigrated would be more accurately portrayed by modern media. Had Hitler's Germany defeated the forces of the British, Soviet and American empires, then one can presume London's Whitehall would be Adolf Hitler Esplanade whilst Hyde Park would have been renamed Lawrence of Arabia Park. Norway's monuments would celebrate Vidkun Quisling and the revered writer Knut Hamsun. Romania would pay tribute to Corneliu Codreanu whilst in Ireland, Britain and New York, instead of statues to Lenin, the name of Irish-American William Joyce might be affixed to great shopping edifices. *Heroes Hang When Traitors Triumph* gives a different perspective of these vilified foes. Softcover, 115 pages, #961, **$20**.

Adolf Hitler: My Last Testament

By Mike Walsh. Adolf Hitler said he was dumbfounded as "an enormous human dragon slowly uncoiled itself before me." The young laborer's description of a protest march calling for work and bread perhaps inspired Hitler to join the revolt against the oppression of the working class. Whatever challenges Germany faced, the highly decorated war veteran would not blame the Jews, for he had earlier remarked that anti-Semitism was repugnant. There is much that is enigmatic about this man who became almost a religious figure. No other leader in history has achieved more in uniting social classes and inspiring those of various religions and races. So far, an estimated 750,000 book titles have been published on The Third Reich. Hitler's *Mein Kampf* is more widely read today than ever before. Yet, few books actually record the rise of the Third Reich in Adolf Hitler's own words. Drawn from his speeches and media interviews *My Last Testament* is Hitler's self-assessment, but it also includes personal observations about the Führer from many others as well. As such, it is an invaluable first-hand source of information for scholars of the period. Softcover, 195 pages, #962, **$25**.

Exploding the Official Myths of the Lincoln Assassination

By James Perloff

Like many major historical events, Abraham Lincoln's assassination had an official public story and a secretive back story. On April 14, 1865, the president was shot by actor John Wilkes Booth, a Southern sympathizer, at Ford's Theatre in Washington. Simultaneously, a Booth accomplice, Lewis Powell, attempted to stab to death William Seward, the secretary of state, at his home. Though not expected to live, Seward survived his wounds.

Booth and accomplice David Herold rode south. On April 26, Union cavalry tracked the pair to a Virginia barn. Herold surrendered; Booth refused. Despite orders to bring him back alive, Booth was mortally wounded by a soldier who fired through an opening in the barn. Afterward, a military court tried eight alleged Booth accomplices. Four were hanged—including Mary Surratt, the first woman executed by the U.S.—and four sentenced to prison at hard labor.

So ends the official story in a nutshell, which is all most people know, due to media control plus removal of critical documents from government archives. James Perloff dismantles that story in this new book, thanks to the digitization of handwritten 19th century documents, and with help from two intrepid predecessors—one alive, the other dead for more than 60 years. Readers may be surprised at how much today's America resembles the America of the 1860s, with a Deep State behind the scenes controlling information, the suppression of civil liberties, secret agendas and more.

Among the book's topics:

• Why, on a dishonest pretext, did Secretary of War Edwin Stanton deny President Lincoln the protection he requested at Ford's Theatre?

• Why was Lincoln assigned a disreputable bodyguard who deserted his post before the assassination, yet was never punished?

• Why was John Wilkes Booth so sure he only needed a one-shot derringer to kill the president?

• Why were the only actual assassination attempts against the only two prominent men in the administration—Lincoln and Seward—who opposed the brutal Reconstruction plan devised for the Southern states?

• How was the Ford's Theatre Presidential Box modified before the event to facilitate the murder?

• Why did Washington telegraph wires shut down after the assassination?

• Why did War Secretary Stanton take charge of the investigation instead of the attorney general?

• Why was Booth's escape road the only road left unpatrolled?

• What did Booth tell Southerners his real reason was for leaving a card at Vice President Andrew Johnson's residence on the day of the assassination?

• Secretary Seward's attempted assassin, Lewis Powell, gained access to the home by pretending to deliver medicine. How did he know the doctor's name and the house's exact layout?

• Why were soldiers closest to capturing Booth replaced by a select Washington detachment, including two commanders who were trusted associates of mystery man Lafayette Baker?

• Why was the court-martial of the sergeant—who, against orders, allegedly shot Booth—canceled?

• Why was Booth's diary, recovered from his body, never entered in evidence at the conspiracy trial, kept secret for two years—and, when finally exposed, why were 43 sheets (86 pages) missing?

• Why were Booth's alleged accomplices denied a jury trial and prompt defense counsel?

• Why were they continuously shackled, heads hooded, before being either hanged or sent to a remote island prison west of Key West?

• What close friend of John Wilkes Booth was also old friends with Stanton's intelligence chief William Wood?

• And even more!

Did Lincoln stop a Rothschild takeover of America?

DIXIELAND DECEIVED

THE GRAND CONSPIRACY BEHIND THE U.S. CIVIL WAR

The true story of the U.S. Civil War, aka the War Between the States, aka the War of Northern Aggression, does not "lie in the middle" somewhere but, rather, is something altogether different from either the contemporary Northern establishment account or the Southern Revisionist version. In reality, the brotherly bloodbath of 1861-1865 wasn't really, in its true essence, a "civil war" as much as it was an attack launched upon the United States from an invisible foreign power with traitorous agents and sincere dupes operating in both the North and South.

It was "the usual suspects" based in Rothschild's Europe and aligned with the empire-seeking Plantation Aristocracy based in the South. It was this elite who long-range-planned and, under one false pretext after another, finally executed America's greatest disaster. And, it was the determined leadership of President Abraham Lincoln that thwarted the elaborate scheme of this deadly cabal in the end. Acclaimed "Correctionist historian" and investigative journalist Mike King will take you on an exciting "you are there" illusion-shattering suspense ride through this important era of U.S. history which still holds modern-day implications.

Dixieland Deceived: The Grand Conspiracy Behind the U.S. Civil War (softcover, 8.5 x 11, 300 pages, #1026, **$45** minus 10% for TBR subscribers plus $5 S&H inside the U.S.) is available from TBR, P.O. Box 550, White Plains, Md 20695. Charge toll free by calling 1-877-773-9077, Mon.-Thu. 8-4 ET. You may also purchase the book at www.BarnesReview.com.

What People Are Saying:

"Over a decade of learning history in the public school system, taught me nothing. I now feel that it was intentionally boring so we didn't care to look too closely at who was involved. In [reading this book], I learned 1,000 times more. There are other conspiracies surrounding the intentions of the founders of the country and the intentions of those involved in Reconstruction, however, this book has completely changed the context. I could not put it down and, although I have disagreed with some of [King's] work in the past, I have always respected him as a journalist, and his work is always something to think about because he knows how to make a point and to limit the clouded details. And he knows BS when he sees it."—DAVID GRIFFIN

* * *

"As a descendant of a Confederate soldier, I was raised on a steady diet of what I now believe to be fabrications and lies. I joined the Sons of Confederate Veterans and was disturbed by the number of men present who wore rings bearing the symbols of a secret society. I noticed often that the Confederate flag was positioned with the stars pointing downwards—another red flag significant of the secret society.

Now I understand why! This book has taken the scales from my eyes. Amazing what original source material will do. Mike King has done a wonderful job of clearing away the fog of propaganda. Read this book. It is truth."—JAMES STEVENS

ALL YOU NEED TO KNOW!

One comprehensive, hardback reference volume covering all the events known as the Holocaust. Oversized (8.5 x 11), case laminate, 579 entries, 256 B&W illustrations, 101 color pictures, fully indexed, bibliography, 634 pages . . .

HOLOCAUST ENCYCLOPEDIA

UNCENSORED AND UNCONSTRAINED

The Holocaust is a topic whose public discourse is tightly controlled by powerful groups. Only their side of the story is permitted. In fact, they insist there is no other side. They guard the West's last taboo and enforce swift punishment upon those who dare to ask any questions or unearth any evidence that leads to unwelcome answers.

Undaunted by this threat, and for the first time in history, a team of critical scholars has produced an encyclopedic compendium of cutting-edge information on this topic that pays no tribute to any power, respects no taboo, poses all the questions worth asking and gives answers exclusively based on real evidence. Its contents have not been censored by any legal authority.

The lead editor of *Holocaust Encyclopedia* made sure that all contributors to this project were truly independent, and will defend what they consider to be true and accurate, even when threatened with imprisonment due to censorship laws in many countries.

In this encyclopedia, you are not lectured in so many entries what we think the Holocaust was. Rather, you find the many pieces summarized and explained that comprise the larger picture: Scores of entries present the essence of the most-pertinent witness accounts. They are the mainstay on which the Holocaust narrative rests. All are subjected to painstaking source criticism, which is one of the most important tools of a real historian. This enables the reader to assess which witnesses are trustworthy, if any.

Holocaust Encyclopedia addresses all the major Holocaust crime scenes: Auschwitz, Belzec, Sobibór and Treblinka; Dachau, Bergen-Belsen, Buchenwald and Mauthausen; Babi Yar, Ponary, Janowska and Maly Trostinets, to name but a few. But their entries do not just summarize what today's narrative is. They explain how it was formed, how it has changed over time, what the reasons for these changes are, and which aspects of the narrative are credible and why.

Forensics are the most important tool to investigate any murder case. Therefore, *Holocaust Encyclopedia* contains lots of entries discussing the many tools said to have been employed to commit the mass murders and to erase the traces: execution chambers, gas vans, mass graves, crematoria and cremation pyres. It discusses toxicological issues surrounding the various lethal gases claimed to have been used: gasoline and diesel exhaust gases, carbon monoxide, Zyklon B/hydrogen cyanide, to name only the familiar ones. How did these tools work, if at all? What traces can we expect to find, if any? And, ultimately, which traces were actually found during forensic investigations undertaken since WWII's end.

Holocaust Encyclopedia also has multiple entries on certain more-or-less common claims about aspects of the Holocaust, including a list of "Who said it?" These cover topics such as "flames shooting out of chimneys," "fat extracted from burning corpses," "blood geysers erupting from mass graves," "soap and towels issued to gassing victims," to name but a few.

Finally, several entries address factors that have influenced the creation of the Holocaust narrative, and how we perceive it today. This includes, among others, entries on psychological warfare and propaganda during the war, on conditions prevailing during criminal investigations and trials of alleged Holocaust perpetrators, on censorship against historical dissidents, on the religious dimension of the Holocaust narrative and on motives of all sides involved in this debate that refuses to go away.

In this important volume with 579 short chapters, you will discover—for the very first time uncensored and unconstrained—the bare bones of this skeleton in the West's historical closet.

Be prepared to be mind-boggled and amazed!

Witness to History: The Reich Legend Uncensored

By Mike Walsh. It is useless to compile a book based on one historian's spin. It seemed far better to give those who made this epoch their chance to tell us the unfiltered, spin-free story in their own words. In this meticulously researched and illustrated book are the actual words of hundreds of eyewitnesses to the events of WWII—from high-ranking world leaders and military men to the average citizen on the street. All of their comments and the author's analyses are divided into 33 chapters covering in part: the Russian Revolution, Jewish power in Germany, Hitler and genuine democracy, the money changers driven from the German Temple, the good life in the Reich, religion in National Socialist Germany, the 1936 Berlin Olympics, German pleas for peace, the Jewish declaration of war on Germany, Poland's provocations, Bolshevik Russia prepares to invade, U.S. blockade forces Japan's hand, uncivilized warfare, conquerors' bloodlust, German behavior, a Christian nation martyred, genocide by starvation, vultures circle, brothers in atrocities, to the victors go the slaves, fate of POWs, the Holocaust, Nuremberg Trials, much more. Softcover, 416 pages, #995, **$35**.

Alfred Rosenberg Political Essays

The National Socialist movement has been dismissed as a racialist movement that had no serious political philosophical foundation. But one has only to read the numerous political writings of the chief ideologue of the movement, Alfred Rosenberg, to discover a clear philosophical account of what the regenerative movement of National Socialism sought to achieve in the Third Reich through its doctrine of racial worth and power and the ideological bases of the foreign political aims of the Reich during WWII. The collection of essays, published by Rosenberg during his career as editor of the *Völkischer Beobachter* and as director of ideological indoctrination, will shed light also on the underlying reasons for the pro-Aryan policies adopted by the Reich. Both the National Socialist movement and the war that was waged on the continent are understood only in the context of the German need to neutralize a perceived enemy that was said to be characterized by a desire to consolidate its international financial power through the disintegration of European society and culture. Essays include: Jewish World Politics; The Jewish Bank Plague; Observations on Democracy; The Nature of British Politics; Jewish Bolshevism; Stock-Exchange Bolshevism; The Red and Golden International; An Anti-Semitic International?; The German Idea; National Socialism; The State of the Teutonic Order; Germany and the League of Nations; In the Event of a League of Nations; Europe's Revolution; extracts from *Letzte Aufzeichnungen* and more. Extensive chapter notes and a bibliography. Softcover, 181 pages, #1010, **$20**.

Legends of the Shawangunk

Three Very Politically Incorrect Treatises Yanked from the Historical Memory Hole

The Blood Mystery

Here is Henri Desportes' most renowned work, *Le mystère du sang chez les juifs de tous les temps*, translated as *The Blood Mystery Among the Jews of All Times*, a seminal study of Jewish ritual murder that was published as a second edition in 1890. Desportes was a Catholic priest and writer, born in 1865 in France. He died in 1939. Here, Desportes takes the approach of performing a historical survey of the Jewish Ritual Murder phenomenon, then dives into specific historical cases and answers the perennial claims of critics. At one point, he says: "All the revelations, the ancient chronicles, the records of the Trent and Damascus trials, the book of the Moldovan rabbi etc. tell us about the same turpitudes. The custom of using Christian blood is very old. It already existed before the total scattering of the Jewish nation, it continued to be practiced until recently, in compliance with Talmudic and rabbinical laws, and it is definitely practiced even [in 1890]." This edition contains a preface by Édouard Drumont, a famous French journalist. Softcover, 271 pages, indexed, #994, **$30**.

The Poisonous Mushroom

Among the most controversial of Nazi publications was a book for children, published in 1938 under the title *Der Giftpilz*—or *The Poisonous Mushroom*. Here, the perceived Jewish threat to German society was portrayed in elemental terms. Ernst Hiemer put together 17 short morality stories intended to warn children of the dangers allegedly posed by Jews. They were depicted as conniving, thieving, treacherous rogues who would do anything for personal gain. Though aimed at children 8 to 14, Hiemer's "lessons" were intended for all readers. Long out of circulation and banned in Germany and elsewhere, this historic edition reproduces full-color artwork by German cartoonist Philipp "Fips" Rupprecht. The book was repeatedly cited at the Nuremberg Trials as evidence of "Nazi cruelty," and was used by prosecutors to justify a death sentence for its publisher, Julius Streicher. Edited by Prof. Thomas Dalton. Softcover, full color, 72 pages, #1000, **$17**.

Why the Jews Should Be Kept Out of England

William Prynne (1600–1669) was a prominent Puritan opponent of church policy under Archbishop of Canterbury William Laud. Prynne became known in the 1640s as an Erastian, arguing for overall state control of religious matters. In 1656, a proposal was made in the Parliament of England to lift the 13th-century residency ban for Jews. This prompted Prynne to write a legal treatise against the proposal. It was printed in 1656 shortly before the Whitehall Conference and became influential in swaying public opinion. The return of the Jews to England was heavily promoted by Manasseh ben Israel, the famous Portuguese rabbi, while Oliver Cromwell desired their conditional readmission. In the end, the Parliament did not support any such proposal. The Jews only came back to England in large numbers with the restoration monarchy of Charles II (1660–1685). In his treatise, Prynne was reciting from the uncontested legal record of England and other nations. He cited ruinous usury, forgery of coins and royal charters, general criminality, ritual murders, etc. as main reasons why the 1290 expulsion had happened and why they should not be readmitted in his time. This publication will be of interest to anyone fascinated by Puritanism, Protestantism and/or anti-Semitic attitudes in Europe in particular and Revisionist history in general. Softcover, 220 pages, indexed, #1014, **$23**.

Three Fascinating European History Books

The Mystery of Doggerland: Atlantis in the North Sea

New marine archaeological evidence has revealed the remains of a large landmass to the north and east of Britain that hosted an advanced civilization 1,000 years before the recognized "first" civilizations of ancient Egypt, Mesopotamia or India. Entwined in Keltic legends as Tu-lay, and referred to by geologists as Doggerland, this civilization began at least as early as 4,000 B.C. but was ultimately destroyed by rising sea levels, huge tsunamis and a terrible viral epidemic released from melting permafrost during a cataclysmic period of glacial recession. Exploring the latest archaeological findings and recent scientific analysis of Doggerland's underwater remains, Graham Phillips shows that this ancient culture had impressive technological and medical knowledge before its time. He looks at evidence detected with remote sensing and seismic profiling of many artificial structures, complex settlements, gigantic earthworks, epic monoliths and huge stone circles dated to more than 5,500 years ago preserved beneath the ground and on the ocean floor. The implication is that the survivors made it to the British Isles to fuel the architectural and astronomical advances of the Neolithic builders of Stonehenge etc. Softcover, 224 pages, item #1016, **$20**.

Arminius: The Liberator

Two thousand years ago, the mighty Roman Empire—just like many Western democracies of today—was marked by decline and corruption. The once noble and altruistic attitude of the *civis romanus* had given way to the coarsest and most selfish morés. The middle class had almost totally vanished. An oligarchy, making a show of ostentatious wealth, brutality and perversion, had seized control. *Arminius: The Liberator* is the story of an actual Germanic prince, trained to serve the Roman Empire, who united the tribes of Germania in 9 A.D. to crush three Roman legions, thereby changing the course of history. Once free of decadent rulers, its later cultural emanations would radiate to North America, Australia and other regions and have lasted more than 2,000 years, so far. *Arminius: The Liberator* is the true story of one man's incredible quest to defy an oppressive, all-powerful empire and lead his people to freedom. Arminius's victory is a lesson to be learned by our people for our times—that unity and clear-headed focus are crucial to overcoming political tyranny and rampant corruption. Softcover, 8.5" x 11", hundreds of illustrations, 324 pages, #1008, limited quantity made possible by a donation, **$55**.

The Autobiography of Sir Götz von Berlichingen: A Knight of the Holy Roman Empire

Here is the amazing tale of Gottfried "Götz" von Berlichingen—the Knight of the Iron Hand—one of the last great medieval knights of history, translated from the original 1567 manuscript. Born in 1480, Götz came of age in an era of great change in his native German lands and the wider world. The Reformation would forever change the landscape of political power in Europe, and the ensuing wars would tear the continent apart. Yet, for a time, Götz's world remained true to it's feudal history, and Götz participated in many feuds and conflicts. A good friend and a terrible enemy, Götz recalls how he fought and struggled in the internal politics of Germany, which pitted princes and lords against one another over land, titles and wealth. He crosses paths—and sometimes swords—with other famous knights, esteemed princes and with the Holy Roman emperor himself. Campaigning with the Imperial Army across Europe, he survived on his wits and prowess in battle. His legacy as a folk hero lived on long after his death, inspiring Goethe to write a play based on his life, and becoming the namesake of the 17th SS-PanzerGrenadier Division in WWII. Before his death Götz recounted his experiences as a knight. Here they are. Softcover, 120 pages, #1012, **$18**.

Race and Racial Differences: A Handbook for the 21st Century

How DNA Shapes Mankind Into Seven Major Races

The first honest, updated DNA/geneological study done on the human race in 50 years. With 64 photographs, 16 illustrations, seven maps, six tables, and 11 explanatory charts.

By Arthur Kemp B.A.

Race is real, it is biological in nature, and it is shaped and determined by genetics alone. This book is the first to conclusively show exactly how races are physically and psychologically shaped by individual genes.

Using data and references from dozens of highly reputable scientists and journals, this fully referenced work starts with an overview of the development of the study of race, from the earliest times up to the very latest advancements in DNA analysis.

From there, it provides a comprehensive yet easily understandable overview of how human DNA works, which is vital to any understanding of how genes, at a Single Nucleotide Polymorphism (SNP) level, are responsible for shaping individuals.

When large numbers of people share similar SNPs, they form distinct groups which manifest themselves as "races."

Human DNA is made up of three major components: Y-chromosomes, mtDNA (which is inherited unchanged through the male and female lines), and autosomal DNA. When these three components are plotted according to their geographic locations, they dramatically divide into seven distinct regions. Each region clusters according to genetic similarity—the classic definition of race.

This science of genetic clustering is used by all the "home DNA testing kit" companies to provide "ancestry and origin" results. It provides unequivocal proof of the biological existence of race, and definitively destroys any claims that race is a "social construct."

This work builds on the seven regions reality by probing deeper and revealing the exact genes and SNPs—by name and location in the chromosomes—which determine the physical differences we see before us as racial types.

Then the process whereby these genes are unequally distributed among the seven major regions is discussed—and how this differentiated genetic distribution has created different races.

In this way, the genes responsible for eye color, hair color, hair texture, skull shape, facial features, skeletal structure and, finally, psychology and intelligence are all individually named, leaving no doubt as to the genetic basis of race.

The seven different races are then named. Then, in a first for this century, these seven major races—and all their subgroups—are reviewed in an illustrated racial typology section which lays bare the vast genetic diversity of mankind.

Finally, the book ends with a definitive, fact-based refutation of the five major race-denial claims.

There is literally no other book on the topic of race like this in the world. It is a handbook on race, DNA, and racial typology for the 21st Century.

The Barnes Review was founded in 1994 by Willis A. Carto and has been publishing without interruption for the past 30 years.

PERSONAL FROM THE EDITOR

Remembering Our Founder

With the coming November/December issue, The Barnes Review will be wrapping up Volume XXX. Founded back in September 1994 by prolific nationalist and populist publisher Willis A. Carto, TBR is dedicating this issue to him. Without Carto's unique vision, this magazine would never have come into existence; it would simply have been too much trouble and too much work for another man. Thankfully, his idea of a Revisionist journal for the common man, covering all eras of history, has survived now for three decades.

Willis was a man who was curious about all kinds of topics. People believed he was focused only on such important Revisionist issues as WWII, the real Adolf Hitler, the Holocaust and White nationalism. The truth is, he was interested in just about everything. This included, of course, those issues mentioned above, but also: the world's religions—both past and present; migrational and explorational patterns of ancient man; suppressed American history; the founding fathers; world history—especially from a Western perspective; the causes and consequences of war; the efforts of other populists; nationalist heroes; economics; architecture; art; music; gardening; dogs; guns; and more.

Many a night, when I would, at some late hour, leave the TBR offices—then located on Capitol Hill, in Washington, D.C.—I would see him, still at his desk, reading some newsletter, a newspaper or a history book. The man was indefatigable and never stopped absorbing information from all kinds of sources.

In this issue, we have thus included a wide array of material reflecting the eclectic interests of our founder. Inside, you'll see articles covering: the daring and inspirational young riders of the Pony Express; suppressed information about the infamous "Hossbach memo"; a biography of French nationalist and populist leader Francois de La Rocque; and the inexplicable push for total war by a prominent WWII-era church leader.

In case you didn't know, Willis was also very interested in Jewish history—ancient, modern, and everything in between. It was his unvarnished discussion of this topic that gained him national notoriety as one of America's "top anti-Semites."

Since Willis was integral to the nurturing and expansion of the Holocaust Revisionist movement, we have also included an article on the 1985 Ernst Zündel trial in Canada, which resulted in millions of people being exposed to the Revisionist point of view on the Holocaust. We also include articles from three men who knew Willis quite well. They tell us not only about Willis's professional accomplishments, but about the man himself.

This issue would not be complete without a piece from our founder himself. Willis condemned war as the greatest folly of man. In his essay, Carto blasts those forces driving the perpetual war machine. We also felt it appropriate to include a piece from Dr. Harry Elmer Barnes. Willis valued Barnes's friendship so much, he named this journal after him. ❖

Only The Truth Can Make Us Free

Nikita Khrushchev said, "Historians can upset things." We hope so. It's high time to do exactly that if we wish to avoid what clearly is a dark and foreboding future. Our only hope is to learn what history has to teach during this voyage and many others to come.*

History is old news and news is new history. If it's not the one it can't be—or shouldn't be—the other. True, real news, like real history, is very controversial in this day of the politicalization of both. But history is far too important to be left to college professors, pundits, politicians and pressure groups. This magazine aims for intelligent readers of all stations and crafts, not for the sterile literati, although they, too, can learn much from our pages if they wish.

If history cannot be used to interpret current events and to foretell the future, it is worthless; like modern art at best an amusing exercise in self-gratification. If it is well-financed and tax-privileged, it is a swindle. History is prophecy in action.

Our world's history is as massive as the universe that lies beyond. It encompasses everything from the dimly perceived lives and migrations of prehistoric peoples to the content of newspapers hitting the streets as you read this. History is knowledge and it is romance. History is power.

Nothing is more interesting than history. It is a source of pride in accomplishment and an indictment of evildoers. But, most of all, history is the great teacher, ever willing and eager to impart her wisdom. Unfortunately, and at terrible cost, we have been uninterested and easily distracted pupils, and we have been seduced by the liars and the docudramatists.

Why should we stand by while history is mislabeled, misrepresented and corrupted, its substance tampered with by special interest charlatans too seldom brought to book in the court of public exposure? Why should we permit our patrimony to be debased and perverted?

WILLIS A. CARTO
Painting by Pete Papaherakles.

The sad truth today is that those who are not special-interest pleaders can hardly be found among the ranks of historians, whose calling above all, said Cicero, is to tell the truth. On the one hand there are the pathetic establishmentarians whose idea of revising history is to write out the role of White males almost entirely and write in Jews, lesbians, Blacks and American Indians. History texts today for schoolchildren bear the wounds of this attack for the purpose not of truth but simply to please the shabby goal of political correctness.

And, then, we have the so-called Revisionists, whose monomania on the one subject of the Jewish holocaust of World War II is shared by Elie Wiesel, Deborah Lipstadt and their ilk. These "opposites" believe that this "detail of history," to quote brave French politician Jean-Marie Le Pen, is the central and defining event of all history. It isn't, and we're bold enough to say so.

Harry Elmer Barnes, Charles Beard, Charles Callan Tansill and the other great Americans who first saw that history was being used by special interests as a weapon against the people would gag from a diet of nothing but holocaust debunking. Historical Revisionism is much larger and grander than that. The basic facts about this subject have been well-established and are accepted by all fair minded and alert people intelligent enough to look beyond the twisted and myopic press.

It's past time to move on to new fields and new recruits.

The aim of TBR is to deal with not only the most controversial of historical subjects but also the most inspiring, the most interesting, the least known and the most instructive to the human situation today—right now. Thus, our subject matter will be wide and broad-ranging. People will like TBR as long as they are open-minded, intellectually curious and lovers of the truth. People whose minds are made up and do not wish to know the truth will not subscribe and will not be missed.

And here's where you come in. Read TBR. If you ever find a fact offered which you believe to be untrue, please write us. Don't be afraid and don't think you'll insult us. If your letter makes sense at all, we'll reprint it within the limits of available space.

To repeat: we're not "hung up" on anything except our honest desire to get at the truth. The good book says to know the truth and it shall make you free. We honestly believe that. And we hope that you do, too. ❖

***Trouble on the Pony Express*, an oil painting by Frank Tenney Johnson, depicts a Pony Express rider under attack by hostile Indian braves.**

A SHORT HISTORY OF THE PONY EXPRESS

By Mike Mains

Are you a young, skinny, wiry fellow, not older than 18? How about an expert rider, willing to risk death daily? If so, you might have made a crack Pony Express rider. It was even better if you were an orphan.

In the spring of 1860, signs and newspaper ads looking for young men who matched those descriptions appeared all over the country. The ads were placed by the newly formed Pony Express, hoping to hire riders to carry mail from St. Joseph, Missouri to San Francisco, California. The pay was $25 a week.

Orphans were preferred because of the extreme danger involved. Pony Express riders were subject to extreme temperature changes, both hot and cold, along with blizzards, tornadoes, and lightning storms. If a horse gave out midway through a run, a rider could find himself abandoned in the wilderness and at the mercy of a pack of ravenous wolves. Those were just the inherent natural dangers, but there were also the human ones, too.

Pony Express riders could have their mounts stolen by horse thieves, be bushwhacked by bandits or tortured and scalped by Indians. In fact, Indian attacks were common. Riders found that the best way to avoid being pierced by Indian arrows was speed. They would simply outrace their attackers if possible. Still, every rider carried a rifle, a Bowie knife and two six-shooters, and often used them.

"Young, skinny, wiry fellows" who were expert riders under the age of 18 were perfect for the job of Pony Express rider.

LONELY PROSPECTORS

The need in the 19th century to establish faster mail service from Missouri to California was, of course, driven by money, in this case gold.

James Marshall was the first to discover gold in California in 1848. Word of his find spread quickly among the locals, but it took six months to trickle back east of the Mississippi River. When the news hit, it created a virtual frenzy, and brought hundreds of thousands of people out West in what came to be known as the Gold Rush of 1849.

The state's population swelled with lonely, homesick prospectors panning for gold and pining for news from the friends, family members and sweethearts they'd left behind. Their misery was compounded by the agonizingly slow process of mail delivery. Mail via steamship or stage coach took four weeks to travel from east to west. And though the telegraph and railroad both expanded their reach throughout the 1850s, neither was able to cross the vast expanse of land between Missouri and California.

In those days, people picked up their mail at the post office or general store. Californians were so mail-starved, they waited in line for days in hopes of receiving a letter. News of a mail delivery could bring an entire community to a standstill.

According to Fred Reinfeld in his book *Pony Express* (1973):

> Every pick and shovel is dropped, every pan is left aside, every rocker is stopped with its half-washed dirt, every claim is deserted, and they crowd around the store with eager inquiries, "Have you got a letter for me?"

When California became the nation's 31st state in 1850, angry citizens immediately petitioned their representatives to secure faster mail delivery. But how? All attempts to establish faster mail service had ended in failure and, in some cases, death.

Hoping to fill the need for faster mail, Absalom Woodward and George Chorpenning Jr. began using mules to deliver mail between Salt Lake City and Sacramento in 1851. Dubbed the

"Jackass Express," their service was short-lived. Woodward and four other men in his party were tomahawked and scalped by Shoshone Indians while delivering mail.

The Butterfield Overland Mail Company received a government contract to deliver mail in 1858, but, due to a lack of wagon trails, they had to travel a southern route through Arkansas, Texas, and then west to California. That route covered 2,800 miles and took 24 days.

The challenge of establishing faster mail service to California remained all through the 1850s. Finally, one man rose up to meet it. His name was William Russell.

BRAINS BEHIND THE EXPRESS

Russell and two partners, Alexander Majors and William Waddell, owned a successful shipping company that hauled Army supplies by wagon. Russell was the senior partner in the company and spent much of his time in Washington, lobbying government officials for freight and mail contracts. Late in 1859, he met with California Sen. William Gwin, who convinced Russell what the country needed was a fast and efficient way to deliver mail to the far West. Gwin floated the idea that such a service could lead to a lucrative government contract.

Russell was immediately taken with the idea, but his partners weren't. They thought Russell's plan of using riders on horseback to transport mail was too wild, too risky and too expensive to undertake.

A route from Missouri to California would have to cover 1,966 miles through some of the meanest country in the region. It would require building relay stations every 10-20 miles, where riders could change horses, and home stations every 65-100 miles, where riders could sleep and eat. Hundreds of horses would have to be bought and hundreds of men hired to run the stations and carry mail. Setting up such a service would be a logistical nightmare, not to mention dangerous, and every ride would be a race against time.

The above engraving, based on a painting by George Ottinger, depicts a Pony Express rider doffing his hat to two men raising a telegraph pole. On October 24, 1861, the first telegraph line was completed from the Midwest to California, ending the need for the Pony Express.

But Russell persisted and eventually won his partners over. On January 27, 1860, the three men established the Central Overland California and Pike's Peak Express Company, better known as the Pony Express. The company promised to deliver mail from Missouri to California in 10 days or less. There was only one hitch. The entire operation would have to be set up and launched in two months.

THE MAIL MUST GO THROUGH

Russell and his partners wasted no time. They bought 400 of the fastest horses they could find and immediately began building relay stations. They hired experienced, no-nonsense men to run the stations—men who could shoe a horse, have a saddled pony waiting for the next rider and, if necessary, fight Indians. Then they put out the call for riders.

From farm boys to city slickers, everyone wanted to carry mail for the newly formed company despite the dangers. In the end, however, not everyone was cut out for the job. Riders had to be light in weight (jockey-sized or thereabouts), so as not to overburden the horses. They had to be reliable and, as Russell's partner Majors insisted, they had to be of "good character."

"Riders of the Pony Express … were required to swear their loyalty to the company. They had to promise not to fight, curse or drink alcohol. The company often gave riders a small Bible and expected them to live by its teachings," says Elaine Landau in her 1946 book *The Pony Express*.

The company soon hired 80 riders. Most were in their teens or early 20s. The oldest was in his 40s. All of them were instructed on the most important part of their job: The mail must go through, no matter what.

Every Pony Express ride came outfitted with a mochila, Spanish for knapsack, a specially designed leather saddlebag that was slung over a horse's regular saddle and held in place by the rider's weight. What made a mochila special were four locked pouches where mail was stored at each of its

Coming and Going of the Pony Express **by famed American artist Frederic Sackrider Remington, 1900.**

four corners. Mochilas were portable and could be placed or removed in seconds. Riders were taught to guard their mochila at all costs. In fact, during it's entire existence, the Pony Express lost only one mochila.

WELCOMING THE PONY EXPRESS

On the night of April 3, 1860, the streets of St. Joseph, Missouri were alive with thousands of happy citizens. They were there to watch the inaugural ride of the Pony Express. At 7:15 p.m., a cannon boomed, the crowd cheered and the very first Pony Express rider galloped off into the night, carrying mail bound for California.

Johnny Fry, a handsome young man, is widely credited with being the first rider out of St. Joseph. He rode all night, stopping only for a few seconds at relay stations to change horses, and completed his run at Seneca, Kansas, 80 miles away, where he handed the mochila to his relief rider, 16-year-old Don Rising.

Two thousand miles away, a similar scene unfolded. James Randall was the first rider to leave San Francisco, carrying eastbound mail meant for Missouri. Like Johnny Fry, he departed amid a crowd of cheering spectators. It was actually a race, the greatest race the country had ever seen, to see which team of riders would deliver its mail first: the westbound team started by Fry or the eastbound team started by Randall. Whoever was first to deliver his mochila to its final destination would be declared the winner.

At 5:30 p.m. on April 13, 1860, the first mail delivery from St. Joseph arrived in Sacramento and was greeted with cheers from a waiting crowd. Seven hours later, the mochila arrived in San Francisco. Despite the late hour, another celebration took place. Bells pealed, cannon boomed and scores of men fired their six-shooters into the night sky in celebration. Californians would no longer have to wait a month or more to receive a letter from the east. Fry's westbound team had won the race.

Thirty minutes later, the eastbound mochila arrived in St. Joseph to yet another celebration. The Pony Express was off to a rousing start. Little did anyone know how much trouble lurked around the corner.

THE PAIUTE WAR

Tension between White settlers and Indians in the Utah territory of present-day Nevada had been mounting for years. It came to a head in May 1860 when White settlers kidnapped and molested two Paiute Indian girls. The Indians retaliated by attacking a small settlement known as Williams Station. The Indian war party rescued the two girls, who were found tied up in the basement of a saloon. They also killed five men.

The attack on Williams Station set off an all-out war. Fighting was fierce on both sides and led to the deaths of 16 Pony Express employees and seven relay stations being burned to the ground. A young rider named William Streeper rode into the station at Dry Creek to find its lone attendant, Ralph Rosier, dead and his body mutilated.

The reaction of Streeper is recounted in Howard R. Driggs's book *The Pony Express Goes Through: An American Saga Told by Its Heroes*:

Secret History of the Wild, Wild West

Outlaws, Secret Societies and the Hidden Agenda of the Elites

Drawing on family diaries, author Daniel J. Duke—the great-great-grandson of Jesse James— unravels the hidden history of the Wild West to expose the outlaws, politicians and secret societies that were pulling strings behind the scenes. He examines Jesse's close ties with outlaws like Johnny Ringo, Jesse Evans and Billy the Kid. He demonstrates how Jesse faked his own death and lived out his life under an alias, and how Billy the Kid did the same. He also details how both Jesse and Billy continued their work for a secret organization after their faked deaths. Also explores how Jesse was related, by blood or marriage, to powerful people in the Baylor family, Copperheads, Knights of the Golden Circle, Lyndon Johnson, Harry Truman and Billie Sol Estes. Exposing the secret agenda behind the outlaw gangs of the Wild West, Duke also reveals the secret war between the clandestine organization and its opposition that has been waged in the shadows for centuries. "When I opened the door my hair just stood up on end. They say it won't do it, but mine did. There lay the murdered and scalped keeper, stark naked."

It was during this time that 20-year-old Pony Express rider Robert "Pony Bob" Haslam distinguished himself for his bravery and became a legend. Pony Bob was headed east and nearing the completion of his usual route when he reached Reed's relay station. There, he found no fresh horses. Pony Bob pushed his worn-out horse to the next station, where his run ended. His relief rider, Johnson Richardson, frightened over hostile Indians on the warpath, refused to take over the run. It was the only case in Pony Express history of a rider refusing to undertake his job.

Station master W. C. Marley offered Pony Bob a $50 bonus to keep riding, and the young man took it. Ten minutes later, he was back in the saddle and heading to the next home station, more than 100 miles away. After riding for hours, he arrived and handed his mochila to relief rider J.G. Kelly. But the story doesn't end there.

After a few hours rest, Pony Bob headed back the way he came with a mochila filled with westbound mail. When he arrived at Cold Springs station, he found the station keeper dead from an Indian attack, and all of the horses stolen. Pony Bob stayed just long enough to let his horse drink, before galloping off.

Pony Bob reported the attack at the next station, and convinced the station keeper that a Paiute war party was likely headed his way. The man left the station with Pony Bob, and the two riders galloped away. It turned out that Pony Bob saved the man's life, as the station was attacked by Indians the following morning.

When Pony Bob finished his run at the Bucklands Station, he had ridden 380 miles round trip over a span of 36 hours and under constant danger. It would go down as the greatest ride in Pony Express history, and what some consider to be one of the greatest feats of horsemanship ever.

THOSE DARING YOUNG MEN

Pony Express riders were constantly chased and shot at by hostile Indians. Pony Bob had to outrun Indians several times while carrying mail for the company. In March 1861, his jaw was broken and five teeth were knocked out by an arrow, but Pony Bob finished his ride.

Eighteen-year-old rider Nick Wilson, who had lived among the Shoshone Indians as a boy, was shot in the forehead with an arrow and left for dead. Although the arrow was lodged two inches above his left eye, Wilson miraculously recovered.

The arrival and departure of Pony Express riders were big events.

William Cody, more famously known as "Buffalo Bill," was a 14-year-old mail rider in Wyoming. One day, he found himself chased by a whooping war party of Indians. Cody pulled out his six-shooter and fired at the Indian closest to him, the tribe's chief. One shot killed the chief and elicited a shower of arrows from the other Indians. Cody's horse was hit, but it wasn't a serious wound, and the young rider eventually outran his pursuers. Not every rider was so lucky.

Bart Riles, a thin, quiet Mexican boy, was ambushed by a war party of Shoshone Indians while carrying mail to Fort Churchill in Nevada. His horse was hit in the rump with an arrow, and Bart was shot in the stomach with a bullet at close range. He knew he was dying, but Bart's hero was Pony Bob Haslam, and, like his hero, Bart was determined not to lose the mochila he was carrying. Using his jacket, Bart tied himself to the saddle horn and passed out. When his horse limped into the relay station at Cold Springs, the attendants had to carry him inside.

The mochila was put on a fresh horse, and one of the attendants rode off with it to the next station. The other attendant, Jim McNaughton, sat with Bart all night and tended to his wounds. At daybreak the boy whispered, "*Diga al Señor Bob que guarde con mi vida.*" ("Tell Mr. Bob that I guarded it with my life.") He then died in McNaughton's arms.

"Bronco Charlie" Miller, the youngest rider in Pony Express history at 11 years old, was wounded twice by arrows. He claimed he got his start delivering mail when he saw a horse arrive at a home station without its rider. The rider had been killed and scalped by Indians.

OTHER DANGERS

Violence associated with the Pony Express wasn't limited to Indians. On July 12, 1861, gunfire erupted at the Rock Creek station in Nebraska territory. When the smoke cleared, three men lay dead. Among them was David McCanles, a notorious bully and outlaw. Holding a smoking gun was a 23-year-old Pony Express employee named James Butler Hickok, who tended livestock at the station. He was arrested and tried for murder, but acquitted. The shooting earned him the name "Wild Bill."

Billy Campbell, on a Nebraska run between forts Kearny and McPherson, came upon a pack of ravenous wolves

devouring the remains of a horse they'd killed. When Campbell raced by, the wolves took off after him. Campbell knew, if the wolves caught up, both he and his horse were dead. He took hold of the bugle that riders were issued to announce their arrival at a station and blew it for all it was worth. The sound startled the wolves and allowed Campbell and his horse to outrun them.

In another instance, William Frederick Fisher was lost in a blizzard for 20 hours. He fell asleep in a snow bank and would have froze to death had a jack rabbit not hopped on his leg and roused him from his frigid slumber.

RIDERS OF THE PURPLE SAGE

While violence and death were always possibilities for the riders and station attendants of the Pony Express, not every day was tinged with peril and excitement. Most rides went peacefully, and the job was one of the loneliest in the world. Riders rarely saw or spoke with one another, and time spent at a relay station while changing horses allowed them only a few minutes of terse conversation with the station attendants before they were back atop a fresh pony and galloping away. Night riders were especially prone to melancholy.

Diane Yancey, in her book *Life on the Pony Express*, says, "Nights on the road were black and silent except for coyote howls and the thudding of the pony's hooves. Riders put in hours of riding with only their thoughts for company."

Almost all of the riders were unmarried, which added to their sense of loneliness. Still, they were the dashing young men of their day, and quickly developed a following of female admirers. Johnny Fry was perhaps the most popular of the riders among the ladies. Young women baked cookies and cupcakes for him and stood waiting patiently for him to arrive.

Pony Bob Haslam in later years.

Fry could only reach for the treats with one hand, as they were difficult for him to handle without slowing the pace of his mount. A young girl in Troy, Kansas solved the problem by baking her cupcakes flat with a hole in the center so Fry could catch them on his finger as he galloped by. Thus, according to some, the donut was born and popularized in America.

ENDURING LEGACY

In 1861, telegraph wires running across the nation all the way to California almost entirely eliminated the need for the Pony Express. Americans immediately embraced sending telegrams as opposed to mailing letters.

On October 24, 1861, the Pony Express ceased operating. It took another three weeks to deliver the last of its mail, but, by mid-November 1861, the Pony Express was no more.

A total of 180 men rode for the Pony Express, and hundreds more worked at the relay stations. Here is what happened to a few of the more well-known riders:

• Wild Bill Hickok became a Union scout, an Indian fighter under Col. George A. Custer and, finally, a cele-

brated lawman in Kansas. He was shot dead in a poker game by Jack "Crooked Nose" McCall in Deadwood, South Dakota. Wild Bill was holding two pairs—aces and eights—when McCall shot him in the back. That hand has ever since been known as the Dead Man's Hand.

• Buffalo Bill Cody was glorified in print by dime novelists, became friends with Sitting Bull, and toured the world with his Buffalo Bill's Wild West show. Cody was a Freemason his entire life, rising up to the rank of 32nd degree, but, the day before he died, he converted to Christianity and was baptized in the Catholic Church. He died in 1917 at the age of 70.

• Johnny Fry joined the Union Army and was killed in the Civil War by William Quantrill's raiders in the Battle of Baxter Springs. Fry killed four men in fierce hand-to-hand combat before going down.

• Robert Pony Bob Haslam became a U.S. Army scout, a job he held until he was well into his 50s. In 1890, he helped negotiate the surrender of Chief Sitting Bull. Pony Bob died penniless and forgotten in Chicago in 1912 at the age of 72.

• Bronco Charlie Miller, the last surviving Pony Express rider, died in New York City on January 15, 1955. He was 105 years old.

Although the Pony Express lasted only 18 months, it remains forever etched in the hearts and minds of Americans. Even today, we continue to be enthralled and inspired by tales of these courageous young riders who risked all to deliver the mail. ❖

RIDERS FACED CONSTANT DANGERS

The job of Pony Express rider was a dangerous one, and lethal threats were everywhere, including hostile Indians, poisonous snakes, wolves, heatstroke, dehydration, blizzards and more. Were a rider to be thrown from his horse and break a limb, there might not be a doctor (or a friendly face) within 100 miles. Hitler's Secret Meetings

Do they support Nuremberg war crimes charges?

By John Wear, J.D.

The International Military Tribunal (IMT) in its final judgment cited four secret meetings held by Adolf Hitler which indicated his plans to conduct aggressive war. In these meetings, held on November 5, 1937, May 23, 1939, August 22, 1939 and November 23, 1939, Hitler allegedly made important declarations explicitly stating his desire to conduct aggressive war. The IMT used these meetings to prove that many of the tribunal defendants had participated in a preconceived plan to conduct a war of criminal aggression.[1]

This article shows that none of these secret meetings indicates that Hitler had a preconceived plan to conduct aggressive war.

NOVEMBER 5, 1937 MEETING

Hitler addressed a conference attended by some of his advisors on November 5, 1937. The attendees at this conference included Defense Minister Werner von Blomberg, Army (Wehrmacht) Commander-in-Chief of the German Armed Forces Werner von Fritsch, Navy (Kriegsmarine) Adm. Erich Raeder, Air Force Chief of the Luftwaffe High Command Hermann Göring and Foreign Minister Konstantin von Neurath. Also present was Col. Friedrich Hossbach, an officer of the German General Staff assigned by it for liaison work with Hitler. Hossbach was never Hitler's personal adjutant, although this idea has persisted in some accounts.[2]

COL. FRIEDRICH HOSSBACH
Author of infamous memo.

The Hossbach version of this conference—known as the "Hossbach memorandum"—became one of the most celebrated documents of the war. It was written several days after the conference, and it would carry no weight in a normal court of law, even if an actual copy of this memorandum was available.

Hossbach had been an opponent of Hitler since 1934, and he was not against using illegal and revolutionary means to eliminate Hitler. He was an ardent admirer of Gen. Ludwig Beck of the German General Staff, whose life he had helped save during a cavalry accident.

Beck, who was also a determined foe of Hitler, was engaged in organizing opposition against Hitler. Hossbach was eager to provide Beck with every possible kind of propaganda material, since Hitler, at the time, was popular in Germany, and only extreme methods might be effective in opposing him.[3]

It has never been shown that the version of this meeting introduced at Nuremberg was an authentic copy of the memorandum Hossbach began to write on November 10, 1937. He even failed to recall later when he completed his effort. The fact is, no copies of the original version of the Hossbach memorandum have ever been found.

The version introduced by the American prosecution at Nuremberg was said to be a copy made from the original version in late 1943 or early 1944. However, Hossbach declared in a notarized affidavit on June 18, 1946 that he could not remember if the Nuremberg copy corresponded to the original which he had made almost nine years earlier. In fact, the Hossbach memorandum, which was a primary instrument used in securing the convictions and executions of multiple top German leaders, has never been verified. Thus, there is no reason to automatically assume it is authentic.[4]

Raeder explained that Hitler's views, as expressed on November 5, 1937, offered no basis to conclude that any change in German foreign policy was about to take place. Raeder testified that neither he, nor von Fritsch, nor von Blomberg believed

Four attendees at the November 5, 1937 meeting from which emerged the infamous "Hossbach memo" included (left to right): Defense Minister Werner von Blomberg, Commander-in-Chief of the German Armed Forces Werner von Fritsch, Grand Adm. Erich Raeder and Foreign Minister Konstantin von Neurath. Also in attendance was the Luftwaffe's Hermann Göring. By the time the Allies investigated this meeting after WWII, Fritsch and Blomberg were dead. Raeder, Neurath and Göring, however, agreed Hitler's remarks at the conference did not indicate plans for waging "aggressive war."

that Hitler meant war. The IMT judges, however, with the dubious help of this unconfirmed record, declared that Hitler had revealed unmistakably in the Hossbach memorandum his unalterable intention to wage a war of criminal aggression.[5]

Fritsch and Blomberg were dead when the Allies investigated this conference after World War II. Neurath and Göring, however, agreed with Raeder about the essential nature of Hitler's remarks. Hitler had discussed German aspirations in Central Europe and the danger of war, but he had never announced an intention to pursue a reckless foreign policy or to instigate a war with any nation.

Even the version of the Hossbach memorandum introduced at Nuremberg, as British historian A.J.P. Taylor has pointed out, does not anticipate any of the actual events that followed in Europe. It does contain some belligerent ideas, but it outlines no specific actions, and it establishes no timetables.[6]

Historian Udo Walendy wrote:

> The so-called "Hossbach memorandum" does not furnish any proof that Hitler had been planning "a conspiracy against peace"; on the contrary, it is a classic example of how the postwar "judiciary" and their propaganda "historians" were forced to fall back on the notes of German resistance adherents and still had to falsify and exaggerate these in order to give such an indictment a veneer of legality.[7]

Thus, it was false to assume that the Hossbach memorandum was authentic in the first place, and it was incorrect to assume that the unverified version of the memorandum introduced at the IMT contained any damaging evidence against Hitler or any other German leaders.

Unfortunately, many historians have blindly followed the IMT judgment. These historians have arrived at the mistaken conclusion that Hitler's conference of November 5, 1937 was relevant in indicating Hitler's responsibility for starting World War II.[8]

MAY 23, 1939 MEETING

On May 23, 1939, a meeting was held in Hitler's study in the new Reich Chancellery in which Hitler allegedly announced and gave the reasons for his decision to attack Poland. Among the persons present at this meeting were IMT defendants Hermann Göring, Erich Raeder and Gen. Wilhelm Keitel. The adjutant on duty that day was Lt. Col. Rudolf Schmundt, who afterward allegedly made a record of what was said during the meeting, certifying it with his signature as a correct record.[9]

GEN. LUDWIG BECK
Determined foe of Hitler.

Unlike Friedrich Hossbach, Lt. Col. Schmundt was a loyal National Socialist who could be trusted to tell the truth about what Hitler said in this meeting. However, Schmundt was injured in the July 20, 1944 assassination attempt on Hitler, and died a few months later

from his wounds. Thus, he was not able to testify at the IMT as to what was said in this meeting. The question of the authenticity of his record of this meeting, like the Hossbach memorandum,, remains unresolved.[10]

Grand Adm. Raeder, when confronted at the IMT with the Schmundt transcript, said in court:

> In my opinion, it is the most obscure document about a speech of Hitler which exists anywhere, for a large part of its statements, in my opinion, make no sense at all. … It simply in no way reflects the character of the speech correctly.[11]

We know for certain that Poland had made major threats against Germany. Poland threatened Germany with a partial mobilization of its forces on March 23, 1939. Hundreds of thousands of Polish army reservists were mustered, and Hitler was warned that Poland would fight to prevent the return of Danzig to Germany.

The Poles were surprised to discover that Germany did not take this challenge seriously. Hitler, who deeply desired mutually beneficial and peaceful relations with Poland, refrained from responding to the Polish threat of war. Germany did not threaten Poland and took no precautionary military measures in response to the Polish partial mobilization.[12]

The situation between Germany and Poland deteriorated rapidly during the brief span of six weeks, from the Polish partial mobilization of March 23, 1939 to a speech delivered by Polish Foreign Minister Józef Beck on May 5, 1939.

Beck's primary purpose in delivering his speech before the Sejm, the lower house of the Polish parliament, was to convince the Polish public and the world that he was able and willing to challenge Hitler. He knew that British Foreign Minister Lord Halifax had succeeded in creating a pro-war atmosphere in Great Britain, and that he could go as far as he wanted without displeasing the British.

Beck had taken an uncompromising attitude in his speech that effectively closed the door to further negotiations with Germany.

RUDOLF SCHMUNDT
Death prevented testimony.

Beck made numerous false and hypocritical statements in his speech. One of the most astonishing claims in his speech was that there was nothing extraordinary about the British military guarantee to Poland. He described it as a normal step in the pursuit of friendly relations with a neighboring country. This was in sharp contrast to British diplomat Sir Alexander Cadogan's statement to Joseph Kennedy that Britain's guarantee to Poland was without precedent in the entire history of British foreign policy.[13]

Beck ended his speech with a stirring climax that produced wild excitement in the Polish Sejm. Someone in the audience screamed, "We do not need peace!" Pandemonium followed. Beck had succeeded in convincing the audience that a war with Germany was the proper course of action. Beck also persuaded those in attendance that Hitler had insulted the honor of Poland with what were in fact quite reasonable peace proposals.

Unfortunately, the listeners were unaware of the numerous falsehoods in Beck's presentation and, with that one address, the Polish foreign minister effectively closed the door to any further peace negotiations with Germany and, at the same time, convinced Poles that Germany was a deadly enemy that must be stopped.[14]

In this environment, it would have been foolish for Hitler not to have made adequate military preparations. Schmundt's notes suggest that Hitler was envisaging the possibility of conflict with Poland and the Western Powers, but that he hoped to prevent the intervention of the Western Powers by diplomatic means if a war occurred between Germany and Poland.

Keitel recalled after World War II that he left the meeting of May 23 with the firm belief that there would be no war. Joachim von Ribbentrop stated after the war that Hitler "repeatedly told me that one had to talk with military men as if war was about to break out here or there on the next day." Most analysts would regard this as a reasonable and prudent policy concerning the relationship between political and military leaders.[15]

AUGUST 22, 1939 MEETING

The IMT judgment stated:

> On August 22, 1939, there took place the important meeting of that day. … The prosecution has put into evidence two unsigned captured documents which appear to be records made of this meeting by persons who were present. The first document is headed: "The Fuehrer's speech to the Commanders in Chief of the 22nd August 1939." The purpose of this speech was to announce the decision to make war on Poland at once.[16]

At this meeting, Hitler had summoned the leaders of the army groups and of the armies of the three branches of the Wehrmacht to his Obersalzberg residence to instruct them about the foreign policy situation and to brief them about the possible campaign against Poland. This speech to his generals is probably Hitler's most frequently quoted speech. There are seven transcripts and protocols of this speech which, in parts, are very different from one another.[17] Thus, no one knows exactly what Hitler said during this meeting.

By August 22, 1939, the Poles had

conducted numerous violent acts of aggression and discrimination against the Germany minority in Poland. Dutch historian Louis de Jong wrote that, on March 25, 1939, windows were smashed in the houses of many ethnic Germans in Posen and Krakow and in those of the German Embassy in Warsaw. German agricultural cooperatives in Poland were later dissolved, and many German schools were closed. Ethnic Germans who were active in the cultural sphere were taken into custody. In the middle of May 1939, in one small town where 3,000 ethnic Germans lived, many household effects in houses and shops were smashed to bits. The remaining German clubs were closed in the middle of June.[18]

De Jong wrote that, by mid-August 1939, the Poles proceeded to arrest hundreds of ethnic Germans. German printing shops and trade union offices were closed, and numerous house-to-house searches took place. Eight ethnic Germans arrested in Upper Silesia were shot to death during their transport to an internment camp.[19]

Donald Day, a well-known *Chicago Tribune* correspondent, reported on the atrocious treatment the Poles had meted out to the ethnic Germans in Poland:

> I traveled up to the Polish Corridor, where the German authorities permitted me to interview the German refugees from many Polish cities and towns. The story was the same. Mass arrests and long marches along roads toward the interior of Poland. The railroads were crowded with troop movements. Those who fell by the wayside were shot. The Polish authorities seemed to have gone mad.
>
> I have been questioning people all my life and I think I know how to make deductions from the exaggerated stories told by people who have passed through harrowing personal experiences. But, even with generous allowance, the situation was plenty bad. To me the war seemed only a question of hours.[20]

William Lindsay White, an American journalist, recalled that there was no doubt among well-informed people

that, by August 1939, horrible atrocities were being inflicted every day on the ethnic German minority of Poland. White said that a letter from the Polish government claiming that no persecution of the Germans in Poland was taking place had about as much validity as the civil liberties guaranteed by the 1936 constitution of the USSR.[21]

Polish Ambassador Jerzy Potocki unsuccessfully attempted to persuade Beck to seek an agreement with Germany. Potocki later succinctly explained the situation in Poland by stating "Poland prefers Danzig to peace."[22] Polish armed forces Commander-in-Chief Edward Rydz-Smigly also declared, "Poland wants war with Germany, and Germany will not be able to avoid it, even if she wants to."[23]

American historian David Hoggan wrote that the leaders of the German minority in Poland repeatedly appealed to the Polish government for mercy during this period, but to no avail. More than 80,000 German refugees had been forced to leave Poland by August 20, 1939, and virtually all other ethnic Germans in Poland were clamoring to leave in order to escape Polish atrocities.[24]

British Ambassador Nevile Henderson in Berlin was concentrating on obtaining recognition from Halifax of the cruel fate the German minority faced in Poland. Henderson emphatically warned Halifax on August 24, 1939 that German complaints about the treatment of the German minority in Poland were fully supported by the facts. Henderson knew that the Germans were prepared to negotiate, and he stated to Halifax that war between Poland and Germany was inevitable unless negotiations were resumed between the two countries. Henderson pleaded with Halifax that it would be contrary to Polish interests to attempt a full military occupation of Danzig, and he added a scathingly effective denunciation of Polish policy.

What Henderson failed to realize is that Halifax was pursuing war for its own sake as an instrument of policy. Halifax desired the complete destruction of Germany.[25]

Hoggan wrote that Hitler was faced with a terrible dilemma. If Hitler did nothing, the Germans of Poland and Danzig would be abandoned to the cruelty and violence of a hostile Poland. If Hitler took effective action against the Poles, the British and French might declare war against Germany. Henderson feared that an atrocity in Bielitz would be the final straw to prompt Hitler to invade Poland.

Henderson, who strongly desired peace with Germany, deplored the failure of the British government to exercise restraint over the Polish authorities.[26]

> Germany would be in the greatest danger if England and France pushed into the Ruhr.

It was reasonable for Hitler in this environment to talk about a possible invasion of Poland. This meeting does not indicate that Hitler had a preconceived plan to conduct aggressive war against Poland and other European nations, only that he recognized that war might very well be inevitable and, like any responsible leader, wished to be prepared for all possible scenarios.

NOVEMBER 23, 1939 MEETING

The authenticity of Hitler's statements allegedly made at this November 23, 1939 meeting has been questioned by many historians. For example, Udo Walendy wrote:

> This "document" also has the same typical flaws in format and contents that characterize the other "key documents" of the IMT prosecution: no date, no heading, no signature, so that here, too, prerequisites for establishing a body of evidence elude the historian.

Walendy noted that the document also contained an outpouring of transparently flimsy hypotheses of Allied war propaganda.[27]

This conference was held after England and France had declared war on Germany. At this conference, Hitler stated that progress in the war depended on possession of the Ruhr. He conveyed his belief Germany would be in the greatest danger if England and France pushed through Belgium and Holland and into the Ruhr.

Since the sympathies of the people in Belgium and Holland were all for France and England, Hitler felt breaching the neutrality of these two countries was necessary to prevent their occupation by France and England. Hitler stated that Germany was forced to break the neutrality of Belgium and Holland because he knew, if Germany didn't, England and France would.[28]

The IMT judgment concluded:

> There is no evidence before the tribunal to justify the contention that the Netherlands, Belgium and Luxemburg were invaded by Germany because their occupation had been planned by England and France. British and French staffs had been cooperating in making certain plans for military operations in Low Countries, but the purpose of this planning was to defend these countries in the event of a German attack. The invasion of Belgium, Holland and Luxemburg was entirely without justification.[29]

The IMT judgment does not mention the fact that Hitler was eager to make peace once England and France had declared war against Germany. Hitler confided to his inner circle:

> If we on our side avoid all acts of war, the whole business will evaporate. As soon as we sink a ship and they have sizeable casualties, the war party over there will gain strength.[30]

Hitler made a peace offer on October 6, 1939 to the English and French governments. Included in this peace offer were the evacuation of Poland by the Wehrmacht, except for Danzig and the Corridor. Hitler obviously

would not have included the evacuation of Poland in his peace offer if he had wanted Poland as "Lebensraum in the East."[31] Hitler's peace offer was very reasonable, but it was quickly rejected by the English and French governments.

A few days after Belgium and Holland had made mediation proposals, Winston Churchill stated in November 1939 on British radio: "This war is a British war and its aim is the destruction of Germany."[32] Britain and France never showed the slightest interest in making peace with Germany.

The IMT judgment's statement that England and France had never planned to attack Germany through Belgium, Holland and Luxemburg is absurd. The British had already been involved in attempting to conduct aggressive war against Germany. William Henry Chamberlain wrote:

> The hypocrisy of the war-crimes trials is well illustrated by the case of German Adm. Erich Raeder, who was given a life sentence for plotting aggressive war, namely, helping to plan the Nazi invasion of Norway.
>
> Lord Hankey revealed some years back that the British were making identical plans at the same time. Winston Churchill admitted this to be a fact in his book *The Gathering Storm*.
>
> Final confirmation has recently been offered by the publication of the first volume of the *British Official History of the Second World War*. This sets forth in detail the plan approved by the British War Council as early as February 6, 1940. It embraced the seizure of Narvik and the occupation by force of northern Norway and Sweden, even including the Swedish port of Lulea on the Baltic.[33]

NEVILE HENDERSON
Desired peace with Germany.

CONCLUSION

None of the secret meetings mentioned in the IMT judgment indicates that Hitler had a preconceived plan to conduct aggressive war. Although American IMT prosecutor Robert Jackson and others associated with the IMT tried to present it as a high point in the development of international law and justice, the IMT was actually a politically motivated proceeding which failed to produce credible evidence of a German plan to conduct a war of criminal aggression. ❖

UNCENSORED WWII BOOKS

Léon Degrelle In Exile: 1945-1994

By José Luís Jerez Riesco. Stripped of his Belgian citizenship and sentenced to death in absentia for fighting against Bolshevism in WWII, Degrelle lived the rest of his life in exile in Spain, harbored by Franco. During these 49 years, Degrelle refused to remain silent as fantastical narratives were woven about the war and the "atrocities" of the Germans in the decades following. Despite attacks on his family, vilification by the world and conflicts with the Church, he never wavered in his Catholic faith or his conviction in National Socialism. Here is the story of those years, complete with extensive letters between Degrelle and his friends and family, interviews, speeches and anecdotes from those who knew him. Softcover, 518 pages, #993, **$30**.

Mass Murder at Katyn

Here is the first-ever complete English translation of the forensic report by the Germans detailing the mass murder of Polish officers and officials by Stalin's secret police in the Katyn Forest, originally published in 1943. Dismissed as "propaganda" and ignored for 50 years, this report was completely accurate, and, if anything, an understatement of the events. The detailed report starts with an overview of the basic facts surrounding the discovery of the mass graves and then produces a series of eyewitness accounts of the captive Poles being transported to the site of the executions. Next, the reader is given a thorough account of the environment and its effect upon buried bodies—establishing the time of death. Then, a series of postmortem studies on the bodies is presented, as well as correspondence between the Red Cross and other concerned parties. The next section details the Allied response, which alleged the murders hadn't occurred and then that the Germans were responsible. Also includes a list of identified victims. Softcover, 290 pages, 8.5" x 11" format, #929, **$28**.

Germany Must Perish!

By Theodore Kaufman. This book—written in 1941 by a New York Jewish-German émigré—caused a storm in Germany and America with its open advocacy of the physical extermination of all Germans. This was to be achieved through a process of mass sterilization and the dismemberment of that nation. Because of Kaufman's claimed links to the policy advisors of the American president, Nazi Propaganda Minister Joseph Goebbels used the book to help encourage Germans to fight to the last. Ironically, significant sections of Kaufman's book, despite being dismissed as the work of a loner, came true. At least 12 million Germans were expelled from their land following the end of the war, and their deportation became the single largest transfer of any population in modern European history. Softcover, 97 pages, #640, **$10**.

Germany Speaks: Nazi Germany Explains Itself to the English Speaking World: The Full Original Text from 1938

In the year immediately preceding the outbreak of WWII, the German foreign office launched a campaign in Britain to explain the inner workings of Nazi Germany. The highpoint of this campaign was this book, a four-part set of 21 essays by leading party officials, each explaining in detail the rationale of their policies. Contributors included Von Ribbentrop, Dietrich, Todt, Ley, Darré, Frick, Von Epp, and 14 others. Sections discuss: state structure, population growth, race, Jews, the judicial system, women's rights, the educational system, the role of propaganda, and the eugenics measures adopted by the state. The second part explains the Reich's economic system, its agrarian, social, labor and welfare policies, sports, culture, entertainment, Germany's foreign policy, world economics, the colonies, trade, the world press, politics, and, finally, a plea for lasting peace. Softcover, 253 pages, #724, **$25**.

Hitler Speaks on the Jews: Selected Speeches and Writings of Adolf Hitler, 1919–1945

Compiled and translated by Frank Diepp. Adolf Hitler has become one of the world's most recognized anti-Semites in history. Barely a day goes by without his name being mentioned in the controlled media, almost 80 years after his death. The controlled media continues to insist on the most ludicrous, far-fetched reasons for Hitlerian anti-Semitism. This book cuts through the lies about National Socialist anti-Semitism by going directly to the source: Adolf Hitler himself. To achieve this task, the compiler combed through hundreds of Hitler's speeches and his major writings, dating from 1919 to April 1945. The end result of this labor is the production, without commentary, in Hitler's own words, explaining why he was an anti-Semite. This is a riveting read from beginning to end, and is vital for anyone seeking a real understanding of the Hitler phenomena. Softcover, 145 pages, #969, **$15**.

Crimes Discreetly Veiled: Seven Lies of the WWII Era Exposed

By F.J.P. Veale. With a Foreword by The Rt. Honorable Lord Hankey. This brand-new edition of the classic work deals comprehensively with seven of the most enduring and appalling lies created by the Allies during and after World War II. The first lie is that of the image of "Uncle Joe" Stalin—who was transformed from an "evil Communist dictator" into "a fighter for freedom." The second lie deals with the massacre at Katyn—where the Communist secret police murdered over 21,000 Poles. The third lie deals with Benito Mussolini's "execution." This was no execution, but a blatant

murder carried out to hide a massive gold theft. The fourth lie deals with Dr. Marcel Petiot and his wartime murder spree in France. The fifth lie deals with the "Marzabotto Massacre." The sixth lie deals with persecution of Gen. Ramcke. The seventh lie deals with the case of Adm. Raeder and his shameful conviction. Softcover, 304 pages, #965, **$27.50**.

Sorry Mom, I Was Wrong About the Holocaust: The Trials & Tribulations of the Schaefer Siblings

By Monika Schaefer. The author's mother and father—both Germans—were proud of their heritage, though they were told they should not be. In America, the children were taught Germans were brutes, warmongers and responsible for "the Holocaust." She said to her mother, "Why didn't you stop Hitler and stop these death camps? You should have done something! You must have known!" By the time she understood she had been "brainwashed," her parents had passed away, so she wrote a cathartic posthumous letter and made a short video as her research had proven she had been lied to about World War II, Hitler and the events known as "the Holocaust," which did not match what we were taught in school. That video went viral and triggered a surreal odyssey that ended up with her and her brother Alfred spending time in German prisons. This book recounts that saga. Softcover, 304 pages, #955, **$25**.

The Nameless War

By Archibald Maule Ramsay. A dramatic historical work that exposes the behind-the-scenes Jewish lobby in Britain that forced that nation into war against Nazi Germany, written by a well-known member of Parliament. The author—imprisoned without trial by the Churchill government for opposing the war—starts with an overview of the Jewish lobby's involvement in revolutionary activity in Europe, and then discusses the Jewish declaration of war against Germany in 1933. Ramsay reveals many secret details about how the build-up to the war was engineered, the use of mass civilian bombings to spread terror, and of the machinations to bring the U.S. into the war. Ramsay then discusses his own detention. There has long been an unofficial ban on books dealing with "The Nameless War," a conflict that has been waged from the shadows for centuries, and is still being waged. Softcover, 125 pages, #972, **$15**.

Mein Kampf: The Stalag Edition

By Adolf Hitler. This is the only complete, unabridged and officially authorized English translation of *Mein Kampf* ever issued by the Nazi Party. It is not to be confused with any other version which are generally poorly translated. This edition was translated by a now-unknown English-speaking Nazi Party member and it was printed by the NSDAP in limited numbers from 1937 to 1944. Most copies were distributed to the camp libraries of English-speaking POW camps and became known as the "Stalag" edition because of the camp library rubber stamp on the title page. Only a handful of copies survived the war. Softcover, 584 pages, 6 x 9, #675, **$40**.

The French Gestapo Trials

By Vincent Reynouard. Is everything we have been told about the Gestapo—the German secret police—all lies? Is the reputation of the Gestapo as torturers and thugs false? Reynouard compared the accusations made against the Gestapo at the Nuremberg trials by the Allies with the postwar French trials of the same cases, victims and eyewitnesses. He found that the evidence presented at Nuremberg was different—faked. Softcover, 236 pages, #734, **$25**.

The Brainwashing of the German Nation

By Udo Walendy. The author was imprisoned because he refused to parrot the official lies of the German and Allied governments about who was responsible for the war and who was committing actual war crimes. Walendy describes the hidden truth of the "legal" origin of today's German laws, forced on a defeated people, now stripped of their identity, their pride and their true past by falsified history. Softcover, #110, 64 pages, **$9**.

The Bad War: The Truth Never Taught About World War Two

Banned by Amazon! After years of five-star ratings, Amazon finally caved and banned Mike King's *The Bad War*. Why? Here is the book to break the truth blockade! Americans today have an almost identical recollection of WWII as the "good war," fought by their forebears against the "Krauts" and "Japs." But how much do we know about that crucial event and the decades of complex European history preceding it? For whom were the 20th century's global wars actually waged? A photo-journalistic chronology—300 of the most important events of the war reinterpreted in brief synopses. 400 illustrations. Softcover, 308 pages, #772, **$35**.

Hitler's Table Talk

This large book consists of notes of the German leader's lunch and dinnertime conversations with close friends and colleagues. Copied down by adjutants and edited by Martin Bormann, these discussions reveal Hitler's wartime thoughts on enemies, friends, art, science, history, religion, nature and a vast number of other topics which reveal his astonishingly wide general knowledge. Softcover, 8.5 x 11, 298 pages, #624, **$35**.

Francois de La Rocque

Analyzing the political career of a French populist, painted by his critics exclusively in "black and brown"

By Remi Tremblay

In the July/August 2023 edition of The Barnes Review, this author delved into the riots that rocked Paris on February 6, 1934. Yet, amidst the chaos, the figure of Lt. Col. Francois de La Rocque remained somewhat overlooked, relegated to a secondary role in the unfolding drama of 1934. Despite leading the Croix de Feu (Cross of Fire), arguably France's most significant right-wing movement in the history of France, which attracted notable figures such as the renowned pilot Jean Mermoz and future president Francois Mitterrand, La Rocque's significance has often been sidelined by historians.

While some, like Polish-born Israeli historian Zeev Sternhell, hastily branded him a Fascist, the reality is far more nuanced. Many, including historians like Jean-Noël Jeanneney and Gilles Perrault, argue that such accusations were merely propaganda from the Reds. Despite his immense popularity at the time, few historians have ventured to fully explore La Rocque's complex legacy.

Here we offer a long overdue look at this enigmatic figure who might have become president of France had it not been for the outbreak of war.

A FRENCH HERO

Francois de La Rocque hailed from an aristocratic lineage. His father, Raymond de La Rocque, was a count and also a brigadier general in the French army. Gifted with intellect and diligence, his son, Francois emerged as a standout student, earning many praises during his education. Francois graduated from Saint-Cyr, France's version of West Point, in 1907, ranking 130th out of 277 students. His professors lauded his intelligence and foresaw a bright military future.

RAYMOND DE LA ROCQUE
Father of famed nationalist.

Opting for further specialized training, La Rocque attended cavalry school before his deployment to Algeria in 1908. There, he spent two years honing his skills and training his men. In 1913, he was reassigned to Morocco during a campaign to quell the Rif uprising.[1] There, he led counter-insurgency efforts until a fateful attack by Berbers on August 2, 1916 left him with a permanent physical disability. Despite his injury, however, La Rocque remained undeterred, securing a transfer back to France during the tumult of World War I.[2]

La Rocque's numerous WWI military endeavors garnered him a plethora of honors, including the Legion of Honor, the War Cross and five other distinguished decorations.

Postwar, he continued his military path, now serving alongside high-ranking officials, accompanying them on their missions. His journey took him to Poland in support of a French mission before returning to counter-insurgency duties in Morocco in 1925.

However, the lingering effects of his wartime injury eventually caught up with him, relegating him to desk work. Faced with this shift, he made the decision to resign from the army and transition to civilian life.

Finding employment with an electricity company, La Rocque enjoyed a more substantial income than his modest military salary. Yet, he felt a sense of duty to continue serving his country. He joined various movements and clubs, including the Cercle Servir and the Ligue de Défense Aérienne (Air Defense League). He also aligned himself with the Cross of Fire. He believed fervently in France's obligation

to its veterans, echoing sentiments akin to those of British Prime Minister Lloyd George, who vowed to create a nation worthy of its heroes.

Driven by a vision of a united and prepared France, La Rocque centered his political endeavors around these twin objectives, advocating for national unity and readiness in the face of potential conflict.

THE RISE OF A MOVEMENT

Cross of Fire was originally established in 1927 as a veterans' organization. Its founder, Maurice d'Hartoy, envisioned it as a group for the elite. Thus, only those who had received medals or decorations for risking their lives in battle were accepted. In its early years, it welcomed a few thousand members, becoming one of many such organizations. In 1929, La Rocque was asked to succeed d'Hartoy. Initially reluctant, he agreed to observe the group for a bit and then give them his decision.

By 1930, about 9,000 veterans were part of the association, but its leadership was divided with significant differences on objectives. Most veteran organizations were apolitical, focused simply on uniting and defending veterans' interests. Some, like the Communist Association Republicaine des Combattants (Republican Fighters Association) and the Association Marius Plateau (The Marius Plateau Association), linked to the nationalist Action Française (French Action), were politically inclined. However, the majority avoided political attachments.

At that time, half of all former French soldiers belonged to such organizations, with more than 3 million members enrolled in total.

In early 1930, recognizing the potential of the group, La Rocque finally accepted the leadership. His primary goal was to recruit more members, strengthen the organization and promote national reconciliation among Frenchmen.

During his military service, La Rocque had been a reader of *L'Action Française*, the royalist newspaper headed by Charles Maurras, but he did not share its anti-Semitic views. As Maurice Genay stated,[3] "In the Cross of Fire, and among the Briscards, Catholics, Protestants, Jews and freethinkers are just first names. French is our surname."

La Rocque envisioned a grand reunion of all French citizens, rising above former animosities. The only ones excluded from this reconciliation were the hardline Communist leaders —not the rank-and-file members that La Rocque insisted had been misled.

Cross of Fire's first foray into the political realm occurred in December 1932 when the issue of war debt was raised in the French parliament. For most of the French leagues, paying the United States was out of the question. While Cross of Fire did not participate in the riots that occurred in mid-December, they demonstrated in force to show their opposition to the draining of France's coffers.

In 1933, the Volontaires Nationaux (National Volunteers) and Regroupement National (National Grouping) were created,[4] expanding the organization's appeal to a broader audience to promote "national regeneration."

Their program was somewhat vague, calling for the restoration of national defense, reduction of taxes, fight against taxation and protection of savings and the family. The only radical point was the "elimination of subversion." This shows La Rocque, contrary to some perceptions, was not a Fascist. As Mitterrand later noted, "La Rocque's statements contradicted the reputation that had been ascribed to him. He was neither Fascist nor anti-Semitic."[5]

La Rocque himself declared:

> We abhor anti-Semitism, having known too many magnificent Jewish fighters, ardent patriots whom we would never want to exclude from the French community.[6]

The legend associating La Rocque with Fascism originated from Communist propaganda. They also waged a campaign of physical violence against Cross of Fire members. Dozens were injured, and several members were killed in the 1930s by Communists.[7]

To protect its meetings, La Rocque created a security service known as the "dispos." For the Communists, this was equivalent to forming a militia. However, unlike the German SA or the paramilitary squads, known as the squadristi, the dispos were purely defensive and not political warriors in any sense. Their behavior during the February 6, 1934 uprising[8]—where they refrained from participating in the riot—demonstrates this clearly.

Fifteen years after his death, La Rocque was finally recognized for his patriotism. President Charles de Gaulle (above) presented La Rocque's widow with a medal commending his efforts against the German occupation of France.

The only time La Rocque ever threatened to mobilize his men was in 1935, when he feared a Communist takeover of the country.

Unlike other leagues, Cross of Fire never took part in any of the riots that shook France during that era. They denounced corruption but always protested legally, which partly explains why the group was more popular than other leagues at the time. Those more militant groups called La Rocque and his men quiescent.[9]

La Rocque adopted a strategy of "sacred egoism," proclaiming that France and only France mattered. This France-first policy made his popularity soar. Membership numbers reflect this growth. In 1933, Cross of Fire had 29,000 members. By 1934, it had 180,000. In 1935, it grew to 300,000 and, at its peak in 1936, it boasted between 700,000 and 800,000 members.

That year, La Rocque published a manifesto demanding paid vacations and a minimum wage for workers, increased retirement benefits, deportations of non-working foreigners, greater accountability for politicians, representation by population, sanctions for members of parliament absent without justification, a ban on politicians sitting on private company boards, and modernization of the army.

Overall, La Rocque proposed quite modest reforms with the aim of making the republic more efficient and humane. In fact, his program was not at all revolutionary. He didn't seek to alter the institutions but merely to make them work more effectively for the benefit of the people.

The program was straightforward. Members were simply asked to vote for the candidate most likely to defend the nation and its people. In some districts, instead of supporting nationalist candidates, Cross of Fire supported centrist candidates who were more likely to defeat far-left opponents. This was hardly a radical new approach to politics. In fact, you saw this tactic used in the 2024 French elections, where a far-left party beat Marine Le Pen's "France-first" National Rally by employing similar electoral machinations.

Unexpected changes came in 1936, however, when Leon Blum of the Popular Front was elected prime minister. A member of the Jewish Agency for Palestine, Blum was also head of the Socialist Party at the same time.

Soon after his election, Blum received minor injuries at the hands of members of the Royalist Camelots du Roi (National Federation of the King's Camelots) who became enraged when he ordered his taxi-cab driver to cut through a funeral procession for right-wing leader Jacques Bainville. Several mourners took that as a grave insult and attacked Blum's cab.

Shaken and slightly injured by the attack, Blum's first move was to ban right-wing leagues. Blum justified this

by citing the February 6 riots. What he failed to mention was that any political violence was always instigated by leftists.

(The parallel with Robert Rundo and his Rise Above Movement, recently banned in the United States for vigorously opposing left-wing violence at right-wing rallies, is striking. Courageous Judge Cormac Carney reiterated this when he ruled in the Rundo case that rightwingers in America were being "selectively prosecuted" for defending themselves against violent left-wing Antifa and BLM thugs. Carney also decried the fact that leftwingers were never prosecuted, despite the fact they had, on nearly every occasion, been the instigators of political violence and mayhem at peaceful rallies.)

La Rocque, who had threatened to use the power of his office to overthrow an emerging Red government the year before, simply complied with the ban. He denounced the decision verbally, but was careful not to commit any act that might be interpreted as rebellious.

In truth, he had anticipated such a move. Valuing legality, he announced on June 17 the formation of an official party—the Parti Social Français (French Social Party or FSP). Opposed to unrestrained capitalism and totalitarian Communism, his party proposed conservative measures, coupled with reforms for the needy, inspired by his previous manifesto and a new one he titled "Une mystique, un programme" ("A Mystique, a Program").

In this document, the party was presented as a "spiritual undercurrent derived from the last war,"[10] aiming to "perpetuate the spirit of the fire." His three priorities were set: work, family and fatherland—the very motto Marshal Philippe Petain would later adopt for the Vichy government he led from 1940 to 1944.

So, when the dissolution of Cross of Fire and other related movements was announced on June 18, the newly formed party sprang into action, with most members simply transitioning to the FSP. By 1939, about 1.5 million

This photo-montage of a larger-than-life Francois de La Rocque speaking before a huge crowd appeared on the back cover of *La Roque and His Party* by François Veuillot, published in Paris in 1938. La Rocque was painted by his left-wing critics and his political opponents as a "black shirt" or "brown shirt," but, in fact, he was a Christian"France-first" conservative, nationalist and populist.

members held party membership cards.[11] Many insist La Rocque could have won the ensuing 1940 election if it had not been canceled due to the outbreak of war. Judging by his program, his government would have been similar to Francisco Franco's or Pétain's, but without the autocracy, as La Rocque was fully committed to democracy.

However, the onset of war brought his movement to a halt. Although he called for sanctions against Germany, he was fully aware that France was not ready for another war. The army had not been modernized and, thus, lacked the means to clash with Germany yet again. Hence, the quick defeat of France in June 1940 did not come as a surprise.

Still, La Rocque refused to accept the armistice. On June 16, 1940, La Rocque wrote and published a call to resistance in *Le Petit Journal* ("The Little Newspaper") urging the French to prepare for total resistance. It is important to note that this was published two days before Charles de Gaulle's famous call for resistance on the BBC, which made him a legend.

For La Rocque, who had long advocated rearmament and preparedness, collaboration was unthinkable. A few years before the war, he had refuted accusations of foreign subsidies and had sworn never to receive a dime from Berlin or Rome:

> Any man, any party that accepted instructions or, a fortiori, subsidies from beyond our borders would be committing the crime of high treason.[12]

His patriotic actions would prove the futility of the accusations that had been brought against him, i.e., that he and his followers were a danger to the French state.

In August, his party changed its mission again. The FSP became the Progrès Social Français (French Social Progress), and the political struggle was temporarily abandoned in favor of social concerns. La Rocque refused to support Petain's government, which was too close to Germany, and he did not support De Gaulle, either. Despite his hesitation to take more aggressive action against the German occupiers, the charities of French Social Progress were used as a front for Resistance activities.

In March 1943, La Rocque and 152 leaders of the movement were arrested by the Gestapo and sent to Eisenberg, Germany before being transferred to Austria. Freed on May 8, 1945, La Rocque was sent back to jail upon his arrival on French shores at the request of the Communists, who were eager to have one of their former foes under lock and key.

La Rocque died on April 28, 1946, while he was still in prison. It took 15 years before he was awarded a medal for acts of resistance, and de Gaulle officially apologized to La Rocque's widow.

Although he called for sanctions against Germany, he was fully aware that France was not ready for another war.

NOT A BOOGEYMAN

It has often been said that Cross of Fire was the only mass rightist movement in French history, which is factually true but must be clarified. The right is a broad concept and, although the party's symbol was a skull, the hierarchy was inspired by the army, and its members were divided into sections ready to be mobilized. It was far from being a Fascist or National Socialist party.

La Rocque consistently emphasized that he was a republican who believed republican institutions, but he felt a house cleaning was in order. Jean-Louis Tixier-Vignancour rightly asserted, like Pierre Drieu La Rochelle before him,[13] that La Rocque had been a predecessor of de Gaulle. Both were patriotic, inspired at times by the enthusiasm and concerns of the vocal veterans' organizations and other like-minded groups. They both wished to clean up corruption in politics. Both were army men, but they demanded politics be played by democratic rules, though de Gaulle did break this promise in his 1958 comeback.

François de La Rocque was more reactionary than revolutionary. He was closer in ideology to figures like Wolfgang Kapp and Walther von Lüttwitz of the Kapp Putsch of 1920,[14] or even de Gaulle, than he was to Adolf Hitler or Benito Mussolini. ❖

The Real Fascist: Marcel Bucard

Cross of Fire was initially an apolitical movement, but some members pursued their own political agendas. One such member was Marcel Bucard, an early French Fascist (pictured at right).

After his involvement with Georges Valois's proto-Fascist Faisceau Party, Bucard joined Cross of Fire and began writing for its associated newspaper *L'ami du peuple* ("The Friend of the People"). However, he soon found the movement too conservative and felt it was avoiding "the Jewish Question." Feeling that veterans were being held back by their leadership, he left and founded the Combattants d'Action Civique (Civil Action Fighters) in 1929, before establishing Francisme (Francism) on September 29, 1933 with a solemn march honoring the Unknown Soldier at the Champs-Elysées with Roman salutes.

In December 1934, Bucard represented French Fascists at an international Fascist meeting in Montreux, Switzerland, convened by Mussolini and presided over by Gen. Eugenio Coselschi of the Institute for Universality of Rome. Following the meeting, Bucard declared: "We have laid the groundwork for the revolutionary action to be taken for the triumph of universal Fascism."

A month later, Coselschi arrived in Paris, welcomed by Bucard and his supporters. The Fascist International convened at Paris's Blue House, named for the blue-shirt-and-black-tie uniform known as a Franciste.

Other attendees included Georges Mercouris (Greece), Eoin O'Duffy (Ireland), Damsgaard-Schmidt (Denmark), Vidkun Quisling (Norway) and Anton Mussert (Netherlands), highlighting the growing appeal of the expanding Fascist international network.

The Francistes were highly active and distinct from Cross of Fire. They opposed both the bourgeoisie and conservatives, as well as Socialists and Communists. They celebrated figures from both the Communards and Saint Joan of Arc, demonstrating their eclectic historical underpinnings and their rejection of the traditional right-left political dynamic.

Engaging in numerous street clashes with Communists, Bucard himself was jailed for leading a brawl in Alsace in 1935. Blum dissolved and outlawed Francisme on June 18, 1936 as part of his sweeping effort to eradicate all organized right-wing groups.

Bucard attempted to rebound by launching the Parti Unitaire Français d'Action Socialiste Nationale (French Unitary Party of National Socialist Action), but it was too late. A new leader, former Communist Jacques Doriot, was emerging—and moving toward Fascism. ❖

World War I Memorial Opens

September 13, 2024 is the date set for the unveiling of a new memorial honoring the more than 1 million Americans who fought in World War I. Crafted by Sabin Howard, the 58-foot-long arrangement of bronze figures and background reliefs—named *A Soldier's Journey*—will be the largest freestanding bronze sculpture in the Western Hemisphere, according to *The Washington Post*. The impressive collection of bronze figures includes men saying goodbye to wives and loved ones, soldiers in gripping battle scenes and more. *A Soldier's Journey* will serve as the focal point of the new National World War I Memorial on the National Mall.

Ring That Bell

If you watched the Paris Olympics, you noticed that some gold-medal track-and-field athletes were ushered to a large bell and asked to ring it in celebration of their wins. After the Olympics concluded, the bell was shipped to Notre Dame Cathedral. There it will peal again during church services, once the repairs on the iconic cathedral are completed in December of this year. In 2019, Notre Dame was devastated by a fire, and it has taken five years to partially restore it so that its doors could be opened again.

Engineer Martin Sweatman of the University of Edinburgh has published a fascinating paper in *Time and Mind* journal. After studying one particular carved pillar at the ancient megalithic site of Gobekli Tepe, in Turkey, he believes 365 V-shaped markings represent days of the year, and carved squares represent the cycles of the Moon, according to *Smithsonian* magazine. Sweatman's research also leads him to confirm what TBR said back in our May/June 2015 issue: The pillar carvings at Gobekli Tepe commemorate the date when fragments of a massive comet hit the Earth and threw the world back into a 1,200-year-long ice age.

Ocelot Lovers Rejoice

The American ocelot, a 15-to-34-lb. member of the cat family known for it's gorgeous leopard-like coat, once roamed in the thousands across America's south, from Arizona to the Gulf Coast. Today there are an estimated 120 wild individuals in the United States. In August, however, wildlife conservationists were pleased to discover game-trail video of an ocelot sunning itself on a rock (above) in an area of Arizona where no ocelot had been sighted in 50 years, says nature writer Elizabeth Gamillo. The largest ocelot breeding population currently resides in Texas. Ocelots are still found in dwindling numbers in sparsely inhabited parts of Central and South America.

The Jewish Telegraphic Agency (JTA) is fuming. In a recent speech discussing anti-Semitism, "Donald Trump blamed Kamala Harris, focusing too much attention on anti-Israel protesters," JTA says. "Trump did not mention far-right anti-Semitism, which experts say continues to pose a grave threat." In short, JTA wants you to know, evidently, that Jews are under threat in America from everyone across the political spectrum. JTA forgot to mention however, that, as far as we know, not a single Jew in America has been killed maliciously in decades due to his religion. JTA also forgot to mention the 40,000 Palestinians that Israel has killed in one way or another in the Holy Land in just about a year. Jews in America are in about the safest place in the world they could be right now.

Small Man, Big Heart

Alexander Stephens barely weighed 100 lbs, but his frail physique covered a man with an indefatigable will. Stephens once heard that local Georgia Superior Court Judge Francis Hiram Cone had called Stephens—then serving as a U.S. representative for Georgia—a traitor for helping to table the Clayton Compromise in 1848.

Stephens, by accident, ran into the man at a political rally. When Stephens asked the judge if he had called him a traitor, the judge denied it. Stephens countered by saying, "Had it been true, I would have slapped your face."

The judge soon regretted his public denial of the truthful accusation and wrote Stephens a letter demanding he apologize for the public display. Stephens ignored the letter. This only further infuriated the judge.

When the two men again ran into each other, this time at a hotel in Atlanta, the judge repeated his demand for an apology. When Stephens refused, the judge unleashed a tirade of insults. Stephens proceeded to pull out his cane and smack the judge across the chops, just as he had promised.

The judge—who weighed in at more than 300 lbs.—struck at Stephens with a knife. Stephens defended himself with an umbrella he'd snatched from his opponent, but the massive judge threw himself upon Stephens and knocked him to the ground, stabbing him six times, one between the ribs.

"Now, damn you, retract or I'll cut your damn throat," the judge demanded.

"No! Never! Cut!," cried Stephens.

Stephens then caught the knife as it was headed for his throat and managed to get to his feet. He was then rescued by spectators, but his hand had been so badly cut that he was losing blood from a injured artery. It was thought he would not survive, but he recovered and went on to become vice president of the Confederacy, as detailed in Edmund Wilson's 1966 book *Patriotic Gore: Studies in the Literature of the American Civil War*.

Male Chromosome Shrinking

Everyone knows that X and Y genes determine biological sex, despite what some weird activists tell you. Women have a pair of XX chromosomes, and men have XY. The Y chromosome is much smaller than the X chromosome, however, carrying around 55 genes compared to around 900 on the X. Despite its smaller size, the Y chromosome does do a very important job by switching on male development in the womb. According to a new report, scientists believe the Y chromosome has been shrinking for several hundred years now, and no one really knows why. Some scientists now worry it has reduced in size so much it's at risk of disappearing altogether in the next thousand years. What this means for mankind is anyone's guess but, one thing is for sure, without men, women would have to mow the lawn and go to the dump without us.

When Myth Becomes High-Tech Reality

WOVEN INTO OUR ANCESTRAL MYTHS FROM THE DISTANT PAST are nuggets of truth. For instance, most people though Troy was just a figment of Homer's mythic imagination until Heinrich Schliemann discovered its ruins in 1873. Other myths offer us mysterious yet dire warnings, ones that we should be more heedful of today.

By Marc Roland

"Myths" are today generally synonymous with "lies," or, at best "folk tales." That they are something more than just stories or falsehoods was established during the last century by Carl Gustav Jung (1875–1961), the Swiss founder of analytical psychology. His discovery continues to influence the fields of anthropology, archeology, literature, philosophy and religious studies because it demonstrates how myths reflect our collective unconscious.

The collective unconscious is a part of the mind containing memories and impulses common to mankind as a whole, and originating in the inherited structure of the brain. "Myths are public dreams," concluded American Jungian folklorist Joseph Campbell (1904–1987). "Dreams are private myths. We must be willing to get rid of the life we planned, so as to have the life that is waiting for us."[1] The same may apply to the cultural progress of entire peoples.

Some myths are visions of our as-yet-unexpressed—even unimagined—potential as a civilizing species. When they first arise, and often for generations thereafter, they seem far beyond all possibilities of attainment. But, if the transition from visionary longing is finally made, its material achievement, initially deemed miraculous, is soon taken for granted.

Icarus and Daedalus: A cautionary fable warning of imminent catastrophe due to over-reliance on technology—or a prescient myth of things to come? Maybe both.

A case in point is the ancient myth of an Athenian master mechanic who invented manned flight for his escape from captivity on the eastern Mediterranean island of Crete. The earliest known account of Daedalus survives from the 15th century B.C., during the Bronze Age, some 3,400 years before regular airline service between Crete and the Greek mainland became commonplace.

ANCIENT BALLOONISTS

Prescient myths of human flight were not confined to European dreams, however. During the early 1970s, American author James Woodman became fascinated with the so-called Nazca Lines of southwest coastal Peru, the largest art gallery on Earth—literally.

This collection of out-sized designs—some geometric or linear, others portraying a variety of animals or unrecognizable images—was created by removing the dark-grey top-cover of the Nazcan Desert to reveal the faint yellow sand just beneath. Uncertainly bracketed between the parameters of the 3rd century B.C. and 5th century A.D., the colossal geoglyphs are scattered across 170 square miles.

The bizarre images were not discovered until the early 1930s, and then by accident, when a local pilot happened to fly over the figures, which

ANCIENT BALLOON DESIGN IN ACTION

Above, James Woodman and William Spohrer—like a 21st-century Icarus and Daedalus, dangle in a reed gondola suspended from their re-creation of a hot-air balloon they believe could have flown over the plains of Nazca more than 2,000 years ago. Right: Before sunrise, on November 25, 1975, *Condor I* fired up for its successful experiment, proving that a pre-Inca people had the capability of achieving manned flight.

had gone unnoticed until then. All are superbly executed in perfect proportion—some, several miles in length—demonstrating an exceptionally high degree of skill in surveying techniques, as well as the social cooperation necessary for executing them on such a gargantuan scale.

To Woodman, the ancient terraglyphs appeared to have been made specifically for appreciation from an aerial perspective. Mainstream scholars insisted instead that they were sacrificial offerings only, not intended to be seen by their creators, but meant for viewing exclusively by imaginary deities who dwelt in the sky.

Despite this prevailing scientific opinion, Woodman wondered if prehistoric South Americans had somehow achieved manned flight, the only means by which they could view the forms during construction and then, afterward, truly appreciate the finished creations of their enormous art tableau spread across the Nazca Desert.

Fierce Nazcan winds were a serious concern. At left, *Condor I* is torn from its mooring posts while being inflated. Eventually, the crew was able to launch the two-man craft, which rose above the floor of the Nazcan Desert to grace the aviators with a clear view of the terraglyphs below.

It did not make sense to him that they should have gone to the trouble of creating such a huge collection, only to deny themselves any opportunity of ever seeing it, no matter how deep their devotion to heaven. The very notion seemed contrary to fundamental human nature, regardless of cultural and temporal differences separating our times from the Nazca.

During his research into this desert enigma, Woodman was surprised to learn that several otherwise backward tribes in Brazil and Peru were skilled in the manufacture of five-foot-tall envelopes of paper that could fly. Filled with smoke rising from small clay pots of smoldering cane suspended underneath a single opening, the contraptions actually rose high into the air of their own accord.

To the Indians, the little hot-air balloons belong to a legacy from their most ancient ancestors, and were flown originally for religious purposes alone, bringing small offerings to the sky gods. At least two Indian tribes—one in residence today near the Honduran border, and another in the Peruvian highlands—still make these ceremonial aerostats, or free-floating hot-air balloons.

The Incas, Woodman further discovered, honored a legendary figure they referred to as Orichan, who could fly to heaven and back in a vessel of golden flames—imagery implying a gondola equipped with its firepot suspended beneath a hot-air balloon.

Even more suggestive was the ancient Andean hero Antarqui, the boy god who reconnoitered for Incan armies by flying high over battlefields, then returning to the emperor with intelligence about enemy dispositions. The myth of Antarqui lends credence to the possibility that Andean lads—because of their light weight—were used to fly military observation balloons. Boys actually did serve as military observers while strapped to large, leather-made kites for Greek armies in the field some 200 years prior to the official advent of Nazca civilization, 12 centuries before the Incas, whose own culture inherited much from previous Andean societies.

Nazca's so-called Owl Man points suggestively to the ground and the sky, implying that he may be properly seen only by ascending from the former into the latter.

The first such aerial reconnaissance had been invented by Archytas of Tarentum, a philosopher, mathematician, astronomer and statesman, around 400 B.C. It is possible, then, that similar, contemporaneous advances in human flight were undertaken by pre-Columbian South Americans.

Better known than Antarqui was Kon-Tiki-Viracocha, the red-bearded, light-complected, fair-eyed founding father of the Inca who fled as a flood-survivor from some natural catastrophe. "Sea Foam"—a reference to his white skin and oceanic origins —allegedly shared the high wisdom of his lost homeland with native peoples to create Andean civilization. Among the cultural gifts he bequeathed them was the aerostat. A standard image in Nazca art may be a direct reference to and, in fact, a symbol of this gift.

The likeness of a sea-eagle, or frigate bird, appears as the single most reproduced animal throughout Peru's Pacific coastal pottery shards. The bird is remarkable for inflating its gullet to a grotesque size in mid-air, resembling a balloon.

Unique among the Nazca Lines is a half-human image known as the "Owl Man." Regarded as one of the oldest bioglyphs, it portrays a 98-foot-long, standing anthropomorphic figure with the head of an owl incised into the sloping face of a cliff.

Like its companions, the ground drawing may be properly appreciated only from several hundred feet above the desert floor. It gestures with his right hand lifted toward heaven, while its left points to the Earth. It is as though the figure were indicating something integrally important concerning all the Nazca Lines: "If you want to see us properly, you have got to go into the sky."

Woodman was especially surprised to find that Quechua, the language spoken by the Incas, actually contains a pre-modern word for "balloon-maker." Moreover, some surviving examples of pottery recovered from the vicinity of the Nazca geoglyphs portray objects resembling balloons flying across the sky, trailing ropes or streamers. Nazca tapestries housed at Lima's National Museum of Anthropology and Archaeology unquestionably depict humans in flight, either through consuming hallucinogenic plants or via hot-air balloons.

At the Nazca Lines themselves, broad patches of scorched earth may still be observed at the intersections of drawings or atop nearby low rises. They are the results of intensely hot fires that burned when Nazca civilization flourished in the area. Woodman speculated these fires were originally ignited by pre-Columbian aviators to inflate their balloons with hot air.

Putting his suppositions to the test, Woodman and his colleagues—fellow professional aeronauts from the United States—built a hot-air balloon designed to resemble the deltoid miniatures still flown by Honduran and Andean natives. The American scientists restricted their experiment to materials known to have been used by pre-Inca peoples. Nothing belonging to modern times was included in the undertaking. As a feature article in *Time* magazine reported later:

> [Woodman's 88-foot high replica] was made from fabric that closely resembles materials recovered from Nazca gravesites. The balloon's lines and fastenings were made from native fibers, the boat-shaped gondola was woven from totora reeds picked by Indians from Peru's 2.4-mile-high Lake Titicaca.[2]

Even the ground fires for providing hot air were stoked only with desert kindling close at hand. Nazca pottery images appeared to illustrate prehistoric balloon makers stitching together large four-sided, triangular "envelopes," the same configuration chosen for the modern recreation.

At dawn, November 25, 1975, after being inflated with 80,000 cubic feet of smoke, *Condor I* was released, ascending quickly at 18 feet per second, bearing Woodman and William Spohrer aloft to 500 feet above the Nazca Plain in 30 seconds. From that altitude, the awe-inspiring drawings of a vanished, prehistoric race came into perfect perspective and proportion.

As Woodman later wrote:

> The Sun had just cleared the mountains and now flooded the fantastic scene below. … Surely, I thought, the men who created these lines had to have seen them like this, with the shadows of dawn etching their magnificent art. For those two minutes, we were alone with Nazca. We had flown back in time, as much as we had climbed into the sky.[3]

After the 20th-century balloonists landed safely in the Peruvian desert, Spohrer remarked, "Up there, just now, I had the feeling we weren't the first ever to have flown with the wind above Nazca."[4] His colleague in the International Explorers Society, Michael DeBakey, stated that the experiment capably demonstrated that ancient Peruvians could have manufactured and flown a hot-air balloon. "We set out to prove that the Nazcans had the skill, the materials and the need for flight," he said. "I think we have succeeded."[5]

Indeed, *Condor I*'s completed mission persuasively argues on behalf of Peruvian flight in antiquity. The evidence includes: the model orthostats flown by native South Americans for unknown centuries prior to the Spanish conquest; Andean traditions and depictions of human flight; the remains of ancient bonfires at the geoglyphs themselves; the fact the lines and images may only be properly appreciated from several hundred feet above them; and the successful test flight of a balloon crafted from ancient designs and using local materials.

Thus, Antarqui's myth appears real enough, and we may believe that boys were indeed used additionally for airborne military reconnaissance by the Nazcans, just as history records they were deployed by the Greeks.

ANCIENT IMAGININGS OF AI

Athenian "public dreams" envisioned more than human flight. They included a growing feature of our own times: the militarization of artificial intelligence (AI). Talos, a weaponized robotic guard of myth, appears in the *Argonautica*, an epic poem describing Jason's quest for the Golden Fleece. When Jason and his shipmates approached Crete (where, appropriately enough, Daedalus resided), they were bombarded by boulders hurled

Ancient High Tech

The Astonishing Scientific Achievements of Early Civilizations

The first self-igniting match was invented in 1805 by Jean Chancel, a French chemist. Yet, in Babylon, 3,600 years before, identical sulfur matches were in common use. On an ancient Temple in India, there is a detailed carving of a man on a bicycle, yet the modern bicycle wasn't "invented" until 1817. These inventions are only two examples of technology lost in the Dark Ages. Exploring the sophisticated tech achieved by ancient civilizations, Frank Joseph examines evidence of robotics and other forms of artificial intelligence; manned flight, such as hot-air balloons and gliders; and military science, including flamethrowers, bio warfare, poison gas and solar-powered cannon. He reveals how ancient engineers excavated subterranean cities, turned stone walls into glass, lifted 100-ton blocks of granite, illuminated underground temples and stored their food in massive air-cooled refrigerators.

Examples explored in the book include Plato's alarm clock; 600-year-old Aztec whistles that reproduce animal sounds with uncanny accuracy; Stone Age jewelry from Siberia worked by a hand-powered drill; robotics in ancient Troy, Greece, and China; and more. The author also explores evidence of advanced medicine in ancient times, particularly in Egypt and China, from skull surgery, optometry, and prosthetics to dentistry, magnet therapy, and cancer cures.

Talos as he appeared in the 1963 film *Jason and the Argonauts*. According to Greek oral tradition, Talos was a bronze or brass robotic humanoid standing 100 feet tall and designed to protect Crete against invaders. Talos can been seen in the context of human myth as a warning to future generations about the dangers of imbuing a mortal creation with human sentience and what threats that might present. Talos may also be a cultural memory of the sophisticated mechanized creations made by Bronze Age craftsmen utilizing the technological expertise and advanced concepts demonstrated in the Antikythera device, for instance. The ancients had many surprisingly hi-tech innovations—including functioning robotics—that were millennia ahead of their time. See more about this in TBR's "Ancient Mysteries" edition, September/October 2022.

at them from a bronze warrior programmed to protect the Aegean island from all outsiders by patrolling its shores three times daily.

The Argonauts nonetheless made landfall and overcame their giant opponent, when Jason pulled a bronze nail out of the defending automaton's heel. From it gushed a fluid known as *ichor*, draining this vital "blood of the gods" from Talos, until he collapsed into a heap of broken metal.

"In modern terms," observes *Popular Electronics* reporter William Tenn, "that single vein could have been his main power cable, and the pin, his fuse." He describes Talos as "a weapons-alert system and guided missile in one package." The blood-like *ichor* that ran through Talos calls to mind today's most famous robot, the life-like Sophia (see item on page 35), which is "filled with a liquid metal to form a resistive sensor," according to her manufacturer.[6]

According to *How Stuff Works* writer, Robert Lamb:

> Talos is far more than a mere curio amid other tales of gods and heroes.
>
> While myths can reveal much about history and culture, this episode also concerns the nature of technology. In its towering stature, we see the elite nature of bronze craftsmanship at the time, as well as the military prowess of bronze weaponry. It was an age of peak bronze technology.
>
> Talos is something special, even to modern humans. He's the embodiment of technological achievement and divine power intertwined in a single mythic being. …
>
> Talos is remarkably futuristic, anticipating the scientific possibilities of the present age and, even then, belonging more with the bizarre imaginings of the new mythology of science fiction than with the mechanisms created and used in real life.
>
> This killer robot stares back at us from the mists of ancient human civilization, reflecting the attitudes of its time, but also challenging us to consider the ramifications of artistic and technological creation. What are the limits of the modern Talos's might? Despite the never-ending onslaught of sci-fi killer robots, these questions remain as enthralling as ever.

Such timelessness applies as much to their modern significance, as to their origins. Although classical scholars have dated composition of the *Argonautica* from 283 to 221 B.C., the basic story was "already well known to Hellenistic audiences, which enabled Apollonius [Apollonius Rhodius] to go beyond a simple narrative, giving it a scholarly emphasis suitable to the times. It was the age of the great Library of Alexandria," when Heron of Alexandria was himself at work on his robotic creations.

"On one hand," writes Lamb, "Talos stands as a potential metaphor for the might of bronze technology during the Greek Bronze Age, stretching from 3200 to 1200 B.C."[7]

In fact, some versions of Talos

portray him as the last survivor of an ancient race of bronze "men," i.e., the last survivors of the Late Bronze Age.

In Linear B, the ancient Cretan language, the word Talos was synonymous for the Sun, and Minoans worshipped Zeus as *Zeus Tallaios*. *Tallaia* is the Linear B name (perhaps derived from the older, still untranslatable, more originally Minoan Linear A) for a spur of the Ida mountain range where the Zeus cult was centered inside his cathedral-like cave, the *Ideon Antron*, or "Navel of the World," high up Mount Ida, at more than 8,000 feet, Crete's highest peak.

Detailed representations of Talos preceded the *Argonautica* by at least 150 years on Greek vase paintings and Etruscan mirrors. His depiction on a Cretan coin from Phaistos is particularly significant. It was from the ruins of this large city that a baked clay disk, impressed with the earliest known example of movable type, was retrieved. Dated to the Middle Minoan Bronze Age, it is 2,000 years ahead of the same process reinvented by Johannes Gutenberg around 1450.

The centerpiece of Crete's Pre-Classical urban center at Knossos features the earliest known example of an operable flush toilet. So too, the Antikythera mechanism is an ancient astronomical computer unlike anything comparably devised for centuries to come, discovered underwater 19 nautical miles northwest of Crete.

Considering Talos's associations with that Aegean island, he may also be regarded within the context of similarly advanced examples of ancient technology discovered there. Indeed, all these cultural fragments establish the conception of Talos long before the *Argonautica* was composed and well into the Bronze Age, which he appears to have personified. He may symbolize a kind of innovative, technologically advanced weapon built for military purposes.

A CAUTIONARY TECHNO-TALE?

A cautionary story rewritten by Hans Christian Andersen, after an 1843 fairytale, inspired Igor Stravinsky 74 years later to compose his symphonic poem *Le chant du rossignol*, "The Song of the Nightingale." It tells of a Chinese emperor who, from childhood, dearly loved his pet nightingale, which returned his deep affection.

> Talos stands as a potential metaphor for the might of bronze technology during the Greek Bronze Age.

One day, a visiting sorcerer presented a remarkable gift to His Majesty: a mechanical nightingale that sang, flapped its wings, strutted and danced, even took food in its beak from the emperor's own hand. He was so taken with this miraculous invention that he forgot about, and thus ignored, the real bird that had been his closest companion for so many years.

Eventually, the monarch realized with a shock that his living nightingale had disappeared. Days, weeks, months passed, but it failed to return through the palace window always left open, the sill set with plates of food and water. The emperor sickened with regret for his vanished friend, and could no longer bear to look at its robotic replacement, which he gave away.

As summer merged into fall, and he realized that his feathered friend would never return, the monarch fell ill with regret, taking to his bed, from which he constantly watched the open window.

Norse application of quartz crystal's light-bifurcating qualities enabled transatlantic voyages to North America five centuries before Christopher Columbus set sail for the New World. Before actual examples of sunstones were found, most scholars considered them mere myth. Above: A promotional photo from the History Channel's "factional" drama *Vikings* (2013–2020) depicts Norse folk hero Ragnar Lodbrok employing a sunstone.

At length, he began to die of grief, closing his eyes for a final sleep, when, incredibly, he heard his nightingale singing from the windowsill. A moment later, the bird landed upon his breast, still singing. The emperor quickly recovered and, together with the nightingale, lived a long, happy life.

In this ancient tale is the potential for dehumanization posed by our distraction with and growing reliance on not only AI, but technology itself.

The most famous dramatization of this inner conflict was Walt Disney's *Sorcerer's Apprentice*, an episode in the 1940 film *Fantasia*. His cinematic treatment was an animated version of the symphonic poem *L'apprenti sorcier*, composed in 1897 by Paul Dukas, after *Der Zauberlehrling*, Wolfgang von Goethe's poem written 100 years before and based on Lucian.

Whether the mid-2nd century satirist actually invented the tale or perpetuated an earlier version of it in *Philopseudes* ("Lover of Lies") is suspected but unconfirmed. More certainly, its perennial appeal from at least as early as Rome's imperial period to Europe's Age of Enlightenment, down to the present day, underscores the archetypal story's recurrent theme expressed in technology's innate propensity to overt control.

In the story, an inexperienced sorcerer's apprentice uses his unperfected magic to infuse inanimate objects with intelligence so they can carry out the hard, physical labor the apprentice previously performed. They become uncontrollable and create a potentially devastating flood. Luckily, the master sorcerer is able to stem the rising tide.

The implication is clear: Technology is a useful servant but a dangerous master. Man's alternating fascination for and ambivalence toward applied science has preoccupied him since the advent of his first technical achievement. This has set him apart from all other animals on Earth, and given him dominion over them all.

This immemorial conflict of conscience continues to resound in perhaps his oldest surviving oral tradition, going back nearly half a million years ago, to the earliest controlled use of fire by *Homo erectus*.

In the Greek myth, Prometheus stole fire from heaven and gave it to humans suffering in cold and darkness. For this sympathetic act, he was severely punished, as Zeus had ordained that only gods were wise enough to use fire which, in the hands of flawed, selfish men, would cause death and destruction—not only among themselves but of the natural world itself.

In all art, nowhere is this fierce dichotomy more powerfully dramatized than in another symphonic poem, 1850's *Prometheus* by Hungarian composer Franz Liszt. Since the allegorical tale's first telling, we still debate whether the compassionate Prometheus or the prophetic Zeus was correct.

> The means by which the Vikings achieved their extraordinarily difficult voyages is still debated.

No less controversial are claims for transoceanic seamanship in the centuries prior to the first official circumnavigation of the globe in 1522.

VIKING SUNSTONES

That Vikings sailed round-trip expeditions from Scandinavia to North America five or more centuries earlier that Columbus is accepted fact. But the means by which they achieved their extraordinarily difficult voyages is still debated. How medieval mariners steered a true course over thousands of miles of open water, beyond sight of land, at least 300 years prior to the introduction in Europe of the magnetic compass, remains controversial among mainstream scholars.

Even such an otherwise invaluable navigation instrument becomes useless when traveling within the general vicinity of the magnetic pole. Yet, there is no excuse for academic bewilderment as the answer was plainly spelled out by the Northmen themselves, as long ago as A.D. 1275.

Hrafnkel's Saga recounts a perilous voyage in which:

> [T]he weather was thick and stormy. … The king looked about and saw no blue sky. … Then the king took the sunstone and held it up, and then he saw where the Sun beamed from the stone.

Additional period source materials describe "sunstones" as effective navigational aids in common use throughout the Viking Age. Norse navigational genius was inadvertently duplicated after nearly a thousand years, during the late 1940s, when research technicians at the U.S. National Bureau of Standards (NBS) developed a "sky compass" based on the same principle of polarization so successfully employed by Viking mariners.

The device was a "twilight compass" invented by Dr. A.H. Pfund of Johns Hopkins University. A 1949 NBS paper tells us:

> The principal advantage of the sky compass is during twilight and when the Sun is several degrees below the horizon, as well as when the region of the sky containing the Sun is overcast, so long as there is a clear patch of sky overhead. The sky compass is thus of particular value when the sextant is not usable.
>
> Since the extent of polarization of the sky's light is greatest at right angles to the incident beam of sunlight, the compass is most accurate in the polar regions, where it is also most useful, because of the long duration of twilight.[8]

U.S. Navy and Air Force researchers conducted experiments with the sky compass throughout the early 1950s. Thereafter, it was used by pilots of the Scandinavian Air Service (SAS) for several years on polar flights, following in the technological travels of their Viking forefathers.

Even so, modern skeptics dismissed all medieval references to Norse "sunstones" as entirely legendary until

Danish archaeologist Thorkild Ramskov postulated in 1967 that such objects were not flights of skaldic fancy.

They were actually cordierite, "a kind of natural crystal with birefringent and dichroic properties which change color and brightness when rotated in front of polarized light," according to *Ancient American* magazine writer Earl Koenig. He says:

> [This allowed] for precise location of the Sun's position on an overcast day. Birefringence, or double refraction, is the splitting of a light wave into two different components: an ordinary and an extraordinary ray otherwise invisible to the naked eye. The color of cordierite will change from blue to light yellow when pointed in the Sun's direction. To back up his conclusion, Ramskov pointed out that cordierite pebbles are found in large numbers along the coast of Norway.

Optical calcite, or Iceland Spar, performs similarly well, playing an important role in the scientific discovery and study of polarization. Iceland was found and occupied by the Norse. Even today, many high-performance polarizers use Iceland Spar. Such stones could have performed even when the Sun was several degrees below the horizon, when the atmosphere was still illuminated. Light fog and an overcast of thin clouds cannot eliminate light polarization, as revealed by optical calcite or cordierite crystal. Only under a thickly overcast sky would sunstones fail to operate.

Koenig says:

> At first, Ramskov's theory was well received and widely accepted by public and academics alike. Even ordinarily conservative science magazines published articles applauding his plausible research.

In time, however, conventional scholars caricatured all discussion of Viking sunstones as "comic book archaeology," an allusion to which the editors of *Scientific American* and *National Geographic*, wherein the Norse sunstones had been favorably described, did not take kindly.

Sophia is among the most advanced specimens of artificial intelligence in the world today. In October 2017, Sophia was granted Saudi Arabian citizenship, becoming the first robot to receive "legal personhood" in any country—something hitherto relegated to realms of science fiction, just as ancient myth envisioned otherwise unimaginable examples of sophisticated technology.

But, in early 2007, Hungarian researchers testing cordierite used during the Viking Age (A.D. 800 to 1200) found the crystals do in fact reveal the Sun's position with a remarkable degree of accuracy, even in bad weather. According to Koenig:

> For more than a month, Dr. Gabor Horvath led a team of investigators from Budapest's Eotvos University recording polarization in the Arctic. They proved that the crystals located the Sun's position in foggy or cloudy conditions.

In the words of British author, Robert Temple:

> Any number of armchair scholars can quibble, but there is no substitute for physical demonstration. … This [the sunstone] was the secret technology that enabled the Vikings to reach America.[9]

Temple is the foremost authority concerning optics in Classical and Pre-Classical times. "I have been working on this problem for more than 30 years," he states, a claim attested by his detailed tome on the subject, *The Crystal Sun: Rediscovering a Lost Technology of the Ancient World*.[10]

His uniquely thorough investigation relates that more than 100 magnifying lenses crafted during the Middle Ages have been discovered across Scandinavia.

Their profusion demonstrates that the Norse sunstones were not cultural exceptions among an otherwise barbaric society, but part of broader skills in optics denoting a highly creative, inventive people—masters of metallurgy and great poets—likewise capable of designing some of the most seaworthy vessels ever built. In short, the crystal of Norse myth became the sunstone that guided Viking explorers to a new world.

Sadly, we are a people no longer fascinated by such grand visions. Our dreams of the future have become nightmares of worse to come. ❖

Classic Essays on the Jewish Question: 1850 to 1945

Edited and compiled by Thomas Dalton, Ph.D. Uncensored essays from Richard Wagner, Fyodor Dostoyevsky and Theodor Fritsch to virtual unknowns like Frederick Millingen and Wilhelm Marr discuss the most taboo subject of all. Their words are compelling and "racist." Now, for the first time, 16 classic essays on this issue are compiled into a single volume. These essays are difficult to find for obvious reasons. These kinds of essays are not only frowned upon in America, several states are pushing for a ban if not future criminalization for those distributing them. In Europe, as we all know, dozens of nations have passed laws making open discussion of this issue a criminal offense. When found, these essays are almost always incomplete. When found complete, they are poorly translated and edited. The aim of the present book is to alleviate this shortcoming and to offer full information so readers can decide for themselves if the authors contained herein are blazing "anti-Semites" or actually have a reasonable cause for concern. Softcover, 370 pages, #931, **$23**.

Jewish Freemasonry

By Édouard Drumont & Nicolae Paulescu. Introduction by Dr. Alexander Jacob. The two principal anti-Masonic texts presented in this edition shed some light on the Jewish origins and ambitions of the Freemasons. The first text is from French journalist Édouard Drumont's famous work *La France Juive: Essai d'histoire contemporain* (1886), while the second is from the Romanian political scientist Nicolae Paulescu's *The Hospital, the Koran, the Talmud, the Kahal and Freemasonry* (1913). Both authors discuss the contrast between the "character" of the Masonic ethos and the social doctrines of the Catholic Church. The authors allege a prime goal of Masonry has always been to replace Christianity as a political force in the West. Softcover, 136 pages, #928, **$15**.

Jewish Domination of Weimar Germany

By Eckhart Verlag and Francis Dupont. This was the National Socialist government's first English-language attempt to explain the rationale behind its legislative moves to restrict Jewish influence in Germany after 1933. Using official pre-Nazi-era demographics, this work showed that Jews were massively over-represented in all fields of German social and economic life—except farming and creative work. It lists the ownership of media in Weimar Germany, the financial scandals, Communist and other political subversion, degenerate theater, sexual perversion, school indoctrination and media bias. Softcover, 96 pages, #670, **$14**.

Jewish Austria

By François Trocase. This is the abridged 1942 edition, completely reset with new illustrations, by Léon de Poncins of François Trocase's 1899 study of the end of the Austro-Hungarian Empire. It provides a crucial insight into the role played by one group in the collapse of this venerable Catholic empire at the heart of Europe. More focused than Édouard Drumont's historic survey *La France Juive* (1886), Trocase's work presents a detailed analysis of the economic and social conditions of the Austrian Empire in its last days. His investigation of the *modus operandi* of Jewish powerbrokers has an urgent relevance to the economic and political conditions of Western states. How did they gain such power? How did they undermine the Church? What control did they exercise on politics, finance and society? What was the relationship between Jews and socialism? Also a section on the "anti-Semitic" movement in Austria. Softcover, 97 pages, #904, **$12.50**.

Jewish Fanaticism

By Hervé Ryssen. Judaism is essentially a universalistic political project with the objective of world unification, the prelude to global pacification. It is a long-term project and the aim is not simply to convert the world to Judaism, but rather to incite the other peoples to abandon their racial, national and religious identities so as to favor the spirit of "tolerance" between men. The Jews thus feel compelled to engage in perpetual agitation intended to convince the world to adopt their project. They are a people of propagandists. It is not by chance that they are so influential in the

mass media of all democratic societies. The incessant guilt-tripping campaigns directed at Europeans of all stripes and for all crimes, whether real or imagined, relating to slavery, colonialism, pillaging the Third World or Auschwitz, have no other aim, when all is said and done, than to eradicate all sense of collective identity. Softcover, 449 pages, #873, **$30**.

The Jewish Mafia: The Great International Predators

Hervé Ryssen details sex slavery, global organ trafficking, organ transplant industry, "Torah Nostra," Murder Inc., Meyer Lansky, "invisible" mafia, pillage of Russia, fall of the Oligarchs, crime from Berlin to Marbella, Organizatsiya, crime in Antwerp, Vilnius, Bangkok and Bogota, Israeli mafia, diamond scams, revolutionary funding, illegal drug trade, porn industry, illegal immigrant trafficking, Atlantic African slave trade, Christian slaves of the Middle Ages, aesthetic surgery racket, Lipsky's swindles, Jacques Crozmarie and the ARC scandal, horse racing and garage rip-offs, the VAT fraud, crime in England, the U.S. and France, the pillaging of vanquished countries and much more. Softcover, 381 pages, 475 endnotes, #731, **$35**..

Israel's Billions: Jewish Swindlers and International Financiers

By Hervé Ryssen. Jews have been expelled from every country they have ever lived in, at all periods of history. Sometimes they have been massacred. The principal impetus was usury, ruining peasants and tradesmen while disproportionately enriching the Jewish communities in all the cities. The receiving of stolen goods is another accusation, as well as their manifest hatred of the Church and the *goyim* in general. All over Europe, they engaged in smuggling, debasing the coinage, washing ducats in acid, using yellow arsenic to give brass the color of gold, to swindle and deceive the Christians in a thousand ways. Very little has changed in this regard, except that these swindles have acquired a scope unprecedented in history since the turn of the 20th century. Softcover, 279 pages, #833, **$25**.

End Times Warfare: The Eschatological Beliefs of the Great Religions

By Hervé Ryssen. Eschatology is the study of "End Times" doctrines. All three of the great monotheistic religions—Judaism, Christianity and Islam—contain a belief that the world was created by God, and that this world must come to an end. This theme of the end times and the coming of the Messiah are also found in Judaism, as well as in Islam, which also draws its inspiration from the Old Testament. Yet, these three religions are completely incompatible. Why? For the pure and simple reason that their vision of the future diverges on this fundamental point: At the end of time, one—and only one—religion is to triumph. In the end, the religion whose goals are the clearest and faith most ardent will win. Softcover, 189 pages, #855, **$25**.

Psychoanalysis of Judaism

By Hervé Ryssen. Jews are possibly the most successful religious and cultural group on the planet. In America, they are the kings of media, Hollywood, the music industry and Wall Street. They have the most powerful and determined lobbies in the world, working not only for their own national interests, but the interests of the state of Israel. Israeli leaders have openly admitted that they "own" the U.S. Congress. So what makes Jews so successful? How have they been able to wield such influence over the non-Jewish nations in which they dwell? How have they convinced so many that their suffering is "the worst"? How have powerful organizations managed to get the world's tech companies to suppress criticism? Softcover, 461 pages, #846, **$30**.

The Jewish Hand in the World Wars

By Prof. Thomas Dalton. Throughout history, Jews have played an exceptionally active role in promoting and inciting war, says the author. With their influence in government, we find recurrent instances of Jews promoting hardline, uncompromising stances and actively inciting people to hatred. The author maintains that Jewish misanthropy, rooted in Old Testament mandates, and combined with a ruthless materialism, has led them, time and again, to instigate warfare if it served their larger interests. This fact explains much about the present-day world. This book examines in detail the Jewish hand in the two world wars. Along the way, Dalton dissects Jewish strategies for maximizing gain amidst warfare, reaching back centuries, i.e., how to thrive iand profit from mayhem. Softcover, 198 pages, #790, **$32.50**.

Inside the 1985 Zündel Trial

In 1985, researcher and publisher Ernst Zündel was charged by Canadian authorities with disseminating "fake news" because he had the audacity to publish a book questioning the official Holocaust myth and pointing out, quite convincingly, the glaring errors in the mainstream Holocaust narrative. His trial gained worldwide coverage, but not the kind his persecutors desired.

By John Wear, J.D.

Jews seldom praise the work of Holocaust Revisionists. However, an exception is sometimes made regarding the 1985 Ernst Zündel trial in Toronto. For example, the failure of Jewish eyewitnesses to provide credible testimony at the 1985 Zündel trial caused Harvard law professor Alan Dershowitz to write that the trial was "a total victory for Holocaust deniers and a total disaster for Holocaust survivors and the Jewish people."[1]

The failure of the prosecutors in the 1985 Zündel trial to find effective witnesses also caused Jewish political scientist Robert Kahn to write:

> If the concept of "symbolic victory" is sometimes difficult to apply precisely, the 1985 prosecution of Ernst Zündel clearly backfired. What had been an attempt to silence Zündel, and possibly use the legal system to repudiate denial, became instead a public relations coup for the Toronto publisher and his supporters.[2]

This article documents why Dershowitz and others have called the 1985 Zündel trial a victory for Holocaust Revisionists.

HISTORICAL BACKGROUND

Samisdat Publishers Ltd., under the signature of its president, Ernst Zündel, published in the early 1980s a 32-page booklet entitled *Did Six Million Really Die?*. Under a license from Historical Review Press in England, Samisdat was prevented from making any changes to the publication. Samisdat sent the booklet to numerous people across Canada in the hope that it would arouse interest in the subject explored in the book: Did 6 million Jews really die pursuant to a systematic policy of extermination by National Socialist Germany during World War II?[3]

SABINA CITRON
Began legal assault on Zündel.

Sabina Citron, a founder of the Canadian Holocaust Remembrance Association, charged Zündel with the criminal offense of "spreading false news" likely to cause racial and social intolerance. This charge was later assumed by the Canadian government and led to two lengthy jury trials in 1985 and 1988.[4]

The booklet *Did Six Million Really Die?* unquestionably contained some errors. It was written hastily in the early 1970s by a young University of London graduate, Richard Verrall, who used the pseudonym "Richard Harwood." The booklet critiqued the weaknesses of the evidence and arguments provided in orthodox Holocaust literature, and gave the reader alternative views of what happened in the German camps during World War II. The booklet did what polemical works are supposed to do by providing readers with an alternative view of the so-called Holocaust.[5]

The primary purpose of the prosecution of Zündel was to make sure that ordinary Canadians would not have access to the type of information contained in *Did Six Million Really Die?*. Zündel, in his defense, decided to put the Holocaust on trial. Indeed, Zündel forced pro-Holocaust historians to defend their position that Germany had an official program of mass extermination against Jews during World War II.[6]

A VICTORY FOR REVISIONISM

Holocaust skeptic Ernst Zündel was hounded in Canada for the crime of "spreading false news." Despite the avalanche of expert witnesses who testified on his behalf, and their ability to effectively undermine the official Holocaust narrative and, thus, the Canadian state's case, Zündel was still found guilty. However, many consider it a victory for Revisionism because the public learned that the Revisionists had scientific evidence, while the Exterminationists floundered to prove any aspect of their case.

PROSECUTION EYEWITNESSES

The prosecution in the 1985 Zündel trial counted on the testimony of carefully chosen "survivors" to prove the Holocaust happened as Court Historians say. These survivors were supposed to testify that they had seen, with their own eyes, the carrying out of homicidal gassings. However, none of the prosecution's eyewitnesses was able to successfully describe any homicidal gassings at the German camps.[7]

Arnold Friedman, a 56-year-old Hungarian Jew, was touted as an eyewitness to the homicidal gassings at Auschwitz. Friedman testified that, while in Auschwitz, he saw "14-foot flames" shooting out of the crematorium chimneys. Douglas Christie, Zündel's defense attorney, showed Friedman scientific evidence that the crematoria at Auschwitz were designed not to give off either flames, ashes or odors. Friedman eventually admitted that his testimony did not come from personal experience; he was simply repeating what others had told him.[8]

Ignatz Fulop testified that he was a Jewish inmate at Auschwitz for approximately eight to 10 days in May 1944. He testified that, at night, he could see heat flames coming from the crematoria. When Christie asked Fulop how high the heat flames were, Fulop replied, "Forty, 50-foot, 30-foot. All depends how hot it was [in] the ovens."[9] Since the crematoria at Auschwitz did not give off flames, Fulop's testimony was clearly erroneous.

Rudolf Vrba, who had escaped from Auschwitz in April of 1944, was a world-famous eyewitness to the alleged homicidal gas chambers at Auschwitz. Vrba was a coauthor of the "War Refugee Board Report," and was the author of the book *I Cannot Forgive* (with Alan Bestic) published in 1964. Furthermore, Vrba had provided important eyewitness testimony at the Auschwitz trial in Frankfurt in 1964.[10] The prosecution felt that Vrba could produce reliable and authentic testimony at the trial. Vrba was considered one of the most important witnesses in support of the existence of gas chambers at Auschwitz.

However, Vrba confessed during his testimony at Zündel's trial that his book *I Cannot Forgive* was "an artistic picture … not a document for the court." Vrba also testified that he had never actually witnessed anybody being gassed at Auschwitz, but had merely heard rumors. Furthermore, Vrba admitted that his written and pictorial descriptions of the Auschwitz crematory were mere guessing, based on "what I heard it might look like." Vrba proved to be an unreliable witness who could only cite hearsay evidence of the so-called Holocaust.[11]

Another prosecution witness at this trial was Dennis Urstein. He

claimed he saw bodies hauled out of the gas chamber at Auschwitz. Urstein described the bodies as "greyish-greenish" in color. However, persons who have died from Zyklon-B poisoning turn a bright cherry red color. Urstein also claimed that he wore no protective clothing when assisting with the disposal of bodies in the gas chamber. If this had been the case, he would have died, as well. Urstein was exposed as a totally unreliable witness.[12]

Henry Leader was a "Holocaust survivor" who was interned in Majdanek from December 1941 until June 1943. He was transferred to Birkenau in June 1943, and stayed there until October of 1943. Leader is another witness at this trial who couldn't get the body color of the alleged Zyklon-B gas victims correct. Leader testified that the color of the gassing victims at Majdanek was "bluish."[13] Obviously, Leader had never seen the dead body of a person who had been killed using Zyklon-B gas.

Today the evidence that the so-called Holocaust happened is based almost entirely on eyewitness testimony of "survivors." As the 1985 Zündel trial showed, such eyewitness testimony has consistently proven to be extremely unreliable.

RAUL HILBERG'S TESTIMONY

Dr. Raul Hilberg was hired by the prosecution in the 1985 Zündel trial to testify as an expert on the Holocaust. Hilberg had obtained his Ph.D. in public law and government from Columbia University in 1955. He subsequently took up a teaching post at the University of Vermont, which he still held at the time of the trial. He commenced his study of the Holocaust in 1948. Hilberg's major work on the Holocaust was *The Destruction of the European Jews*, which was first published in 1961, and reprinted many times.

When asked in 1983 how the extermination of European Jewry took place without an order, Hilberg said:

> What began in 1941 was a process of destruction not planned in advance, not organized centrally by any agency. There was no blueprint and there was no budget for destructive measures. They were taken step by step, one step at a time. Thus, came about not so much a plan being carried out, but an incredible meeting of minds, a consensus—mind reading by a far-flung bureaucracy.[14]

On January 16, 1985, under cross-examination at the 1985 Zündel trial, Hilberg confirmed that he said these words.[15] Thus, Hilberg stated that the genocide of European Jewry was not carried out by a plan or order, but rather by an incredible mind reading among far-flung German bureaucrats.

Hilberg, who was widely regarded as the world's leading authority on the Holocaust, further testified that he had never examined a single concentration camp. Although Hilberg visited Auschwitz and Birkenau in 1979 for a single day as part of a ceremonial appearance, he did not examine either the buildings or the archives on his visit. Hilberg testified that he had never seen a gas chamber, either in its original condition or in ruins.[16]

> In the 1985 Zündel trial, the prosecutors had a difficult time finding legitimate witnesses.

Christie asked Hilberg if he knew of one scientific report that substantiates that any single place was used as a gas chamber. Hilberg, after repeatedly asking for clarification of the question, eventually had to admit that he knew of no scientific report that proved the existence of a gas chamber in German camps during World War II.[17] Thus, the world's greatest expert on the Holocaust admitted that there was no scientific evidence or even an autopsy report to back up the prosecution's incredible extermination claims.[18]

After Hilberg's testimony, spirits were understandably high at Zündel's headquarters. The prosecution witnesses and their expert, who were supposed to make a fool of Zündel, had failed miserably in their testimony.[19] It was now time for Zündel's defense witnesses to present their evidence regarding the so-called Holocaust.

DEFENSE WITNESSES

Dr. Robert Faurisson, the leader of Zündel's defense team and a recognized expert on text and document criticism, was Zündel's first witness. Faurisson had been studying the alleged German homicidal gassings for 25 years at the time of the trial. He had concluded that gas chambers and the genocide, together, were a fraud, which led to a gigantic political and financial fraud. Faurisson testified that there was not a single homicidal gas chamber in any of the German concentration camps. He stated: "If it [proof of gassings] had existed, we should have thousands of material [proof]. We have not one proof."[20]

Dr. Russell Barton, an English physician who later became an American psychiatrist, testified that he entered Bergen-Belsen with British forces as a young medical student on May 2, 1945. Dr. Barton's first impression of the camp was one of horror. Some inmates were dead and piled up outside the huts, others were in various stages of dying, disease and dehydration.

Barton examined the camp's well-equipped kitchens and found record books listing the food that had been cooked and distributed going back to 1942. Barton determined from his examination of the camp records that there had not been a deliberate policy of starvation at Bergen-Belsen.

Barton made inquiries with inmates, including Jewish doctors, who told him that Bergen-Belsen had not been too bad until the autumn of 1944. Then, as the Red armies were

advancing, the inmates said they had been given the choice of remaining in the camps about to be overrun by the Soviets or being repatriated back to Germany. Many chose to return to Germany.

As a result, from the autumn of 1944 to early 1945, some 53,000 people were moved into Bergen-Belsen, which had room for only 3,000 inmates. The overcrowding was extreme and the staff at the camp resented it. Josef Kramer, the commandant of Bergen-Belsen, and Dr. Fritz Klein, the medical doctor at the camp, didn't know what to do with the huge influx of inmates. Barton testified that the horrific conditions at Bergen-Belsen were attributable to overcrowding and the collapse of the German economy at the end of the war rather than to an intentional program of extermination.[21]

Thies Christophersen was another witness who said that the alleged genocide of Jews during the war never happened. Christophersen supervised about 300 workers, many of them Jewish, at Auschwitz from January to December 1944. On numerous occasions during this period, he visited Birkenau where, allegedly, hundreds of thousands of Jews were being gassed to death. In a memoir first published in Germany in 1973, *The Auschwitz Lie*, Christophersen wrote that, during the time he was at Auschwitz, he did not notice the slightest evidence of mass gassings. At the 1985 Zündel trial, he successfully answered numerous pointed questions by the prosecuting attorney about his experiences at Auschwitz.[22]

Dr. William B. Lindsey, a research chemist employed for 33 years by the DuPont Corporation, testified at the 1985 Zündel trial that he considered mass homicidal gassings in the camps to be technically impossible. Based on his on-site examination of the alleged homicidal gas chambers at Auschwitz, Birkenau and Majdanek, Lindsey stated: "I have come to the conclusion that no one was willfully or purposefully killed with Zyklon B in this manner. I consider it absolutely impossible."[23]

The Six Million: Fact or Fiction?

Edited and expanded by Peter Winter

Revised, edited, updated, and expanded, this work is without a doubt the single most important revisionist examination of the legend of the "Six Million" Holocaust as yet published. Just a few of the amazing revelations contained in this sixth edition include:

• Zionists and Nazis cooperated before the war on writing Germany's racial laws—and in the setting up of Jewish settlements in Palestine;

• Zionists offered to fight for Nazi Germany against Britain during WWII;

• Nazi policy was aimed at encouraging Jews to emigrate or evacuating them east of the Urals;

• Official German records show that there were 4.5 million Jews under Nazi control, and, of that number, 4.3 million lodged claims as "victims";

• The USSR used torture to produce the lion's share of "confessions" extracted from Germans to support the "extermination" allegations;

• The shocking lies and distortions contained in the two Demjanjuk trials;

• The Jewish lead prosecutor in the "Einsatzgruppen" trials publicly admitted to using death threats to extract confessions from Germans;

• Exactly what Adolf Eichmann confessed to and what he did not;

• The Auschwitz Camp Museum has formally admitted that the "gas chamber" it has shown to millions of tourists is actually fake;

• Original German plans of Auschwitz show no "gas chambers";

• Chemical examination of Auschwitz shows Zyklon-B traces missing;

• Offical Polish university archeological digs at Belzec and Sobibor have failed to find any evidence of "gas chambers," and how a similar dig at Chelmno directly contradicted "eyewitness" testimony;

• The "gas chambers" at Majdanek had glass windows, baths, and real showers;

• The "carbon monoxide" gas bottles on display at Majdanek are engraved as "carbon dioxide";

• Details of the "Star of David gas chamber tile" hoax at the 2013 Treblinka archaeological dig;

• How a delousing chamber at Dachau is called a homicidal gas chamber;

• German POWs were forced to alter a shower room at Sachsenhausen to support a Soviet show trial. The forgery was so crude and embarrassing that the Communists knocked down the building in 1952.

• The Bergen-Belsen camp is reviewed, with an explanation of the typhus epidemic that swept the camp in the last months of the war and created the horror images of piles of emaciated dead bodies;

• This 5th edition also deals with the "eyewitness survivor" memoirs and their lies and forgery, starting with a superbly illustrated exposé of the faked memoirs of "Nazi hunter" Simon Wiesenthal and many others.

• The last section discusses the all-important question of how and why the Holocaust storytellers have gone through so much trouble to make up the incredible story of "the Six Million."

Ditlieb Felderer, a Revisionist researcher of Jewish descent, testified that he had conducted 27 separate visits to Auschwitz, where he snapped more than 30,000 color photographs, took soil samples and conducted infrared analysis of rooms and buildings. He examined the camp from top to bottom, and sneaked into areas that were off limits to tourists.

Zündel testified that Felderer's photographs were important in the formation of his understanding of the alleged gas chambers at Auschwitz. However, none of Felderer's photographs was permitted to be offered as evidence by the judge in Zündel's trial.

Felderer testified that the real Zyklon-B rooms at Auschwitz were delousing chambers. These facilities were designed to save lives by fighting typhus through the fumigation of bedding and clothing. He said that faked or reconstructed exhibits were placed on the guided Auschwitz tour. These fake exhibits included the infamous "execution wall," which Felderer discovered did not have any bullet holes in the wall. Felderer described Auschwitz as it is now portrayed as being a "Hollywood set" which carries on Zionist and Communist propaganda.[24]

Canadian attorney Doug Christie defended Zündel in his famous Holocaust trial. Multiple witnesses who were called to testify they had seen homicidal gas chambers in German labor camps—and gassing victims—were exposed as frauds under cross examination by Christie.

MORE DEFENSE WITNESSES

Ernst Zündel had numerous additional witnesses testify on his behalf. Dr. Charles E. Weber, an American who had trained at Camp Ritchie, Maryland, worked for Army Military Intelligence after World War II. He had published a booklet entitled *"The Holocaust": 120 Questions and Answers*. Weber testified that he had communicated to Zündel his extensive research concerning the falseness of the official Holocaust story.[25]

Frank Walus, a retired Chicago factory worker, testified that he was charged with killing Jews in his native Poland during the war. An accusation by Simon Wiesenthal that Walus had worked for the Gestapo prompted the U.S. government's legal action. During Walus's trial, 11 Jews testified under oath that Walus had murdered Jews during the war. Walus testified that he had been beaten up frequently during the time of his trial, and that Zündel had sent him some money to aid in his defense. After a costly four-year legal battle, Walus was found innocent of all charges against him by proving he had spent the war years as a teenager working on German farms.[26] All 11 Jewish witnesses had given false testimony at Walus's trial.

Zündel's next witness, Baptist Rev. Ronald Marr, publisher of the *Christian Inquirer*, testified that Zündel had the right to free speech, and should be allowed to publish whatever he believes.[27]

James Keegstra next testified that he lost his teaching position when he endeavored to teach both sides of the so-called Holocaust. Keegstra testified that he was viciously attacked in the media, and forced to work at odd jobs to support his family.[28]

American researcher Jerome Brentar next testified that faked evidence had been used against elderly Europeans accused of war crimes. For example, John Demjanjuk faced deportation to Israel based on a phony I.D. card produced by the Soviet KGB that claimed that Demjanjuk was a cruel camp guard named "Ivan the Terrible." Brentar testified that he had tried to bring a Jewish witness to the United States who had sworn that he had killed Ivan the Terrible more than 40 years ago. However, Brentar was prevented from bringing this witness to the United States to testify on Demjanjuk's behalf.[29]

Dr. Gary Botting, an English professor at Red Deer College, testified that George Orwell in May 1945 challenged the belief that gas chambers existed in Europe. Botting also testified that he was banned from using the Revisionist book *The Hoax of the Twentieth Century* by Dr. Arthur Butz in a literature course Botting had taught on the Holocaust.[30]

Douglas Collins, a Canadian with over 35 years of experience in journalism, testified that he fought for the Allies during World War II. Collins visited Bergen-Belsen Camp at the end of April 1945, and stayed in Germany for several more years as a member of the Allied Documents Research team. He testified that conditions in Germany were very bad after the war. Collins said the condition of German troops returning home from the Soviet Union "reminded me a bit of the survivors in Bergen-Belsen. They were walking skeletons."[31]

Collins testified that it is dangerous for a journalist to question the orthodox view of the Holocaust. He said that any journalist who questions it is "accused of anti-Semitism, and of hate literature." Collins stated:

> I wonder whether it will be necessary in the future, if this case goes against Mr. Zündel over there and one is writing about the war and this aspect of the war, whether it will be necessary to check with the Canadian Jewish Congress or

B'Nai B'Rith or the Jewish Defense League, which would be better known as the Jewish Attack League, whether it is necessary to check with them before one gets a story into print.[32]

Zündel's next witness was German historian Udo Walendy. Walendy, who had published several history books, testified that the Allies had no knowledge of the "Holocaust" until the end of the war. He further testified that the tales produced in the main Holocaust literature could not have happened as described for technical and many other reasons. Walendy said the thesis of the booklet *Did Six Million Really Die?* is correct, although the booklet could be much better presented with the new documents researchers now have.[33]

TESTIMONY AND VERDICT

At the end of his trial, Zündel was questioned about his views of the "Holocaust." His testimony indicated that he had studied the subject quite extensively.

For example, Christie showed Zündel a picture of the alleged gas chamber at Auschwitz I, with its flimsy door leading into the gas chamber. Christie then showed Zündel a picture of an American gas chamber used to kill people, with its massive hinges and airtight seal on the gas chamber. Christie asked Zündel, "What is the purpose in comparison of those items?"

Zündel replied:

> Because it shows the tremendous care that needs to be taken in the construction and the very strong build of these doors that go to gas chambers that are used to kill people, and it becomes apparent that no such doors were installed in what are today being shown in gas chambers in Auschwitz I that were allegedly used to kill people.[34]

In his testimony, Zündel effectively proved that the alleged gas chamber at Auschwitz I, shown to millions of tourists, could not have been used to murder people.

The jury found Zündel not guilty on the charge of willfully promoting false news regarding an essay he had written entitled *The West, War and Islam*. This essay declared that Zionists had created the lie of the Holocaust to blackmail Germany into bankrolling the building of Israel and conspiring with bankers, Communists and Freemasons to establish a one-world slave society.[35]

Unfortunately, regarding the booklet *Did Six Million Really Die?*, the jury found Zündel guilty of willfully promoting false news. Judge Hugh Locke sentenced Zündel to 15 months in prison followed by three years of probation. While free on bail, Locke placed Zündel under a judicial gag order forbidding him from writing or speaking about the "Holocaust."[36]

Christie appealed the court's decision. On January 23, 1987, Zündel's conviction was overturned by the five-judge Ontario Court of Appeals for two very important reasons. First, Locke had not allowed the defense any influence in the jury selection process. Second, the jury had been misled by the judge on the very meaning of the trial. A second trial concerning only the booklet *Did Six Million Really Die?* was ordered by the court.[37]

CONCLUSION

Michael A. Hoffman II writes:

> The prosecution was anticipating a quick, two-week trial in which the massive weight of the Six Million propaganda—all of the "expert" professors, thousands of "eyewitnesses," mountains of "scientific evidence" and the tens of thousands of pages of Nuremberg testimony, would laugh Zündel and his pathetic crew of "pseudo-historians" and "flat-Earthists" out of public consideration and into the jail cells they so richly deserved.
>
> The media predicted the same scenario, and the "smart money" said it was going to be a walkover for the Zionists.[38]

Instead, the 1985 Ernst Zündel trial was a huge victory for Holocaust Revisionists.

Dr. Robert Faurisson wrote about Zündel and his 1985 trial:

POLITICALLY INCORRECT!

The Track of the Jew Through the Ages

By Alfred Rosenberg

Translated by Alexander Jacob

This classic study of the Jews, written when Alfred Rosenberg was only 26 years old, is based on an astonishingly wide range of historical sources and marked by the clearest understanding of the essential spiritual and intellectual differences between the Jews and the Europeans.

Tracing the history of the Jews in Europe from the Middle Ages to the Russian Revolution, it reveals the frighteningly ruthless manner in which the Jews, always a state within any state, gradually succeeded in destroying all the European empires in their aim of establishing a Zionist world-republic. In the final analysis, the real danger of such a world-republic (which continues today under the guise of globalism) is seen to be that, by violently undermining the spiritual cultural foundations of the European states, it subjects the European peoples to a despotism whose intellectual aridity and obscenity are plainly revealed in the Talmud. The German consulate in Toronto confiscated his passport and the West German government prepared a deportation action against him. In Germany itself, West German authorities had already carried out a series of large-scale police raids on the houses of all his German correspondents.

In 1987, the United States forbade him entry to its territory. But, in spite of all that, Zündel had won a media victory: day after day, for seven weeks, the entire English-speaking Canadian media covered the trial, with its spectacular revelations. The public learned that the Revisionists had first-class documentation and arguments, while the Exterminationists were in desperate straits.[39] ❖

On the Enduring Legacy of Willis Allison Carto

What is the real legacy of Willis Carto, the founder of TBR? In the following article, we hear from TBR's former editor, Dr. Matthew Raphael Johnson, who was not only an employee of Carto's but a trusted friend and confidante, as well. Carto, in his eyes—and to many others—was possibly the most important American publisher of the 20th century.

By Matthew Raphael Johnson, Ph.D.

Willis Allison Carto was my teacher, mentor and friend. When he died in October 2015—almost a decade ago—I wrote in my obituary:

> Willis Carto's passing leaves a gaping hole in the nationalist idea. (I hesitate to call it a "movement."). Willis was a businessman, a practical thinker, a financier—they're in short supply. We've had enough of the Heminevrin Hegels and the Sulpor Schopenhauers. These are not in short supply, and are, to be charitable, superfluous. Willis made it possible for many dissenters to earn a living doing what they love and, with luck, enlightening many. He took on the pain of administration, finance and legal tediousness so people like me can tell the truth without fear of bankruptcy.

Willis hired me right out of graduate school, as someone like me (politically incorrect) would have a tough time in the academic job market. He hired me on November 1, 1999, and my career officially began. Willis made it possible for me to get right to work on books and papers I wasn't permitted to write in the academic world. He created a lifestyle for those working for him where such writing was possible while also raising a family. Today, such a circumstance doesn't exist at all, meaning young men cannot both raise a family and write nationalist material full-time unless they're independently wealthy.

WILLIS A. CARTO
Founder of The Barnes Review.

When Willis was slated to receive part of the inheritance from Thomas Edison's family, he was on the cusp of creating a huge publishing empire—a fact very few today realize. Of course, the Regime could not allow this to happen, and it was in the midst of these subsequent legal battles that I was hired. This eventually exhausted Carto's resources and derailed many of his planned projects. "They got us coming and going," he once said to me, exasperated.

Still, it was very clear that Willis was in the process of building a bona fide think tank, something quite different from the typical Beltway propaganda mills. With the assistance of the late John Tiffany, whose encyclopedic knowledge of many periods in history was impressive, and the graphic design and production skills of Paul Angel, I was soon promoted to editor of The Barnes Review in 2001-2002, while only 30 years old.

While Willis maintained editorial control, the position gave me freedom to pursue academic research into nationalism, post-Soviet Russia and the reclamation of Europe. Unfortunately, the company's financial struggles, totally out of Willis's control, forced me to leave in 2005. I maintained excellent relations with the company during that time and I am still published in The Barnes Review.

Willis made no claim to scholarship, though, on occasion, he crossed that line. When that happened, we fought—sometimes to an alarming degree. His personality was such that he quickly forgot such battles, believing them to

From this headquarters on Independence Avenue on Capitol Hill in Southeast Washington, D.C.—three blocks from the U.S. Capitol—Willis Carto ran his publishing empire for five decades. This included LIBERTY LOBBY, LIBERTY TRUST SILVER MINT, LIBERTY LIBRARY, *The Spotlight*, *The Barnes Review*, the FOUNDATION FOR ECONOMIC LIBERTY, the GOVERNMENT EDUCATION FOUNDATION and the FOUNDATION TO DEFEND THE FIRST AMENDMENT. The building was originally erected by the German-American Building Association in 1900. It is now valued in the millions.

be a normal part of having an editorial staff and often egocentric and brittle editors such as myself. Hiring well-educated, opinionated writers was part of the process of purifying our political doctrine. Willis not only respected such confrontation, he required it. This is likely why he quickly forgot such conflicts; they were never personal.

Nine years ago, I also wrote as part of his obituary:

> I always had to remind myself that Willis is the reason why any political nationalism exists at all in the United States. The Liberty Building [on 300 Independence Avenue, Capitol Hill, Washington, D.C.] was his. I was a temporary occupant. From a single desk at the Press Club, Carto created a publishing empire over several continents and angered almost every powerful interest in the cosmos. Willis could be difficult and stubborn, but I took it without too much complaint—he had earned that right. … Okay, I complained all the time, but, still, the point remains.

Willis, in other words, built a publishing empire under the disapproving glare of every powerful lobby in the country. These, unfortunately, were not his worst enemies. Fellow nationalists and populists quickly became envious and undermined him for the silliest of reasons. Like so many before them, they would rather live in the Gulag before taking orders from someone else.

Overcoming obstacles like these—impediments that would have killed a normal man—can only be the result of extraordinary practical insight, likely his most noticeable attribute. His reward was endless calumny, gold-diggers, betrayal and hatred. Also, for some of us, a great deal of respect.

I always chuckle condescendingly when some newly minted patriot breathlessly tells me about their latest theory that the "Chinese are planning to invade the United States," or some other stupid thing. Buttressing their own delusions as well as their self-importance, these beliefs are almost always the result of ignorance.

Such claims and hare-brained theories usually come from novices that think in simple and non-systematic terms. I wrote years ago:

> The misfit, populist-patriot bed-wetters did nothing but project their own mental incapacity on events. Incapable of any concerted action, these Seroquel Spenglers were convinced that "agents" were after them for the threat they posed to the "unconstitutional gub'ment."
>
> Getting the right men into Congress was the answer, of course. The lawless Regime will certainly bow before a landmark court case or local election, we were told.

To accomplish this, however, we were to send money to the international headquarters of the Nationalist White Constitutional Aryan Truth-loving Anti-Zionist Jeffersonian Federalist Movement for Constitutional Government. Send checks to NWCATAJFMCG. That'll show 'em.

These are the same guys who loudly claim that the last few elections were fraudulent, yet still seek to somehow "get the right people into Congress." These men are entirely bereft of ideas and do not have the intellectual wherewithal to systematically understand the nature of the Regime.

Mocking these characters is easy, but doing so revealed a serious point: Willis Carto steered his friends clear of such "Seroquel Spenglers."

In exposing these loons, of course, we would then be called "agents" who were "paid" to stop their imminent rise to power over a "new America." Willis was able to marginalize these types, putting together, instead, a more serious group of writers and scholars.

Willis focused on ensuring that sane, educated people put forth the nationalist program, not the Haldol Himmlers who exist largely to exemplify the Dunning-Kruger Effect.[1] What was once a ludicrous bunch of disaffected, polyester-clad, alienated bachelors was turned into a serious scholarly and journalistic force due to the unflappable psyche and drive of Willis A. Carto.

Such organization was not about vulgar elections or stump speeches, but rather the long-term delegitimization of the Regime, and this goal was laid out in every institution Carto founded. Willis proved to those who knew him that things were never as they seemed, as friends are often enemies, good intentions often mask pathological appetites and politicians have no real power. Politicians are idiots—game show hosts who take the fall for more powerful economic forces.

Around 2002, I came to the conclusion that Vladimir Putin was a huge threat to the globalist Regime. I was alone in this opinion at the time. I began to convince both Willis and trusted author Michael Collins Piper that Putin's Eurasianism was a huge threat to the global left. Initially, they both said that he was merely a KGB agent that couldn't be trusted.

I was lambasted by conservatives nationwide once I began promoting the idea. Today, the world sees Putin as a nationalist figure and, indeed, a threat to globalization. It was Willis who first gave me the tools to develop this thesis and, today, it is taken for granted. In fact, The Barnes Review published my book on the topic. It's titled *Russian Populist: The Political Thought of Vladimir Putin*.[2]

I created an understanding of Putin back then that has altered American politics, since, before me, Putin was perceived as a leftist and Marxist figure of the old Soviet type. As the nationalist movement altered its view of Russia (thanks to me), the major media did, too. It was Willis that first pointed out that China today is a National Socialist—and not a Communist—power.

> Once Carto began influencing hundreds of thousands of people, the Regime had to destroy him.

The point, of course, is that, even when he disagreed, he still provided his friends with the resources to prove him wrong. These were some of the main, overarching operational ideas that could be found in any group he started. The fact that he once had over 200 employees in 1980 shows his tremendous success, but the Regime simply had more resources than he could ever amass.

Back in 2007, Willis wrote in an editorial published in *American Free Press* newspaper:

There's no doubt but that the American public has had a bellyful of senseless, no-win, aggressive war. At last count, American troops are in 135 countries around the world—over 100,000 of them. There are thousands of mercenaries, but the actual figure is classified. Why?

We are told that our people are there to bring "democracy" to the unenlightened. Although our country is in serious need of some of this wonderful political elixir, seeing that the administration's policies have never been submitted to the people or even to Congress, the charade goes on. It's a shame, but nevertheless a fact that "democracy" is distinguished by its absence in our present environment of pressure groups, lobbies and charlatans.

Since the death of Willis, the U.S. track record in these conflicts has become far worse. It has lost every foreign policy battle it has ever begun and, to some extent, the intellectual scaffolding needed to comprehend why. This was explained by those at The Barnes Review. Comments like these were the very core of Willis's mission. He was not trained as an academician, so his common sense took over. He wrote very little, telling me, personally, that he was "a financier, not a writer or analyst," but he would occasionally lay out an opinion, and these were remarkably consistent.

He was a populist, seeing the post-Cold War U.S. government as illegitimate and, of course, subservient to the Zionist lobby. To him, "populism" meant the rule of the "people," that is, the European founding stock of the American nation, not the present gaggle of ethnic strangers that the ruling class has brought into the country. Without some high level of ethnic and racial homogeneity, there can be no trust and no common action, which is precisely why immigration will not be stopped.

Willis taught the world that warfare and propaganda are the only two arrows in the Regime's quiver, and he let us—his scholars—fill in the details. Lashing out at governments that are successful and never threatening to

the United States—but reject liberalism—become the catharsis for the leftist, failed, postmodern empire. Former Secretary of State Hillary Clinton once laughed and exclaimed, "We came, we saw, he died!" speaking of Muammar Qaddafi—a man who never truly threatened the United States. Qaddafi's policies were bringing Libya to the cusp of First-World status, and oil money was given back to the population. This, too, was populism.

Back in 2015, immediately after learning of his death, I wrote this to his enemies, those who were cheering his passing and attacking his legacy on both sides of the fake American political divide:

> You mindless, conformist, groveling, cliche-spouting, superficial, shallow, TV-soaked, nihilistic, antisocial, brainwashed automatons have no idea what has begun here. Willis is not dead. Rather, the small army of scholars, writers, editors, activists and troublemakers who Willis trained has now been unleashed against your Soros-paycheck existence. In your stupidity, you think that, since one man is dead, the idea dies too. That is typical of your unreason and shallow pathology.
>
> The truth is that we are far tougher, more knowledgeable and more fearless than you. We have very little to lose while you've never heard the word "no" before. That's a mix that will lead you to the rubber room.
>
> I personally guarantee you that there is no way the debauched, corrupt, conformist university system can churn out the requisite number of self-esteem counselors to put you back together when we're finished with you. You're beneath us. Your sophomoric, shallow, pedestrian ideas need to be protected by university speech codes and "safe spaces."
>
> You're soft, entitled, overindulged and irresponsible, and have long reached the peak of your mobilization. We're just beginning.

I stand by these words today, where things have become much, much worse. The Regime and its leftist ideology are at peak mobilization, yet, the nationalist movement is just beginning its ascent, and things have become even more polarized in politics since Willis's death.

Carto's legacy can be found in the fact that his organizational skill laid the groundwork for the Regime's defeat. The typical patriot is no intellectual threat to anyone, but those trained by Carto certainly are.

Willis Carto started something that some said was impossible: He organized the unorganizable—the bizarre set of personalities that, together, create some idea of a "nationalist movement." This was no small feat but, today, much of this legacy is slowly being forgotten. Today, no such deep-pocketed institution or financier exists. Thankfully, The Barnes Review is still alive, and you can even now find online many of the thousands of books and publications Willis was responsible for creating. ❖

Reflections on the Life and Works of Willis Carto

WHEN GIVEN THE CHANCE TO DISCUSS the life and contributions of TBR founder Willis A. Carto, renowned Southern White rights activist Sam Dickson jumped at the chance to share some recollections of his old friend and the shared issues—political, racial, historical, international, social etc.—that brought them together as far back as the late 1960s.

By Sam Dickson, J.D.

What a great honor it is for me to be asked to write a tribute to my friend of many decades Willis A. Carto, who died on October 26, 2015, after over 65 years of selfless devotion to the cause of the European people here in America and in our European homeland.

I first met Willis in person when he came to Atlanta to speak to a Youth for Wallace meeting in the late 1960s. It stood to reason that I already knew of him and his work with LIBERTY LOBBY, an organization he founded and one that I had happily supported.

This meeting grew into a friendship—not only with him but with his remarkable wife and helpmate Elisabeth—that spanned almost 50 years.

Willis personified productivity. In his 65-year-long career, he founded or was instrumental in so many movement organizations and campaigns that space is not available to describe his activities in full. He wore many hats and was involved in a variety of our causes.

It is hard for newcomers to our cause to understand the critical role Willis played and his foundational impact on so many areas of our movement today.

His impact was not only due to his productivity—in sharp contrast to so many of us who just sit around and complain.

WILLIS A. CARTO
Incredibly effective organizer.

Willis talked about the real issues, the issues that count, not the fake issues—the tame issues or, frankly, the non-issues—that System-approved "conservatives" talked about then, and still continue to talk about today.

Willis dealt with the biological aspect of racial differences and the overwhelming importance of race, immigration, Zionist control of our government and our foreign policy, and the full story about events in our immediate past, such as World War II. These were real issues, not phony distractions.

His focus on the real, on the things that matter, was in stark contrast with the "issues" that System conservatives use to raise money and to distract attention. Way back in the 1960s when I first met Willis face to face, System conservative issues already had a whole collection of non-issues to agitate about so as to channel Americans into irrelevant matters.

The issues of the phony System conservatives jumped off the page at you at first glance for their silliness and irrelevance.

I was Georgia state chairman of the William F. Buckley kiddie corps, Young Americans for Freedom, or YAF, as it was known.

The national office of YAF sent us position papers that we were to distribute on campus to influence the thinking of college students. These position papers were like Newt Gingrich's infamous "Contract with America." If you could have punched a button and made every single one of them become instantly enacted into law, it would have had zero impact on either us or our country.

Some of these *National Review*-type issues included things like stop-

In his life, Willis Carto worked with many notable people. One of those was Curtis B. Dall (far left, shown at his wedding to FDR's daughter Anna, Hyde Park, New York, 1926). Dall was a Wall Street stockbroker who claimed that he had seen enough of the stock exchange to realize it was rigged against the common man. Dall went on to become a chairman at LIBERTY LOBBY, founded by Carto in 1955. Read more about Dall in his book *FDR: My Exploited Father-in-Law* (softcover, 288 pages, #696, $25 from TBR).

ping urban renewal ("Urban Renewal is Negro Removal" was the title), saving the Right-to-Work law, and opposing increases in the minimum wage.

Meanwhile, serious grown-ups on the other side, like Lyndon Johnson and his helpers in Congress, were changing the demographics of America. They were playing for keeps and being helped by the ineffectual, phony opposition.

Immigration in 1965 was the biggest issue—as it still is today. Willis became the most important figure in America in opposing the repeal of the National Origins Act by Lyndon Johnson in 1965. The new Johnson immigration law had as its purpose changing the United States from a European White nation into a Third-World slum.

LIBERTY LOBBY, an organization Willis had founded in the mid-1950s, played a bigger role in opposition to the immigration law than any other group. LIBERTY LOBBY had hundreds of thousands of members who were directed by the *Liberty Letter* that was mailed out monthly to write their congressman and senators on issues of importance, such as immigration.

Like Lyndon Johnson but on the other side, Willis was a grown-up, and focused on issues of concern to other grown-ups.

While System conservatives in YAF and *National Review* kept their followers duped with concerns about urban renewal, Willis focused attention on stopping the repeal of the National Origins Act, a eugenically important law that had been passed in the 1920s to preserve America's character as a European nation.

LIBERTY LOBBY was only one of many such organizations, publications, book publishing companies etc. that Willis founded. Others included: *The Washington Observer*, *The Spotlight* (a newspaper with several hundred thousand subscribers that is the ancestor of AMERICAN FREE PRESS newspaper based in Maryland), THE BARNES REVIEW, THE LEGION FOR SURVIVAL OF FREEDOM, THE INSTITUTE FOR HISTORICAL REVIEW, *The Journal of Historical Review*, the monthly publication *Western Destiny*, THE NOONTIDE PRESS … the list goes on and on.

He rescued from oblivion many of our heroes and their books. Ernest Sevier Cox's *White America*, the memoirs of Leon Degrelle, and the memoir of Col. Curtis Dall the former son-in-law of the criminal Franklin Delano Roosevelt, titled *FDR: My Exploited Father-in-Law*, are but a few of the books he published.

The history of our movement and cause is poorly documented. Few know how demoralized, crushed and scattered our ideological ancestors were after the illusionary victory in World War II. Willis, more than any other figure, gathered up the surviving splinters and recreated us.

All of us—whether we know it or not—stand upon the shoulders of Willis A. Carto.

From the dead we should draw lessons for life. The lessons to draw from Willis's life are the importance of real productivity, activity and energy, and the ability to persevere in the face of defeat and failure.

Defeat, failure, reverses—none of these ever deterred Willis. He picked himself up, dusted himself off and went back into the fight.

My personal life, as I know, was made infinitely richer by knowing Willis and being the beneficiary of his vast activities. All of your lives are similarly enriched.

We should not deny kindness to the dead. May Willis Carto, even after his death, be honored in memory as one of our great—if oft-ignored—White heroes. ❖

For Whom Did the Bell Toll?

The tragic betrayal that cost 50 million lives

By Willis A. Carto

Our intervention into two fratricidal European wars in this century—not to mention the Korean and Vietnamese debacles—cost the lives of 535,545 American men and boys and relatives: 116,708 were killed in World War I and 416,837 in World War II.

Although this is a small loss in comparison to the huge losses of France, Germany, Russia and other European belligerents, that lost tens of millions, it is incomprehensibly gigantic when you think of these figures not as numbers but as individual human personalities needlessly snuffed out in their prime of life.

And, when you consider the loss of life of the civilians who were unavoidably caught between the combatants, the tragedy of war assumes an overwhelmingly monstrous and evil dimension. Great historian Harry Elmer Barnes has estimated that some 50 million white Christians lost their lives in the insane fratricidal holocaust known as the second world war, and that the ultimate cost will one day be tallied at $25 trillion—assuming that the dollar itself survives.

This does not include 50 million other Christians butchered by Lenin and Stalin before, during and after the second world war in political genocide—a crime, by the way, which is not covered in the UN-sponsored Genocide Convention pending in the Senate for ratification [when this was written].

And the cost in terms of the most valuable thing of all—the steady loss of European cultural, political and racial integrity and the distortion of the very direction of world history itself—is quite beyond human calculation.

Above, Winston Churchill, FDR and Josef Stalin meet at Yalta. Millions of Europeans—and the American servicemen who fought, died or were wounded in WWII—were all betrayed when the Allies handed a huge swath of Europe over to the Soviet Union at war's end.

Given this sacrifice, were the noble war aims attained? Have these historic disasters made the world "safe for democracy," as that great liberal internationalist Woodrow Wilson solemnly promised? Have they brought "self-determination" to the peoples of the world, as he said they would?

And does the world now enjoy the "Four Freedoms" which another liberal internationalist, Franklin D. Roosevelt, solemnly promised us in order to get Americans to support his war conspiracy? In case you've forgotten our grand war aims of World War II, which cost so many lives, FDR and Winston Churchill promised to bring utopia, if not paradise, to everyone when they met and formulated the "Atlantic Charter"[1] in 1941, even before FDR was successful in getting us into war.

Here are these magnificent "Four Freedoms": 1) Freedom of speech and expression; 2) Freedom of worship; 3) Freedom from want; and 4) Freedom from fear.

And to secure these freedoms, FDR, Churchill and the malevolent forces prodding them joined forces with the devil and turned over half of Europe to Soviet Communist control, vaulting Communism from the starving infant it was at the close of the first world war into a ravenous monster.

As Clare Boothe Luce pointedly remarked some years ago: "Roosevelt lied us into war."

Now, if every one of the belligerents except the Soviet Union lost the war—the "victors" as well as the vanquished—then did anyone win? Yes, the real winners of the two world wars were the forces that instigated them: Communism, Zionism and their paymasters, the stateless mafiosi known as the international bankers.

This is not what it says in the approved history books or even what some misleading "conservative leaders" say, but it is the truth. Isn't it about time to stop the deadly hypocrisy and tell it the way it is?

The president—fill in the name of the current president as it doesn't matter who it is—is always being pressured to do what too many of his predecessors did—lie us into another bloody crusade. Perhaps it will be against Israel's archenemy, Iran, but Russia or China will do. Whoever it is, it will be for the benefit of the criminal troika that engineered and profited from the last two world wars.

Back in 1916, practically no one realized what was really happening. Up to then, Americans had pretty well followed George Washington's classic advice and steered clear of foreign influence. So, when Wilson ran for reelection with the slogan "He kept us out of war," he won.

Immediately after he was elected, he started singing another song: "Make the world safe for democracy," and, "A war to end war." The public was naive enough to believe him; they didn't know that he was the property of the international bankers who had a lot of loans out to Britain and intended to collect every nickel due them plus interest, regardless of how many Americans they had to kill to get that done.

You're still paying for that war, fellow taxpayers, with every offering you make to the IRS. After Wilson, there came Franklin Roosevelt.

HARRY ELMER BARNES
Crusader for historical truth.

Franklin Roosevelt also had ideas on how to save the world from itself. FDR knew that the vast majority of the American people were opposed to American intervention into the new European war—which was a direct outgrowth of the punitive Versailles Treaty orchestrated by the bankers.

In an article written in 1966, Barnes minced no words about the efforts of Roosevelt to involve America in a world war:

> President Roosevelt had a major responsibility, both direct and indirect, for the outbreak of war in Europe. He began to exert pressure on France to stand up to Adolf Hitler as early as the German reoccupation of the Rhineland in March 1936, months before he was making his strongly isolationist speeches in the campaign of 1936.
>
> This pressure on France, and also England, continued right down to the coming of the war in September 1939 [when England declared war on Germany.—Ed.]. …
>
> As the crisis approached between Munich and the outbreak of war, FDR pressed the Poles to stand firm against any demands by Germany, and urged the English and French to back up the Poles unflinchingly.
>
> From captured Polish and French archives, the Germans collected no less than five volumes of material consisting almost exclusively of Roosevelt's bellicose pressure on European countries, mainly France and Poland. The Allies later seized them. Only a small portion has ever been published, most notably some seized by the Germans in Poland in 1939 and published as the *German White Paper*. …
>
> There is grave doubt that England would have gone to war in September 1939 had it not been for Roosevelt's encouragement and his assurances that, in the event of war, the United States would enter on the side of Britain just as soon as he could swing American public opinion around to support intervention.
>
> Yet, when the crisis became acute after August 23, 1939, Roosevelt sent several [insincere] messages for the record urging that war be avoided through negotiations.

FDR needed a pretext, so he tried everything to start a war with Germany in the Atlantic, but German subs would not even fire back when U.S. ships tried to sink them while illegally convoying war materiel to Britain.

He then decided to break down the "back door to war," as historian Charles Callan Tansill called it. Some of the pressures he put on Japan to incite an attack are detailed in *The Final Secret of Pearl Harbor*, by Adm. Robert A. Theobald.

Roosevelt's plan worked, producing the "Day of Infamy" on December 7, 1941, when the Japanese fleet attacked Pearl Harbor.

Roosevelt and his chief of staff, Gen. George C. Marshall, knew the attack was coming. FDR is as responsible for the flaming deaths of the 2,388 men and women who were killed that day as if he had strangled each one with his bare hands. But, of course, he was an "honorable man," so he conscientiously carried out a secret

campaign commitment he had made to the bankers and the Zionists.

The crimes and aggressions of the real war criminals who make world wars out of local conflicts are so blatant, today the "Court Historians," to employ a phrase used by Barnes, have to maintain the libelous fiction of German barbarism and atrocities. They have to because the entire postwar world is erected on the comforting conviction of the moral superiority of the wartime allies—including Russia, then the Soviet Union. If the real war criminals didn't have their Holocaust myth to fall back on, the people of the West would see too clearly how they have been betrayed and weakened.

The establishment must have a scapegoat for their own crimes. Otherwise you might rebel and stop contributing to them. And, if that happened, they'd have to find an honest job and work for a living—assuming they didn't get tarred and feathered.

You can see and you can hear the war buildup on every hand as the vampires begin to lust again for blood. The liberals who once sympathized with the peaceniks and scorned the draft are beginning to change their collective mind—just as they did before the first and second world wars. Now, they want the United States to attack Iran just as soon as Israel says so.

Now, in fact, these mattoids want to draft not only young men but also girls. Our Navy is already in the Persian Gulf, ready for the order to begin firing nuclear missiles.

The same Zionists who scuttled us out of Vietnam like a whipped dog while they and their controlled press screamed their slogans for "peace" and "humanity" are now prodding us as fast as they can toward a date with nuclear holocaust to fight for Israel. It could well mean national suicide for America.

What Price Israel? was the name of a book by Alfred Lilienthal, a distinguished American Jew. Unlike most of his fellow Jews, Lilienthal had no illusions about what the support of Israel has cost, is costing and will cost Americans in the future. It is a price beyond human calculation, not only in terms of dollars and the potential for unspeakable disaster but, more importantly, in terms of culture distortion and the irrevocable loss of our national sovereignty and identity.

George Washington, as if he were speaking of Israeli influence in the U.S., had some wise nationalistic words to say about this in his "Farewell Address,"[2] which is read to a gaping gaggle of dwarfs on the floors of the House and Senate each year on the birthday of the founding father of our nation. We quote at length so that you may see for yourself how perfectly the policy he described (smeared for years as "isolationism" by the bankers' press) is suited for the nuclear age:

> Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious.

> The nation which indulges toward another an habitual hatred, or an habitual fondness, is in some degree a slave. *It is a slave to its animosity or to its affection, either of which is sufficient to lead it astray from its duty and its interest. …*
>
> So likewise, a passionate attachment of one nation for another produces a variety of evils. Sympathy for the favorite nation, facilitating the illusion of an imaginary common interest in cases where no real common interest exists, and infusing into one the enmities of the other, betrays the former into a participation in the quarrels and wars of the latter, without adequate inducements or justifications.
>
> *It leads also to concessions, to the favorite nation, of privileges denied to others, which is apt doubly to injure the nation making the concessions*, by unnecessary parting with what ought to have been retained, and by exciting jealously, ill will, and a disposition to retaliate in the parties from whom equal privileges are withheld; and it gives to ambitious, corrupted or deluded citizens who devote themselves to the favorite nation, facility to betray or sacrifice the interests of their own country, without odium, sometimes even with popularity; gilding with the appearances of a virtuous sense of obligation, a commendable deference for public good, the base of foolish compliances of ambition, corruption, or infatuation.
>
> As avenues to foreign influence in innumerable ways, such attachments are particularly alarming to the truly enlightened and independent patriot. How many opportunities do they afford to tamper with domestic factions, to practice the arts of seduction, to mislead public opinion to influence or awe the public councils! *Such an attachment of a small or weak toward a great, powerful nation, dooms the former to be the satellite of the latter.*
>
> Against the insidious wiles of foreign influence … the jealousy of a free people ought to be constantly awake; *since history and experience prove that foreign influence is one of the most baneful foes of republican government.*
>
> But that jealousy, to be useful, must be impartial, else it becomes the instrument of the very influence to be avoided, instead of a defense against it.
>
> Excessive partiality for one foreign nation, and excessive dislike for another, cause those whom they actuate to see danger only on one side, and serve to veil and even second the arts of influence on the other.
>
> *Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious; while its tools and dupes usurp the applause and confidence of the people, to surrender their interest.*
>
> The great rule of conduct for us, in regard to foreign nations, is, in extending our commercial relations, *to have with them as little political connection as possible.*
>
> So far as we have already formed engagements, let them be fulfilled with perfect good faith: Here let us stop. …

> Our detached and distant situation invites and enables us to pursue a different course. If we remain one people, under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve upon, to be scrupulously respected: when belligerent nations, under the impossibility of making acquisitions upon us, will not lightly hazard the giving us provocation, when we may choose peace or war, as our interest, guided by justice, shall counsel.
>
> Why forego the advantages of so peculiar a situation? Why quit our own to stand upon foreign ground? Why, by interweaving our destiny with that of any part of [the world], entangle our peace and prosperity in the toils of [regional] ambition, rivalship, interest, humor or caprice?
>
> *It is our true policy to steer clear of permanent alliance with any portion of the foreign world.*

There's really no reason why we Americans can't stop these tragic wars. All we have to do is to speak out. True, you may get some frowns from establishment types, and maybe some pro-Zionist Christians, but so what? The alternative to stopping these criminally insane manipulators is a far greater disaster.

To date no presidential candidate has indicated his comprehension of the facts cited here nor have—for that matter—any sitting congressman or senator, although a few have come close. For one thing, everyone "knows" (falsely) that we are dependent upon the Mideast for oil and we have to protect that oil with troops—although we have plenty of underground oil here, and in Alaska, Canada and Mexico—but we're not supposed to notice this, thanks to our controlled news poodles.

This only proves the total irresponsibility of our bipartisan policy of treason over the past four generations and the stupidity or corruption of the media. In our oil policies—as in so many cases—we find that the capitalists have permitted themselves to fall into the trap of the far left, or the two have actually worked together to attain an object. …

Fundamentally our survival—yes, literally our survival—means to junk the criminally irresponsible policy of internationalism which has been promulgated by the enemies of America and parroted from 10,000 bigoted citadels of learned ignorance, journalistic malice and political venality and begin looking toward our own problems here in America first.

If this means leaving Israel to her own devices, then that is exactly what it means. America owes Israel nothing except much of the responsibility for getting us into the first and second world wars. We have already given 535,545 dead plus billions of dollars to the building of Israel,[3] must we now pay the ultimate price of nuclear holocaust, the destruction of our cities, millions dead and national suicide?

> There's no reason why we Americans can't stop these tragic wars. All we have to do is to speak out.

It is time for patriots to realize that the socialism they expound against so vocally is much more a product of war and war mobilization than of socialists or miseducation. War always creates vast spending, big government and regimentation. And this is the very definition of socialism.

A patriotic American Jew, Haviv Scheiber, formerly an Israeli, long warned that, when you boil it down, the more America gets involved in the Mideast, the stronger Israel, Russia and China become. Somehow, in spite of whatever happens, they always come out on top and we always lose. Take all of the words, alarums and pontifications of editorial writers out, and you see that this is the reality.

If you wish to honor the memory of the brave men who have died for their country, uselessly killed in battles far from home for causes which they never understood, then, for God's sake, take a little courage from their example and fight for something you understand very well.

Your highest patriotism today is to respect the memory of those who have died in the uniform of their country by vowing that it will never happen again, and the basest treason is to permit yourself to follow the false patriots into another war, one surely bringing in its wake even greater disasters for our beloved America than any before.

If there is to be war, let it be between patriotic Americans and the traitors who lie to them. And let it be a fight to the finish. In fact, that is exactly what it is. ❖

ENDNOTES:

1. The so-called "Atlantic Charter," billed by most newspapers at the time as a historic document on a par with *Magna Carta*, was supposed to express "a joint declaration of peace aims" (note—not war aims; Congress had not yet declared war). However, it never existed. After the war, some historians made a search for the missing document in order to enshrine it in a golden case for taxpayers, children and the feeble-minded to view forevermore but nothing could be found. The "Atlantic Charter" was merely a press release probably dictated by the two democratic statesmen as they drank brandy between sessions discussing ways and means to drag America into the war. It served to distract the folks back home and keep them from wondering what was going on. Like the Piltdown Man, reference to the hoax is slowly disappearing from textbooks.

3. Although the court historians avoid mentioning it, one of the main forces propelling America into the European war which began in 1914 was Zionism. They did so as a political payoff to give them Palestine (which Britain had also promised to the Arabs). In return for this, the Zionists were to bring America into the war, which they did. Betraying the Arabs, the British kept their promise to the Zionists and issued the Balfour Declaration on November 2, 1917, which was the foundation for Israel.

Willis A. Carto (1926-2015) was the founder of Liberty Lobby, *The Spotlight*, The Barnes Review and multiple other news and history publications.

Revisionism and the Historical Blackout

THERE IS A REASON TBR FOUNDER WILLIS CARTO named the magazine you hold in your hands what he did. Carto had the utmost respect and admiration for a man he believed to be one of but a few scholars willing to buck academia and the Court Historians on the most politically incorrect topics of the day. Here we hear from the great Dr. Harry Elmer Barnes himself—in 1953—and why breaking the "black out" of honest history is so important.

By Harry Elmer Barnes

World War I and American intervention marked an ominous turning point in the history of the United States and of the world. Those who can remember "the good old days" before 1914 inevitably look back to those times with a very definite and justifiable feeling of nostalgia. There was no income tax before 1913, and that which was levied in the early days after the amendment was adopted was little more than nominal. All kinds of taxes were relatively low. We had only a token national debt of around a billion dollars, which could have been paid off in a year without causing even a ripple in national finance. The total federal budget in 1913 was $724.5 million, a tiny percent of the present [1947] astronomical budget. [What might Barnes think of today's $34 trillion budget deficit?—Ed.]

Ours was a libertarian country in which there was little or no witch-hunting and few of the symptoms and operations of the Police State that have been developing here so drastically during the last decade. Not until our intervention in World War I had there been sufficient invasions of individual liberties to call forth the formation of special groups and organizations to protect our civil rights. The Supreme Court could still be relied upon to uphold the Constitution and safeguard the civil liberties of individual citizens.

HARRY ELMER BARNES
Father of Historical Revisionism.

Libertarianism was also dominant in Western Europe. The Liberal Party governed England from 1905 to 1914. France had risen above the reactionary coup of the [Alfred] Dreyfus affair, had separated church and state, and had seemingly established the Third Republic with reasonable permanence on a democratic and liberal basis.

Even Hohenzollern Germany enjoyed usual civil liberties, had strong constitutional restraints on executive tyranny and had established a workable system of parliamentary government. Experts on the history of Austria-Hungary have recently been proclaiming that life in the Dual Monarchy after the turn of the century marked the happiest period in the experience of the peoples encompassed therein.

Enlightened citizens of the Western world were then filled with buoyant hope for a bright future for humanity. It was believed that the theory of progress had been thoroughly vindicated by historical events. Edward Bellamy's *Looking Backward*, published in 1888, was the prophetic bible of that era.[1] People were confident that the amazing developments in technology would soon produce abundance, security and leisure for the multitudes.

In this optimism in regard to the future, no item was more evident and potent than the assumption that war was an outmoded nightmare. Not only did idealism and humanity repudiate war, but Norman Angell and others were assuring us that war could not be justified, even on the basis of the most sordid material interest.

In our own country, the traditional American foreign policy of benign neutrality and the wise exhortations of George Washington, Thomas Jefferson, John Quincy Adams and Henry Clay to avoid entangling alliances and to shun foreign quarrels were still accorded respect in the highest councils of state.

Unfortunately, there are relatively few persons today who can recall those happy times. In his devastatingly prophetic book *1984*, George Orwell points out one reason why it is possible for those in authority to maintain the barbarities of the Police State is that nobody is able to recall the many blessings of the period that preceded that type of society.[2]

A significant and illuminating report on this situation arrived in a letter from one of the most distinguished social scientists in the country, a resolute Revisionist. He wrote:

> I am devoting my seminar this quarter to the subject of American foreign policy since 1933. The effect upon a Roosevelt-bred generation is startling, indeed. Even able and mature students react to the elementary facts like children who have just been told that there is (or was) no Santa Claus.

While World War I headed the United States and the world toward international disaster, World War II was an even more calamitous turning point in the history of mankind. It may, indeed, have brought us—and the whole world—into the terminal episode of human experience.

It certainly marked the transition from social optimism and technological rationalism into the "1984" pattern of life, in which aggressive international policies and war scares have become the guiding factor, not only in world affairs but also in the domestic, political and economic strategy of every leading country of the world.

The Police State has emerged as the dominant political pattern of our times, and military state capitalism is engulfing both democracy and liberty in countries which have not succumbed to Communism.

The manner and extent to which American culture has been impaired and our well-being undermined by our entry into two world wars has been brilliantly and succinctly stated by Prof. Mario A. Pei of Columbia University in an article, "The America We Lost," in the *Saturday Evening Post*, May 3, 1952. It has been developed more at length by Caret Garrett in his trenchant book *The People's Pottage*.

Perhaps, by the mid-century, all this is now water under the bridge and little can be done about it. But we can surely learn how we got into this unhappy condition of life and society—at least until the Police State system continues its current rapid development sufficiently to obliterate all that remains of integrity and accuracy in historical writing and political reporting.

The readjustment of historical writing to historical facts relative to the background and causes of World War I—what is popularly known in the historical craft as "Revisionism"—was the most important development in historiography during the decade of the 1920s. While those historians

at all receptive to the facts admitted that Revisionism readily won out in the conflict with the previously accepted wartime lore, many of the traditionalists in the profession remained true to the mythology of the war decade. In any event, the Revisionist controversy was the outstanding intellectual adventure in the historical field in the 20th century down to Pearl Harbor.

Revisionism, when applied to World War I, showed that the actual causes and merits of that conflict were very close to the reverse of the picture presented in the political propaganda and historical writings of the war decade. Revisionism would also produce similar results with respect to World War II if it were allowed to develop unimpeded. But a determined effort is being made to stifle or silence revelations that would establish the truth with regard to the causes and issues of the late world conflict.

While the wartime mythology endured for years after 1918, nevertheless, leading editors and publishers soon began to crave contributions that set forth the facts with respect to the responsibility for the outbreak of war in 1914, our [America's] entry into the war, and the basic issues involved in this great conflict.

Sidney B. Fay began to publish his revolutionary articles on the background of World War I in the *American Historical Review* in July, 1920. My own efforts along the same line began in the *New Republic*, *The Nation*, *The New York Times Current History Magazine* and the *Christian Century* in 1924 and 1925. Without exception, the requests for my contributions came from the editors of these periodicals, and these requests were ardent and urgent. I had no difficulty whatever in securing the publication of my *Genesis of the World War* in 1926, and the publisher thereof subsequently brought forth a veritable library of illuminating Revisionist literature.

By 1928, when Fay's *Origins of the World War*[3] was published, almost everyone except the die-hards and bitter-enders in the historical profession had come to accept Revisionism, and even the general public had begun to think straight in the premises.

Quite a different situation faces the rise of any substantial Revisionism after World War II. The question of war responsibility in relation to 1939 and 1941 is taken for granted as completely and forever settled. It is widely held that there can be no controversy this time. Since it is admitted by all reasonable persons that Adolf Hitler was a dangerous neurotic who, with supreme folly, launched a war when he had everything to gain by peace, it is assumed that this takes care of the European aspects of the war-guilt controversy.

With respect to the Far East, this is supposed to be settled with equal finality by asking the question, "Japan attacked us, didn't she?"

> The question of war responsibility is taken for granted as completely and forever settled.

About as frequent as either of these ways of settling war responsibility for 1939 or 1941 is the vague but highly dogmatic statement that "we had to fight." This judgment is usually rendered as a sort of ineffable categorical imperative that requires no further explanation. But some who are pressed for an explanation will allege that we had to fight to save the world from domination by Hitler, forgetting Gen. George C. Marshall's report that Hitler, far from having any plan for world domination, did not even have any well-worked-out plan for collaborating with his Axis allies in limited wars, to say nothing of the gigantic task of conquering Russia. Surely, after June 22, 1941, nearly six months before Pearl Harbor, there was no further need to fear any world conquest by Hitler. [June 22, 1941 was the date of Germany's Operation Barbarossa invasion of the Soviet Union.—Ed.]

The mythology that followed the outbreak of war in 1914 helped to produce the Treaty of Versailles and World War II. If world policy today cannot be divorced from the mythology of the 1940s, a third world war is inevitable, and its impact will be many times more horrible and devastating than that of the second. The lessons learned from the Nuremberg and Tokyo trials have made it certain that the third world war will be waged with unprecedented savagery.

Vigorous as was the resistance of many to the Revisionism of the 1920s, including powerful vested historical interests, it was nothing compared to that which has been organized to frustrate and smother the truth relative to World War II. History has been the chief intellectual casualty of WWII and the Cold War that followed.

It may be said with great restraint that never, since the Middle Ages, have there been so many powerful forces organized and alerted against the assertion and acceptance of historical truth as are active today to prevent the facts about the responsibility for World War II and its results from being made generally accessible to the American public.

Even the great Rockefeller Foundation frankly admits the subsidizing of historians to anticipate and frustrate the development of any neo-Revisionism in our time.[4] And the only difference between this foundation and several others is that it has been more candid and forthright about its policies. The Sloan Foundation later supplemented this Rockefeller grant. Charles Austin Beard summarized the implications of such efforts with characteristic vigor:

> The Rockefeller Foundation and the Council on Foreign Relations … intend to prevent, if they can, a repetition of what they call in the vernacular "the debunking journalistic campaign following WWI."
>
> Translated into precise English,

> this means that the foundation and the council do not want journalists or any other persons to examine too closely or criticize too freely the official propaganda and official statements relative to "our basic aims and activities" during World War II.
>
> In short, they hope that, among other things, the policies and measures of Franklin D. Roosevelt will escape in the coming years the critical analysis, evaluation and exposition that befell the policies and measures of Woodrow Wilson and the Entente Allies after WWI.[5]

As is the case with nearly all book publishers and periodicals, the resources of the great majority of the foundations are available only to scholars and writers who seek to perpetuate wartime legends and oppose Revisionism. A good illustration is afforded by my experience with the Alfred P. Sloan Foundation, which helped to subsidize the book by Profs. Langer and Gleason. I mentioned this fact in the first edition of my brochure on *The Court Historians Versus Revisionism*. Thereupon I received a courteous letter from Mr. Alfred J. Zurcher, director of the Sloan Foundation, assuring me that the foundation wished to be absolutely impartial and to support historical scholarship on both sides of the issue.

He wrote in part:

> About the last thing we wish to do is to check and frustrate any sort of historical scholarship since we believe that the more points of view brought to bear by disciplined scholars upon the war or any other historical event is in the public interest and should be encouraged.

In the light of this statement, I decided to take Mr. Zurcher at his word. I had projected and encouraged a study of the foreign policy of President Herbert Hoover, which appeared to me a very important and much needed enterprise, since it was, during his administration, that our foreign policy had last been conducted in behalf of peace and in the true public interest of the United States rather than on behalf of some political party,

Perpetual War for Perpetual Peace

A Critical Examination of the Foreign Policy of Franklin Delano Roosevelt and Its Aftermath

Here is a classic collection of historical Revisionist essays edited by Harry Elmer Barnes dealing with the astonishing duplicity of U.S. foreign policy leading up to World War II. Really nine books in one, this collection will forever change your understanding of how America was dragged into WWII. This volume:

- Details the methods used to suppress historians who dare to discuss the behind-the-scenes instigators of world events.
- Reveals how the betrayal of Woodrow Wilson's Fourteen Points and the terms of the 1918 Armistice laid the basis for World War II and describes the deliberate policies successive Allied governments followed that could result only in a new conflict.
- Shows how American hostility increased as Hitler opposed Jewish influence in Germany.
- Details FDR's anti-German policy in Europe and his unsuccessful efforts to directly enter the war through the "front door."
- Provides an overview of Roosevelt's foreign policy initiatives that were designed to drive Japan into the war.
- Discusses Roosevelt's rejection of all Japanese peace overtures from 1933 to the end of 1941, and of how he ultimately succeeded in goading the Japanese into attacking Pearl Harbor.
- Provides a thorough account of the outcomes of the various investigations of the responsibility for the Pearl Harbor disaster. This includes the previously confidential report by Secretary of the Navy William Franklin Knox who flew to Hawaii immediately after the disaster and reported to the president that the Pearl Harbor commanders could not be held responsible for the tragedy as they had been denied vital information.
- Reveals the physical and monetary cost of Roosevelt's lies that brought the United States into World War II against the wishes of at least 80% of the American people.
- Investigates the bearing and effects of the Roosevelt-Truman global foreign policy on the national interest of the United States, and, in particular, how it reversed the tradition of American isolationism into one of taking on the role of "world policeman"—a policy which has led to an ever-increasing series of disasters for the American people.

Back Door to War

The Roosevelt Foreign Policy 1933—1941

Charles Callan Tansill, one of the foremost American diplomatic historians of the 20th century, convincingly argues that FDR ardently wished to involve the United States in the European war. When his efforts failed, Roosevelt provoked the Japanese into an attack on American territory. Doing so would involve Japan's Axis allies in war, also, and America would thus enter the war through the "back door" to destroy Germany. The strategy succeeded, and Tansill maintains that Roosevelt therefore welcomed Japan's attack on Pearl Harbor. Tansill demonstrates quite convincingly that FDR sought to include the United States in the war on the side of the Soviet Union from the very beginning, and duped the Japanese into firing the first shots at Pearl Harbor and other possessions in the Pacific. Tansill presents extensive primary material from State Department files, experts, period articles and impeccably sound reasoning. foreign government or dubious ideology. One of the most competent of American specialists in diplomatic history had consented to undertake the project, and he was a man not previously identified in any way with Revisionist writing.

My request was for exactly 1/30th of the grant allotted for the Langer-Gleason book. The application was turned down by Mr. Zurcher with this summary statement: "I regret that we are unable to supply the funds which you requested for Prof. __'s study." He even discouraged my suggestion to discuss the idea in a brief conference with the professor in question.

A state of abject terror and intimidation exists among the majority of professional American historians whose views accord with the facts on the question of responsibility for World War II. Several leading historians and publicists who have read my brochure *The Struggle Against the Historical Blackout* have written me stating that, on the basis of their own personal experience, it is an understatement of the facts. Yet the majority of those historians to whom it has been sent privately have feared even to acknowledge that they have received it or possess it. Only a handful have dared to express approval and encouragement.

Moreover, the gullibility of many "educated" Americans has been as notable as the mendacity of the "educators." In Communist Russia and Nazi Germany, as well as in Fascist Italy and in China, the rulers found it necessary to suppress all opposition thought in order to induce the majority of the people to accept the material fed them by official propaganda. But, in the United States, with almost complete freedom of the press, speech and information down to the end of 1941, great numbers of Americans followed the official propaganda line with no compulsion whatever.

In many essential features, the United States has moved along into the "1984"-pattern of intellectual life. But there is one important and depressing difference. In *1984*, Mr. Orwell shows that historians in that regime have to be hired by the government and forced to falsify facts. In this country today, and it is also true of most other nations, many professional historians gladly falsify history quite voluntarily. ❖

Did Lincoln stop a Rothschild takeover of America?

Dixieland Deceived

The Grand Conspiracy Behind the U.S. Civil War

THE TRUE STORY of the U.S. Civil War, aka the War Between the States, aka the War of Northern Aggression, does not "lie in the middle" somewhere but, rather, is something altogether different from either the contemporary Northern establishment account or the Southern Revisionist version. In reality, the brotherly bloodbath of 1861-1865 wasn't really, in its true essence, a "civil war" as much as it was an attack launched upon the United States from an invisible foreign power with traitorous agents and sincere dupes operating in both the North and South.

It was "the usual suspects" based in Rothschild's Europe and aligned with the empire-seeking plantation aristocracy based in the South. It was this elite who long-range-planned and, under one false pretext after another, finally executed America's greatest disaster. And it was the determined leadership of President Abraham Lincoln that thwarted the elaborate scheme of this deadly cabal in the end. Acclaimed "Correctionist historian" and investigative journalist Mike King will take you on an exciting "you are there" illusion-shattering suspense ride through this important era of U.S. history which still holds modern-day implications.

What People Are Saying:

"Over a decade of learning history in the public school system taught me nothing. I now feel that it was intentionally boring so we didn't care to look too closely at who was involved. In [reading this book], I learned 1,000 times more. There are other conspiracies surrounding the intentions of the founders of the country and the intentions of those involved in Reconstruction, however, this book has completely changed the context. I could not put it down and, although I have disagreed with some of [King's] work in the past, I have always respected him as a journalist and his work is always something to think about, because he knows how to make a point and to limit the clouded details. And he knows BS when he sees it."

—DAVID GRIFFIN

"As a descendant of a Confederate soldier, I was raised on a steady diet of what I now believe to be fabrications and lies. I joined the Sons of Confederate Veterans and was disturbed by the number of men present who wore rings bearing the symbols of a secret society. I noticed often that the Confederate flag was positioned with the stars pointing downward, and another red flag significant of the secret society. Now I understand why! This book has taken the scales from my eyes. Amazing what original source material will do. Mike King has done a wonderful job of clearing away the fog of propaganda. Read this book. It is truth."

Where Are the Great Men?

A quiet (troubled) reflection in the evening of life

STANDING AT A CROSSROADS in the history of civilization and his own life, TBR Contributing Editor Ronald L. Ray, ever still in awe of the great Revisionist scholars, researchers and scientists of our time, asks the necessary—even if uncomfortable—question: Where do we go from here?

By Ronald L. Ray

One of the earliest Christian traditions tells us that St. Peter the Apostle was prevailed upon by the young Church at Rome to flee the beginnings of Nero's savage, bloody persecution of the Christians. As he hurried down the Appian Way, it is said that he encountered Jesus Christ, walking toward the capital city of most of the known world. Taken by surprise, the aging fisherman stopped abruptly and asked, "*Quo vadis, Domine?*" ("Whither goest Thou, O Lord?") To which Jesus replied, "I am going up to Rome to be crucified again."

Struck with compunction, St. Peter turned immediately around to follow Jesus back to the terror he had just fled. Soon thereafter, the earthly leader of Christ's church was arrested and put to death by crucifixion on the hill of the Vatican—upside down, because he considered himself unworthy of death in the same manner as his Lord.

Each moment, each of us faces choices about the direction of his life. Rarely are they so dramatic, but they are, nevertheless, of eternal import to our place in history—and in the afterlife.

For 15 years, I have had the enviable privilege of knowing, working with, and being treated as a colleague by some of the greatest defenders of controverted truth to have lived in our time. These are men and women who, compelled by conscience, faced down the infernal leviathan of the would-be rulers of this world and their Great Lie with nothing more than the courageous conviction that the truth must be told about history. This small handful of men and women have caused empires to tremble and fortresses of fakery to fall. That is no exaggeration.

WILLIS ALLISON CARTO

In first place, it is necessary for me to name Willis Allison Carto (1926-2015)—not because he was the first Revisionist, nor even because he conducted groundbreaking research. (To my knowledge, he never did.) But because, for more than 60 years, Willis (who insisted I call him that, rather than the "Mr. Carto" I thought he deserved) did more than anyone else publishing in the English language to ensure that true history, true science and true facts were available, read and known by as many people as humanly possible.

Willis was one of the first to expose Dwight D. "How I Hate the Germans!" Eisenhower's genocidal war crimes against surrendered German soldiers and sailors, as well as against the German civilian population. And Willis gave voice in *The American Mercury* (previously edited by H.L. Mencken) to those, including famous authoress Taylor Caldwell, who opposed the increasing tyranny of the federal government and the radical anti-White racial policies foisted upon a more-than-90% White American population by leftist Jews and self-loathing, wealthy White liberal elitists in the 1960s. The authors he published—and he himself—saw clearly the destruction of civilization to which multi-

culturalism and oligarchic oppression of Caucasians would lead.

While The John Birch Society (JBS) soon sold out to the Zionist lobby for 30 pieces of silver, Willis already had founded LIBERTY LOBBY and then, later, *The Spotlight* newspaper to defend constitutional government in the United States, far outstripping the comparatively lesser, even if notable, influence of the neutered JBS.

At one time, Willis was probably the man most feared and hated by the Jewish lobby. One of the leaders of the terrorist Zionist Organization of America actually demanded that Willis be killed for that reason.

Willis founded the INSTITUTE FOR HISTORICAL REVIEW (IHR) in order to tell the truth about World War II and National Socialist Germany at a time when the Holocaust industry was just hitting its full swing with financial shakedowns, force-fed "history," and unsavory—at times, terroristic—forms of censorship. It was also just before the Jewish would-be rulers of the world had totally consolidated either the ubiquity of their false narrative about the "extermination" of the Jews or their diabolical stranglehold on the reins of American government.

Not only was Willis a decades-long, highly successful proponent of both American and White nationalism, as well as political populism, with publications reaching millions of people over the years, he was also responsible for ensuring that research into the true facts about National Socialist Germany by a number of European Revisionist scholars was translated and published for the English-speaking world. In some cases, like that of German historian Udo Walendy, whose works are largely banned in the Fatherland, Willis's efforts ensured that important scholarship did not disappear down the Memory Hole.

Willis also came to know the great Gen. Leon Degrelle, founder and leader of the Belgian, Catholic, National Socialist Rexist (Rex, for Christ the King) movement, about whom Adolf Hitler once said, "If I were to have a son, I would like him to be like Leon."

Willis had just begun publishing English translations of Gen. Degrelle's planned life-work, *The Hitler Century*. To this day, while Degrelle's *opus magnum* exists in French, only a few small volumes out of approximately 30 exist in English. One of those is TBR's own *Hitler Democrat*. The other, published when Willis headed up the IHR, was titled *Hitler Born at Versailles*. Unfortunately, Degrelle died before the massive translation project could be completed.

But, while Willis and his wife Elisabeth suffered greatly from the Zionist lobby's apparent victories against the IHR (including a 1984 Jewish Defense League firebombing that destroyed the IHR's warehouse and $1 million in books), *The Spotlight* and LIBERTY LOBBY, Willis was far from beaten. He started this publication, THE BARNES

REVIEW, in 1994 and was integrally involved in the start of *American Free Press* in 2001.

The latter newspaper launched its inaugural issue by immediately investigating and exposing the 9/11 false-flag terrorist plot against America.

Willis was a great patriot, a decorated, combat-wounded WWII veteran and an indefatigable voice for truth and the "little guy." He is very much missed. You can, however, read more about Willis and peruse dozens of his written articles in *Appeal to Reason*, available from his widow's website www.WillisCartoLibrary.com.

OUR GLORIOUS PAST

But what about the many Revisionists to whom for decades Willis gave voice? We can only touch on a few out of many, or this article would stretch to many more pages than I am allotted. In fact, a complete account would require a book. So, I will confine myself to a few I have known personally, and to brief mention of a few of the greatest in various countries as only an abbreviated overview.

UDO WALENDY

One of the earliest and greatest WWII Revisionist historians was Udo Walendy, a Catholic German schoolteacher who, already in 1955, lost his position because he dared to tell his students the truth he had researched regarding World War II Germany. The dismissal letter actually stated that, while university professors enjoyed academic freedom, other teachers must adhere to the "official" position. Already, truth was not a defense in Germany. Decades later, when a septuagenarian, Walendy was imprisoned for "not writing" about the "official" view of the Nazis. He never was found to have presented the least historical error in his "Holocaust denial" writings, but, for some people, facts cannot get in the way of the propaganda.

In 1965, Walendy published the German original of *Truth for Germany: The Guilt Question of the Second World War*, which soon was banned for 21 years, allegedly because it was a "danger" to youth. The book is a monumental work of approximately 475 pages, documenting every aspect of how Germany was forced into war with the world. And, while it has been augmented since by new information uncovered in former Soviet archives, it is still a standard reference and a must-read. TBR proudly published the first English translation, as well as *The Brainwashing of the German Nation*. Walendy also wrote *Forged War Crimes Malign the German Nation*, a small but incredible documentation of dozens of forged photographs employed by the WWII Allies and the Jews in their postwar efforts to paint Germany as a criminal nation responsible for thepurported homicidal gassing of 6 million or more Jews.

> Walendy was one of the most important and unvanquished voices for German Nationalism.

Walendy's undoing, however, was his key testimony in the 1980s Canadian trial of Ernst Zündel. Walendy naively trusted in "free speech," only to return home to years of persecution, prosecution, deprivation of his university degree and imprisonment. Harassed but never beaten, Walendy passed away in 2022 at the age of 95.

While I never had the opportunity to meet Walendy or his wife—who also was prosecuted by the German government for publishing her husband's views—he is nevertheless the indirect cause of my involvement in Revisionism.

In 2009, I answered an advertisement for a German translator in *American Free Press* newspaper. To my surprise, I ended up speaking with Elisabeth Carto, who said they needed someone to translate Revisionist articles. My very first assignment was an article by Walendy from his *Historisiche Tatsachen* [*Historical Facts*], regarding guilt for the 1941 war campaign in the Soviet Union.

Well, anyone who has ever read academic German knows how difficult it is to translate into English. I nearly despaired of completion. But, evidently, the Cartos liked my work, because they soon asked for more translations, and then I was asked to write my own articles on various subjects for both TBR and AFP. It has been an incredible privilege during the last 15 years to translate, write and edit for both publications.

During the last decade and a half, I have been privileged to collaborate with more than one well-known Revisionist. All have been unique, sometimes irascible as strong personalities are wont to be, but always fascinating, scholarly, kind beyond measure, and uncompromisingly dedicated to telling the truth, no matter the personal cost.

GÜNTER DECKERT

I recall Günter Deckert, an incredibly tough, provocative, outspoken man, who worked and published tirelessly in defense of German nationalism and against the destructive flood of racially foreign elements inundating his homeland. Deckert was, like Walendy, a schoolteacher—and a very successful one. But, when he began to speak out in favor of nationalism—which the Allied-controlled Federal Republic of Germany treats as identical to National Socialism—he lost his job and pension. He even had to flee into exile and seek asylum more than once. He also wrote an extensive book about his first imprisonment for "thought crimes."

Deckert was, nevertheless, one of the most important, unvanquished political voices for German nationalism over many decades. During the 1990s, he was the head of the German National Democratic Party (*Nationaldemokratische Partei Deutschlands*). Even in his 80s, he still held political office at the local level—much to the chagrin of the establishment.

Above, four prolific Revisionists: From left to right, German publisher and historian **Udo Walendy** (1927-2022), who debunked the Allies' war guilt claims; **Dr. Fredrick Töben** (1944-2020), founder and director of the Australia-based ADELAIDE INSTITUTE, a Revisionist organization dedicated to correcting the historical record of World War II; **Günter Deckert** (1940-2022), a translator of politically incorrect but historically accurate information on the Holocaust and World War II; and Belgian **Gen. Leon Degrelle** (1906-1994), whose eyewitness accounts of WWII have been invaluable additions to the historical record.

It was also in his 80s that Deckert was imprisoned a second time, condemned to what the Powers That Be obviously hoped would be a life sentence. Although a diabetic, he was refused sufficient health care and lost a leg by amputation. Even then, the prosecutor opposed clemency. The deluded state's attorney claimed, among other absurdities, that the one-legged octogenarian was a "flight risk," who might, if freed, hop on one leg out of the country to continue his nefarious work of telling the truth. By the grace of God, however, Deckert was finally released and allowed to return home to his family.

Unknown to many, Deckert was an enthusiastic philatelist. Many times in our correspondence he would request that I return to him the postage stamps he had used to mail something to me.

He also translated and published the German translation of *The Postal History of the Nuremberg Rallies* by John Rawlings and Michael Passmore. Fascinating even from an art history perspective, the book covers the little-known achievements of the Reich Post Office which occurred precisely within the context of, and because of, the massive—and massively successful—NSDAP party rallies.

Deckert and I would often correspond about current events and their relationship either to Revisionism or German and American nationalism. In what would turn out to be his last months, he would always ask me if I were still "Covid-free." Ironically, it was to be that artificially created Covid-19 virus—or, perhaps more accurately, the ensuing and less-than-helpful hospitalization—which led to his passing from the world in 2022.

He was always proud to defend his homeland against the genocidal New World Order. May Germany become worthy of many more such men.

DR. FREDRICK TÖBEN

And then there was the inimitable Dr. Fredrick Töben (1944-2020)—a man who bristled a bit when people would use his academic title, even though, from our perspective, he certainly deserved the courtesy. Fredrick was to Revisionism in Australia what Willis Carto was in America: a prolific publisher, through THE ADELAIDE INSTITUTE, of innumerable articles and other works that sought to bring the truth about World War II to a greater audience, and to oppose the culturally corrosive influences of the international Zionist lobby. Fred was also a key figure in the International Conferences on Revisionism, which Willis organized for a period of years in the United States.

Ever the educator and German Hegelian philosopher, Fredrick had an incredibly lofty and overarching worldview, from which he interpreted countless ideas and events (past and present, often together). For him, the Jewish influence in society is opposed intrinsically to Western European civilization. Jewish writings confirm this antipathy, which is based on ingrained racial supremacism.

But the big question for Fredrick was how the White European cultural thesis could free itself of the Judaic antithesis to achieve a new synthesis at a higher level, which would, through its own intrinsic spiritual value, overcome and separate itself from the destructive, war-producing, materialistic influences imposed on the White world by "the Tribe" and its tributary fellow travelers. He believed achieving this would ultimately result in a culturally richer and more peaceful world.

Without doubt, Fredrick Töben's outspokenness earned him the ire of organized Jewry, and they made him pay for it with more than one prison term (including time in maximum security for his thought crimes) and more than one bankruptcy, due to

fines and court costs imposed on him by a rigged judicial system. But Fredrick, despite the suffering such treatment caused, took it all in stride and stayed true to his values until the end.

HONORABLE MENTIONS

Finally, let us briefly review some other Revisionists of note, particularly those who may now be on the verge of being forgotten. This is by no means intended as a complete list, so apologies to everyone who is not named.

DR. WILHELM STÄGLICH

Dr. Wilhelm Stäglich (1916-2006), a German judge who, in his youth as an officer of the Luftwaffe had been stationed near Auschwitz, wrote a letter to the editor of *Nation Europa* in the 1960s following the Frankfurt war crimes trials, stating that he had never observed anything unusual at the concentration camp.

The persecution was swift and resulted in attempts to disbar him and a successful effort to halve his pension. He chose to retire early and spent more than a decade researching and writing what originally appeared in English through the IHR as *The Auschwitz Myth*. Currently in print again as *Auschwitz: A Judge Looks at the Evidence*, the 400-page tome was one of the first and most thorough examinations of the Nuremberg and Frankfurt war crimes trials, exposing for all to see the fraudulent and corrupt way in which those kangaroo courts were carried out.

It was not long before the German authorities, with no little historical irony, not only banned but confiscated and burned all copies of the original German book. In 1984, Stäglich was deprived of his 1951 doctorate as additional punishment for the offense of telling the truth.

JÜRGEN STROOP

Then there is *The Stroop Report* by Jürgen Stroop, published in the original German with an English translation and commentary by publisher and historian Arthur Kemp. This is the official military report by the officer in command of the operation to destroy the Warsaw Ghetto during WWII. It is a much-needed corrective to the fantastical lies and exaggerations of the Court Historians about the event.

JOHN C. BALL

In 1992, John C. Ball published *Air Photo Evidence and The Ball Report*, proving through examination of, primarily, the Allies' own voluminous archive of air reconnaissance photographs, that homicidal gassings and 24-hour-a-day cremations never happened, but that images were altered—sometimes quite primitively—for propaganda purposes.

> The authorities banned, confiscated and burned all copies of the original book across Germany.

AND MORE

We move on to Paul Rassinier, a French socialist who was the first person of prominence in France to criticize the Holocaust myth. He was followed by Robert Faurisson, half French and half Scottish, who came to epitomize non-ideological, scholarly Revisionist examination of the alleged genocide of the Jews. The French government passed a special law, popularly referred to by Faurisson's name, specifically to try to stop the spread of his influence on society.

We must also mention Horst Mahler, Sylvia Stolz, Arthur Butz, David Irving, Germar Rudolf, Jürgen Graf, Carlo Mattogno, Ingrid Weckert, Fred Leuchter and Ernst Zündel.

Then there is Lady Michele Renouf, who, often through her own personal resources, has been bringing Holocaust Revisionism to audiences in multiple countries—including in Germany—at great risk to herself.

This is by no means a complete list, and we have no doubt that many of you will write to TBR, asking, "But what about so-and-so?"[1]

WHAT OF THE FUTURE?

Time moves forward with an inexorability matched only by the certainty of death. It is with difficulty that I grasp the fact that a quarter of my life thus far has been spent contributing in what is truly only a very modest way to the Revisionist cause. Those who preceded us, and who have paid too often a severe price for their integrity and their groundbreaking research, are passing from this Earth at an accelerating rate, which is alarming to us who are the lesser heirs of greater men.

We view with no little alarm the increasing barbarity with which those who dare to question the dogmas of Holocaustianity and other "known facts," like those of the September 11, 2001 attacks on the United States, are ostracized, punished and very often deprived of the possibility of earning a living. Those who are most outspoken are thrown into prison, often on trumped-up charges, where they are treated in a manner that can only be described as torture.

"Yes, that's overseas," you say. But it has happened already to those like the late Rep. James Traficant and White nationalist William A. White. And it is happening now to those who, innocently and peacefully enough, were present at the pro-Donald Trump "Stop the Steal" rally at the U.S. Capitol on January 6, 2021. Telling the truth about history and the world continues to be risky business.

So, as the old guard departs this life, who is there who will carry on? Will the Jewish lobby finally establish its total control over the dwindling White population, now only at most 17% of the global population? Will it succeed in its ongoing White genocide? Demography is destiny. If the remaining Caucasian race, which in Western Europe and North America is largely beyond child-bearing years, does not

start having large families of six or more children, immediately, the mixed-race madness, foretold with glee by Count Coudenhove-Kalergi and long sought by the conspirators seeking world control, is an inevitability. Let us remember that children are a blessing from God.

And what of the false religion of Holocaustianity and the myth of the 6 million? Who will "speak truth to power" when those of us who are older are gone? Who will dedicate himself (again, that means women, too) to telling the truth about Adolf Hitler, about Germany of 80 and 100 years ago, about the various forms of National Socialism which, across Europe and even in the United States at the time, nearly liberated Europe and America from the death grip of international banksters like the Rothschilds and their financial myrmidons?

Who will continue to prove that, far from genocide, more Jews claimed (and still claim) reparations from Germany after World War II than had ever been living in the German sphere of influence at its height? Who will expose the incestuous relationship between Zio-Anglo-American exploitational capitalism and Judeo-Communist totalitarianism? Does it even matter? Do younger people care?

Thankfully, many—perhaps even a growing number—do. I meet many younger men and women who already are familiar with the ideas and facts put forth by Revisionists for the past 75 years, which they mostly find on the internet in ways that are a mystery to me, personally, since I know how much censorship exists. Yet they are enthusiastic proponents, if rather secretive for obvious reasons.

They are, nonetheless, still a tiny minority that needs to grow exponentially. Who will carry the message of truth to the masses, and how, especially in a world increasingly corrupted and controlled by the international plutocrats and their self-loathing White minions? Who will free us from the death spiral of wage slavery?

Two such men were interviewed recently by American Free Press newspaper Bradley Griffin is a co-founder and editor-in-chief of *Occidental Dissent*, an online journal of populist and nationalist thought. Warren Balogh, who appears to many to be a sincere activist, helped found the National Justice Party, which was established to be a voice for the Alternative Right, traditionalist worldview. Please look them up.

We also should mention Ostara Publications and Antelope Hill Publishing, which are dedicated to republishing many valuable and thought-provoking books. There are many others. Please help us find them. Help us give them a greater voice. Help TBR find a greater voice with those who are following after us.

> Should we acquiesce in their plans for a global plantation run by a few wealthy lords of chaos?

Almost universally, younger folks have never heard of Willis Carto, Udo Walendy, Victor Thorn, Fred Leuchter or the many others who have completed so much primary research upon which the Revisionist movement is built. They are finding the message, but they are not reaching the roots, thus the tree of truth they are climbing remains in danger of toppling.

Archduke Otto von Habsburg taught his children that we must know where we came from, in order to know where we are going. We know that most of our readers are also among the older generations. Help spread our message. Share it with your children and grandchildren. Teach them the truth. Not just for six months or a year, but for as long as it takes. Help preserve our history, our culture—and our future.

But, again, does it matter? Is there still a reason to oppose the gas-chamber gurus and Zionist zealots who have brainwashed billions of people? Or should we just acquiesce in their plans for a global plantation run by a few super-wealthy, kabbalistic lords of chaos? Can we "secure the existence of our people and a future for White children"?

Obviously, we think the answer does matter. What do you think? Where do we go from here? How do we get there? Let us know. And let us know how you would like to help overcome the darkness with the light of truth. ❖

How a Catholic Archbishop Helped FDR Pave the Way for Global War

By Antonius J. Patrick

DEDICATION

After 30 years of fruitful existence, and despite the many obstacles thrown in its way by the Powers that Be, The Barnes Review (TBR) remains one of the few publications where free discussion of history is still allowed and encouraged. It is a tribute to its courageous founder and the current editor and staff that taboo subjects can still be debated. The following essay is dedicated to TBR founder Willis A. Carto and the journal's namesake, Dr. Harry Elmer Barnes, "to bring history in accord with the facts."

INTRODUCTION

If one wanted to know how the Catholic Church in America became an appendage of the U.S. government and a cheerleader for its interventionist foreign policy, and later its social engineering schemes, one need look no further than the activities of Archbishop and then Cardinal Francis J. Spellman (1889-1967) prior to WWII, and his wartime book *The Road to Victory*.[1] Spellman was an enthusiastic propagandist for U.S. participation in the war and an unabashed supporter of Franklin Delano Roosevelt, maintaining a longtime personal correspondence with the president.

The Road to Victory is filled with inaccuracies, falsehoods and distortions. Despite its blatant one-sidedness, however, the book serves as an invaluable insight into the mindset of one of the Church's leading lights at the time and explains how American Catholics fell in line with the Roosevelt administration's maniacal drive for war.

FRANCIS J. SPELLMAN
No objection to Soviet atrocities?

The level of state worship by a supposed "man of the cloth" is truly despicable. Spellman linked the founding documents of the country and its "democracy" to sacred scripture while putting forth the notion that America's participation in WWII was part of a "Divine Plan." One would think that a cleric would be on guard against such pridefulness but, for Spellman, this was most certainly not the case.

Like his fellow interventionists, who wrapped their rhetoric in platitudes like "defeating dictatorship," "saving democracy" and "securing small states' sovereignty," there was no mention of the inconvenient fact that America had aligned with and was massively supporting one of the greatest gangster states in all of history: Josef Stalin's Soviet Russia.

Nor is there any mention of America's own imperialist past, for instance, its meddling in Latin American affairs, or the fact that, under Abraham Lincoln (who Spellman praises), the U.S. government killed tens of thousands of its citizens who sought to establish their own sovereignty—principles that WWII was supposedly fought to protect. The hypocrisy is stunning.

By advocating American involvement and ultimate victory in the war, Spellman signed on to the death warrants of millions of Christians who would fight one another, not for their religion but to fulfill the hegemonic designs of the nation's power elite. While they were called the "Greatest Generation," their sacrifice, as history is now proving out, was largely in vain. The world they believed would come forth has been something quite different than what they were promised by the likes of Spellman.

PRE-WAR ACTIONS

As war clouds gathered over Europe, Spellman spoke of himself as a "man of peace," a moniker he also attributed to President Roosevelt:

This photo from *Stars and Stripes* magazine, from December 20, 1966, shows U.S. Military Vicar Francis Spellman with commanding officers of the U.S. Army Aviation Maintenance Center in Mannheim, Germany. The 77-year-old Spellman told the troops gathered: "It should be rewarding to every one of you to realize what your work [service in the U.S. military] means to all of mankind … to all of those who have sacrificed to save our country and gain peace." On the war raging in Southeast Asia, Spellman insisted, "This war in Vietnam is, I believe, a war for civilization. Certainly it is not a war of our seeking. It is a war thrust upon us and we cannot yield to tyranny."

> By vocation I am a man of peace. I am consecrated to Christ, the Prince of Peace. Unceasingly day and night I pray and I ask my flock to pray for peace. … Not knowingly would I injure anyone.[2]

The future cardinal had hoped that peace could be attained by "building a world safe for democracy on such foundations as the Treaty of Versailles."[3] Yet, one of the catalysts for WWII was the treaty which "men of peace," such as Spellman and FDR, did not seek to rectify, even though most admitted its horrific injustices.

While the archbishop and FDR spoke of peace, their actions were anything but. Almost every move they made—despite the fact that American Catholics and the country at large wanted no part of another European conflagration—pushed the nation to war. If they actually wanted an equitable solution to the European and Asian crises, taking into account the legitimate concerns and interests of all the parties involved, a world war would not have happened, at least America's needless participation in it.

One of the first steps that Spellman took in concert with FDR was the appointment of a new head for the Chicago Diocese. Cardinal George William Mundelein, the previous archbishop, died, but had been a staunch supporter of the president. FDR called Spellman and urged him to put in a prelate of a similar political outlook as the late cardinal. He understood that the Midwest was an area "where social conservatism, isolationism and hostility toward the pro-British policies of the administration had been very troublesome."[4] A new archbishop of Chicago, supportive of the administration's plans for war, would be a key asset.

Despite the pressure from FDR, Spellman chose a non-progressive candidate, but the incident shows how close a relationship the two had. As America moved closer to war, it would become tighter, especially with Spellman's appointment as military vicar of the Armed Forces of the United States.

Spellman often spoke highly about the country's devotion to the concept of "separation of church and state." One wonders if he ever questioned or had qualms about the chief executive officer of the government interjecting himself into a purely ecclesiastical matter. Of course, if circumstances were reversed and a clergyman badgered FDR about some political appointment, there would be an uproar. If Spellman was a true shepherd of the Church, he would have told the president to go pound sand and keep his nose out of ecclesiastical affairs.

OUTBREAK OF WAR

Despite the majority of Catholics wanting no part of the war, and despite the continued statements—at least publicly—of FDR promising neutrality, as newly appointed military vicar, Spellman nevertheless began prepping

for war. Yet, the war did not have to become a worldwide reality had the United States remained neutral and followed the desire of the vast majority of its citizens. It took the determined efforts of the likes of Spellman to prepare the nation for a conflict, as admitted by the archbishop's biographer Robert I. Gannon, S.J.:

> Many of his fellow citizens were convinced that the United States could maintain a strict neutrality and let Europe disintegrate without risk to the New World.[5]

Spellman, however, would have no part of such thinking, no matter how many lives would be lost, the destruction that would ensue or the loss of civil liberties at home:

> [B]ut no trace of this strange complacency is evident in any of the archbishop's speeches delivered to various large and important groups at this critical period.[6]

Spellman's mindset was in line with Pope Pius XII, who publicly spoke of peace among the nations but whose sympathies were with the Allies. Like Spellman, Pius XII knew FDR prior to the war and had a cordial relationship with the president. The Pope and Spellman's friendship went back many years, with each holding the other in high regard.

It was Pius XII who elevated Spellman to the College of Cardinals. Spellman's feelings toward the pope were described by Gannon:

> His mother would always remain one of the two great enthusiasms of his life. The other was, of course, the future Pius XII.[7]

Seen by many as the last "traditional pope," as more evidence surfaces, it appears Pius XII was in reality a "transitional figure," where, under his reign, the revolutionary seeds of Vatican II were surreptitiously sown.

Pius XII's warm relationship with FDR further indicates that he was considerably more progressive than most think. Besides his warmongering, the New Deal was the start of America's version of social democracy with the creation of the welfare/warfare state that began to take over many of the duties and roles that churches, charitable organizations and families played in society.

Another black mark on Pius XII's legacy was the mistreatment of Fr. Leonard Feeney, S.J. and his stance on *Extra Ecclesiam Nulla Salus* ("Outside the Church there is no Salvation"), along with his blunt criticism of liberal Catholicism. This had caused much embarrassment to the Church's hierarchy. [See TBR, January/February 2024 and March/ April 2024.—Ed.]

Spellman's fawning biographer acknowledged that a second world war, like the previous one, would not serve the interests of the United States:

> Another black mark on Pope Pius XII's legacy was the mistreatment of Fr. Leonard Feeney.

> The president was being bitterly criticized for his frank espousal of Great Britain's cause. People said we had made a mistake in saving the empire in World War I; that we should have listened to George Washington and avoided all foreign entanglements; that a negotiated peace with the victorious Kaiser would have been preferable anyway, avoiding, as it seemed, all the disastrous consequences of Versailles.[8]

While Spellman would admit as much, he still justified his actions because, somehow, in his mind, this conflict was of a different nature:

> But to the archbishop, World War II was not a war to save any particular country or class; it was a war to save human liberty, without which man could hardly achieve his end in life—the praise, reverence and service of God.[9]

This accurate description of Spellman is astonishing and reflects not only his ideological bent but what most of the American Catholic hierarchy believed at the time. Supposedly, the archbishop was taught, in his priestly formation, that man's end was to achieve the beatific vision that the clergy was supposed to facilitate. Anything and everything else are secondary.

Not only was Spellman's focus misplaced, but to believe that the war should be fought for human liberty when one of the combatants, Great Britain, murdered, persecuted, stole the property and wealth of millions of his fellow Catholics in England and Ireland over the centuries, was beyond simple hypocrisy. Another of America's potential "liberty-loving" allies, France, had just a short time earlier cracked down on Catholic education. That crackdown became known as the "school wars."

Of course, no mention by the archbishop of the terror which took place during the French Revolution, when thousands of religious were murdered and none of the Church's properties confiscated by the government was ever returned.

SPELLMAN & FDR

Like his commitment to U.S. involvement in the war, Spellman never wavered in his support for FDR. Gannon writes:

> In the president, he [Spellman] saw not a scheming squire using the commonalty for his own purposes, but the commander-in-chief, with authority from God through the people, a knight in armor revolting eloquently against the vicious attacks of two pagan tyrants and, furthermore, a personal friend of unusual charm.[10]

Such sycophancy is the antithesis of how a priest should conduct himself. In fact, Spellman should have avoided falling into such idolatry, since part of the divine office (which all religious are bound to say) contains Psalm 145: "Put not your trust in princes: in the children of men, in whom there is no salvation."

However, some doubt arose in Spellman's mind when the American-Soviet rapprochement began to take place:

> [B]eginning in December 1940, an element of uncertainty crept into this estimate, when one of the pagan tyrants became a democrat and a bosom friend of the champion overnight, but till the end of the war the archbishop's views of the cause and of the leader were to be substantially unchanged.[11]

While Spellman remained obstinately committed to FDR and the cause, his Jesuit biographer had no critical comments about how the archbishop could reconcile his devotion to the president with the fact that the United States had sided with an openly atheistic and repressive Communist regime.

This is just another example of how the Jesuit order had fallen and would be further seen in its persecution and expulsion of Fr. Feeney and the St Benedict Center, both of whom took exception to the U.S.-Soviet wartime alliance.

The relationship was far from one-sided. Not only did FDR count on Spellman to woo Catholics to the administration's position and keep him informed on Church affairs, but he quoted from the archbishop in some of his own speeches and correspondences.

The most influential of these was Spellman's talk at the National Convention of the American Legion in September 1940. The speech received national attention which, for the most part, came with enthusiastic reviews. "Isolationists," however, were "apprehensive" and believed—rightly—that "Roosevelt had found a new and powerful ally."[12]

As with most of Spellman's public pronouncements, it came with talk of peace but was qualified with a need for "preparation." He lamented the mistakes of World War I, but they should not prohibit America from engaging in action if the need called for it.

FDR noticed the popularity of the speech and its tone and began to use parts of it in his own addresses. It coincided nicely (for FDR's sake) with the first installment of the military draft, despite the fact that the United States was still not at war. The initial call for men was a "delicate operation at best" for the president, and would not be received favorably by Catholics of Irish and German extraction who "were inclined to view the end of British dominance in world affairs with equanimity."[13]

To allay the fears of the opposition, FDR took passages directly from Spellman's American Legion address which, in the words of one commentator, were "stronger in justification of Roosevelt's position than any he himself uttered in his campaign."[14]

In a letter to Spellman, FDR conveyed his gratitude for the archbishop's efforts in support of his policies and for his speech, which helped defuse a potentially embarrassing situation for the administration:

> Nothing could have been more heartening and reassuring … to the young men registered for possible service in the national defense, and to their families, than the message you gave to me to transmit to them on the occasion of the first drawing of numbers. …
>
> [Y]ou must have made millions grateful—the young men themselves, their families and many, many others, not affected in the same personal way but deeply desirous in their hearts of confirmation of the sacredness of the cause in which we are all enlisted.[15]

Spellman had done his part by lessening opposition to the draft. Still, the nation was not willing to enter the conflict. It was then up to President Roosevelt to provoke an incident or badger either Germany or Japan enough to attack first.

While both the president and archbishop have escaped any punishment in this world for the mass murder that took place due to their actions, they will not be so lucky with the Prince of Peace. He said, "Blessed are

The Hoax of Soviet 'Anti-Semitism'

Jews, Zionism, Communism and the Soviet Union 1918–1991

By Frank L. Britton. A fully referenced exposé of the lie that the Soviet Union was "anti-Semitic." It proves that the USSR was pro-Jewish, but anti-Zionist. Starting with an overview of the Jewish nature of Communism, the book discusses the internal conflicts in Jewish Communist circles, and of the eventual break between the Socialist Zionists and the Jewish Communists. It contains full quotes from Churchill, Trotsky and Esther Frumpkin, a leader in the Jewish Bund. Learn how the Soviet Union attempted to deal with Jewish demands for a homeland by creating Birobidzhan. At the same time, the USSR was the first nation in the world to recognize Israel in 1948. However, Israel's increasing racism and aggression toward its neighbors reopened the old split between Zionist and Communist Jews. By the late 1960s, relations between Israel and the USSR had broken down, and the Western media launched its "anti-Semitism in Russia" campaign. the peacemakers: for they shall be called the children of God."

THE ROAD TO VICTORY

After Spellman and his fellow warmongers succeeded in getting the United States into the conflict—made easier by the Japanese attack—the archbishop set pen to paper to justify the cause whose end result now was the complete annihilation of America's enemies, no matter the geopolitical fallout that would ensue.

In *The Road to Victory*, Spellman believes that the nation's very survival was at stake:

> We in America are fighting for our existence, for our lives and for humanity. … We know now that we are fighting World War II for the life of our country, for the life of our dear ones, for the life of our ideals, for our own lives."[16]

Somehow, if the country did not enter the war, it would be conquered by its enemies. Yet, even after the Japanese attack on Pearl Harbor, which many forget was not part of the nation but an overseas naval installation projecting American power in the Pacific, the mainland was never threatened with an invasion. No serious military analyst believed that the country could be conquered given its insulation between two oceans.

In fact, the United States could have easily stayed out of the war if the Roosevelt administration had sincerely pursued a non-interventionist foreign policy, which the majority of Americans rightfully favored.

The mendacious FDR repeatedly promised the country's mothers and fathers that "your boys are not going to be sent into any foreign wars."

If a peaceful course of action had actually been followed, hundreds of thousands of Americans would not have had to shed their blood, squander their fortunes or have died fighting for their "survival."

In hindsight, it is not hard to argue that the world might very well have been a better place had the United States stayed out of the conflict all together.

America's survival meant not only its people, but its institutions. Foremost among these was its democratic form of government, the liberties that flow from it, and the men who created it. While love of American democracy has been the reaction of the country's Catholics since its inception, and has carried on to this very day, most Catholic Church intellectuals of the past had always been extremely leery of democracy and republican forms of government in general. Yet, Spellman seems to think that human freedom was born with the founding of the republic.[17]

> Spellman and his fellow warmongers succeeded in getting the United States into the conflict.

The future cardinal's love of the nation's form of government was in line with members of the American Catholic hierarchy. They believed that it was divinely inspired. Spellman quotes from the Third Council of Baltimore in 1837:

> We consider the establishment of our country's independence, the shaping of its liberties and laws, as a work of special providence, its framers building better than they knew, the Almighty's hand guiding them. We believe that our country's heroes were the instruments of the God of nations in establishing this house of freedom.[18]

Spellman echoes this theme when he states: "From her founding fathers, America received a human character that has a divine sanction and implies a divine destiny."[19]

It seems that the churchmen at the council and the archbishop had somehow managed to let slip from their minds St. Paul's statements about how it is folly for man to try to comprehend the mind of God:

> So the things also that are of God, no man knoweth, but the Spirit of God. … For who hath known the mind of the Lord, that he may instruct him?[20]

And, the archbishop engaged in idolatry in his plea to join the fight:

> There are appeals to protect individuals whose avowed purpose is to destroy the Constitution, to tear it apart, to overturn by force the government which we all love and for which we are all willing to give our lives, as our forefathers did before us.[21]

The Divine Savior was quite clear on who his followers were supposed to love: God first, then his neighbor as himself. There has never been a "love thy government" commandment in the Christian moral code. Furthermore, did not the founding fathers, whom the archbishop holds in such high regard, "overturn by force the government" that they lived under, despite the fact that at least one-third of the colonial population at the time wanted no part of their "revolution?"

FOUNDING DOCUMENTS

The Declaration of Independence is cited by Spellman as the guidepost that governs the actions of the United States. This has been the case since the nation's inception. He said:

> This is the principal concern in America today, the preservation of our personal liberties. The first official act of our government was the solemn pledge in the Declaration of Independence to maintain and to preserve the God-given rights to life, liberty and the pursuit of happiness for all men.[22]

Archbishop Spellman should have known what was proven out in World War II: That the greatest threat to individual liberty is war. That is capsulized in Randolf Bourne's famous dictum "War Is the Health of the State." The archbishop was, apparently, unfamiliar with his own country's horrible record of wartime violations of per-

sonal freedoms. If he had been truly concerned with the protection of personal liberties, he would have been an advocate of true peace, not war.

His belief that God was the inspiration behind the Declaration of Independence and the creation of the national government that followed is puzzling, to some. In the opening two paragraphs of the document, an Omnipotent Being is mentioned—"Nature's God" and "Creator." It is clear that the "God" referred to is not the Triune Entity that Spellman consecrated his life to. The Declaration of Independence's authors, and most of its signees, would, no doubt, be outraged if they knew that Spellman was linking their Deity with the Christian God of Revelation. He continues:

> And for more than 160 years, this government of ours has exercised its power and authority for the sole purpose of protecting the rights, the responsibilities and the obligations that God has imposed on the soul of every citizen.[23]

This is nonsensical: How can a state protect "responsibilities" and "obligations" of its citizens?

Under social contract theory, which the Declaration of Independence is, par excellence, governments are created to protect individuals and property rights. Yet, the record of states has been just the opposite. Through their warmaking powers they have conducted mass murder on an unprecedented scale while, through taxation and money printing, they have expropriated untold amounts of wealth from the citizenry.

Spellman blasphemously ties sacred scripture with the founding documents of the United States. He argues:

> We should try to live ourselves and let others live in accordance with God's commandments and in accordance with the Constitution of the United States.[24]

In another passage, he states:

> [W]e still believe in America, in the fundamental righteousness of our Constitution, the basic righteousness of our people in their sincere desire to live in harmony, helpfulness and peace with their fellow men, and in obedience to her laws and the commandments of God.[25]

The undue veneration of the Constitution, even by Spellman's time, had been tarnished by the progressive historians, most notably Charles A. Beard and his *Economic Interpretation of the Constitution*. Beard showed that the founders had more in mind than pure political altruism. They wanted to secure their financial and political dominance in the new federal structure that came at the expense of the states.

The vast majority of the American populace opposed the ratification of the document, yet, by wily political maneuvering and underhanded tactics, the Constitution's proponents were able to foist it upon the country. As years have passed since Beard's seminal book was written, critiques of the Constitution have only proliferated.[26]

The archbishop also links the Ten Commandments with democracy, both of which lead to Christ:

> There is only one road to peace that I know of, the Highroad of Democracy, the road marked by the sign posts of the Ten Commandments, the road back to Christ and His teachings in personal life, in national life and in international life.[27]

The "Highroad of Democracy" which Spellman gushes about, by any objective measurement, has been a disaster for mankind. Social democracy, with its welfare programs, has destroyed the traditional family and emasculated men, making both dependents of the state. Economically, the more democracy (socialism) a society adopts, the more living standards fall. Culturally, the arts, music and literature are nowhere near the standards they were prior to the democratic age, as the state, which has become the primary benefactor of the arts, always favors the lowest common denominator to appeal to the masses.[28]

More troubling about Spellman is that he consecrated his life not to be a sycophant for America's wars, but to preach the Gospel and convert his

Adolf Hitler: Pictures from the Life of The Führer

Published by the Cigaretten-Bilderdienst; 203 photographs by Heinrich Hoffman. Text by Goebbels, Julius Schreck, Otto Dietrich, Wilhelm Bruckner, Robert Ley, Speer, Fritz Todt, Baldur von Schirach, Philipp Bouhler and Julius Schaub. A reproduction and translation of the famous original 1936 cigarette card photo album A*dolf Hitler: Bilder aus dem Leben des Führers* with articles from Hitler's entourage describing his life, work, and achievements. The original was sold as a blank book,. Then the owner would purchase the photographs separately. The images would then be manually pasted into pre-assigned places to complete the book. It contains 203 rarely seen photographs dealing with all aspects of Hitler's political work before his rise to power, and for the first few years thereafter. Regarded as a propaganda coup that helped consolidate Hitler's hold on power, this book sold in the millions by 1940, and was one of those ordered destroyed by the Allied occupation forces. This is not a "photocopy," but a perfect digital reproduction from a rare, high-quality German original. fellow countrymen, many of whom, he admits, are irreligious:

> A large portion of Americans do not go to church; large numbers do not pray to God. However, let us forget the past. Let us look to today. If we have been neglectful in the past, we can start to pray now.[29]

What the archbishop is saying is that one can start praying now and all is forgiven, as long as one supports the war effort.

COMMUNISM

The elephant in the room for Spellman, as for all of his fellow warmongers, was the Soviet Union. While Spellman condemns Communism in general, there is not one mention of Josef Stalin or that the United States aligned itself with him, providing the mass-murdering dictator with massive amounts of aid. This, of course, became very troublesome for Spellman once he heard that Hitler and Stalin had signed a non-aggression pact.

Nothing is said of Stalin's brutal invasion of Poland, yet the "totalitarian regimes" are condemned. The archbishop does not bring up, for example, that Germany had legitimate grievances with Poland over its harsh treatment of ethnic Germans—nearly all of whom were Christians—that came under its rule after World War I.

German diplomats attempted to negotiate in good faith, but the Polish government, in some of the most idiotic diplomacy ever conducted, rebuffed more than fair German overtures and gave the Reich little recourse but to resort to arms to protect ethnic Germans inside Poland from being displaced or murdered.[30] Similar things could be said about the way FDR "negotiated" with the Japanese, leaving them little alternative but war.

While Hitler had legitimate reasons for his actions against Poland, Stalin did not. Instead, the Soviet dictator's action was a pure power grab. What of the integrity of small nations that was one of the principles that the war was fought for? Spellman cites Pope Pius XII on the matter: "All nations, even small, may have their independent national life."[31] Where was the Catholic hierarchy's outrage, including Pius XII's, over Stalin's brutal take down of Poland?

Even to this day, when celebrations commemorating World War II are held, such as the recent 80th anniversary of D-Day, nothing is said about America and Great Britain partnering with an anti-Christian Communist state whose internal and external policies were the antithesis of why the war was supposedly waged. All the while, FDR had repeatedly spoken of the importance of religion in the conduct of civilization.

CONCLUSION

If Americans had wanted war from the outset, where most indicators of public sentiment were in favor of it and Spellman was articulating their desires, his pre-war activities and book, although wrong, would be less objectionable. This, however, was not the reality of the situation.

Instead, Spellman and the Roosevelt administration went against the will of the people and deliberately set out to involve the United States in another world war that the vast majority did not support until the Pearl Harbor attack.

While Roosevelt's actions could be understood as the self-aggrandizement of a politician, Spellman's cannot. The archbishop was consecrated to tend to the spiritual needs of his flock and to look out for their temporal welfare as much as possible. Participation in WWII served neither.

More damning for the archbishop was that the office he held had been instituted for a specific purpose. It had high standards by which its occupants had to abide. Cardinal Francis J. Spellman's actions before and throughout World War II, while they may have been in line with what the Catholic Church in America had morphed into, had not followed the designs of what its Divine Creator had intended His vicars to practice. ❖

What Revisionism Means to Me

Author reflects on the quest for historical truth

By Mike Mains

Revisionism and Revisionist history: For some reason, those words have been given a bad rap, much in the same way that the term "conspiracy theory" has also been demeaned, and probably for the same reason: to discredit those who seek the truth.

But let's look at what those words really mean. The words "revisionism" and "revisionist" come from the word "revise," which means to reconsider or alter something in light of further evidence. So, to revise something actually means to improve it. How, exactly, is that a bad thing?

Anyone who has ever written a book is familiar with the word "revision." You write the first draft and then you enter the revision period where you revise what you have written. This is where sentences are tightened, grammar is corrected, and, bit-by-bit, the book is molded into a final product.

Without a thorough revision, most books would be unpublishable. And, when you consider that almost every book coming from traditional mainstream book publishers today is unpublishable in terms of accurate information—even with their revisions—that's saying something.

Not only that, but the more you revise a book, the better it should become, and there's no end to the process. A book can be revised and made better for months, years and decades. In fact, there's an old joke about authors: One never finishes a book—he merely stops working on it.

So, when we think in terms of Revisionist history, what we're really doing is correcting the mistakes or, in some cases, the outright lies that "history" has handed down to us. We're improving and correcting the "official narrative" espoused by Court Historians, the mass media and the political establishment.

Needless to say, doing so carries an enormous responsibility. If you're going to improve upon history, then you'd best be doing it with facts and evidence, not personal interpretation, as those who would rewrite the Constitution want us to believe today.

A fact is something that can be proven. A belief is an opinion, which expresses what a person thinks or feels. Often, what a person believes about an event differs widely from the actual truth.

Sticking to facts and evidence requires hours of research and much hard work, which places Revisionist historians among the unsung heroes of modern society.

REVISIONISM AND ME

In 2015, I read my first Revisionist history book. It was Mike King's *The Bad War*. Shortly after that, I read *Did Six Million Really Die?*—now titled *The Six Million: Fact or Fiction?*.[1]

To say those books opened my eyes is an understatement. They didn't just open my eyes—they opened my mind and completely changed my perspective of history and even contemporary politics. I was forced to face an onslaught of my own questions.

You mean, I asked at the time, we were lied to? We weren't the good guys in World War II—like they told us in school—we were actually the bad guys? How could that be?

If you're an evidence guy like I am, then you know, when a witness is caught lying in court, all of their past and future testimony is called into question. The same thing happened to me when I read those two Revisionist books.

It was clear to me: If we had been lied to about WWII—and not just small distortions of facts but massive, deliberate lies about every aspect of the entire war—then we'd been lied to about *everything* else. Thus began my deep dive into Revisionist history.

Before reading those books, I was familiar with the role our government and mass media have played in numerous political assassinations and terrorist acts, such as the attacks of September 11, 2001. However, I never saw the big picture.

The researchers whose work I followed, Mae Brussell among them, had one-track minds when it came to who was behind all of those nefarious deeds. To them, it was always the "big, bad Nazis" who had somehow managed to escape Germany at the end of World War II and were now deeply embedded in every government of the world, controlling every aspect of our lives behind the scenes.

Exactly how that happened has never been explained.

Some of the more whacked-out researchers claimed without evidence that it was the Jesuits who were deeply embedded in every government of the world, and that they were the ones behind the scenes controlling every aspect of our lives. How that happened was never explained, either.

It wasn't until I began reading books of Revisionist history that the missing pieces of the puzzle finally

fell into place. It was Revisionist historians who put me on track to who's really controlling our lives—and it isn't the Nazis or the Jesuits.

WHY REVISIONISM MATTERS

"Who controls the past controls the future. Who controls the present controls the past," ran the party slogan. Those words from George Orwell's novel *1984* encapsulate why Revisionism is so important and so needed today. The past controls how people perceive the present, and the present controls the future.

When I first began reading Revisionist history books just a decade ago, the internet wasn't nearly as censored as it is now. Today, it's becoming more difficult to get honest history online. That's why your support of this magazine is so essential. It has become one of the last bastions of truthful history, and one of the few places willing to print and sell books written by Revisionist historians. These are books that give you the facts about what really happened in the past and why.

Produced in 1933, *Hitlerjunge Quex* drew from the real story of Herbert Norkus, a Hitler Youth killed by Communist street-fighters in 1932. The film pulls few punches in its depiction of Depression-era misery. The film became a Nazi propaganda staple for years. Produced by Karl Ritter. Directed by Hans Steinhoff. Red Storm Over the Village: Frisians in Peril

"Nazi cinema's most venomous anti-Soviet propaganda film!" Few political films made during the Third Reich were accorded the distinction of being distributed by the Goebbels Propaganda Ministry. Peter Hagen's *Friesennot* (*Frisians in Peril*) was awarded that distinction in 1935. Peter Hagen was a film reviewer for Goebbels's newspaper and then joined the Propaganda Ministry. There, he became a leading film critic. *Red Storm Over The Village: Frisians in Peril* dramatizes the plight of peaceful Germans from Friesland who lived in an isolated village on the Volga in Russia for generations. Their bucolic existence is shattered by the invasion of a cavalry detachment of the Red Army. A brutal Red Guard rapes and kills a young village girl. Then, when drunken troops desecrate the village's house of worship, the outraged Germans revolt. Multiple special features. German, 1935, 96 minutes, English subtitles, #1002, **$30**. Dr. Fredrick Töben

"I don't want to believe, I want to know"

By Freya Oldenburg

Dr. Gerald Fredrick Töben (1944-2020) was the author of works on education, political science and history. Later in life, he became interested in Revisionism and began researching many aspects of World War II.

He was born in Jaderberg, Germany in June 1944 and, in 1954, when he was 10 years old, his family relocated to Australia. He studied in Australia, New Zealand and Zimbabwe, and then completed his Ph.D. in Germany. He later taught in New Zealand and Australia, and he lectured in Nigeria.

In his mid-30s, Töben returned home to Australia with his wife and son. He was excited when he was offered a teaching post in Goroke, a small town in Victoria in 1983. His motto was:

> The Mediocre Teacher tells.
> The Good Teacher explains.
> The Superior Teacher demonstrates.
> The Great Teacher inspires.

Dr. Töben was a well-educated, experienced teacher, and he was keen to improve the school system's educational standards. However, a personality clash developed with the school's principal. He disagreed with Töben's teaching style. The principal claimed he was "incompetent and disobedient." This led to Töben's dismissal, which gained national attention.

At a social gathering at the time, Töben managed to seize the ear of the Victorian minister of education and pleaded for her intervention. She replied: "You'd be surprised how little influence a minister has in such matters, Dr. Töben."

DR. FREDRICK TÖBEN
Unbreakable Revisionist.

Whilst challenging his dismissal in court, he took up employment driving a school bus. He was recognized by the media as "Australia's most highly qualified school bus driver." Eventually he won his case for unfair dismissal but, sadly, his marriage became a casualty of the propaganda campaign against him. His book *The Boston-Curry Party: On the Sacked, Plundered and Smoking Australian Educational Battlefield at Goroke* details his experiences. Copies can still be found online.

In 1994, Töben established the Adelaide Institute, which published a monthly journal promoting historical Revisionism with a particular focus on exposing the many false claims concerning conduct of the German people and the German military during World War II.

He also openly discussed the Holocaust, but with a reasoned, forensic approach respected by many. It was this dedication to investigating and exposing "uncomfortable truths" about WWII that made him the object of vilification by hysterical media outlets and vindictive state authorities.

Töben rejected what he called the "official conspiracy theory" that the Germans systematically tried to exterminate European Jewry. This was accomplished, the official story goes, in homicidal gas chambers.

An often quoted line by Töben was: "I don't want to believe, I want to know." One of the topics he wanted to know the truth about was if the Germans actually had functioning homicidal gas chambers at the work camps. After investigating the topic, he discovered they did not—and he said so in his newsletter.

To date, the telling of 20th-century European WWII history continues to be a subset of law and politics but not truth. Almost 80 years since the end of WWII, German laws still threaten with imprisonment any truthseekers who question "official" claims and details about the Holocaust. Töben experienced that organized oppression first hand.

In February 1999, Töben left Australia on a study tour aimed to challenge various European countries' free speech policies and standards.

Dr. Fredrick Töben receives a miniature Koran from his hosts at the Teheran Holocaust Conference.

He said at the time:

> I shall seek the views of judges, politicians and other leading citizens on the alleged existence of the Auschwitz "homicidal gas chamber" claims made by alleged survivors of this concentration camp.

Töben arranged to meet Chief Prosecutor Hans-Heiko Klein at Mannheim Police Headquarters at 2 p.m. on Thursday, April 8, 1999, for a private discussion to clarify specific German laws that placed restraints on investigating Holocaust claims. Fredrick requested an earlier meeting, as he had another appointment with a judge in Bielefeld the same day. Chief Prosecutor Klein agreed to change the time to 11 a.m.

When Töben returned at 11 a.m., a high-ranking official, Mr. Mohr, was also present. Mohr claimed that, coincidentally, he just happened to be there. Unbeknownst to Töben, a trap had been set. After some discussion, Klein and Mohr stood up and arrested Töben for the crime of publishing Revisionist material on the internet.

Töben was held on remand for seven months before a hearing of the charges. In November 1999, Judge Kern sentenced him to 10 months in Mannheim Prison without suspending any portion of it. Kern added that he could immediately be released on posting what amounted to about U.S. $4,000 bail.

> Töben was a kind, brave and highly intelligent man who refused to lie just to avoid jail time.

On Thursday, November 11, 1999, Ernie Edwards of the Australian Embassy paid a visit to Töben. At the same time, Ludwig Bock, Töben's lawyer, arrived to say the bail money had been raised by a man named Eric, but not by Edwards or Bock. Eric would get the necessary signatures and paperwork to complete his release. Later that day, Töben walked out of prison.

In his mind he would recite the third verse of *Die Gedanken sind frei* (Thoughts are free—an old German *volk* song). The words are:

> *Und sperrt man mich ein im finsteren Kerker*
> *Das alles sind vergebliche Werke*
> *Denn meine Gedanken zerreissen die Schranken und Mauern entzwei*
> *Die Gedanken sind frei.*

(In English this means: "And if I am thrown into a dark dungeon; All these are futile attempts; Because my thoughts tear all barriers and walls apart; Thoughts are free.")

Interestingly, while imprisoned at Mannheim, Töben was elected spokesperson for 250 prisoners on remand. His experiences in Mannheim Prison are documented in his book *Where Truth Is No Defence*, available online.

About the entire Orwellian situation, Töben said:

> Every thinking human being is a Revisionist—Revisionism is nothing but a method, a heuristic

> principle with which to construct one's world view. Opinions are constantly revised through a free flow of information. Only encrusted minds cannot absorb new information and, so, moral responsibility does not come to the fore. Then citizens like me are arrested in a private discussion and thrown into prison.

But Töben's surreal legal odyssey was not over yet. In 1996, the Executive Council of Australian Jewry (ECAJ) filed a complaint with the Australian government's Human Rights and Equal Opportunity Commission (HREOC) against Töben pursuant to Section 18C of the Racial Discrimination Act (Clth) 1975.

Hearing Commissioner Kathleen McEvoy declared the ADELAIDE INSTITUTE had violated the country's Racial Discrimination Act by posting material whose main purpose was to "denigrate Jews." Deeming that the material was not of a historical, intellectual or scientific standard, she declared it should be banned on the basis that it was bullying, insulting and offensive.

On October 10, 2000, HREOC ordered the ADELAIDE INSTITUTE and Töben, the institute's director, to remove from its website material that "denies the Holocaust," and to issue an abject written apology to the country's Jews.

Welcoming the order, EACAJ Vice President Jeremy Jones stated: "Töben's Holocaust denial is offensive, insulting and, as HREOC has now confirmed, unlawful."

Peter Wertheim, a Jewish community leader and ECAJ lawyer in the legal action, said:

> This is a landmark case because it deals with hate on the internet, and it is the first in Australia, and quite possibly anywhere in the world, to have done so.

But Töben was not one to back down. He declared his defiance of the HREOC order, saying that he would not apologize for posting factually correct material:

> I shall do nothing, because I consider the proceedings that led to this order to have been immoral because "truth was not a defense." I cannot defend myself against someone's hurt feelings.

Following a ruling by the HREOC in 2002, the Federal Court of Australia in May 2009 granted a permanent injunction prohibiting Töben publishing "anti-Semitic material" on his ADELAIDE INSTITUTE website.

On August 13, 2009, Töben was sentenced to three months in jail on 24 counts of contempt of court for breaching the court injunction. He did his time at Cadell Correctional Facility, located in South Australia.

Dr. Töben was also ordered to pay $230,000 in legal costs—an amount sure to force him and the ADELAIDE INSTITUTE into bankruptcy. In response to the ruling. Töben declared:

> The Executive Council of Australian Jewry has succeeded in sentencing me. Free expression has been split into free expression and hate speech. Without free speech we have no quest for truth.

Töben poses for a photo at a TBR meeting in Washington, D.C.

NOT SAFE ANYWHERE

In October 2008, the German federal authorities unsuccessfully attempted to extradite Töben at Heathrow Airport, London. He had been transiting on an American Airlines flight from Chicago en route to Dubai. The European arrest warrant had been originally issued in 2004. The German authorities claimed material he published between 2000 and 2004 on the ADELAIDE INSTITUTE website in Australia was of an "anti-Semitic and/or Revisionist nature."

After a 50-day incarceration in Wandsworth Prison in London, District Judge Daphne Wickham ruled the warrant was invalid as it contained inadequate details about the offenses.

The German authorities conceded it would not have been possible to satisfy the British courts that the offense was extraditable. They later stated their intention to attempt to extradite him from other jurisdictions in the future. The case caused some controversy in the United Kingdom and Australia. His book *Fifty Days in Gaol* details that experience.

On December 11, 2006, Töben took part in the two-day International Conference to Review the Global Vision of the Holocaust in Teheran. The conference was attended by 67 scholars

Töben presides over a multi-national discussion group at the Teheran Holocaust Conference.

from 30 countries. Iranian President Mahmoud Ahmadinejad initiated the gathering. The conference was widely condemned by Jewish and Western media and politicians for daring to discuss different points of view on the Holocaust.

In 2012, further court proceedings were initiated by the Executive Council of Australian Jewry (ECAJ) to claim legal costs. This resulted in Töben's bankruptcy and the loss of his modest home.

From 2013 to 2017, Töben litigated a defamation action in the Supreme Court of New South Wales against Sen. Christine Milne and *Nationwide News* for publishing an article in which he was described as a "Holocaust denier," "anti-Semite" and "had fabricated history about the Holocaust."

The case was dismissed in 2017 due to the presiding judge at a pretrial hearing accepting the defendants' ludicrous submission (for which there was no supporting evidence) that Töben's principal reason in bringing the proceedings was not to vindicate his reputation but, rather, to use the proceedings to express his views on the Holocaust. Töben was ordered to pay legal costs. Again, bankruptcy proceedings were commenced.

Dr. Töben sadly passed away from a short but severe illness on June 29, 2020 at the age of 76.

Despite his trials and tribulations, he never adopted "victim status" or became a bitter man. He was a courageous gentleman to the end. He was a valiant and unwavering defender of truth, and an inspirational teacher.

When asked how he was able to cope with these testing periods in his life—when he was ridiculed and demeaned by high-powered grievance groups and the mainstream media—he said he knew he had done nothing wrong. Also, there was always someone special who supported him and his views, and that gave him strength.

He was very modest in his needs. He derived great joy tending his garden, where he found solace, and through his love of music, his favorite composer being Richard Wagner and his Ring Cycle. He was a philosopher and a deep thinker with an extensive library. He lived a full and active life.

He lived by Immanuel Kant's quote:

> *Habe Mut dich deines eigenen Verstandes zu bedienen.* (Have the courage to use your own mind.)

We are extremely grateful for Fredrick's immense courage, inner strength and dedication to the truth, even though it cost him so very dearly.

In fact, we should all be grateful for those brave souls willing to search for and expose the truth (and those willing to publish it), despite the consequences. In many Western nations today, this can mean character assassination, stiff fines, prison sentences and bankruptcy. ❖

AN INSPIRATION

I met and had phone conversations with Willis Carto a couple of times for writing opportunities with *The Spotlight*, American Free Press and The Barnes Review. The first meeting took place at his Liberty Lobby office where I still remember a large portrait of George Washington that hung on the wall behind his desk.

The interview began with the typical prefatory questions about one's background, but it quickly shifted to a discussion about Revisionism and Dr. Harry Elmer Barnes. I had read a lot of Barnes and the Revisionist historians, which came through in our pleasant conversation. We talked for a while and, by the end, I considered him more of a friend than a potential employer. I did make it a point to thank him for all he had done for Revisionist history, and giving a voice to dissident scholars.

Even if there was no position available, or he chose another candidate, I wanted to express my appreciation for his gallant efforts.

The other interview was similar, and I got offers both times. Because of personal circumstances, I had to turn them down—a decision I regret to this day.

He still remains an inspiration to me—not only for his many accomplishments, but for the great courage he displayed throughout his life in battling the Powers that Be.

SHEER DEDICATION

So, TBR has made it to 30 years. How did that happen? It was not by chance, but by sheer dedication. Willis Carto was the founder and the inspiration for TBR. He taught many people well, including Michael Collins Piper, John Tiffany, Dr. Matthew Raphael Johnson and, of course, today's TBR staff. There were, and still are, many famous contributing writers who submit articles, too numerous to mention here. Many subjects covered in TBR have been taboo for so long. Death has claimed many of our writers, but many are still with us—and producing at a high level.

To have founded TBR, *The Spotlight*, Liberty Lobby and even more organizations and publications was a monumental job. Keeping TBR alive today, in this political climate, still is.

I first met Willis through my father Knut Hesstvedt Scharnhorst, who ran a business in Escondido, California, at a time when Willis lived in the area. I was also able to meet his wife Elisabeth at a preparedness convention held at the expo center in Anaheim, California. It was a well-attended and very useful event.

My father subscribed to *The Spotlight*, the newspaper Willis started in 1975 that at one time had over 300,000 subscribers. That is how I became familiar with *The Spotlight* and, later, The Barnes Review.

When Father passed away, I took over his subscription. I liked the frank material. I had recently served time in the U.S. Army. Because I had access to material classified at the time, I found much in *Spotlight* to be right on the mark. I could not talk about what I knew, of course, but, as the years went by and much was declassified, many of us had stories to tell!

Later on, Willis founded TBR, thinking that people would be hungry for honest history. I think he was a bit disappointed by the initial results, though the 7,000 subscribers he initially amassed became the future core of the subscribership.

People are often in denial and don't read. But that is slowly changing, as people are waking up to all the lies we have been told. I have written some articles on various subjects for TBR and have been honored to be a part of the Revisionist effort.

KEEP CASTING YOUR PEARLS

I recently learned that "the champagne" of historical journals, The Barnes Review, is celebrating its 30th anniversary and, so, I decided to see if I could discover what—if any—symbol is directly related to that sublime commemoration. Alas, it would appear that such matters are limited to the celebration of human nuptials rather than more worldly operations, but, nonetheless, in this instance, it would seem that fortune provided a truly felicitous symbol worthy of the publication in question.

In the West, a worthy element is assigned to each year that a couple is married. Of course, it is common

knowledge that the 25th anniversary year is silver and the 50th is gold, but, interestingly enough, the 30th year of a marriage is crowned by the pearl.

This "gem" is unique in that it is not the result of geological activity, as are gold, silver and precious gems, but, rather, it is the product of a small, primitive life form avoiding discomfort by covering an irritating inclusion lodged within its confining shell with an organic coating that eventually hardens to become an object of both great beauty and worth—the pearl.

Even more astounding, the consequences of this phenomena are mentioned in Scripture itself. In the Old Testament, in the Book of Job, Chapter 28, verse 18, we read that "[T]he acquisition of wisdom is above that of pearls." In using the pearl to denote an object of great worth, the writer makes clear that only "the acquisition of wisdom" is seen as a more significant—and enriching—endeavor!

In the Gospel of St. Matthew, Chapter 13, verses 45 and 46, the acquisition of the pearl is compared with a man's attempt to gain God's Kingdom, and it is duly noted that all must be sacrificed to obtain the object herein declared:

> Again, the Kingdom of Heaven is like a merchant seeking fine pearls, and, upon finding one pearl of great value, he went and sold all that he had and bought it.

But pearls are also used in a warning by Christ, referencing the judgment we are to use in dealing with our fellow man. In the Gospel of St. Matthew, Chapter 7, verse 6, we are admonished to:

> Give not that which is holy unto the dogs, neither cast ye your pearls before swine, lest they trample them under their feet, and turn again and rend you.

Here again, the pearl is used to indicate something of great value whose waste will lead to catastrophe for the man who fails to understand its true value.

In Revelation, Chapter 21, verse 21, St. John uses the image of the pearl to describe to his readers the Gates of Heaven, surely something that must be seen as more magnificent than all things merely worldly:

> And the 12 gates were 12 pearls; each one of the gates was a single pearl. And the street of the city was pure gold, like transparent glass.

The simple fact is that pearls are unique. Though they can be matched to a certain extent in size and color, the attempt is solely a matter of perception. Gemstones can be identical because they are mineral formations; that is, they can form under (relatively) the same circumstances and can be cut to the same exact sizes and shapes.

Precious metals are also of a kind, differing only in their purity and what they become—a ring, a brooch, a pendant and so forth. But pearls are individual and unique. Each one is a separate creation and, one can honestly—and with considerable amazement—say in the same way that THE BARNES REVIEW is unique, not only within each issue but as a publication in and of itself. TBR is indeed a pearl of great worth that, in these waning days of our ancestors' vision of freedom—and while looking toward our Lord's promised return—the "pearl" that is THE BARNES REVIEW offers to its readers such consolation as remains available in these blighted and benighted days.

But, interestingly enough, the pearl is not the only benefit to mankind arising from the oyster. Providence has also provided this primitive creature as a foodstuff for Man. Indeed, far more is gained in eating this shellfish than in harvesting the pearls it produces. Dietetically, the oyster is a blessing worthy of our thanksgiving, as can be seen here:

• Oysters are rich in omega-3, a nutrient that lowers the risk of cardiovascular mortality, decreasing inflammation-driven diseases and reducing symptoms of metabolic syndromes such as high blood pressure.

• Oysters are protein dense and their protein is of very high quality.

• Oysters are the best dietary source of zinc. A single oyster offers around 50% of that metal's recommended daily intake.

• Oysters are rich in Vitamin D that promotes bone health. Oysters also provide Vitamin B-12, offering far more of this substance than any meat other than organ meats.

Thus we can see that this gift of God provides nutrition to mankind the same way as THE BARNES REVIEW. This publication does not just produce a visually splendid journal, but that same journal is also filled with the knowledge needed to feed the mind as well as gladden the senses.

It is to be devoutly hoped that this glorious work of good, decent and intelligent people may live to see its diamond anniversary! As we Orthodox Christians say, "May God grant you—THE BARNES REVIEW—many years!"

A DEAR FRIEND & COLLEAGUE

One day, in 1989, I received a membership application from a "W.A. Carto" and, like anyone else, he was assigned a membership number and put on the roster to receive our monthly magazine *Sharkhunters*, which discusses the authentic history of submarine warfare of both the Allies and Axis. I called him back and, during our conversation, he said that he was in fact Willis Carto but that I should not list him that way for fear of backlash against SHARKHUNTERS by the SPLC (aka Spitlickers). We are not ashamed of our members or what we do, so he was listed correctly. Soon thereafter, I was added as a features editor to one of his publications.

He was right! It wasn't long before I got a call from "Hefty Heidi" Heinrich at the SPLC, and they immediately posted me as a "neo-Nazi" on their website—an outright lie.

Willis and I became good friends over the years. When my wife and I lived in Tampa and Willis would come to the bay area, we always got together at a nearby Cuban restaurant. He was always the perfect gentleman when my wife was with us.

After we moved to central Florida and his travels brought him to the Jacksonville area, we always met at

the "A1A Ale House" in St. Augustine and enjoyed burgers on the second floor balcony overlooking the Bridge of Lions there.

Over the years, my family—including our two then-little kids—frequently met with Willis and his devoted wife and always had a wonderful time. During the time I knew and became friends with him, Willis was an honorable man and devoted to the honest and accurate history of World War II and the German Reich. I am really sorry he's gone. He was a great man.

HIGH POINT

When, after being invited to attend and speak at a TBR conference and convention held in Washington, D.C. —situated a stone's throw from Capitol Hill—I had the privilege of spending time with the venerable Willis Carto.

As it was 2003, I can expect my recall to be less than perfect. However, our introduction, the kindness and humble unassuming nature of this revered influencer for over half a century has remained crystal clear.

The impression I received was that Mr. Carto had a deep and incisive questioning intellect without any pretentiousness.

My only regret is that, with other notable delegates such Dr. Fredrick Töben in attendance, we were not given the opportunity of a group photo. No matter. Meeting all the Revisionist scholars and Willis was one of the high points of my academic life.

THANK YOU, TBR

I began subscribing to Willis Carto's *Journal of Historical Review* (JHR) around 1991. I quickly became convinced that the official Holocaust story was a fraud. I read with interest outstanding articles by Dr. Robert Faurisson, Dr. Arthur Butz and numerous other scholars, as well as most of the books published by the Institute for Historical Review (IHR).

Unfortunately, internal squabbles arose at the IHR. I watched in dismay as costly legal battles ensued that drained valuable funds from multiple organizations. I kept subscribing to JHR until it was discontinued in 2002.

Although I continued to read historical Revisionist books, I did not discover The Barnes Review (TBR) until years later. I began reading TBR and was relieved that another physical publication had filled the void left by the demise of the JHR.

Eventually I sent some articles I had written to TBR. John Tiffany called me back and said he liked my articles and wanted to publish some of them. TBR has now published many of my articles, and Editor Paul Angel has been kind enough to let me share some of my articles with "Inconvenient History," a Revisionist website, for publication. I congratulate TBR for publishing so many outstanding books and articles that bring history into accord with the facts. Happy 30th.

NEVER FORGET

I got my start in politics with the Buchanan for President campaign of 2000 when I was 19. People might be surprised to learn how many convention delegates and campaign volunteers were reading either *The Spotlight* or The Barnes Review—or both.

After that campaign ended, I kept the regional band together and fielded my own bid for the Tennessee legislature in 2002. While that spirited endeavor would ultimately lead me to radio, there was a year (2003) during which I was desperately searching for a way to stay involved in the fight. A fellow former Buchanan delegate from New York said, "You need to meet Willis Carto."

He and I traveled to Washington in the early months of 2003 and met with Carto in D.C. I remember the stack of papers and files on his desk being at least two feet high. Willis graciously received me, and we hit it off. He even let me write some articles for AFP, which kept me engaged until radio came calling. I'll never forget it.

Over the years, we stayed in touch. He would call occasionally to share advice and ideas. When I got married in 2006, he sent a gift. But I think the thing that stands out to me the most about Willis today is how modest he always was. I didn't know during that initial meeting that I was speaking with, perhaps, the most accomplished and unapologetic partisan for our side on this continent in the 20th century. He was an institution unto himself.

His legacy is matchless, but I never heard him mention it. He was always focused on the cause.

It is important to remember our heroes and the men upon whose shoulders we stand. I am thankful that a man as renowned as Willis Carto agreed to meet with someone who was then such a young and relatively unaccomplished guy searching for a path forward. He played an important

role in my early evolution as an activist. TBR, which I first became acquainted with nearly a quarter-century ago, has informed my opinions as a commentator ever since. Happy birthday, TBR!

WRONG ABOUT DIXIE

The latest issue of The Barnes Review, May/June 2024, "For the Love of Dixie," predictably, based on your past record, had a lot of pro-South articles and book selections. I previously had a letter to the editor published that went against a pro-John Calhoun letter. This is one area where I'd say that your editorial program is definitely wrong.

Therefore, I suggest that you carry a book by Mike S. King, and your readers read it. That book is *Dixieland Deceived: The Grand Conspiracy Behind the U.S. Civil War*. Incidentally, I helped to edit the book. They should also read King's *The Bad War: The Truth Never Taught About World War II*, which you already carry at TBR.

Gary Kevin Ware
Via email

[TBR now has that book in stock. See the ad on page 61. The author believes that the Civil War was the result of an elite conspiracy. The online description for *Dixieland Deceived* says:

"It was the usual suspects, based in Rothschild's Europe—using the empire-seeking 'Plantation Aristocracy' based in the South—who long-range planned and, under one false pretext after another, finally executed America's greatest disaster.

"It was the determined leadership of Lincoln that thwarted the elaborate scheme of this deadly cabal."

It's a well-researched, fast-paced and fascinating tome from the ever-popular King that paints Lincoln as a hero, certainly a new take on the 16th president for TBR. Thanks for suggesting the book.—Ed.]

TRAIL OF JEERS

I enjoyed the May/June issue of TBR, especially the focus on the Southern cause in the un-Civil War. Still, I wanted to provide a couple comments on some of the content.

In reading the advertisement for the book, *Authentic History: Ku Klux Klan, 1865-1877* by Susan Lawrence Davis, I was surprised by some of the language and assumptions in the description. In a somewhat condescending tone, the text states that the book is "written in a racially paternalistic style" and "mindset" that includes the "false belief that the Blacks were content and loyal under White rule."

I have studied the Antebellum, un-Civil War, and postwar periods, probably more than the average person, and have owned an original hardcover copy of Lawrence's book for many years. Such a description of her book seems ill-informed. To claim no Blacks were "content and loyal under White rule" on the plantations is not supported by historical evidence and is a "false belief" in itself.

For a better view, I direct your readers to the multi-volume *The American Slave: A Composite Autobiography by the U.S. Government's Works Progress Administration* that contains thousands of interviews with the last generation of Blacks to have been slaves and some of their children.

The firsthand accounts often include happy recollections of time spent with their masters and missus, cornshuckings turned into celebrations, slave weddings and Sunday suppers held at the "big house," slaves intervening when the lives of their masters' families were threatened by invading Yankee troops, former slaves remaining on the plantations for years after the war until their masters and missuses died, and more memories that dismantle the Hollywood narrative of slavery and plantation life.

What's almost never mentioned are whippings, rapes and the other Babylonian-style tortures people have been led to believe happened to slaves on a daily basis.

For further research, I highly recommend *Time on the Cross: The Economics of American Negro Slavery* by Nobel Prize winner Robert William Fogel. This book was thrown down the memory hole for a reason. An easy and fast read, it's an extensive examination of plantation operations that includes how the slaves were purchased, trained, managed and treated.

In short, the slaves were treated quite well and had a higher life expectancy and lower infant mortality than Whites working in the sweatshop factories of Northern industrialists. Plantations were businesses. Businesses can only make profits with productive workers. Workers are more productive when they're content. It's the same reason the businesses we work for today provide insurance to keep us healthy, paid holidays, personal days off, and other benefits.

How productive would we be at our jobs if we were beaten, injured, and raped on a daily basis? Simply, it was bad for business to treat the slaves badly.

The reality of plantation life for most slaves is why there never was a major slave rebellion in the United States. With 100 or more slaves on a plantation, and a White family of just five to 10 members, a real rebellion would have been easy, but it never happened. At the same time, many slaves cursed Abe Lincoln for the war and turning them out from plantation life, which had held a certain amount of security, and into a world with no plan as to how they would survive.

Lastly, with regard to the article by Frank Jackson on the impact of "Reconstruction on Amerindians," I was surprised to see the author resort to repeating some "Court Historian"

Continued on page 86

Continued from page 85

tropes with regard to the Indian Removal Act of 1830. This included saying the Amerindians were "rounded up into a proto-concentration camp," and even using the term "Trail of Tears" that has no basis in the Amerindians' own history of the relocation.

In short, the Amerindians got the deal they negotiated for in what was essentially a land swap. Part of Andrew Jackson's motivation for the relocation was to preserve the remnants of Amerindians as a distinct race and prevent them from being absorbed into the growing White population east of the Mississippi River. In fact, the Cherokees were so mixed by that time that their chief, John Ross, was only one-eighth Cherokee. An 1835 census showed 23% of the tribe already had White admixture.

For the full story on the so-called Trail of Tears, I would recommend the article "Trail of Tears: Death Toll Myths Dispelled," by William R. Higgenbotham, *The Oklahoman* (February 28, 1988), and Mike King's article "The Marxist Myth of the Trail of Tears."

It's time to end the false guilt over politically motivated slavery and Amerindian narratives.

Higgenbotham stated the following in his article regarding the Trail of Tears legend, but his remark applies to both mythologies: "I, who have spent more than 20 years researching it, doubt anyone will bother. It is too good a story as it stands and too well-fixed to disturb. That makes it all the more dishonest."

SILENCING TRUTHSEEKERS

Recently, Scott Ritter, ex-military truthteller about the Rothschild Empire's panicked war against Russia, was boarding an airplane to travel again to Russia when he was stopped on the orders of some criminal element of the lawless U.S. State Department. His passport was seized and, thus, he was not allowed to travel to Russia.

Every last American who is keeping track is aware the Deep State, in the brain-dead name of Joe Biden and "democracy," are ramping up a hot war through NATO against Russia because Ukraine—their sacrificial proxy—is collapsing.

Most of these concerned people are well aware that this amounts to wild-eyed, desperate insanity as this could very well lead to a world-destroying nuclear war.

Even if that is avoided by some miracle, it will lead to the total destruction of the "West." As all the Rothschild-owned nations are so corrupted by total worship of the Rothschild U.S. dollar, there is no real strength left militarily, economically or morally. Satanism now rules Rothschild's "West" without opposition.

Therefore, it is most interesting to have received a phone call recently from a lifelong New York City resident friend who informed me that NYC Jews are bailing out en masse. They are mostly heading, he alleges, to the far south of the world—New Zealand, Australia and the most southern nations of South America.

One suspects they, too, expect nuclear war, hoping that relocation will leave them unscathed.

Witness to History is now in stock!

IT'S HERE! Witness to History: The Reich Legend Uncensored

RESCUED! By Mike Walsh. *Witness to History* was 25 years in the making with one purpose in mind: a single, comprehensive book that divulges previously censored information while effectively debunking the propaganda of the victors. At the same time, the author puts into perspective the catastrophic 20th century by presenting the big picture surrounding the so-called Russian Revolution of 1917 up to and through the attempted genocide of the people of defeated Germany. In this book, Walsh gives those who made this epoch their chance to tell us their unfiltered, spin-free comments in their own words. *Witness to History* is that book with the actual words of literally hundreds of eyewitnesses to the events of WWII—from high-ranking world leaders and military men to the average citizen on the streets. Softcover, 416 pages, illustrated, #995, **$35**.

Life in the Reich: Hitler's Germany—1933–1945

By Mike Walsh. The quality of life in the Third Reich was far superior to elsewhere in the developed world. Ordinary German workers enjoyed a lifestyle previously reserved for the upper classes of the West. Germany led the world in fashion, medicine, cinema, lifestyle, manufacturing, transport infrastructure, public facilities, science, healthcare and education. For good reason, the Germans were the cheeriest people on Earth. The claim that this was achieved through investment in militarism is absurd. Despite being war economies, the debt-ridden U.S. and European Union suffered the collapse of their infrastructure whilst their indebted populations even now live hand-to-mouth. Prosperity in the Reich set an example that exposes the failures of the mutually supportive capitalist and Communist systems. A taboo topic for media and palace publishers, *Life in the Reich* was removed by Amazon because it dared to show Hitler's Germany as it was and not as the propagandists would have us believe it was. Mainstream media and court publishers consider this a taboo topic because they don't want you to know—in case you draw the right conclusions. Softcover, 120 pages, #960, **$18**.

Heroes Hang When Traitors Triumph: Martyrs of World War II

By Mike Walsh. Character assassination inevitably follows a defeat in war. Had peace terms with National Socialist Germany been equitable, it is likely that non-German figures since denigrated would be more accurately portrayed by modern media. Had Hitler's Germany defeated the forces of the British, Soviet and American empires, then one can presume London's Whitehall would be Adolf Hitler Esplanade whilst Hyde Park would have been renamed Lawrence of Arabia Park. Norway's monuments would celebrate Vidkun Quisling and the revered writer Knut Hamsun. Romania would pay tribute to Corneliu Codreanu whilst in Ireland, Britain and New York, instead of statues to Lenin, the name of Irish-American William Joyce might be affixed to great shopping edifices. *Heroes Hang When Traitors Triumph* gives a different perspective of these vilified foes. Softcover, 115 pages, #961, **$20**.

Adolf Hitler: My Last Testament

By Mike Walsh. Adolf Hitler said he was dumbfounded as "an enormous human dragon slowly uncoiled itself before me." The young laborer's description of a protest march calling for work and bread perhaps inspired Hitler to join the revolt against the oppression of the working class. Whatever challenges Germany faced, the highly decorated war veteran would not blame the Jews, for he had earlier remarked that anti-Semitism was repugnant. There is much that is enigmatic about this man who became almost a religious figure. No other leader in history has achieved more in uniting social classes and inspiring those of various religions and races. So far, an estimated 750,000 book titles have been published on The Third Reich. Hitler's *Mein Kampf* is more widely read today than ever before. Yet, few books actually record the rise of the Third Reich in Adolf Hitler's own words. Drawn from his speeches and media interviews *My Last Testament* is Hitler's self-assessment, but it also includes personal observations about the Führer from many others as well. As such, it is an invaluable first-hand source of information for scholars of the period. Softcover, 195 pages, #962, **$25**.

The Great Tragedy: Germany's Declaration of War Against America—Hitler's Speech to the Reichstag

Adolf Hitler's December 11, 1941 speech to the Reichstag, delivered just hours after a formal declaration of war had been delivered to the U.S. ambassador in Berlin, marked a decisive turning point in WWII. This speech was more than just a declaration of war, it was an 88-minute explanation by Hitler of the origins of the war, the background of the attacks on Germans in Poland, why he decided to attack the Soviet Union in June 1941, FDR's hostile policies toward Germany, an overview of Germany's place in the struggle for Europe, and, finally, Hitler's earnest desire for peace at any cost. The day after this speech was delivered, a highly inaccurate and edited version appeared in American newspapers. This is the first complete and accurate translation of this historical speech. Softcover, 41 pages, #636, **$9**.

Back Door to War: The Roosevelt Foreign Policy 1933—1941

Charles Callan Tansill convincingly argues that FDR ardently wished to involve the United States in the European war. When his efforts failed, Roosevelt provoked the Japanese into an attack on American territory. Doing so would involve Japan's Axis allies in war, also, and America would thus enter the war through the "back door" to destroy Germany. The strategy succeeded, and Tansill maintains that Roosevelt therefore welcomed Japan's attack on Pearl Harbor. Tansill demonstrates quite convincingly that FDR duped the Japanese into firing the first shots at Pearl Harbor and other possessions in the Pacific. Tansill presents extensive primary material from State Department files, experts, period articles and impeccably sound reasoning. Softcover, 735 pages, #651, **$40**.

Rivonia Unmasked!: The South African State's Case Against Nelson Mandela, 1964

First published in 1965, this book by Lauritz Strydom was the White South African government's official version of the famous 1963-1964 "Rivonia Treason Trial," which saw eight top South African Communist Party (SACP) and African National Congress (ANC) leaders, Nelson Mandela included, sentenced to life imprisonment for a shocking plan to seize power by bloody violence in South Africa and turn it into a Marxist state. Evidence at the trial showed that the USSR, Algeria, China, Czechoslovakia and East Germany all supported the plot, and that the ANC and the SACP planned a physical invasion. The two new appendices included by editor Arthur Kemp focus on the facts that Mandela, despite his many public claims to the contrary, was a high-ranking member of the SACP, and that the support structure of the ANC was comprised of Communist Party Jews. Softcover, 176 pages, #828, **$18**.

Race and Reason: A Yankee View

By Carleton Putnam. This was the first major book to address race and racial differences in a calm, educated and sophisticated manner just as the "Civil Rights" revolution began sweeping America and overturning the established order. *Race and Reason* answers every liberal argument and counter-argument with reason, compassion and intellect. It addresses the issues of physical, mental and psychological racial differences, backed up with meticulous research, statistics and analysis—and proves conclusively that integration can only lead to the harming of all races, and the destruction of Western European civilization in particular. Softcover, 147 pages, #614, **$15**.

The Hoax of Soviet 'Anti-Semitism': Jews, Zionism, Communism and the Soviet Union 1918–1991

By Frank L. Britton. A fully referenced exposé of the lie that the Soviet Union was "anti-Semitic." It proves that the USSR was pro-Jewish, but anti-Zionist. Starting with an overview of the Jewish nature of Communism, the book discusses the internal conflicts in Jewish Communist circles, and of the eventual break between the Socialist Zionists and the Jewish Communists. It contains full quotes from Churchill, Trotsky and Esther Frumpkin, a leader in the Jewish Bund. Learn how the Soviet Union attempted to deal with Jewish demands for a homeland by creating Birobidzhan. At the same time, the USSR was the first nation in the world to recognize Israel in 1948. However, Israel's increasing racism and aggression toward its neighbors reopened the old split between Zionist and Communist Jews. By the late 1960s, relations between Israel and the USSR had broken down, and the Western media launched its "anti-Semitism in Russia" campaign. Softcover, 133 pages, #750, **$15**.

Three New Books on the Civil War Era Offer Unique Insights Into the War, Reconstruction

Twelve Years in Hell: Victorian Southerners Expose the Myth of Reconstruction

By Lochlainn Seabrook. Southerners viewed Reconstruction as a Yankee Communist revolution. This revolution was a war planned far in advance to destroy the South. The architect of Reconstruction, Abraham Lincoln, privately planned to subjugate and then totally Northernize the South. After Lincoln's assassination, Reconstruction was taken over by Socialists and Communists, all radical members of the then-left-wing Republican Party. As part of Reconstruction, the North repeatedly violated the Constitution, committed robbery, destruction and seizure of private property, rape and murder. Simultaneously, legally elected Southern officials were thrown out of office and replaced by "progressives." To maintain control, Grant's radical government weaponized the police, the courts and the military. Many of the social, racial and economic problems plaguing the U.S. today began during Reconstruction. Now the left is using the same 1870s-era tactics. Softcover, 520 pages, #1022, **$35**.

I, Confederate: Why Dixie Seceded and Fought in the Words of Southern Soldiers

Did the Southern Cause died on April 9, 1865 with Lee's surrender? No, the Southern Cause is flourishing today! How can this be if the North won the war? What was and is the Southern Cause? And why were millions of people of all races willing to fight for it? You'll find the answers to these questions, as well as discussions on related topics (the Constitution, nullification, sectionalism, slavery etc.) in Lochlainn Seabrook's *I, Confederate*. Seabrook provides excerpts from the writings, speeches, letters and poems of 200 Southerners (mostly former C.S.A. soldiers), who describe, in their own words, the reasons they took up arms against their Northern cousins. Seabrook also includes writings from Southern and Northern civilians and Union veterans who also supported the campaign that Southerners referred to as "the bedrock of the Southern Confederacy." Illustrated with rare Confederate photos, preface, introduction, notes, index and bibliography. Softcover, 376 pages, #1023, **$27**.

The Hampton Roads Conference: The Southern View

The most important meeting of the Civil War took place in Virginia in February 1865. Yet it receives barely a mention in most history books. Known as the Hampton Roads Conference, in attendance were Confederate VP Alexander Stephens, Assistant Secretary of War John Campbell and Sen. Robert M.T. Hunter. On the other side were Lincoln and Secretary of State Seward. According to conventional history, the meeting opened with "kind-hearted Lincoln" offering generous promises to the "erring South," including $400 million in compensation for slaves—if the seceded states would return to the Union. The Confederates, however, viewed the meeting as a negotiation between "two countries," demanding the North recognize their independence. Lincoln refused and demanded complete surrender. Four hours later the meeting adjourned. Lochlainn Seabrook includes 32 analyses that set the record straight on the myths about the final meeting between the two opposing sides. Softcover, 294 pages, #1024, **$25**.

A Brief History of the Slavic Race from Pagan Times to the Orthodox Era

Imagine yourself transported to a mesmerizing realm where the old Slavic gods, cultures and racial fabric interweave with Russia and Eastern Europe's rich medieval and ancient Paleolithic and Neolithic people. In *A Short History of the Slavic Race*, you'll also discover the illuminating traditions, myths and beliefs of the Slavic peoples who lived in the territory that today includes the vast forest-covered terrain of Russia and across the broad plains of Central Europe.

For millennia, the Slavic peoples revered a pantheon of gods representing the elements, fertility, conflict and fate. Thus this pagan religion profoundly impacted their lives as they endeavored to comprehend and placate them through ceremonies, melodies and stories. These efforts are demonstrably shown in their finely crafted grave goods and the expanding archeological record.

This primer, however, is more than a collection of folktales and myths. It also sheds light on the rich and varied Bronze Age and Iron Age cultures of medieval and ancient Russia and Eastern Europe. We follow the growth and decline of the great Kievan and Novgorod empires of the past, the collision of cultures, and the lasting influences that still permeate the area today.

Eastern Europe and Russia's social, political and cultural landscapes were shaped by the interactions and struggles of various peoples, including Slavs, Balts and Finno-Ugric tribes, among others, and we explore the depths of their history, as well. We also delve into the lasting effects of the Mongol conquests, the impact of Byzantine Christianity and the development of powerful medieval kingdoms.

PERSONAL FROM THE EDITOR

Where Are Today's Daring Explorers?

On the front cover of this July/August 2024 edition of TBR, we feature the great Norwegian explorer Thor Heyerdahl. From the late 1940s until his death in 2002, Heyerdahl epitomized the curiosity, skill, perseverance and courage demonstrated by his Norse and Viking ancestors 1,000 years and more earlier as he braved the open oceans to prove that ancient man—even with the technology and maritime skills of Stone Age peoples—could cross both the Pacific and Atlantic oceans to settle faraway lands. Though ridiculed at the time for his ideas, Heyerdahl's successful expeditions proved his critics wrong and inspired a new generation of Revisionist historians to reconsider their views on the peopling of the Americas, and engendered a new understanding of what our ancient ancestors were actually capable of in the realm of maritime exploration.

Where are these kinds of explorers today? Some might say the closest thing we have are those astronauts who are boldly traveling on vehicles to outer space, but their craft are packed to the gills with advanced electronic technology, leaving much of the navigation to the computer. Not so in Heyerdahl's case. He and his crew preferred to accomplish their daring journeys with as little modern technology as possible, if only to prove that ancient man was quite capable of achieving things once considered beyond his "primitive" abilities.

Thank you, Thor Heyerdahl, for having the courage to undertake these daring journies and for rousing a generation of researchers to look beyond the Court Historians' limited view of our past. Would there were more Heyerdahl's out there today.

Also in this issue of TBR are articles on a variety of historical periods, from the Middle Ages to colonial times and the battle for control of North and South America, all the way to the World War II era, the tumultuous 1960s and 1970s in the United States and beyond. We also feature an inspiring interview with a former member of the Estonian parliament, Ruuben Kaalap, who brings up to date on the condition of Eastern Europe and gives us his outlook for the future, not only of Estonian culture but the entire region, as well. There's more, but I won't spoil it.

On another note, TBR's assistant editor, John Friend, who has made many important contributions to this magazine, has found himself a new job. I can't blame him. Plain and simple, TBR did not have the funds to truly compensate him for his many talents. We wish him well and hope to hear more from him in the future. John replaced Dr. Ed DeVries as host of the TBR History Hour podcast series when Ed passed from pneumonia in 2020. Thus, that TBR interview series is currently in limbo until I find a new host as good as they both were.

Wink, wink: It sure would be nice if someone out there would send TBR a nice donation so I can train and pay a few new employees. Right now, I am doing this magazine by myself, so please let me know if I missed anything. ❖

—Paul Angel, Executive Editor

The Count Would Be Quite Pleased

Pericles, Plato, Dr. Elmer Pendell, Carleton Putnam, Carleton S. Coon, Arthur de Gobineau, J. Philippe Rushton, Ira Calvin, John Baker, Sir Arthur Keith, Dr. Henry E. Garrett, Dr. Friederich Karl Wiehe, Arthur Kemp and hundreds, if not more, of scientists, anthropologists, authors and activists have warned us that racial homogeneity is the most important factor in the rise and fall of civilizations. Either a nation has it or it doesn't. If you don't have it, these scholars have proven in their works, your civilization is bound to die.

There are many examples of this in human history, including ancient Egypt, Greece and Rome, the fall of which can all be tied to a replacement of the founding stock of those civilizations.

In more modern times, we have disturbing examples of this phenomenon. For instance, we have witnessed a distressing increase of non-European people in Germany, France and England. London has devolved into one of the most ethnically diverse cities in the world. As of 2021, London and its immediate environs had a population of 8,899,375. Approximately 37% of London's population was born outside the UK. Amazingly, more than 300 languages are spoken there. Some are considering changing Big Ben to Big Babel.

In Germany, rather than a "master race" of blue-eyed Aryans, you now have Turks, Arabs, Africans, Kurds, Chinese and Vietnamese populating large swathes of Berlin. More than 30% of the city is now non-German.

In France, the same thing is happening. Anch National Institute for Statistics and Economic Studies says:

> Approximately 20% of people living in Paris are immigrants and 41.3% of people under 20 have at least one immigrant parent. Among the young people under 18, 12% are of Maghrebi origin [Algeria, Libya, Mauritania, Morocco and Tunisia], and 10% are of Subsaharan African origin. … In 2020-2021, about 6 million people, or 49% of the population of Paris, are either immigrants or have at least one immigrant parent.

In the United States, thing are no better, thanks to Joe Biden's open-borders policy, which has allowed in as many unvetted illegal immigrants as can scurry across the border before you can say "hasta luego." By modest estimates, 12 million people from 190 nations have crossed into America, most without showing any real form of identification. We have no idea who these people are or why they are really here, though it is doubtful that all (or even 10% , for that matter) are actually fleeing persecution in their native lands. One could wager that the vast majority of them are here for the free things that actual American citizens can barely afford: housing, food, cellphones, debit cards, laundry service, health care etc.

According to USAFacts.org:

> Between 2010 and 2022, the Hispanic/Latino population had the most growth, increasing by 12.9 million from 50.7 million in 2010 to 63.7 million in 2022.

Demographers don't see this trend changing anytime soon, especially if the Democrats retain or expand their political power in the next election cycle. And it's not all Hispanics coming in. People from nearly every nation on the globe have entered the United States under Biden's somnambulant watch.

Leftwingers will tell you that "cultural diversity makes us stronger," but we are not sure how.

In Sweden, once an Aryan nation if you ever saw one, the minority population keeps rising. Unfortunately, the Swedes are averaging 1.6 children per married couple, far below the replacement rate of 2.1 children per couple.

At the same time, Sweden has seen a significant increase in population with immigrants from Syria, Iraq, Iran, Somalia, Afghanistan, India, Turkey, Eritrea, Thailand, China and Lebanon topping the immigration charts.

Has the crime rate dropped? The standard of living for Swedes increased? Are there fewer riots or a smaller number of Swedish women being raped? Of course, not. Nothing good has increased in Sweden or any other advanced nation since suicidal Western leaders have thrown out the welcome mat to the dregs of the Third World.

In fact, not a single nation in Europe has been "strengthened" by this increase in multicultural madness.

In the United States, we see every day a growing number of reports of mothers murdered, young women raped, children trafficked, elderly citizens attacked and beaten on the streets, increased gang activity and worse.

How dare Joe Biden and his handlers allow law-abiding Americans to be subjected to these criminals—who so easily could have been kept out of this nation—and shame on anyone who would support this obvious replacement of America's founding stock.

If you doubt that the West is under a calculated and purposeful attack, read the UN's 1990 report "Replacement Migration," whereby 70% of the founding stock of advanced White nations (and Japan and South Korea, too), will be replaced with "immigrants or the offspring of immigrants" by 2050.

Richard Nikolaus Eijiro, the count of Coudenhove-Kalergi (1894-1972)—who welcomed the idea of a single brown race, akin to modern-day Egyptians, inheriting the Earth—might think this is a great thing, but we do not. If the immigration floodgates are not closed soon, the White, Christian Western world is doomed, if it isn't already.

But there is some good news. Judging from the recent results in the EU Parliament elections, many Europeans have awaken from their cultural slumber and want this invasion to end now. ❖

Remembering Thor Heyerdahl: Modern-Day Viking Explorer

By Patrick Chouinard

Thor Heyerdahl was a Norwegian explorer, anthropologist, and scholar who significantly influenced our comprehension of human migration, navigation and cultural interaction. Born on October 6, 1914, in Larvik, Norway, Heyerdahl developed a strong interest in maritime studies throughout his early years. This interest became the foundation for his pioneering trips and interdisciplinary research.

THE JOURNEY OF THE *KON-TIKI*

In 1947, Heyerdahl embarked on his first journey, known as the *Kon-Tiki* expedition. Inspired by his hypothesis that Polynesia may have been colonized by individuals who migrated from South America rather than Asia, Heyerdahl and a small crew embarked on a voyage from Peru aboard a rudimentary balsa-wood raft he named *Kon-Tiki*. The crew completed a 101-day journey spanning over 4,300 miles across the Pacific Ocean, ultimately arriving at their intended destination, the Tuamotu Islands. Heyerdahl's *Kon-Tiki* expedition garnered global fascination and solidified his status as a trailblazing figure in alternative archeology. His writings, experiments and excavations have significantly contributed to the study of ancient maritime migration.

Heyerdahl's decision to embark on the *Kon-Tiki* expedition was driven by his scholarly expertise in biology and geography and his fascination with cultural dispersion and the genesis of civilizations. Like others of his day, including his contemporaries in the Third Reich, Heyerdahl saw many of these civilizations as having Aryan influences. He developed the notion that ancient sailors may have crossed the Pacific Ocean using open boats. This was based on his time living among indigenous people in the Marquesas Islands and his observations of shared characteristics between Polynesian and South American cultures.

After the success of *Kon-Tiki*, Heyerdahl undertook other voyages to test hypotheses concerning human migration and cultural spread. In 1953, he spearheaded the *Ra* voyages, during which he and his crew endeavored to navigate from Morocco to Barbados in a papyrus reed boat based upon designs of ancient Egyptian watercraft. Despite the disintegration of the *Ra I* raft during the first expedition, Heyerdahl's desire to engage in such risky endeavors proved his dedication to pushing the limits of exploration and scientific investigation.

Heyerdahl's multidisciplinary research method distinguished him in the academic realm. He collaborated with specialists in several fields, such as archeology, anthropology, oceanography and marine biology, effectively incorporating a wide range of viewpoints to enhance his comprehension of ancient civilizations and maritime navigation methods.

Although Heyerdahl's study encountered suspicion from certain academic community members, it served as a source of inspiration for subsequent generations of academics, and captivated the public's imagination.

Aside from his voyages, Heyerdahl also carried out archeological digs at other locations, including Tucume in Peru and Easter Island. These excavations revealed compelling evidence that corroborated his hypotheses regarding transoceanic communication and migration. His contentious analyses of archeological evidence ignited discourse among the academic community while inspiring fresh areas of inquiry into pre-Columbian interaction and trade.

Heyerdahl was a highly productive explorer, scientist, and a proficient

Thor Heyerdahl and a crewmember are shown adjusting the sail of the *Kon-Tiki* raft on its initial voyage in 1947. *Kon-Tiki* had a six-man crew, five of whom were Norwegian. These included Heyerdahl, Erik Hesselberg, Knut Haugland, Torstein Raaby and Herman Watzinger. The sixth member was Swede Bengt Danielsson. Heyerdahl hypothesized that the original settlers of Easter Island were the "Tiki people," a race of "White bearded men" with blue eyes and red hair, matching the ancient descriptions of the Peruvian/Incan god Viracocha or, in earlier myths, Kon-Tiki (or Con Ticci). He believed these Tiki people crossed the Pacific from South America and influenced the culture and religion of the Polynesians. First, however, Heyerdahl had to prove that ancient South Americans could have navigated from Peru to Polynesia using only the technology of the time. He succeeded.

writer and communicator. He wrote several popular books, including *Kon-Tiki: Across the Pacific by Raft* and *Aku-Aku: The Secret of Easter Island*, which made his exploits and theories accessible to a large audience. Heyerdahl's talent for elucidating intricate scientific concepts through easily understandable storytelling led to his extensive impact and lasting influence.

THE TWO *RA* EXPEDITIONS

Did ancient Egyptians colonize the Americas? Heyerdahl wanted to know. His *Ra* expeditions, perilous journies across the Atlantic Ocean in a rudimentary vessel made of papyrus reeds, exemplifies the inquisitiveness, perseverance and daring spirit indicative of his Nordic Aryan ancestry.

Heyerdahl embarked on what is now known as the *Ra I* expedition in 1969 to demonstrate his hypothesis that ancient peoples could have traversed immense distances with the maritime technology of their times.

In addition to being a voyage of discovery, the *Ra* expeditions sought to prove his audacious claim that the ancient Egyptians were more than capable of crossing vast oceans. His vision also hoped to reshape notions of what defined the indigenous populations of the Americas, and restructure our understanding of a possible ancient White presence in North and South America.

As was the case for his motivation in launching the *Kon-Tiki* voyage, Heyerdahl was fascinated by the capabilities of ancient maritime cultures. It was his conviction that technological limitations did not necessarily dictate the migration patterns of early civilizations, and that primitive peoples were capable of traversing the oceans of the globe using what we would characterize today as crude vessels.

As a result of this conviction, he put forth the hypothesis that ancient Egyptians or Phoenicians might have made it to the Americas. This, of course, challenged the dominant academic consensus of the time.

In order to validate his hypothesis, Heyerdahl built a craft using only the materials and techniques that were accessible to archaic civilizations. *Ra I*, a vessel constructed wholly of papyrus reeds akin to those employed by ancient Egyptians, was the outcome. He fashioned the vessel using conventional techniques, attaching bundles of papyrus to form the hull and fabricating sails from woven reeds.

Heyerdahl and his crew undertook

The crew of *Kon-Tiki* was able to hook sharks, tuna and other fish to feed the crew during the 101-day voyage from Peru to Raroia in the Tuamotus in French Polynesia, 460 miles northeast of Tahiti. The voyage proved that ancient South Americans could have sailed to Polynesia. Recent DNA studies by Stanford University indicate that some Polynesians do in fact bear South American Indian DNA, and Polynesian DNA has been found in several primitive tribes in the Amazon. This has thrown the "single-wave" population model of the Americas into disarray, as also found in Amazonian Indians was a genetic link to ancient Australasians. In the end, Heyerdahl was correct: Ancient peoples certainly had the ability to make transoceanic voyages. Left to right above: Thor Heyerdahl, Herman Watzinger and Knut Haugland.

meticulous measurements to ensure the vessel's authenticity, including seeking guidance from authorities on ancient boat-building methodologies, and procuring materials directly from Egyptian sources.

Rhodesian author and nationalist publisher Arthur Kemp noted in his book *The Children of Ra* that Egypt, far from having Black African or Semitic origins, was originally a White Aryan civilization, and that the DNA of, for instance, King Tut, was more akin to Western Europeans than Blacks or Semites. Thus, were the *Ra* expeditions to be a success, it could prove that ancient Whites migrated to and possibly even settled the New World hundreds if not thousands of years before Christopher Columbus.

The *Ra* expeditions were not devoid of difficulties. Heyerdahl and his party encountered initial skepticism and censure from the scientific community. Numerous specialists cast doubt on the papyrus boat's seaworthiness and the viability of traversing the Atlantic Ocean in such a vessel. Heyerdahl remained undeterred in his goal of demonstrating his theory through action rather than oral debate.

In May 1969, *Ra I* departed from the Moroccan port of Safi, carrying Heyerdahl and a crew of international origin. From the outset, the voyage was fraught with danger, as the delicate vessel encountered considerable difficulty in navigating the unpredictable Atlantic. While progressing westward, the crew encountered formidable currents, turbulent winds and the ever-present danger of hurricanes.

In spite of the obstacles, the *Ra I* accomplished consistent advancement across the Atlantic Ocean, but came up 100 miles short of the Caribbean islands when the reed boat became waterlogged and he and the crew had to abandon ship. They had, however, traversed more than 4,000 miles in slightly over two months.

Determined to try again, Heyerdahl launched *Ra II* in 1970, again from Morocco. The crew encountered numerous marine species, such as dolphins, sharks and whales, during their voyage, thereby gaining invaluable knowledge regarding the open ocean ecosystem and demonstrating that such an expedition could feed itself on such marine creatures.

Off the coast of Barbados, the *Ra II* encountered a colony of sperm whales. Heyerdahl and the crew were filled with reverence as they beheld these magnificent creatures.

After 57 days at sea, the *Ra II* arrived at its final destination, Barbados, on July 12, 1970. It was with great elation and relief that the crew arrived, having accomplished the historic feat of being the first modern explorers to traverse the Atlantic in a reed vessel. The outcome of Heyerdahl's audacious experiment demonstrated that ancient civilizations were capable of circumnavigating the world's oceans using rather primitive vessels.

The success of the *Ra* expeditions generated extensive scholarly attention and discourse, prompting numerous specialists to reconsider their positions regarding prehistoric maritime exploration. Heyerdahl's theories

gained wider acceptance, and his groundbreaking expedition inspired a new generation of explorers to push the boundaries of human understanding.

Heyerdahl continued to investigate the mysteries of ancient maritime civilizations by undertaking additional expeditions in the Pacific and Indian Oceans. His efforts thus inspired contemporary archeologists and anthropologists. Heyerdahl's audacious endeavor not only challenged prevailing notions regarding prehistoric maritime exploration, but also motivated scholars to take a deeper look into the peopling of the Americas.

The Ra expeditions (one in 1969 and another in 1970), initiated by Norwegian explorer Thor Heyerdahl, set out to prove that ancient Mediterranean cultures, such as the Phoenicians and Egyptians, could have traversed the Atlantic Ocean in papyrus reed boats to make landfall in the Western Hemisphere. **Above,** Heyerdahl and crew prepare to launch *Ra I* from a port in Morocco. The ship made it about 600 miles from Central America before sinking, the crew rescued by a nearby yacht. **Below,** after 57 days at sea, *Ra II*—built by Aymara Indian craftsmen from Lake Titicaca in Bolivia—arrives in Carlisle Bay, Barbados, escorted by a flotilla of local vessels including commercial and pleasure boats.

THE SICAN CIVILIZATION

Heyerdahl remained interested in the origins of South American culture. In the mid-20th century, he helped investigate the Sican pyramids in Peru. This resulted in the excavation of the ancient ruins of the once-glorious Sican civilization. Heyerdahl conjectured that this was a lost White culture that had considerable influence in the Andean region. The Sican pyramids, located in the Lambayeque Valley of northern Peru, are mysterious and wondrous to behold. The archeological artifacts uncovered there have captivated the interest of experts, providing insights into a past era characterized by cultural opulence.

The Sican pyramids were built from the 8th to the 14th centuries A.D., and functioned as important sites for the Sican people's religious, political and ceremonial activities. The stepped platforms and ceremonial structures, constructed with adobe bricks and indigenous materials, represented the authority and status of the governing aristocracy.

The Sican civilization's exceptional skill in metallurgy is demonstrated by the magnificent gold and silver objects discovered in close proximity

to the pyramids. The presence of masks, jewelry, and ceremonial regalia among these items serves as evidence of the Sican civilization's exceptional ability to create elaborate metalwork and their significant role in regional trade networks.

The iconography present on Sican items and murals portrays various aspects of mythology, cosmology and the natural world, offering valuable insights into the beliefs and religious activities of the Sican civilization. Ceremonial utensils and temple walls were embellished with depictions of deities, supernatural entities and zoomorphic figures, showcasing the profound interrelation between human culture and the spiritual domain.

The Sican pyramids, even after millennia, nevertheless evoke a sense of admiration and amazement, acting as enduring symbols of the resourcefulness and endurance of ancient societies. Continuing study and conservation endeavors strive to safeguard these archeological marvels and guarantee their legacy for future generations.

Heyerdahl's exploration of the Sican pyramids not only enhanced our comprehension of Andean archeology, but also emphasized the significance of interdisciplinary research and cross-cultural exchange in deciphering historical enigmas. As we further investigate and analyze these ancient places, our understanding and admiration for the variety and intricacy of human history grows.

Although Heyerdahl has received criticism from certain groups for his belief in "diffusionism," i.e., that ancient peoples were able to make it from continent to continent and exchange ideas and even DNA, his influence on our understanding of human history and the possibilities for cross-cultural exchange is of utmost significance. His inclination to question established beliefs and venture into unexplored domains epitomizes the essence of scientific investigation and exploration.

The legacy of Heyerdahl continues to captivate and motivate adventurers, researchers, and visionaries worldwide as a reminder of the limitless potential of the Aryan spirit and the lingering enigmas of our collective history. ❖

THE SICAN CIVILIZATION

The Sican civilization inhabited the north coast of what is now Peru circa A.D. 750–1375. According to Japanese archeologist Izumi Shimada, Sican allegedly means "Temple of the Moon." The Sican culture is also referred to as the Lambayeque culture. In early 1989, at the age of 74, Heyerdahl learned of massive earthen and adobe pyramids in Peru and asked the foreign ministry for permission to excavate. To his surprise, he found that few in the Peruvian government knew anything about them. Grave robbers, however, were well aware of the riches to be found in ancient Peruvian tombs and had looted literally hundreds of thousands of graves in the region over the centuries. Fellow archeologist Walter Alva, however, revealed to Heyerdahl the existence of a 650-acre site untouched by the *huaqueros* who, according to local lore, were too scared to rob from what was known as the Tucume site for fear of arousing ancient spirits. There, Heyerdahl found 26 pyramids and mounds. (One shown above; there are over 250 earthen/adobe pyramids in the Lambayeque Valley.) Heyerdahl, Other Daring 'Amateurs' Vilified, Ostracized, Punished for 'Uncomfortable' Archeological Finds

By Frank Joseph

Having just arrived in Bolivia for the first time during the fall of 1994, I struck out on a bright afternoon for an aimless walk through the labyrinthine streets of La Paz, just to get my bearings at the world's highest capital city, almost 12,000 feet above sea level. A random turn down Tiahuanaco Avenue brought me unexpectedly before the Museo Nacional de Arqueología de Bolivia (National Museum of Archaeology of Bolivia), internationally renowned for its vast collection of Inca artifacts and other, priceless objects from earlier Andean civilizations. Workers were coming and going through the 148-year-old building's front entrance, stacking up trash on the curb in anticipation of an overdue garbage truck.

Almost lost among the random piles of discarded debris lay something I was shocked and appalled to behold: a large, detailed model of the world-famous reed-boat built and sailed from the coast of Morocco into the Caribbean Sea by that great 20th-century adventurer Thor Heyerdahl.

Stooping to examine the replica, its exquisite, handmade construction (from actual totora reeds) became apparent. "You're not really throwing this thing away, are you," I asked one of the busy laborers. Pitying my astonishment, he gave me the *bote de juguete*, as he referred to it, just as the noisy city dump truck turned down Tiahuanaco Avenue.[1]

MODEL OF *RA II*.
Rescued from the trash truck.

Leaving Bolivia with my formerly unwanted treasure went unchallenged, but it aroused the suspicions of U.S. customs agents, who wondered aloud if the two-foot-long reproduction was being used to smuggle illegal narcotics. They threatened to smash it open for purposes of inspection but relented after I offered to carefully dismantle the cabin section, allowing them to peer inside with a flashlight.

Later reassembling the several removed pieces was simple enough, and the well-traveled, intact replica has since then been proudly perched atop a bookshelf in my home library. I subsequently learned that it is one of only two such models in existence. An identical twin was displayed at Norway's Kon-Tiki Museum, in Oslo, until 1978, when completion of an additional wing allowed for installation of the 40-foot-long real thing. Both its smaller reproductions were created together in 1970, as joint commemorative trophies celebrating Heyerdahl's epic voyage of May 17 that year.

But, like the three-quarter-scale version from La Paz, the life-size inspiration suffered its own, extra-archeological woes.

Ra II was, as its name indicates, a second attempt at building the faithful rendition of a pharaonic vessel of the type portrayed in Egyptian temple art, yet structurally sound enough to successfully navigate an Atlantic crossing from Safi, Morocco to Central America. Emphasizing the project's authenticity, construction of *Ra II*'s predecessor was undertaken in modern Egypt.

But ancient maritime skills at the Nile Delta had been long lost, together with the racial integrity of its former inhabitants. *Ra I* came apart while at sea and had to be abandoned. Fortunately for its crewmen, their only concession to 20th-century technology had been a ship-to-shore radio for alerting the coast guard.

Having learned his lesson, Heyerdahl turned to native Bolivians, whose totora reed weaving techniques were still in use after the passage of countless generations going back millennia to pre-Inca times. Aymara Indians told how their ancestral founding father, Kon-Tiki Viracocha, or "Sea Foam"—

more a title than a name for a White-skinned, red-bearded visitor from overseas—taught them the arts of civilization, including boatbuilding.

Heyerdahl observed that their perennial craft were surprisingly similar to ancient Egyptian designs, only much smaller and thus better suited to different conditions on Lake Titicaca. He commissioned them to complete a full-sized, experimental version strictly adhering in every detail to a Nile Valley vessel from Dynastic times. The resulting *Ra II* proved eminently seaworthy, handily sailing 4,433 miles of open ocean in good time.

Shortly following Heyerdahl's earlier, ill-fated attempt, he was falling under the shadow of accused "racism" for repeating the native Bolivians' own oral traditions of their fairly-complected culture hero, Kon-Tiki Viracocha. Even today, the "racist' stigma is still widely applied to Heyerdahl: "He was a good author and could tell a good story, but also horribly racist."[2]

Because the merest hint of such a charge amounted to the kiss of death for any public enterprise, the National Geographic Society, which funded *Ra II*, was in danger of precipitously withdrawing financial support. To forestall that terminal eventuality, he replaced his original experienced sailors with eight men of as many, different races and ethnicities from Africa, Asia and Polynesia for transparently political, though not professional, reasons, thereby forming a more acceptable, predominantly non-White crew. Today, we know his brow-beaten concession would not have been enough to assuage demands from the politically correct purveyors of myths such as "systemic racism" and "gender fluidity."

Heyerdahl was no less ferociously attacked by an overwhelming majority of archeologists who, even 54 years later, have lost none of their vitriolic hatred for the man. An early outburst

THOR HEYERDAHL: Accusations of "racism" have failed to diminish his great accomplishments.

from *Time* magazine spat at him, "the only thing Heyerdahl proved is that Norwegians are decent sailors"—even though he was the only Scandinavian aboard *Ra II*.[3] Others did not give him that much, exclaiming, "He is less a seaman than a showman."[4]

Some excoriated the very newspapers and magazines in which their own criticism appeared for "giving this unsavory publicity hound the attention he obsessively craves, but by no means deserves, to poison the minds of uneducated people who don't know any better. Warning: You are complicit!."[5] Most skeptics repeated, as they still do, that "his self-styled 'expedition' was an abject, comical failure," because "it could never prove Thor's ludicrous presumption that ancient Egyptians discovered America, not Columbus."[6]

In light of the academic flak Heyerdahl took for *Ra II*, his reaction to my first published book was perhaps something with which he could identify from bitter personal experience: "You have obviously read a lot and accumulated much interesting material on a topic that is so controversial that most scholars turn their back on it for fear of being ridiculed," just as he was.[7]

But his enemies missed the point, either unintentionally or deliberately. His often-stated intention had been to show that seafarers of antiquity could have traveled from continent to continent, not that they did. The longstanding pronouncement from mainstream archeology held that they decidedly did not have the wherewithal for sailing extended distances. Heyerdahl put consensus dogma to the test.

Ra II's sole mission was to demonstrate how culture-bearers from the ancient Old World either possessed the capacity for successfully completing trans-oceanic voyages, or they lacked such means altogether. In this, the experiment unequivocally established that Dynastic Egyptian mariners did indeed operate vessels sufficient for overseas travel to pre-Columbian America.

Twenty-three years before *Ra II*, Heyerdahl had established his international reputation for duplicating the oceanic prowess of ancient man by sailing the replica of an Inca raft made from locally available balsa logs some 4,300 miles to Polynesia from Callao, Peru. At the time, 1947, orthodox scholars denigrated his experiment as a publicity stunt that proved nothing.

Seventy-three years later, "an international team took samples from 15 indigenous populations on the Pacific coasts of South and Central America and 17 islands in Polynesia, more than 800 samples in all," reported *World Explorer* magazine, sourcing a July 8, 2020 article in *The Guardian*.[8]

> The discovery of butternut remains proved the Vikings had traveled farther south than thought.

They looked for long strings of DNA that matched exactly between the populations, and found that matches with some Polynesians and people from Ecuador and Colombia were "unmistakable." They confirmed the results using both traditional statistical analysis and new "big data" techniques.

The islanders who carry South American DNA are scattered around what is now French Polynesia, including the Tuamotu Archipelago. Interestingly, Thor Heyerdahl's *Kon-Tiki* expedition ended when his reed raft ran into a coral reef off one of the Tuamotus.

The British-led geneticists found that most of the comparative DNA samples clustered around A.D. 1200, three centuries before the earliest modern Europeans arrived in Peru and 500 years before the Tuamotu Archipelago was first visited. In 2020, 18 years after Thor Heyerdahl died in 2002, science proved that his *Kon-Tiki* expedition did indeed retrace the same route sailed by pre-Inca seafarers into Polynesia.

HELGE AND ANNE INGSTAD

His near-contemporary Norwegian colleague was no less pilloried by academic crucifiers. Ten years before *Ra II*, Helge Ingstad made the first discovery of its kind on the American continent: a Viking settlement at L'Anse aux Meadows on the northernmost tip of Newfoundland.

There he organized an international team of university-trained investigators led by a professional archeologist—his own wife, Anne Stine Ingstad—under the direction of the Canadian government. Excavated trace elements dated the site to around 1,000 years ago, when the famous Viking explorer, Leif Erikson, established the earliest-known Norse settlement in North America, described by the Icelandic sagas as Vinland.

The largest of eight buildings identified by the Ingstads was a dwelling 94-by-51 feet, consisting of several rooms. Another seven structures included small domiciles and workshops, together with an iron smithy containing a forge and iron slag, a carpentry workshop that generated wood debris, and a specialized boat-repair area strewn with worn rivets. Besides those related to iron working, carpentry and boat-repair, other artifacts were common, everyday Norse items. These included a stone oil lamp, a whetstone and a bronze fastening pin. The presence of a spindle and a bone knitting needle suggested that women had also been present in the settlement around the turn of the 10th century.

Although they were the first researchers to prove conclusively that Norsemen like Erikson had found their way across the Atlantic Ocean to North America half a millennium before Columbus, mainstream science fell on the couple like a pile of bricks.

Fifty-seven years later, their daugh-

ter Benedicte related that "even after discovery of the spindle whorl, which conclusively proved Norse presence in Newfoundland," her parents were more publicly vilified than privately congratulated. She writes of "the academic rivalries, one-upmanship and posturing that went on as individuals tried to gain funding and promote their own self-interests."

Her mother's vital contribution to L'Anse aux Meadows was ignored, denigrated or "relegated to a minor position, despite Helge's efforts to stress Anne's role."

Benedicte described "the accusations of fraud they had to endure even many years after their discovery."

Stress led to a "growing rift between Ingstad [and his wife] in the aftermath of the Norse settlement discovery, as well as conflicts with friends in the archeological community. Helge was referred to as an 'amateur archeologist'," even though he had been an honorary member of the Norwegian Academy of Science and Letters, and held honorary doctorates at the University of Oslo, Memorial University of Newfoundland in Canada, and at St. Olaf College in Minnesota.

Benedicte writes that:

> Anne's accreditation as an archeologist went unremarked. The negative reaction of the Danish establishment persuaded Helge not to include Danish archeologists on further expeditions. … [A]cademic warfare began, though Helge was unaware of these machinations even after his permit to continue excavating in Newfoundland was summarily revoked.[9]

His discovery of food remains at the site included butternuts, a particularly enlightening find because they do not grow naturally north of New Brunswick. Their presence at L'Anse aux Meadows was physical proof the Vikings in Newfoundland traveled farther south to obtain them. The butternuts led Ingstad to believe that the site was probably an outpost or centralized hub for further Viking expeditions sailing down the North American coast to what much later

HELGE INGSTAD was pilloried by his colleagues for discovering the Viking impact on pre-Columbian America. Ingstad and his wife, archeologist Anne Stine Ingstad,uncovered the ancient remains of a Viking settlement at L'Anse aux Meadows in Newfoundland, Canada, proving that Viking explorers such as Leif Erikson had crossed the Atlantic Ocean to North America. They were ridiculed and censored.

Remains of several longhouses on Pamiok Island, Ungava Bay, Ontario, after T.E. Lee's 1968 reconstruction.

became the state of Maine and beyond.

His evidence-backed conclusion elicited only derisive laughter from orthodox scholars who, without proof of their own, downgraded L'Anse aux Meadows to a lone fluke, the short-lived failure of bumbling Norsemen.

By the time Ingstad died in 2001, at 102 years of age, he had personally outlived all his professionally jealous detractors by surviving into a new century in which his greatness has found a replacement generation of young admirers.

His struggle against powerful enemies had been preceded when the first examples of early ice age art came to light in Spain. The first and among the most outstanding specimens were found near the town of Santillana del Mar, 19 miles west of the city of Santander.

MARCELINO SANZ DE SAUTUOLA

In 1879, the nine-year-old daughter of Marcelino Sanz de Sautuola told him of an obscure cave with "strange drawings" she saw while playing on a hill locally known as Altamira, the "high view." Returning with her father, they beheld the walls and ceiling of the underground location alive with an extensive series of vibrant images depicting a herd of bison in different poses, two horses, a large doe and wild boar, goats and human handprints.

All were masterfully executed in charcoal and ochre or hematite, which had been occasionally diluted to achieve variations in intensity. Many of the representations were etched into the naked rock face, the natural contours of which had been skillfully and realistically incorporated into a portrayed animal's anatomy, thereby producing a three-dimensional effect.

For almost a year, de Sautuola explored Altamira's 971 feet of interconnecting chambers and twisting passages, all of them decorated with brilliant figures, without disclosing their existence to the outside world. Only in spring 1880, after meticulous notetaking of the complex interior, did he make his daughter's discovery public.

But professional scholars unanimously dismissed his "Stone Age art gallery" as a hoax, because consensus scientific opinion held that prehistoric man lacked the intellectual capacity to produce such extraordinary aesthetic expressions. Their choruses of ridicule were led by the leading antiquarian of the time, Emile Cartailhac (1845–1921), curator of the Académie des Jeux floraux, and one of the founders of the Institut de paléontologie humaine in Paris, during Lisbon's Prehistorical Congress. He dismissed de Sautuola as "an amateur archeologist" who had "forged" the images, given their exceptionally high quality and very good state of preservation.

"They all look as though they were completed by a hired artist just a few months ago," the influential Cartailhac asserted, "as they most certainly were."[10]

Throughout the rest of the 1800s and into the 20th century, Altamira became synonymous for "fraud" in the public mind, a transparent attempt to dupe the official guardians of scientific truth. In 1902, however, university-trained anthropologists found several other subterranean paintings of self-evident Paleolithic origins in Cantabria. These discoveries forced a re-examination of Altamira's main passage, which varies from six to 36 feet in height. Excavating the floor, they uncovered rich cultural deposits from 18,500 years ago dating to the Paleolithic, or Old Stone Age. Investigators determined that, prior to its modern discovery, the cave had not been visited since 13,000 B.C., when a landslide had sealed its mouth, thereby perfectly preserving the paintings and artifacts inside, until a large tree fell on the buried entrance, dislodging enough rocky debris to partially expose the opening sometime during the late 19th century.

Abashed by these revelations, Cartailhac recanted his rejection of the site in a famous article, "Mea culpa

d'un sceptique" ("The Apology of a Skeptic"), for a prestigious scientific journal, *L'Anthropologie*. Alas, his contrition came too late for the disgraced de Sautuola. His reputation ruined, he had died 14 years earlier. Long after, in 2008, scientists using uranium-thorium dating determined that at least sections of the rock art had been painted between 25,000 and 35,000 years ago.

The story of discovery was a pattern that preceded Altamira and continues to repeat itself onto the present day: Many of the greatest archeological finds are often made by lowly "amateurs" unfettered by conventional blinders, their documentation dismissed as "fraudulent" and they themselves castigated as "swindlers" by mainstream academics, who rarely give more than a cursory glance to the new evidence, which is later authenticated, typically long after all persons originally concerned have passed away in disgrace.

Visionaries of every kind are invariably despised, because their fresh perspectives undermine the faulty foundations of prevailing doctrine and the careers invested in that paradigm. The only difference between Cartailhac and today's scientific dogmatists is that they are emotionally incapable of writing a "Mea culpa d'un sceptique," because their professional pride prevents them from admitting they were wrong.

T.E. LEE

A far older find still ignored into obscurity ruined the career of its discoverer. At the northern end of Lake Huron and Georgian Bay, Ontario, T.E. Lee of the National Museum of Canada labored at an archeological precinct known as Sheguiandah, on Manitoulin, the world's largest freshwater island.

Between 1951 and 1955, he dug up finely made stone tools and worked fragments of quartzite at strata consistent with 100,000 B.C. For attempting to overthrow anthropological dogma with new information, Lee

Marcelino Sanz de Sautuola, the defamed discoverer of ice age art in Spain. Official apologies came too late.

"was driven from his government post into eight years of unemployment," writes anthropology author Michael Cremo, "blacklisted and unemployable in his own country," even though the Sheguiandah site had been confirmed as anciently authentic by "four prominent geologists."[11]

Forty years later, chipped, quartzite cobbles were found at another Canadian dig near Calgary. "It is undeniable that these cobbles look artificially worked," observed the American physicist and great compiler of anomalous scientific information William R. Corliss. He added:

> In fact, they closely resemble the human-made "choppers" from Early Paleolithic sites in Asia and Europe. The Alberta "tools" could be over 100,000 years old, completely upsetting the accepted timetable for human activity in North America.[12]

VIRGINIA STEEN-MCINTYRE

Another professional archeologist was also deprived of her livelihood for breaking the official quarter-million-year barrier for humans in America. During the early 1960s, Juan Armenta Camacho began finding some very old-looking lithic implements at Hueyatlaco, 70 miles southeast of Mexico City. He had assembled an impressive collection by the time U.S. geologist Dr. Virginia Steen-McIntyre, arrived to assist in excavating the Valsesequillo region project, as an expert in the field of dating materials associated with fire evidence.

Steen-McIntyre said:

> The stone tools were roughly of two types. Those in the older, lower layers were blades and flakes with edges retouched to make them sharp. Those from the upper layers were well-made, bifacially worked artifacts. That is, stone flakes were chipped off both faces of the tool.
>
> Both the upper and lower layers contained projectile points—spearheads—which showed that the hunters actually pursued game and did not just cut up a dead carcass that they had happened across. … [R]adiometric dates using methods identical to those used in Africa to date the early sites there place these ancient hunters way back in time, to slightly over a quarter of a million years ago.

Establishment resistance to her findings was fierce.

> A branch of the [Mexican] government descended on Juan and confiscated his entire fossil bone and artifact collection—those discovered during the Valsesequillo Project and the bone collection of the anthropology department, University of Puebla—and all his equipment. All was moved up to Mexico City. He was forbidden by law to do any more field work there, ever.

Steen-McIntyre was snubbed by colleagues for decades, despite persistent efforts to have her data peer-reviewed, until she was forced out of archeology. She confessed:

> So, there I was at the end of 1981, no job, tarnished reputation, stone-walled, discouraged, crushed emotionally. I pretty much turned my back on science and went in

Virginia Steen-McIntyre, punished for uncovering an uncomfortable antiquity.

other directions. From 1987 to 1994, I cared for elderly relatives and became a professional flower gardener.[13]

More than professional jealously was opposed against Steen-McIntyre, however. Her arguments on behalf of Upper Paleolithic artifacts were hard enough for conventional scholars to accept. But the Valsesequillo Project's quarter-million-year-old period dated 150,000 years before the supposed evolution of *Homo sapiens*, rendering Steen-McIntyre's dating of the site, however incontrovertible, too dangerous to consensus reality and hence much too hot for consideration.

Aside from application of state-of-the-art dating techniques, Dr. Cyclone Covey (professor emeritus of history, Wake Forest College, Winston-Salem, North Carolina) observed that the site's "artifacts lay in association with extinct fauna."[14]

The hunters at Hueyatlaco preceded the arrival of Christopher Columbus a bit too much for official acceptance.

While Steen-McIntyre was struggling to understand how 250,000-year-old tools had found their way into Mexico, archeologists elsewhere were beginning to envision Europe's Stone Age monuments as part of a worldwide network, contrary to most of their colleagues, who regarded such considerations as the worst possible scientific heresy, despite a preponderance of evidence to the contrary.

DR. DAVID D. ZINK

Among those very few scholars brave enough to openly confront prevailing opinions was Dr. David D. Zink (1927-2008), named "Explorer of the Year" in 1976 by the International Explorers Society (Miami, Florida), for spending decades seeking out hundreds of megalithic sites around the world. His personal survey was perhaps the most comprehensive of its kind ever undertaken by a single researcher, and at his own expense.

Although a university-trained investigator, he admitted that the societies responsible for erecting the standing stones raised "unsettling questions" with respect to the generally accepted version of human prehistory:

> They suggest a past marked by a mobility and an intellectual and technological sophistication that approaches or even equals our own. Specialists who work on a particular culture seem to develop a vested interest that impels them to see all local cultural evolution as totally autonomous. Such chauvinism leads to cognitive filters (blinders), which protect the investigator from any evidence that does not fit his own beliefs, in this case, about the evolution of man and his culture.[15] ❖

Dr. David D. Zink believed the builders of the most impressive megalithic sites around the world had an impressive level of technological sophistication that "approaches or even equals our own."

The Norse Discovery of America

The Norse Discovery of America as Detailed in the Icelandic Sagas

This is really three books in one, written by expert Viking scholars!

The Viking and Norse exploration of the continent of North America remains one of the lesser-known episodes found in the famous Icelandic sagas, and this book is a masterful collection of these adventures. Written and compiled by expert scholars and translated directly from the original Icelandic, the sagas showed that there were numerous Norse voyages of exploration—and settlements—in North America more than 500 years before Columbus. The meticulous research in this work also reveals that Columbus himself was aware of these Norse ventures, and that this knowledge provided many valuable details such as approximately how many days' sailing he faced. The sagas also contain many other fascinating details, such as the name of the first Norse baby born in North America, interactions with the natives (Skraelings) and the location of their landing points and settlements. In addition, the sagas provide evidence of Norse settlers in the New World who stayed behind and were absorbed into the native population. Book I: "Arguments and Proofs That Support the Claim of Norse Discovery of America" by Arthur M. Reeves. Book II: "Arguments and Evidences Respecting the Claim that America was Discovered by Norsemen About A.D. 1000, and Colonized About A.D. 1003 With Proofs Submitted as to Occupation of a Part Known as Great Ireland in the 11th Century" by North Ludlow Beamish. Kingship & Law in the Middle Ages

WHEN MOST PEOPLE THINK ABOUT THE MIDDLE AGES, they imagine a political system in which an unaccountable, omnipotent king and his lords held sway over their subjects—basically slaves—who had no recourse but to toil until death for their masters. But, the truth is, the lower classes held more power than one might imagine.

By Antonius J. Patrick

INTRODUCTION

The German medieval scholar Prof. Fritz Kern (1884-1950) produced two studies. One was *The Divine Right of Kings and the Right to Resistance in the Early Middle Ages*, released on August 1, 1914, which, unfortunately, did not become known to the English-speaking world until much later due to the then-impending outbreak of World War I. Another study, *Law and Constitution in the Middle Ages*, was published in 1919. The two were combined in 1939 under the title *Kingship and Law in the Middle Ages*. Praeger published the work in 1956, translated with an introduction by S.B. Chrimes.

The book is not an easy read nor is it necessarily for the novice with little knowledge of the period. That being said, there is an almost endless series of fascinating insights and explanations of how medieval law and society actually worked and how the rights of sovereigns and those they ruled were carried out and put into practice. Unlike what most contemporary scholars and lay people think, the idea of ruler and ruled was quite different than the current political configuration of the Western world. Instead, the sovereigns of the Middle Ages were bound by the same law as those they held sway over. Even though one may know little of the era, the book is certainly well worth the effort since it will undoubtedly inspire the reader to become more familiar with this neglected and often besmirched time of history.

PROF. FRITZ KERN
Expert on the Middle Ages.

Though it was not one of Kern's themes, a study of the book disproves once again the Whig interpretation of history which contends that each successive generation is superior to its predecessor. Although far from perfect, the Middle Ages, especially the early years, consisted of the most morally just societies in all of human existence. As the Western world continues to sink into depravity, economic decline abounds and omnipotent government is ever present, Kern's book describes a historically proven social order which, if studied and then emulated, can be the basis of a just and lasting new world order.

BRITISH AND AMERICAN CONSTITUTIONAL HISTORY

Kern sets out in the first study of *Kingship and Law in the Middle Ages* to supplement and bolster British constitutional history and seeks to bring out the similar characteristics and divergencies of how law, sovereignty and society at large worked to provide a greater understanding of European civilization as a whole. Unfortunately, even before WWI, British scholarship was deficient in the

Pope Leo III crowns Charlemagne emperor on December 25, A.D. 800.

workings of medieval law, and it was not until after WWII that Kern's book was received into the English-speaking world.

S.B. Chrimes, a lecturer at the University of Glasgow who translated and wrote the introduction to the book, explains what Kern had hoped to accomplish in regard to British constitutional history:

> What is needed … is a genuine study of constitutional history on comparative lines: a study which, instead of merely making an addition-sum, as it were, of national histories, shall seek the common factors underlying constitutional experience in a number of different but closely cognate countries, more especially those of Western Europe. (p. x)

Chrimes believes that Kern accomplished this task, as *Kingship and Law in the Middle Ages* "form[s] an important corrective to the common presentation of English constitutional history." (p. xvi)

While the book adds to British and European political historiography, it does not necessarily apply to U.S. constitutional history or to those many constitutions that have been written and re-written in nation after nation ever since. For, unlike the governing structures of Europe for most of its history, the U.S. Constitution and the government it created were designed to preclude a monarchy. This was not by accident, but was made explicit in Article 1, Section 9:

> No title of nobility shall be granted by the United States: And no person holding any office of profit or trust under them shall, without the consent of the Congress, accept of any present, emolument, office or title of any kind whatever from any king, prince or foreign state.

If Section 1, Article 9 was not enough, the very First Amendment to the Constitution of the new American state made it crystal clear that it was also to have no part in the honor, defense or promotion of Christianity as the European kings of the past had sworn to do at their coronations: "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof."

The anti-monarchial spirit found in the Constitution can also be seen in the Declaration of Independence and among those fighting the American Revolution. In his now deified document, Thomas Jefferson annunciated the grievances that the colonists held against George III:

> The history of the present king of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute tyranny

> over these states. To prove this, let facts be submitted to a candid world.

The wily Sage of Monticello deftly directed all of his furor at George III with only a small rebuke of the British "legislature" not mentioning Parliament by name. Little did Jefferson know, a little over four generations later, the king's abuses that he vehemently decried would pale in comparison to the mass murder and destruction that the U.S. government, which he and his fellow "founding fathers" were so proud of establishing, would commit on his Virginia descendants.

DIVINE RIGHT OF KINGS

As the Germanic kingdoms became Christianized, their governing structure began to change, with the Church playing a crucial role. The Divine Right of Kings would then become part of the concept of monarchy until the French Revolution:

> [T]he Church adopted a strongly theocratic view of the royal position, viewing it as an office carrying duties, imposing upon its holder the duty of acting as the Vicar of God. (p. xix)

The monarchial principle contained a theocratic element where the king had a "divine right" to rule, not as a dictator, but as a "guardian" of the community "to which God rather than the community appointed, and to God the ruler remained responsible for the performance of his office." (p. 7) The king was not "sovereign" without limitations, but was dependent "upon God and His commands—a dependence that sprang from the ruler's divine mandate." (p. 10) The divine right of kings at this stage of history was thus restrictive of the prince's power.

Christian theology merged with the Germanic tradition of popular election and blood-right in the selection of kings as the Church sought to "bridge the gulf between the two [theology and tradition] by its practice of blessing an individual man's right to rule." (p. xix) "The early medieval kings," Kern shows, "did not come to the throne through a simple personal right of inheritance. He did, as a rule, possess a certain hereditary reversionary right, or at least a privileged 'throne-worthiness' in virtue of his royal descent." (p. 12)

Unlike what is believed today—that the populace had no voice in feudalism—in fact, their consent was essential for any claimant to the office:

> [I]t was the people who summoned him to the throne with the full force of law, in as much as they chose from among the members of the ruling dynasty either the next in title or the fittest. The part played by the people or their representatives in the elevation of the monarch fluctuated between genuine election and mere recognition (or acceptance) of a king already designated.
>
> But at least the community gave legal assent to the prince's accession to the throne, and solemnly installed the new king in power. (pp. 12-13)

The Divine Right of Kings would become part of the concept of monarchy until the French Revolution.

Elected kings came from leading families who, over the course of time, were looked to for the settlement of disputes, the successful management of their estates, their courage and bravery in battle and for their intelligence and learning. Kings, for the most part, did not engage in demagoguery or make empty promises to their constituents to gain support. Class war, pitting the haves versus the have nots, which is endemic in modern politics, was not a part of medieval life. King-making was far from perfect, but, typically, the most competent and leading figures of a family dynasty would come to the throne. They took their vows seriously, did their best to fulfill their duties and were, in most instances, beloved by their people.

In his discussion of monarchy in the early Middle Ages, Kern accurately assesses the power (and limits) of kings, which differed from absolutists and later constitutional monarchs:

> [E]ven the monarch who was the sole ruler of an independent state owed his power, both in fact and in law, to a decision of the people, to the election or acclamation of the community, then we shall entertain no doubts at all that the monarchial principle of the early Middle Ages did not possess the strength attributed to it by the advocates of Divine Right in modern times; namely, the monarch's independence of popular will in respect of his whole legal position. (p. 9)

Unlike modern times, however, where supposedly the people through their "will" or "voice" govern society,[1] in the medieval era, neither the people nor kings was sovereign. Instead, God was sovereign, and "the law, which binds both monarchy and community, is equally sovereign, so long as it does not run counter to God."

Kern says: "The monarch … and the community … are joined together in the theocratic order in such a way that both are subordinate to God and to the law." (p. 10)

The Church's role in affirming the legitimacy of the medieval kings had significant implications on the monarchy as an institution. "[I]n the long run, the effect of the ecclesiastical consecration of the monarch was the exaltation of the state more than of the Church." (p. xix)

Kern tells us, however, that this conflicted with:

> … the deeply rooted Germanic idea of law [which] was that of the good, old law, unenacted and unwritten, residing in the common sense of justice, the sum total of all the subjective rights of individ-

uals. The king's right to rule was but his private right, a mere parcel of law itself. (p. xx)

The Church had a different vision and:

> … regarded divine or natural law as the universally obligatory law, and insisted that it was the king's duty to realize this law in practice, even if it conflicted with the good old customary law. (Ibid.)

This set the stage for later absolutism and the far worse condition of the "constitutional monarch," where legislators ensured the king's power shielding him from popular resistance, as Prof. Hans-Hermann Hoppe points out in his *Short History of Man*:

> [T]he position of the absolute king was at best a tenuous one, as the memory of his actual rise to absolute power through an act of usurpation still lingered on and effectively limited his "absolute" power, the introduction of a constitution actually formalized and codified his power to tax and to legislate.[2]

In contrast to what is taught in classrooms and written in nearly all political science texts, the development from absolute monarch to a constitutional one was that of regression in regard to liberty:

> The constitution was not something that protected the people from the king, but it protected the king from the people. … The constitutional king, in subjecting himself to a few formalities and procedural routines, was thus enabled to expand his powers and enrich himself far beyond anything possible for him as an absolute monarch.[3] (Ibid., p. 116.)

While the Church's vision of the monarch was not completely compatible with the Germanic tradition, it believed that, under the tutelage of popes, bishops and the Divine Law, kings would be checked in the abuse of their office. For most of the Middle Ages this held true. However, kings, being mere men and

THE JACQUERIE REVOLT

In 1358, in the waning centuries of the Middle Ages, peasants in France revolted, led by a man named Guillaume Cale. The cause of the Jacquerie Revolt, as it is called, was multifold, but is generally attributed to abuses heaped upon common laborers by their entitled overlords. Also, the French lower classes had still not yet forgotten the Battle of Spurs, fought in northern France. It was there that aristocratic French knights fled the battlefield—spurring their mounts in frantic retreat—leaving the commoner French infantrymen to be slaughtered by English armored cavalry. In addition, bands of victorious mercenaries raped and pillaged the countryside, the local people being the most affected by the lack of effective state protection. To add insult to injury, the French king was captured and ransomed. The money for this ransom was exacted from the lower classes.

Fed up with their incompetent and avaricious overlords, the peasants took to arms, killing a local knight, roasting him on a spit, carving him up and forcing his children to eat the flesh. This fueled the peasants' optimism, and the revolt spread: peasants sacked and burned local castles and murdered their rich owners. (Above, French "Jacqueries" sack an estate.)

Unfortunately for the lower classes, the revolt did not end well. According to "History Collection," a news and history website: "Desperate to end the revolt, Cale, with his peasant army assembled to meet that of the nobles, unwisely accepted an invitation for truce talks with the armed leader of the nobles, Charles the Bad of Navarre. Cale was treacherously seized when he showed up, tortured and beheaded. The now-leaderless peasant army was then ridden down by knights and routed, after which the peasants were subjected to massive collective reprisals and a reign of terror in which around 20,000 were killed."

sinners, eventually succumbed to the allurements of power, money and prurient pleasures, and the carrying out of God's will on Earth became secondary to their own needs.

KINGS AND THE LAW

In a nearly total reversal of what constitutes lawmaking in the present epoch, the early medieval legal structure rested on a different concept of law. While today governments make and change laws and regulations at the drop of a hat, the legal system in the age of kings was far different. For medieval life, law was "customary," "the law of one's fathers," and "the pre-existing, objective, legal situation, which was a complex of innumerable subjective rights." (p. 70)

There were no written constitutions that had to be interpreted by governments themselves and that have proven to be ineffective in the protection of individual and property rights. We all remember the all-too-recent usurpation of citizens' rights, stolen during the Covid hysteria power grab of recent memory.

Instead, the guarantor of rights in feudalism was done by custom:

> All well-founded private rights were protected from arbitrary change, as parts of the same objective legal structure as that to which the monarch owed his own authority. (Ibid.)

The king, too, was subject to the law, and, like the community, had to abide by its precepts. There was no civil or public law that applied to officials that today is used to shield their actions from prosecution. Instead, in medieval times, "the monarch is dependent upon the law, which is superior to him, and upon which his own existence is based." (Ibid.)

While most politicians attempt to get around the law to enhance their power, the kings and princes in feudal times "frequently acknowledged that they were bound by the law." (p. 75)

For the feudal state existed not as a law-making institution creating law through legislation, but "for the realization of the law; the power of the state is the means, the law is the end-in-itself;" (p. 70)

Never before have modern-day governments had the power to shut down entire societies at will, causing mass suffering and financial loss, as they did during the "Covid pandemic." But do we actually have the power to hold these 21st-century despots accountable?

This is contrary to the omnipotent democratic state whose laws, regulations and oversight reach into every facet of society.

The idea of law as custom, with every person of society under its sway, came from the legal make up of the Germanic kingdoms that was different than the Roman ideal of state-making law through legislation, as Kern states:

> The purpose of the state, according to Germanic political ideas, was to fix and maintain, to preserve the existing order, the good old law. The Germanic community was an organization for the maintenance of law and order. (pp. 70-71)

A clarification of the terms "monarch" and the "state," however, is in order. The use of monarch to describe the early feudal kings is somewhat of a misnomer. Monarchy, in the literal sense, means single or sole ruler who is the ultimate decision maker of judicial cases and who is also a "legislator," one who creates law. A monarch can also levy taxes without the consent of his subjects.

This is not how feudal kings operated, as Hoppe writes:

> The king is supposed to only apply law, not make it. …
>
> [The] king will never be granted a monopoly on his position as judge. … Everyone remains free to select another judge, another noble, if he is dissatisfied with the king.
>
> The king has no legal monopoly on his position as judge. … If he is found to commit errors in the application of law … his judgment stands open to be challenged in another noble court of justice, and he himself can there be held liable for misjudgment.[4]

Monarchy, as currently understood, describes those kings of the later Middle Ages and constitutional monarchs of the modern period. These later kings were "absolutist" in the sense that they no longer had to abide by the law and "live under it," nor were they restricted by the Church or the community.

The state, at that point in time, was far different than it is today. With the demise of the Roman Empire, supplanted by the Germanic kingdoms, the state—happily—was replaced by an aristocratic order where legal matters were solved in the courts of kings and princes along with the existence of ecclesiastical judicial bodies. A feudal king "may

look like the head of a state," as Kern says, "but he definitely is not a state but, instead, part of a natural, vertically and hierarchically structured and stratified social order."[5]

While the Church certainly supported the Germanic concept of the "good old law" as the legal foundation upon which a social order should rest, it added another component to the law, the role of the state, and the principles of monarchy. Kern discusses this highly important element of the early medieval legal structure:

> [T]he purpose of the state, according to Christian ideas, was more progressive, active and ambitious. The state must respect and enforce not the existing traditional law, but the law never quite attained, yet ever to be striven for, of God or nature, the law of reason, and, in a certain sense, the law of the Church also, especially its biblical and theological premises. (p. 71)

Kern continues:

> The medieval Christian state is not merely a juristic institution, but expresses the ideal of active social betterment and civilization. Hence it binds the monarch to another law, and not merely to the existing order, but to one which has still to be created. (Ibid.)

This concept expanded the role of the king which stems, in part, from the duty imposed on him with the Church's making him a "vicar of Christ" in its coronation rites, placing a sacerdotal mark on the monarch. Kern discusses the merging of the two principles and their differences for the feudal kings:

> The divine law, which the Church expected the state to enforce, and the customary law of the "folk" were, therefore, not necessarily identical in purpose. On the contrary, precisely because it is a new law, revolutionary, reforming and civilizing, the divine law of the Church is often found opposed to folk-law.
>
> Consequently kings … were often induced by the Church either to broaden the … conception of the state … simply to preserve the law, or to replace it with the ecclesiastical notion of the state's duty to advance the welfare of its subjects. (Ibid.)

CONCLUSION

There are a number of other important topics discussed in *Kingship and Law in the Middle Ages*—consecration of the monarch, popular sovereignty and contract, the transfer from repression to prevention—not covered in this article. What has been emphasized is most applicable to what is taking place in the world today.

Never before have governments had the power to shut down entire societies at will, causing mass suffering and financial loss, as they did using the "Covid pandemic" as an excuse. Yet, it has happened and, if steps are not taken, it will be done again.

To prevent another such cataclysm, the omnipotent state must be eliminated. However, it first must be debunked in the realm of ideas. Fritz Kern's masterful study of the Middle Ages provides the intellectual ammunition for that necessary task. ❖

Will Vaccines Be the End of Us?

Author John Massaro has traveled around Africa, Asia, and South America and gotten numerous "travel shots," never having heard a bad word about vaccines. In fact, he thought they were a medical miracle. He later learned they had caused an autoimmune condition that had tragic consequences. He became fixated on the subject and,over the next 30 years, made an exhaustive investigation with an open mind, examining the pro-vaccine position and the people behind it. He discovered that the history of vaccination, going back to 1796, is one, long, hidden narrative of failure. Massaro says that, now, with the Covid-19 shots we've reached the final act. Others have written about the corruption that pervades the vaccine industry and top public health agencies, but none has shown how it ties in with so many other falsehoods that stain the human record. Give Them a Big Hand

Archeologists in Kent, England have unearthed 800 Ice Age stone artifacts in a secluded valley. This included two "giant hand axes" thought to have been created during an interglacial period possibly more than 300,000 years ago, according to the *Internet Archaeology* website. At the time, an early Neanderthal people inhabited Britain, archeologist Letty Ingrey reported, but added that her team from University College London Archaeology South-East was still unsure who made the tools. The hand axes were so large—one was reportedly 11.7 inches long—it prompted some to ask what Hominid species had hands large enough to wield such a massive tool or if, perhaps, the axes were solely for ceremonial purposes. For those wondering, Neanderthal man did make sophisticated flaked stone tools and even manufactured portable flint cores that could later be knapped to form a variety of sharp-edged tools. This is now known as the Levallois technique.

Jurassic Weasel

Millions of years ago, it wasn't just dinosaurs struggling for existence in the Early Jurassic period. Ancient mammals were scurrying around then, too. But what were they like? According to archeologists digging in Mongolia, a newly discovered species of early mammal, dubbed *Feredocodon chowi*—best described as a miniature weasel—living alongside the dinosaurs during the Early Jurassic. Note that the Early Jurassic started immediately after the Triassic-Jurassic extinction event, a couple hundred million years ago. This extinction event—caused, scientists believe, by volcanic eruptions—is not to be confused with the Chicxulub comet strike of 66 million years ago that began the extinction of the dinosaurs and pave the way for mammalian dominance of planet Earth.

Sky Islands Under Threat

Forbes is reporting that an "inland archipelago of 30 isolated mountains is a new ecoregion that is home to hundreds of plants and animals found nowhere else on Earth." That unique area spans a portion of the border between the African nations of Malawi and Mozambique. Due to flukes of geology, there you will find mountain peaks rising up in a dotted chain, each stark granite spire surrounded and separated from the next peak by patchy grasslands. Atop these "Sky Islands" you will find evergreen forests "watered by cool moist winds from the Indian Ocean" says *Forbes*. Living in these evergreen forests are, scientists say, hundreds of unique species found nowhere else on Earth. This includes a bird that must nest near anthills to survive, a pygmy chameleon (thought extinct), a new Quirimbas Mongrel frog, a new variety of bush viper and *Epamera malaikae*, a new species of iridescent blue butterfly. Unfortunately, these ancient and unique forests are being cut down by farmers and loggers. Conservationists are trying to stop this practice before the Sky Islands and their rare denizens are lost forever.

Dutch Stonehenge?

Archeologists in Tiel, Netherlands, led by Cristian van der Linde, have uncovered a 4,500-year-old ritual site reminiscent of both Woodhenge and Stonehenge in Britain that, they say, was also used to track astronomical alignments and mark the summer and winter solstices. The nine-acre site featured multiple mounds between which the Sun would shine on the shortest and longest days of the year. Unlike Stonehenge, no megaliths were erected, and any remaining sighting posts rotted away long ago, though much archeological work remains to be done at the site in the Dutch municipality of Tiel. The massive grounds were also used for ancient burials. The graves of at least 60 adults and children have been found thus far.

Anti-Semitism in China

The Jewish Telegraphic Agency (JTA) is reporting that, after the Oct. 7, 2023 counter-terrorism strikes by Hamas fighters inside Israel, anti-Semitism in China has skyrocketed. The JTA reports: "China's internet—from message boards to video platforms to social media—suddenly flooded with viciously anti-Israel and anti-Semitic comments. Pointing to Israel's actions against the Palestinians, people have [voiced] support for Hitler and Nazi Germany to the idea that oppressed Jews have become oppressive Nazis." JTA added: "It's not just a phenomenon on social media. State media, such as the Chinese Communist Party-backed national news broadcaster CCTV, claimed that 'Jews represent just 3% of the American population but control 70% of its wealth. [T]hese factors can be used to exert incomparable influence on politics'." No kidding.

alleged "spike in hate crimes" may have something to do with the fact that there have been more than 1,100 very emotional pro-Palestinian protests in the city since Oct. 7, 2023, during which marchers might have yelled out something offensive to Jews. In one of the more serious incidents, a 19-year-old suspect was charged with chasing an Israeli student with a stick on the Columbia University campus. So, while Jewish students are made to feel a bit uncomfortable at college campuses here in the United States, each and every one of Palestine's schools has been destroyed by the Israeli military. According to *Al Jazeera*, "Hundreds of schools, including those run by the United Nations, in [Gaza] were bombed, and students and teachers killed, in just the first 100 days of Israeli bombardment" that eradicated "educational infrastructure and caused mental trauma to thousands of beleaguered students."

Anthony Fauci's Admissions

In case you missed it, on June 3, now-retired, unelected bureaucrat Dr. Anthony Fauci testified before a House panel about the origins of the Covid-19 pandemic, the response of the government to the outbreak and his involvement in censoring all who questioned his "science." It was a barnburner. Not only did one of Fauci's longtime assistants admit he had schooled Fauci on how to avoid Freedom of Information Act requests so his electronic communications would be safe and secure from outside scrutiny, Fauci was heard on a recording urging his colleagues to continue to make life as hard as possible on Americans who were reticent to get the mRNA Covid shot to carry on their daily lives. This involved working with the largest social media outlets to push his narrative exclusively and censor all dissenting opinions about the efficacy and potential dangers of the vaccine and the origins of the virus. Members of the House panel also want to know why Fauci met with CIA officials several times during the pandemic. Fauci also alleged that he had always kept "an open mind" about the origins of the virus being either from natural mutations or whether it had escaped from a Chinese lab. Behind the scenes, however, Fauci was rewarding scientists with lucrative grants who agreed to continue the lie that the virus had emerged "zoonotically" from an exotic food market, and ridiculing any scientists who disagreed publicly. Some are predicting that, if the GOP keeps the House and wins the Senate this fall, Fauci could face criminal charges

Interview With Ruuben Kaalap, Former Estonian Parliament MP

What follows is an uncensored interview with Ruuben Kaalap, a conservative former member of the Estonian Parliament (MP). Conducted by James Edwards, a member of TBR's Board of Contributing Editors and the host of the popular radio show *The Political Cesspool*, this interview gave Kaalap an uncensored platform to discuss the future of his homeland, the Baltic states, Russia, ethnic groups within Russia, White culture and much more of interest to Europeans and Euro-Americans.

TBR: Five years ago, at just 25 years old, you were elected to the Estonian Parliament. How did you manage to accomplish such a feat at such a young age?

Kaalap: My journey in Estonian politics began long before my election to the parliament. I was driven by my sense of duty and responsibility toward my country, my nation, my ancestors and descendants. As a teenager, I was already active in nationalist activism, and, in 2012, I co-founded the Conservative People's Party of Estonia (EKRE). Additionally, I was elected several times as the leader of the youth movement Blue Awakening (Sinine Äratus), which played a crucial role in promoting nationalist ideas and values among young people in Estonia.

Despite my youth, I was already a spokesperson for the nationalist worldview in Estonia. I made my first, unsuccessful bid for parliament at the age of 21 (minimum age), and two years later I was elected into my city council. These campaigns gave me a lot of political experience that was very useful in the parliamentary elections of 2019.

Despite the attempts by the mainstream media to portray me as an extremist, particularly following my appearance at the American Renaissance Conference [AmRen] in 2016, these efforts actually backfired and brought me support from many Estonian people. The ideas expressed at AmRen resonate with a large portion of the Estonian population, who share concerns about issues such as national identity, immigration, and cultural preservation. Rather than alienating voters, the media scrutiny highlighted my commitment to defending our nation's values and sovereignty, which resonated strongly with many Estonians.

RUUBEN KAALAP
Wants Estonia preserved.

TBR: What issues did you run on? What were your planks?

Kaalap: Throughout my campaign, my election slogan consisted of three core principles: "Estonian nation, Estonian nature, Estonian independence." These principles are also central to the Blue Awakening movement. During my term in the parliament, I fought hard for all of these issues.

I firmly believe, as does the majority of Estonians, that nationhood is intrinsically tied to ethnicity, and that our national identity must be preserved through policies aimed at increasing the proportion of ethnic Estonians among our population. With just 67% ethnic Estonians, one of the lowest rates in Europe, this issue demands urgent attention.

For me, nationalism, conservatism, and environmentalism are inseparable. My actions in the parliament helped to strengthen protections for our sacred groves, ancient natural sites revered since pre-Christian times. True

nationalism rejects the exploitation of our environment for the profit of foreign interests. I defended our forests from the indiscriminate clear-cutting, that is currently happening in Estonia. I strongly believe in the deep connection between blood and soil, and to make it possible for Estonians to remain Estonians, we need to preserve our environment and heritage landscapes that have nurtured our forefathers from time immemorial.

In the parliament, I was a member of the Foreign Affairs Committee, and that allowed me to focus on safeguarding our national independence and sovereignty. I believe that true sovereignty begins with regaining our cultural and spiritual consciousness. As a dedicated ethnonationalist, I advocated for the recognition of ethnostates and self-determination as a fundamental right of every nation. These are the principles that the Estonian ethnostate was built on in 1918, restored in 1991, and which should guide our foreign policy.

In addition, I prioritized revitalizing our national economy, freeing it gradually from the grip of the foreign banking system and multinational corporations. In conclusion, my campaign centered on addressing key challenges facing Estonia, and I believe they resonated strongly with the voters.

TBR: Your party, the Conservative People's Party, has been described as nationalist and right wing. It is also currently the second most powerful party in Estonia. What makes the party so attractive to voters?

Kaalap: The Conservative People's Party of Estonia (EKRE) resonates with voters because it offers a clear alternative to the liberal democratic status quo and advocates for policies that prioritize the interests of ordinary Estonians. Our party is committed to protecting Estonia's national identity, sovereignty and cultural heritage, while also addressing pressing issues such as immigration, security and economic development. We believe in putting Estonians first and ensuring that our country remains a safe and prosperous homeland for future generations of ethnic Estonians and friendly Estophiles.

Additionally, a significant factor in EKRE's appeal to voters lies in the disillusionment many Estonians feel toward the West. During the Soviet occupation, the West was idealized by Estonians and, in the 1990s, there was a strong desire to emulate Western values and lifestyles. However, as time has passed, many Estonians have come to recognize the negative impacts of globalization, urbanization, mass immigration and alien culture on our unique national identity and cultural heritage. EKRE's stance against these forces resonates with people who seek to preserve what is distinct and valuable about Estonian society.

TBR: Coupled with the popularity and sustained success of similar parties, like Vlaams Belang in Belgium, should we have reason to believe that such ideas are once again becoming ascendant in Europe?

Kaalap: Western Europe has long neglected the deeper understanding of national identity, the importance of roots, ancestors, language and traditions. These fundamental aspects have been forgotten or ridiculed, not only by our enemies from the leftist or liberal camp but also by conservatives who fail to grasp the depth and profoundness of ethnic roots. This has created an unnatural situation where modern urbanized cosmopolitan Westerners sense a profound emptiness within themselves. This lack, deeply rooted in every nation's collective unconscious, is beginning to resurface.

The rise of parties like Vlaams Belang, EKRE and others across Europe reflects a growing disillusionment with traditional political elites and a desire for change among many citizens.

As people increasingly recognize the erosion of their cultural identity and traditional values, they are turning to parties that prioritize national sovereignty, ethnic preservation, and the well-being of their own people.

This resurgence of nationalism means a shift away from the globalist agenda and toward a rediscovered appreciation for the unique identities of European nations, encompassing our cultural, genetic and linguistic heritage.

TBR: Compared to the multicultural hellscapes of so many once-thriving major American cities, a place like Tallinn (Estonia's capital) is breathtakingly beautiful. How have Estonians been able to preserve their cultural heritage?

Kaalap: Estonians take immense pride in our heritage and have worked tirelessly to preserve it throughout our history. Our strong sense of national identity, rooted in our language, traditions and connection to our land, is the basis of our resilience. Additionally, Estonia's small population and homogenous society have allowed us to maintain a strong national identity and preserve our heritage in the face of external pressures.

One key factor in preserving our heritage is the tradition of native-language education, dating back to the 17th century. Estonia's village schools quickly established our nation as one of the most literate in Europe. Remarkably, our oldest university predates Harvard and became an Estonian-language institution right after Estonia first declared independence. During that time, Estonian was the smallest language in the world to have its own university. Education still plays a crucial role in transmitting our heritage to future generations.

> One key factor in preserving Estonian heritage is the teaching of our native language.

Estonia's educational system incorporates comprehensive programs on national history, language and traditions, instilling a sense of appreciation and responsibility for preserving our cultural heritage from an early age.

As a result of generations of tireless efforts of Estonian writers, poets and intellectuals, every great classical work of world literature is available in Estonian. We have always known that the respect and understanding of other cultures and one's own culture go hand in hand. Such deep cultural work is what allowed Estonians to regain ethnic consciousness in the 19th century, and to start building our own free country. And, during the harsh years of the Soviet occupation, the metapolitical struggle of our artists, writers, musicians and philosophers was what kept the ethnic identity alive, and allowed it to strongly and massively resurface the moment when the power of the Soviets waned in the 1980s—and thus began the famous Singing Revolution.

This is not to downplay the importance of physical and armed struggle for the Estonian homeland, which has also lasted for centuries. The memories of our ancestors' heroic battles against the overwhelming forces of Crusaders and Russian invaders since the Middle Ages remained deep in our folklore and were passed down for many centuries. These legends inspired Estonians to fight in the War of Independence 1918–1920, and, during World War II, to join the guerrillas known as the Forest Brothers, and to serve in the Estonian Legion fighting against the Red Army.

These memories, in turn, helped to keep alive the metapolitical struggle during the latter half of the Soviet occupation, even though none of this was allowed to be talked about publicly—which made our grandfathers' stories even more precious.

TBR: To what extent has the "great replacement" that is taking place in the United States and Western Europe impacted Estonia?

Kaalap: Estonians have already endured a great replacement during the Soviet occupation. The horrors of World War II and the subsequent Communist regime led to the loss of close to 20% of our population. Many fell victim to Communist genocide and deportations to Siberia, while others fled to Western countries in search of refuge. In their place, hundreds of thousands of immigrants were forcibly brought in from the vast Soviet empire, leading to a demographic shift in certain regions of Estonia where the Estonian population was literally replaced with Russian-speakers.

Before World War II, Estonians comprised 88% of the population, but, by 1989, this figure had fallen to just 61%. The threat of becoming a minority was very real for us, and we have seen many of our fellow Finno-Ugric peoples under Russian rule fall victim to that fate, as they face complete extinction within this century, after having become minorities.

Through patriotic policies implemented in free Estonia, we managed to raise the proportion of ethnic Estonians in the country to 69% by 2011. But then the appearance of liberal policies began to reverse this trend. Like many European countries, Estonia has grappled with demographic changes in recent years, including emigration, new immigration, and declining birth rates. By 2021, the share of ethnic Estonians had once again fallen, this time to 67%.

During EKRE's tenure as a governing party from 2019 to 2021, we implemented a comprehensive set of policies aimed at halting this decline. This included measures to curb the influx of cheap labor, to incentivize the return of Estonians living abroad, and to support young families to alleviate the need for burdensome bank loans to secure housing. Unfortunately, these nationalist policies were reversed when liberals regained power.

We are in a very vulnerable situation since Estonia's population is only 1.3 million. The longstanding saying that every Estonian must stand for 10 people, in terms of achievements and contributions, has historically held true. However, the demographic trends observed in Western Europe pose an existential threat to our very physical survival. We have a deep understanding of this threat, having witnessed the erosion of our own national identity and the gradual extinction of our brotherly Finno-Ugric nations who are unfortunate enough to live in territory ruled by Russia. It is imperative as Estonian nationalists that we take decisive action to counter these trends, since our very survival as a people is at stake.

TBR: What are the biggest political and social concerns that most Estonians are worried about?

Kaalap: In Estonia today, our main worries encompass both external and internal challenges that shape our nation's future. At the forefront of our concerns lies the issue of national security and defense. The Russian invasion of Ukraine and accompanying hybrid attacks against Baltic countries

threaten us very acutely and physically. To safeguard our sovereignty, Estonians, myself included, stand ready in organizations like the Defense League, a well-trained voluntary militia that is ready to defend our homeland alongside the regular armed forces. Estonia has also always retained a policy of mandatory conscription for young men.

Yet, even as we fortify our defenses, we must confront the pressing challenges on our domestic front. Estonia has recently experienced the highest inflation in the EU, which casts a feeling of uncertainty over many livelihoods. Together with ill-conceived policies such as the EU's "green deal," which has disrupted our energy sector without any true environmental benefit, our economic landscape is under strain.

A large part of Estonia's economy is controlled by foreign capital. At a time when Estonia's economy is in recession, the Swedish-owned banks are only raising their profits at the cost of the Estonian people. The farmers are quitting, small businesses are going bankrupt all over the country, while the government is only focusing on the residents of the big cities.

This brings us to another very pressing topic: urbanization. It is threatening both our environmental landscapes and traditional rural way of life, which are essential to Estonian culture. The policies of the liberal government are creating a gap and divide between cities and countryside, both in economic as well as cultural terms. As more and more people move to cities, leftist culture encroaches, diluting our unique identity as Estonians. The liberal government is currently actively shutting down longstanding village schools that have served communities for centuries.

Moreover, there is a growing belief among liberals that rural living is becoming increasingly obsolete, with cities being perceived as the sole space for normal people.

Additionally, immigration, integration and the preservation of our ethnic makeup are fundamental parts of our national discourse. Most Estonian people remain true to our commitment to preserving our ancestral identity. We know that we need to stay true to who we are.

TBR: Your nation sits in a very interesting corner of the world that shares a border with Russia. You view the Russo-Ukrainian conflict differently than most dissidents in America do. Please explain.

Kaalap: Estonia has the historical experience of 50 years of Soviet occupation, but this was preceded by two centuries of forced oppression by the Russian Empire, and this, in turn, was preceded by more than 40 recorded invasions of Estonia from the east since the 11th century. Therefore we have no illusions about the deeply entrenched imperialist mindset within the Moscow empire, no matter if it is Czarist, Communist or Putinist. The imperial identity of Moscow makes it an existential threat to neighboring countries. This experience resonates with every nation that has shared a border with Russia. Thus, no sane person in Eastern Europe would choose Russian occupation over European integration; the choice is clear.

> Urbanization is threatening both our environmental landscapes and traditional rural ways of life.

Therefore we stand also in support of Ukraine's sovereignty and territorial integrity. Estonians across the political spectrum absolutely condemn Russia's aggression. As nationalists, we recognize Ukraine's right to self-determination as an ethnostate of the Ukrainian people, which echoes our commitment to preserving national identities and resisting external intervention.

I completely understand the American non-interventionist position in regard to conflicts outside the Western hemisphere. It is a natural counter-reaction to the stupid and irresponsible wars in the Middle East that the United States became involved in, which were never in the interest of the American people. What I cannot understand, however, is the idolization of post-Soviet Russia as a traditionalist country, coupled with the dismissal of Ukraine's strong and growing nationalist movement as globalist puppets.

The brave Ukrainian men and women fighting on the frontline are doing more to save the European peoples and our race than any political activist ever could. If there is a White country in the world where ethnic and racial nationalism are completely accepted in society, it is Ukraine. Say what you will about President Zelensky, but the collective will of the people matters far more than individual leadership, because it is the Ukrainian people who collectively have refused to surrender their country to the Russian sphere of influence.

Many Estonians have personal connections with those serving on the frontlines of Ukraine's struggle for independence. Estonian volunteers have joined the fight alongside their Ukrainian brothers-in-arms. As a Member of Parliament, I visited war-torn Ukraine in August 2022, and I saw the destroyed cities of Bucha and Irpin, which stand in ruins as testimony to the war crimes reminiscent of the genocidal Red Army of World War II.

I visited wounded Ukrainian soldiers in a military hospital. I will never forget the sacred oath given by soldiers of the Azov regiment on the burial of their female comrade who fell in the battle of Mariupol. Of course, with my fellow nationalist MP, we didn't go empty-handed. For the fighters of the Azov Division we gifted two reconnaissance drones that were later used in battle.

These are ties forged in blood. This is what matters, and not the intellectual exercises of Western armchair strategists.

TBR: If you could author the ending of the war, what outcome would you like to see?

Kaalap: The best thing that could come out of this war would be the emergence of an independent alliance comprising Central and Eastern European states. Ukrainians are growing more and more disillusioned with the U.S. and NATO. And why shouldn't they, given that at this moment Ukraine has only one month's worth of surface-to-air missiles for the protection of their civilian population against Russian terror? Instead of redirecting the Western arms industry to help Ukraine, the largest majority of American and German weapons go to Israel to enable the genocide of Palestinians. It is becoming more clear that, in order to defend our countries against Russia effectively, we need an alliance that would be independent of the globalist structures of NATO and EU.

I have been the foremost advocate in Estonia for such an alliance for years, especially during my tenure in the Foreign Affairs Committee. Referred to by the Polish as Intermarium, and aligned with concepts like the Three Seas Initiative, this vision extends to the geographic heart of Europe—which could aptly be named Middle Earth.

This coalition, encompassing the countries between the Baltic, Black and Adriatic Seas, could economically and militarily be able to rival Russia. Even more importantly, it would serve as a bastion of European culture, preserving the part of Europe that has best retained its national instincts and traditions, sheltering it from the pervasive influence of American mass culture. An independent alliance between the three seas could also support the efforts of the descendants of Europeans worldwide. All of this, of course, presumes a peaceful resolution to the Russo-Ukrainian war that respects Ukraine's sovereignty and territorial integrity.

This would involve the withdrawal of Russian forces from Ukrainian territory, and Russian acceptance that Ukraine should be free to choose its own geopolitical path regardless of what Moscow calls its strategic interests.

As for the future of Russia, I am mainly concerned about the self-determination of indigenous populations like the Finno-Ugrians. While some, such as Vepsians, Izhorians or Mansi, have been pushed to the brink of extinction, others, such as Erzya, Mari and Udmurts, have a strong enough national identity that Russian authorities recently began a crackdown on their alleged separatism, sending many cultural activists to prisons according to Russian hate speech laws.

As custodians of Finno-Ugric heritage, Estonia, Finland and Hungary have a vital obligation to support their eastern brothers in their quest for self-rule and ethnic preservation.

TBR: What are your plans for future activism?

Kaalap: I decided early on during my parliamentary career not to seek another term right away. I believe, during those four years, I achieved best what was possible under the times. Later, I was proven right. The parliament is in a gridlock situation between liberal and conservative parties, and the political debate there is becoming more and more superficial. I said goodbye to the towers of Tallinn, and returned to the South Estonian wilderness and countryside.

That allowed me to focus again on the metapolitical work, and I currently chair the foundation Estonia for Estonians, which most importantly oversees the publication of nationalist news and opinion portal *Koiduaeg*.

I am also a member of the council of the Integration Foundation, which deals with the questions of integrating non-Estonians into Estonian society. I represent the nationalist voice in that institution. (For some weird reason, the Estonian Jewish community vocally opposed my appointment to that position, but they were powerless to stop me.)

As a former member of the Estonian parliament and a proud Estonian patriot, I remain committed to advocating for policies and initiatives that

The War Against Whites: The Racial Psychology Behind the Anti-White Hatred Sweeping the West

The War Against Whites by Arthur Kemp reveals that the Black Lives Matter ideologues do not seek "racial equality," but rather the total destruction of Whites and their civilization—and are driven by a deep, underlying mass psychosis which falsely blames White people for all problems encountered by non-Whites trying to fit into a First World society. Dealing forthrightly with IQ, character, psychology and behavior, racial disparities in crime, socio-economic status, education, and health, this book conclusively refutes the claim that "systemic racism," a code word for "blame Whitey," is the cause of non-White failure to achieve parity in White nations around the globe. Analyzes the George Floyd incident, the myth that police in the U.S. are "hunting Blacks"; the Black slaughter of their fellow Blacks; official crime records in the U.S., the UK, the Netherlands, France, Sweden, Germany, Austria, Norway, Australia and South Africa showing that Whites are overwhelmingly the victims of non-White criminal attacks; provides a thorough refutation of the "environment" argument; shows that low IQ is conclusively linked to crime—among all races; schizophrenia, the "aggression gene" and violent crime—and much, much more. promote our national interests. I have unique experiences in grassroots organizing, political engagement and public advocacy, which I have a duty to put into service for my nation.

Recently, I was also elected the chairman of EKRE's local chapter, in which position I plan to advance community-based direct democracy, protect the local environment and retain the unique culture of South Estonia.

Yet I recognize that the greatest contribution I can make is in fostering a deep appreciation for our culture and history. I am doing it both through creative expression and educational outreach. Our greatest goal is to ensure that our heritage endures and thrives for generations to come. In the end, the only thing that matters is if we can pass on our heritage to the coming generations. This will be my main mission for the coming years, beyond the realm of politics.

TBR: How can Estonia play a bigger role in the reclamation of Europe's destiny?

Kaalap: Estonia's role lies in its unique preservation of ancient European culture, worldview and spirituality, because we have retained deep in our subconscious something that was lost in Western Europe centuries ago. Within the Estonian soul survives a profound connection to our ancestors, not the least thanks to the pre-Christian traditions that have endured through the ages. This fundamentally animistic outlook on life, which in our country is very well able to coexist with Christian beliefs, is the basis of our national identity.

The ancient European spirit is still alive here, among the scattered villages, deep forests and lakes, the melodies of our folk songs and even the structure of our language. Every descendant of European ancestors, whose heart is open to it, can experience it during a visit here. It is a secret hidden deep within our ethnic subconscious, defying explanation and eluding definition.

I firmly believe that this spiritual heritage is precisely what Europe needs in its quest to overcome the pervasive rootlessness of the modern world. Estonia stands as a living testament to the power of reconnecting with one's roots.

This holds the key to unlocking a new awakening—a renaissance grounded in the timeless wisdom of our ancestors. I urge all who share the European legacy to rediscover their roots. Only this can bring about a true awakening and a brighter future for European children. ❖

The Great Tragedy: Germany's Declaration of War Against America—Hitler's Speech to the Reichstag, December 11, 1941

Adolf Hitler's December 11, 1941 speech to the Reichstag, delivered just hours after a formal declaration of war had been delivered to the U.S. ambassador in Berlin, marked a decisive turning point in the global tragedy of World War II. This speech was more than just a declaration of war: it was an 88-minute personally written explanation by Hitler of the origin of the war, the background to the outbreak of the war in Poland, its subsequent dramatic developments, why he decided to attack the Soviet Union in June 1941, President Franklin Roosevelt's hostile policies toward Germany, a short overview of Germany's place in the struggle for all of Europe, and, finally, his earnest desire for peace at any cost. The day after this speech was delivered, a highly inaccurate and edited version appeared in American newspapers. This is the first complete and accurate translation of this massively important historical speech, and provides a feast for historians of that great and awful conflict. Back Door to War: The Roosevelt Foreign Policy 1933—1941

By Charles Callan Tansill. One of the foremost American diplomatic historians of the 20th century convincingly argues that U.S. President Franklin D. Roosevelt wished to involve the United States in the European War that began in September 1939. When his efforts appeared to come to naught, Roosevelt determined to provoke the Japanese Empire into an attack on American territory. Doing so would involve Japan's Axis allies in war also, and so America would thus enter the war through the "back door" to destroy Germany. The strategy succeeded, and Tansill maintains that Roosevelt therefore welcomed Japan's attack on Pearl Harbor. Tansill demonstrates quite convincingly his central theme: that FDR sought to include the United States in World War II by any means necessary on the side of the Soviet Union from the very beginning, and duped the Japanese into firing the first shots at Pearl Harbor and other possessions in the Pacific. Tansill proves his premise by the usage of extensive primary material from U.S. State Department files, current periodicals and sound reasoning. Softcover, 735 pages, #651, $40.

The Aryan Race: Its Origins and Its Achievements

By Charles Morris. A beautifully written cultural history of the Indo-European peoples. The author, a classical scholar, defines "Aryan" as a "linguistic race" spanning the areas occupied by the great Indo-European invasion, reaching from India to Ireland, and proceeds to analyze all aspects of the cultures across this vast region. Along the way, he proves that the broad family of Indo-European language speakers had a common origin at some distant point in the past. It includes an overview of the development of ancient Indo-European households, farming arrangements, legal systems, culture, religion, language and political development. Read of the tales from the *Rig-Vedas*, their similarity to the Greek and Roman myths, and the parallels with the Norse *Edda* and even Cúchulainn in Ireland. It is a treasure-trove of facts, myths and storytelling that reflects the collective genius of the Indo-European people across the centuries. The last chapter is a prognosis of future racial development. Written in a time of unparalleled European supremacy over the world, the author's predictions have been completely reversed by events, but, even in the confidence of his claims, is a lesson well worth learning: the futility of "White supremacy" and the understanding that the only path to racial preservation lies in physical geographical separation, not White rule over other races. Lost in the Jungle

By Paul du Chaillu. Here is the third classic study of African wildlife, culture and native tribes as they existed in the mid-1800s, written by the first European explorer to confirm the existence of gorillas and pygmies. Following on from his *Stories of the Gorilla Country* and *Wild Life Under the Equator*, adventurer Paul du Chaillu describes in vivid detail African life before the advent of European colonization, and the astonishing practices, culture and environment which existed at this time. This work is particularly valuable as it shows, without prejudice or favor, Africa as it was, as seen by one of the first European explorers to set foot inside the interior of the Dark Continent. Read of witchcraft trials, and the tribe members' astonishment at their first sight of a White man, their amazement at everyday items such as clothes, shoes, socks, hats, a music-box and a mirror, and of how the Apingi tribe appointed du Chaillu as their king. This is truly a story of how a White man went where no European had ever gone before. This book is another eye-opening account of Africa in its natural state, and contains many sobering lessons applicable to the present-day—if the reader has the vision to see and understand their meaning. It is a hand-restored and re-set edition, complete with original illustrations. Softcover, 200 pages, #794, $20.

The Impending Crisis of the South: How to Meet it

One of the most influential anti-slavery books in pre-Civil War America, this book by Southerner Hinton Rowan Helper not only opposed "White supremacy" but also clearly analyzed and explained the relationship between race, civilization, politics and demographics. By assembling official statistics from slave-owning and non-slave-owning states, the author proved conclusively that the presence of slaves was not, as some of the South's leaders claimed, vital for their economy but, in fact, exactly the opposite. Helper showed that, by all measures—economic, social, political, agricultural yield per square mile, education, literacy, infrastructure and many other indicators—the use of Black slaves by the South was an impediment upon economic growth that had severely retarded the entire development of the Southern states. The book conclusively proves that slavery—and the presence of large numbers of Africans in the South—was a significant barrier to the economic advancement of Whites. In addition, Helper compiled the most detailed statistics on slavery, showing exactly how many slaves there were, and the precise number of slaveowners. These figures demonstrate the vast majority of White Southerners did not own slaves but were tricked into supporting a jingoistic, fake "Southern Nationalism" orchestrated by a small clique of immoral ultra-capitalists. Helper's conclusive economic and social arguments against slavery were backed up by his heartfelt moral objections to the idea of "owning" another person—but he was no bleeding-heart liberal. This work, which became a Republican Party election propaganda piece in the U.S. presidential election of 1860, also revealed that the officially endorsed Abolitionist movement had two goals: the emancipation of African slaves and their immediate deportation back to Africa or somewhere else where they would be permanently, geographically isolated from White America. As expected, this book and its ideas caused a storm in the South, where it was banned and its possession and distribution outlawed. In Arkansas, three men were hanged after being arrested for being in possession of the book. Nonetheless, between 1857 and 1861, nearly 150,000 copies of T*he Impending Crisis of the South* were circulated, despite it being blamed for heightening the tensions that led to the Civil War. Helper's warnings about the long-term effect of the presence of massive numbers of non-Whites in America has come true a thousand times over. Softcover, 339 pages, #1022, $35.

Rivonia Unmasked!: The South African State's Case Against Nelson Mandela, 1964

"Mandela Lied to the World: South African Communist Party Admitted in 2013 That He Was a Senior Central Committee Member" plus "Mandela's Jews: Jewish Involvement in the Rivonia Plot." First published in 1965, this book by Lauritz Strydom was the White South African government's official version of the famous 1963-1964 "Rivonia Treason Trial," which saw eight top South African Communist Party (SACP) and African National Congress (ANC) leaders, Nelson Mandela included, sentenced to life imprisonment for a shocking plan to seize power by violence in South Africa and turn it into a Marxist state. Evidence at the trial showed that the Communist parties in the Soviet Union, Algeria, China, Czechoslovakia and East Germany all actively supported the plot, and that the ANC and the SACP planned a physical invasion and revolution akin to that of Vietnam or Cuba. The value of this book is not restricted to now-suppressed revelations on the ANC/SACP axis. It also vividly demonstrates how the Apartheid government was out of touch with reality, believing firmly that the ANC did not represent the majority of Black people and that it was "only" the Communists who were the problem. It was a delusion that would cost White South Africa dearly. The two new appendices included by editor Arthur Kemp focus on the facts that Mandela, despite his many public claims to the contrary, was a high-ranking member of the SACP, and that almost the entire support structure upon which the ANC relied was comprised of Communist Party Jews. Softcover, 176 pages, #828, $18.

Race and Reason: A Yankee View

By Carleton Putnam. First published in 1961, this was the first major book to address race and racial differences in a calm, educated and sophisticated manner just as the "Civil Rights" revolution began sweeping America and overturning the established order. Written by one of America's most successful businessmen—the founder and president of Delta Airlines—*Race and Reason* is a question-and-answer format book dealing with race and racial differences. It answers every liberal argument—and counter-argument—with passion, reason, compassion and intellect. It addresses the issues of physical, mental and psychological racial differences, backed up with meticulous research, statistics and analysis—and proves conclusively that integration can only lead to the harming of all races, and the destruction of Western European civilization in particular. "Unquestionably a major common denominator of fallacy in the many-sided equalitarian ideology was the suppression of the truth concerning the genetic foundation of life. We saw this truth around us every day, in the color of our children's eyes, in the structure of their bones, in the cast of their countenances, in the qualities of mind and heart that paralleled these elements, yet trance-like we clung to the belief that it did not exist. Genetic racial limitations should have been as clear as crystal. All history taught it. All free science confirmed it. Few but a patently self-serving minority of trained investigators contested it. Yet the leading nation of the free world embraced the fallacy, used its influence in foreign affairs in support of it, and corrupted its own people in its name." Softcover, 147 pages, #614, $15.

Authentic History: Ku Klux Klan, 1865–1877

By Susan Lawrence Davis. The only officially authorized history of the original Ku Klux Klan, written by the daughter of the founder of that organization in Alabama. Written to counteract the misrepresentations made about the original KKK and its activities, this now-suppressed book contains many astonishing "insider" insights, such as: The KKK was financed from England by the Jewish former Secretary of State for the Confederacy Benjamin P. Judah (who fled the South at the end of the Civil War); the KKK's chief chaplain was Roman Catholic; the KKK's chief justice was North America's 33rd degree Masonic leader; the hood—for which the KKK became famous—was in fact outlawed by the original organization because so many people were using it as a disguise when committing "false-flag" crimes in the name of the KKK; the original KKK's primary activity was political in nature, and their officers in various legislative bodies—reaching as high as the U.S. Senate—were focused on restoring White rule to the Southern states; when official KKK posses were formed, they were under strict orders from top leaders never to dispense mob justice or engage in any extrajudicial whippings, lynchings or other abuses; when rogue elements and non-KKK members started performing atrocities in the KKK's name, the leadership ordered the organization permanently disbanded, citing such abuse of its name as the primary reason for its closure. Written in a racially paternalistic style, this work also clearly reveals the mindset that lay behind the slave-owning era: a false belief that the Blacks were "content" and "loyal" under White rule—and that only a few Southerners understood and supported the view of Abraham Lincoln. This was, namely, that the Black presence posed a long-term demographic threat and that they needed to be repatriated to Africa, rather than stay under White rule in America. A sensational historical document, vital for anyone wishing to gain a proper understanding of the Southern postbellum resistance to "Reconstruction." This edition has been completely reset, contains all the original images (digitally restored) and includes a detailed index. Softcover, 229 pages, #1020, $25.

The Hoax of Soviet "Anti-Semitism": Jews, Zionism, Communism and he Soviet Union 1918–1991

By Frank L. Britton. A fully referenced exposé of the lie that the Soviet Union was "anti-Semitic." It proves that the USSR was pro-Jewish, but anti-Zionist. Starting with an overview of the historical background of the Jewish nature of Communism (drawing upon the British government's 1919 "White Paper on Bolshevism" and the May 1907 edition of *National Geographic* magazine), the book discusses the internal conflicts in Jewish Communist circles, and of the eventual break between the Socialist Zionists and the Jewish Communists. It contains full quotes from Churchill, Trotsky and Esther Frumpkin, a leader in the Jewish Bund and the official Jewish section of the Communist Party of the USSR (who represented the anti-Zionist faction). Learn how the Soviet Union attempted to deal with Jewish demands for a homeland by creating one within the Soviet Union, the Autonomous Oblast of Birobidzhan—which still exists today. At the same time, the Soviet Union and its allies were the first nations in the world to formally recognize the state of Israel in 1948. However, Israel's increasing racism, ultra-nationalism and aggression toward its neighbors reopened the old split between Zionist and Communist Jews. By the late 1960s, relations

between Israel and the Soviet Union had broken down, and the Western media launched its "anti-Semitism in Russia" campaign. The culmination came in 1983 when leading Communist Jews in the USSR created the Anti-Zionist Committee of Soviet Public Opinion, set up to counter the Zionist claims of "anti-Semitism" and to act as a conduit for Soviet Jews to express their opposition to Zionism. This work contains as well the full text of all three AZCSPO information pieces distributed in the West. Softcover, 133 pages, #750, $15.

The Norse Discovery of America as Detailed in the Icelandic Sagas

By A.M. Reeves, N.L. Beamish and R.B. Anderson. The Norse exploration of North America remains one of the lesser-known episodes of pre-Columbian American history, despite its unquestioned authenticity and numerous archeological proofs. One of the more interesting sources for these early trans-Atlantic voyages is the famous *Icelandic Sagas*, and this book is a masterful collection of these adventures. Written and compiled by experts and translated from the original Icelandic, the *Sagas* showed that there were numerous Norse voyages of exploration—and settlements—in North America more than 500 years before Columbus. Columbus himself was aware of these Norse ventures, and this knowledge provided many valuable details, such as how many days' sailing he faced. The *Sagas* also contain many other fascinating details, such as the name of the first Norse baby born in North America, trade and war with the natives, and the location of their settlements. In addition, the *Sagas* provide evidence of Norse settlers who stayed behind and were absorbed into the native population. This book also looks at how U.S. Indian vocabulary was influenced by Norse and Celtic words, and includes a list of Norse/Irish trans-Atlantic voyages of exploration. Actually three books in one, *The Norse Discovery of America* remains the leading English translation and study of the *Icelandic Sagas* ever published. Softcover, 285 pages, #830, $28.

The Talmudic Jew: Expanded Edition

By August Rohling. Translated and edited by JR Books Online. Printed by TBR. August Rohling (1839–1931) was a German Catholic theologian, professor and author of critical studies of the Talmud, Judaism and Protestantism. His most famous work is *Der Talmudjude* (*The Talmudic Jew*), first published in 1871 in Münster. Immediately after its appearance, the Jews unleashed a smear campaign against the book and its author, even though all Rohling did was quote directly from the Talmud and various Jewish scholars. Here is the first English-language edition of this valuable historical document. We have created this translation from the French edition published in 1889 under the title *Le Juif selon le Talmud* (literally *The Jew According to the Talmud*). Its translator and editor was A. Pontigny, who also wrote an introduction and a conclusion and who greatly expanded the text, mostly from Rohling's other publications. Édouard Drumont, a French journalist, author and politician, contributed the preface. This book will be of great use to anyone interested in the history of Judaism. Softcover, 113 pages, #1017, $13.

Legends of the Shawangunk

By Philip H. Smith (1887). The Shawangunk Mountains (also known as Shawangunk Ridge) in New York State form part of the easternmost section of the Appalachian Mountains. In New Jersey, they are known as the Kittatinny Mountains. In Pennsylvania, the mountain chain becomes the Blue Mountains. Historical events across this region formed an integral part of the history of colonial America. Chapters cover the Delaware (Lenape) Indians, the First and Second Esopus Wars detailing the conflict between Dutch settlers and the local Indians, the trouble between the British and the Nederlander settlers, armed border battles between the colonists of New Jersey and the people of the Shawangunk region, the finding of mastodon bones, Catherine DuBois—the heroine of Wildwyck, the brutal Battle of Minisink, the massacre at Fantinekill, friction between Tories and American patriots, the Tories after the Revolution, the midnight journey of Miss Land, little-known adventures of "Indian Slayer" Tom Quick, Kortright's expedition, the early pioneers of the Shawangunk region, relations with the Indians, hunting bear and panther in the region, and more. Softcover, 229 pages, #1018, $25.

A Little-Known World War: The War of Jenkins' Ear

In the 1730s, Spain and England were fighting for supremacy not only in Europe, but also on land in the Americas and on the high seas in the Caribbean.

By Mike Mains

You've heard the expression, "Suppose they gave a war and nobody came." Well, suppose they gave a war and people came, but nobody ever heard of it? That's the case with the War of Jenkins' Ear, an actual world war that took place from 1739 to 1748 and one that too many people have never heard of.

If you're wondering how a war came to be known by such an uncharacteristic name, it was actually coined by the historian Robert Carlyle, and the ear in question belonged to Robert Jenkins, a Welshman and an otherwise obscure merchant captain.

In 1731, Jenkins commanded a British merchant ship named *Rebecca* that was carrying a cargo of sugar from Jamaica back to Britain. At that time, Spain allowed a limited number of goods to be traded between Britain and Spanish America. However, British merchants frequently flaunted the agreed-upon list of limited goods and engaged in smuggling of cargo that Spain had outlawed. Among the most smuggled items were logwood, a spiny Caribbean tree of the pea family used for making dyes, tallow for making candles and soap, as well as hides.

GEORGE II
Portrait circa 1731.

As a result of this smuggling, Spanish patrol boats routinely boarded British ships in search of contraband. These Spanish patrol boats were known as the Guarda Costa, or coast guard, and they could sail faster and outgun any merchant ship, especially ones loaded with cargo. The men who commanded and sailed these Spanish patrol boats could be vicious and cruel. They seized ships, whether they were guilty of smuggling or not, imprisoned their crews and sometimes tortured their captains.

On April 9, 1731, Jenkins' ship, the *Rebecca*, was becalmed off the coast of Cuba, when a Guarda Costa sloop commanded by Juan de Leon Fandino demanded the right to inspect its cargo. Once aboard, Fandino's men ransacked the ship, finding nothing but sugar, a perfectly legal item of trade per Britain's agreement with Spain. Fandino, however, was convinced the ship was carrying hidden contraband and accused Jenkins of smuggling.

When Jenkins denied the accusation, Fandino had him tied to a mast and forced the Welshman to watch as the ship's cabin boy was brutally beaten. Jenkins and his men were horrified but remained at the mercy of their captors. The more Jenkins truthfully insisted that the ship carried no contraband, the more infuriated Fandino became. He had Jenkins hung three times, once almost to the point of death, threatened to burn the ship, and finally drew his cutlass and sliced off Jenkins' left ear.

"The same will happen to him [King George II] if caught doing the same," threatened Fandino.

Fandino then decided "to scalp the much-insulted Jenkins. Finding

Above, a 1738 political cartoon of Robert Jenkins presenting Prime Minister Horace Walpole with his severed ear. As an English ditty ot the period summed up, according to historian Robert Gaudi: "Our merchants and ears a strange bother have made, with losses sustained in their ships and their trade. But now they may laugh and quite banish their fears, nor mourn for lost liberty, riches and ears."

the Welshman's head too closely shaved, he gave up on this idea as impractical," historian Robert Gaudi informs us. Gaudi adds:

> Fandino's men contented themselves with beating the mate and boatswain "unmercifully." They then stripped the *Rebecca* of everything portable, including bedding and the clothes of the crew, leaving them standing naked on the deck.[1]

The aborted stripping of the ship didn't stop Fandino from attempting to doom Jenkins and his entire crew to death:

> Fandino himself confiscated the *Rebecca*'s navigational equipment (maps, sextant, compass) and her store of candles. … More than an act of theft, it was a deadly act of sabotage designed to leave the Rebecca wallowing in darkness on unknown seas. …
>
> Crossing the Atlantic proved difficult. The crew made rudimentary garments out of sailcloth and sacking. Without candles, they burned oil and butter in the binnacle to steer by; without compass and sextant, Jenkins navigated by the stars and "by his nose," which is to say he used the excellent seamanship which would save his life and the lives of other crews time and again throughout his long career on the world's oceans.

Jenkins and the *Rebecca* reached the River Thames on June 11, 1731. With his severed ear preserved in a bottle, Jenkins personally petitioned King George II for compensation from Spain.

"This audience, arranged by Secretary of State Newcastle at the behest of a group of London merchants, set off a brief diplomatic flurry," Gaudi recounts. "Furious letters flew back and forth between the Spanish and English courts. … Then nothing happened."

THE ROAD TO WAR

While Jenkins and his ear were soon forgotten, grievances between England and Spain were not, and they continued to grow until 1738. It was then that Jenkins returned to public light. He was ordered to appear before a committee of the House of Commons, which he did, bringing along his still-preserved ear.

Jenkins described to the committee the barbaric treatment he and his crew received from the Spanish back in 1731. He must have made quite an impression, because, immediately afterward, public sentiment for a war with Spain increased considerably.

As Gaudi tells us:

> The clamor for war among the English public had never really died down, anyway. It now returned with a deafening roar—so loud that no member of the government, none of the king's ministers, not even

Above, an engraving titled *The Capture of Porto Bello, November 21, 1739*, based on a painting by George Chambers Sr. The fortress—guarding an important Spanish port on the Panamanian coast—was attacked and captured by a British fleet commanded by Adm. Edward Vernon during the War of Jenkins' Ear.

> [Sir Robert] Walpole himself could safely ignore it.

Finally, the inevitable happened. Gaudi explains:

> War was declared between Britain and Spain on October 19, 1739, the proclamation nailed at crossroads throughout the land. Bonfires cast a ruddy glow on jubilant mobs as Royal Heralds proclaimed war at the Temple Bar.
>
> Vaguely Spanish-looking individuals were attacked and beaten in the streets; most were French or Italian or just had dark hair. In a tavern among the common people, to the thunderous peal of all the church bells in London, the Prince of Wales drank to the success of British arms.

THE BATTLE OF PORTO BELLO

Knowing that a direct invasion of Spain would bring France into the war due to a mutual defense treaty between the two countries, the British high command decided to attack Spain via her American colonies. Edward Vernon, a vocal critic of the king over his refusal to act against Spain earlier, was commissioned vice admiral and immediately launched the first major action of the war, an attack upon Porto Bello, a Spanish settlement in Panama.

In preparation for the battle, Vernon ran his men through endless gunnery drills and instructed his officers to use their own initiative once the fighting started. Gaudi elaborates on Vernon's innovative tactics:

> Now began the first of those innovations for which he is best remembered by naval historians. This was his "Address to the Fighting Instructions," which allowed his subordinates to act on their own initiative in the heat of battle.
>
> Before Vernon's "Addition," captains were forced to adhere to a rigid preset battle plan, regardless of changes in circumstance. Vernon now allowed captains to make decisions based on the unpredictable ebb-and-flow of the fight. This sort of freedom of action was almost unheard of in the tightly choreographed naval engagements of the day.

According to the book *Hitler's Revolution* by Richard Tedor, this is the exact same strategy that Hitler applied in World War II. In fact, much of Germany's early success in that war was due to the initiative of its officers making battlefield adjustments in the heat of combat.

The battle of Porto Bello began on November 20, 1739, with heavy shelling from the British ship *Hampton Court*, captained by Commodore Brown, and return fire from the Spanish fort known as the Iron Castle, filling the atmosphere with "acrid clouds of thick white smoke."

Gaudi continues:

> *Hampton Court*'s well-trained gunners soon proved themselves far more capable than their opposite numbers in the fort, firing off more than 400 shots in 20 minutes, pummeling the Iron Castle's walls and batteries at a furious rate.
>
> Naval artillerists of the day operated by the following formula: one gun ashore equaled four afloat—a calculation based on the advantage bestowed by heavier cannons made possible by a fixed position on solid ground. According to this reckoning,

the Iron Castle far outgunned *Hampton Court*. The fort officially mounted 32 big guns, generally firing between 24- and 42-pound weight of shot to the *Hampton Court*'s 70 guns of smaller displacement.

Yet the guns of *Hampton Court* prevailed. Gaudi recounts the battle:

> Brown's gunners continued to pound the Iron Castle's lower battery. Soon they brought down a portion of the heavy timber roof, knocking out three of the fort's nine functioning guns and killing their crews. At this point, the Spanish garrison of about 300 men began to melt away.

Iron Castle fell and, within days, two other forts and the town itself surrendered. Vernon had won for England the first major action of the war.

Gaudi recounts the jubilation of the British:

> To say England went mad upon hearing of Vernon's exploit vastly understates the degree of national frenzy. Spontaneous celebrations erupted as news spread. Fireworks and bonfires lit the skies of cities from Bristol to London to York. King George II, formerly one of Vernon's detractors, now supported the man's immediate promotion to admiral.

BRUTAL FIGHTING IN FLORIDA

While Vernon was fighting the Spanish at their settlements in Panama and Colombia, Gov. James Oglethorpe of Georgia launched the first major land campaign of the war, an invasion of Florida. On May 10, 1740, Oglethorpe captured the small Spanish outpost of Fort Diego, located in present-day Palm Valley, Florida. Flush with success, he prepared for an assault on St. Augustine.

The assault did not go well. A squad of roughly 100 men, commanded by Col. John Palmer, found themselves ambushed at dawn by a force of 300 Spanish regulars, a contingent of freed slaves and a few dozen Seminole Indians. Gaudi describes the action:

> Outnumbered by at least three-to-one, Palmer's men, taken by surprise, succumbed to a ferocious onslaught. Most didn't have time to load their muskets; many, still asleep, were slaughtered in their tents.
>
> The Creeks, sensing defeat, crept off into the bush; the regulars and the South Carolinians, unable to form into their accustomed ranks, were massacred. Inside the remains of the fort, the fighting was fierce and hand-to-hand. The Highlanders alone put up a good fight, seizing up their Claymore broadswords and hacking at the invading Spanish in the half-light. The battle lasted only an hour or so. Palmer himself, three British captains and three lieutenants, along with 75 men perished in this action. [Nearly] 35 more were taken prisoner.

Oglethorpe's planned assault of St. Augustine was the first major British defeat of the war and led to a counter invasion of Georgia by Spanish forces in 1742. Oglethorpe led the defense of his state and successfully repelled the invaders. And, so, the War of Jenkins' Ear dragged on until 1748 when both sides finally settled their differences and declared peace.

As for the two principles who started it all—Fandino and Jenkins—"the waters of history have closed over Fandino's head; his end remains unknown."

Jenkins, meanwhile, went on to become acting governor of the island of St. Helena until March 22, 1742. He later died in Bombay in 1743.

If you enjoy history, and particularly military history, you'll learn much more from *The War of Jenkins' Ear*, a detailed and well-written account of a war of which most of us have never heard. ❖

The War of Jenkins' Ear

The Forgotten Struggle for North and South America—1739-1743

In the early 18th century, the British and Spanish empires were fighting for economic supremacy in the Americas. Tensions between the two powers were high, and wars blossomed for nearly 100 years, from the War of Spanish Succession (Queen Anne's War in the Americas), culminating in the War of Jenkins' Ear. This war would lay the ground work for the French and Indian War and the American Revolution—and the war was a world war in the truest sense, engaging the major European powers on battlefields from Europe to the Americas to the Asian subcontinent. Yet the conflict is barely known to us today, and it resulted in the invasion of Georgia and even involved members of George Washington's own family. It would cost 50,000 lives, millions in treasure, and over 600 ships. Robert Gaudi takes the reader from the Chesapeake Bay to the rocky shores of Tierra del Fuego, the Cape of Good Hope and across the Pacific to the Philippines and the Cantonese coast, with stops in Cartagena, Panama and beyond. How British Jews Helped Instigate World War II

As one of the most prolific Revisionist historians in America today, TBR Editorial Board member John Wear has gained much attention from groups who object to his truthful writings on World War II, in particular. The Anti-Defamation League, for instance, has named him one of America's top anti-Semites in an attempt to smear him and his work. Here, Wear answers critics who allege he has not proven his case that Jewish interests were instrumental in conniving Winston Churchill to go to war with Germany, inevitably costing the Brits and their Commonwealth allies millions of dead men.

By John Wear

A critic of an article I wrote documenting Jewish involvement in instigating World War II[1] said that I did not adequately document the involvement of British Jews in influencing Great Britain to enter into the war. This article provides additional information showing that British Jews were instrumental in influencing Britain to help instigate World War II.

THE FOCUS

By the end of 1935, Winston Churchill had amassed substantial debts that he could not pay off. Churchill needed all the financial aid he could get.

The Anti-Nazi Council, later called The Focus in response to Churchill's wishes for a less negative title, came to Churchill's rescue and ensured his political and financial survival.[2]

British historian Martin Gilbert stated that, on November 13, 1936, Churchill wrote to his son Randolph to explain why he had helped launch the Anti-Nazi League. Churchill wrote that the basis of the Anti-Nazi League "is of course Jewish resentment at their abominable persecution. But we are now taking broader ground rather on the lines of my Paris speech."[3]

WINSTON CHURCHILL
Inveterate and callous schemer.

British historian Paul Addison wrote that The Focus was a conspiracy to change the course of British foreign policy, with Churchill as its chief propagandist. In the spring of 1936, with the assistance of The Focus, Churchill began to call for Britain to adopt a foreign policy based on collective security under the League of Nations. By implication, this would include the Soviet Union, which had joined the League of Nations in 1934.

Although Churchill had been highly critical of the Soviet Union as recently as 1931, by 1933, his anti-Communism was subordinated to his conviction that National Socialist Germany was the greater danger to Britain.[4]

Churchill made no mention of The Focus in his wartime memoirs. The existence of The Focus's secret network of journalists, politicians, businessmen, trade unionists and intellectuals was first disclosed in 1963, when one of its financial backers, Eugen Spier, published a short account of its history. Addison wrote that The Focus was "a partly Jewish organization."[5] British historian Henry Pelling wrote that the group's finances were originally provided by Jewish businessman Eugen Spier.[6] British politician Roy Jenkins also confirmed that Spier, a rich German Jew, generously paid most of the early bills of The Focus.[7]

The Focus began to receive funds

THE BATTLE OF CABLE STREET

The anti-Fascist demonstration in London, October 4, 1936, featured hordes of protesters. and various anti-Fascist demonstrators including local trade unionists, Communists, anarchists, British Jews, and socialist groups. It eventually became violent and devolved into what is now called the Battle of Cable Street, during which London's Metropolitan Police and members of Oswald Mosely's British Union of Fascists (BUF) battled leftist marchers run amok. It is estimated there were 2,000-3,000 BUF members, 6,000-7,000 policeman and as many as 250,000-310,000 anti-Fascists.

from other Jewish sources. The Jewish Defense Fund, for example, donated 50,000 pounds to support The Focus's activities. After confidential approaches had been made to Churchill by the American Jewish Committee, Churchill traveled to Florida to inaugurate The Focus in the United States. He gave his son Randolph instructions to talk about The Focus with Bernard Baruch, the wealthy Jewish financier. The Board of Deputies of British Jews also helped sustain The Focus during its early years.[8]

Sir Robert Waley-Cohen, the wealthy Jewish director of Royal Dutch Oil Company, also provided funding to The Focus. Using Waley-Cohen funds, The Focus set up a publishing company that brought *Headway*, the official monthly of the League of Nations Union, under its control. At Waley-Cohen's request, The Focus set up German-born Werner Knop in a "front," Union Times Ltd., disguised as a press agency. This agency agitated for an anti-German foreign policy. It also financed the pamphleteering into National Socialist Germany by Cmdr. Stephen King-Hall.[9]

On March 28, 1938, Sir Henry Strakosch, a gold mining millionaire and chairman of Union Corporation Ltd., agreed to pay off Churchill's considerable debts. Strakosch was a Jew born in Moravia, Czechoslovakia and a prominent member of The Focus.[10]

In view of the substantial Jewish financial contributions to Churchill and The Focus, it is not surprising that, by 1937, Churchill had become a committed Zionist. In a letter to Franklin Roosevelt dated August 9, 1942, Churchill stated: "I am strongly wedded to the Zionist policy, of which I was one of the authors."[11] In 1950, Churchill referred to the creation of Israel "as a great event in the history of mankind." Churchill further said he had "been a Zionist all his life."[12]

In his last letter to Chaim Weizmann, Churchill wrote: "The wonderful exertions which Israel is making in these times of difficulty are cheering to an old Zionist like me."[13]

Churchill was an exceptional orator and writer, and, as such, he was an effective agent for The Focus in stirring up British public opinion against Germany. For example, Churchill stated in the House of Commons shortly after Germany's Anschluss (reunification) with Austria:

Germany's War

The Origins, Aftermath and Atrocities of World War II

By John Wear. *Germany's War* documents that the Allied leaders were primarily responsible for starting and prolonging WWII—costing millions of lives. FDR's numerous provocations forced Germany to declare war on the U.S.A. despite Hitler's desire for peace. Also covers Stalin's plan for European conquest, America's second crusade, how WWII was planned and instigated, the Allied conspiracy to prolong the war, the Allied POW camps that killed a million Germans, the appalling plight of expelled Germans, history's most terrible peace, crimes committed in German camps, the alleged genocide of 6 million Jews, and more. > The public mind has been concentrated upon the moral and sentimental aspects of the Nazi conquest of Austria—a small country brutally struck down, its government scattered to the winds, the oppression of the Nazi Party doctrine imposed upon a Catholic population and upon the working-classes of Austria and Vienna, the hard ill-usage of persecution which indeed will ensue—which is probably in progress at the moment—of those who, this time last week, were exercising their undoubted political rights, discharging their duties to their own country.[14]

Churchill's statements are all lies. The overwhelming majority of Austrians had desired a union with Germany. The Anschluss was hugely popular in Austria. Churchill, in his speech, had begun the warmongering that eventually led to World War II.

After the Munich Agreement, Churchill stated in his speech on October 5, 1938, that Hitler had extracted British concessions at pistol point, and he loved to use the image of Hitler as a gangster. Churchill used flowery rhetoric and elegant phrases to describe the allegedly mournful Czechs slipping away into darkness. Churchill wanted to convince his countrymen that National Socialist Germany was governed by an insatiable desire for world conquest.

The simple and stark purpose of his speech was to convince the British people to eventually accept a war of annihilation against Germany.[15]

Churchill's campaign of speeches urging collective security against Germany aroused anger in Berlin. The *Deutsche Diplomatisch-Politische Korrespondenz* stated that Churchill was trying to "camouflage personal dislike of Germany" as "practical reasoning."[16]

In a speech given in Saarbrücken on October 9, 1938, Hitler said:

> All it would take would be for Mr. Duff Cooper or Mr. Eden or Mr. Churchill to come to power in England instead of Chamberlain, and we know very well that it would be the goal of these men to immediately start a new world war. They do not even try to disguise their intents; they state them openly.[17]

The Focus had styled itself as a movement for the Defense of Freedom and Peace.[18] In reality, with Churchill as its main spokesman, the primary purpose of this Jewish-led organization was to foment a war of annihilation against Germany.

OTHER CONFIRMATION

Numerous other sources confirm that Jews actively worked to draw Great Britain into war against Germany. James Forrestal, the former U.S. secretary of Defense, wrote in his diaries about a conversation he had on December 27, 1945 with U.S. Ambassador to Great Britain Joseph P. Kennedy:

> [British Prime Minister Neville] Chamberlain, he says, stated that America and the world Jews had forced England into war. In his telephone conversation with Roosevelt in the summer of 1939, the president kept telling him to put some iron up Chamberlain's backside. Kennedy's response always was that putting iron up his backside did no good unless the British had some iron with which to fight, and they did not.[19]

Kennedy knew that Churchill and his Jewish controllers were scheming to have the United States enter into World War II. Kennedy wrote in his diary about Churchill's desire to draw the United States into the war: "I just don't trust him. He always impressed me that he was willing to blow up the American Embassy and say it was the Germans if it would get the United States in."[20]

While visiting the United States in December 1939, Kennedy talked to Jay Pierrepont Moffat, one of the few men in the State Department with whom Kennedy enjoyed a good relationship. Kennedy told Moffat that Chamberlain understood that the United States had no intention of entering the war in Europe.

Kennedy said:

From left to right: Jewish billionaire **Henry Strakosch**, a member of The Focus and the man who paid off Winston Churchill's substantial debts; **Sir Robert Waley-Cohen**, the wealthy Jewish director of Royal Dutch Oil Company who helped fund The Focus and provided money to buy publications in which Focus propaganda could be published; Neville Chamberlain's warmongering **Secretary of War Leslie Hore-Belisha**. Far right, **Joseph P. Kennedy**, the U.S. ambassador to Great Britain who warned colleagues about Churchill's desire to completely destroy Germany.

> Churchill, however, wants us there as soon as he can get us there. He is ruthless and scheming. He is also in touch with groups in America which have the same idea, notably, strong Jewish leaders.[21]

Kennedy said privately that the Jews were too powerful in the media and too outspokenly anti-German.[22]

Chamberlain had a Jewish secretary of War, Leslie Hore-Belisha, who strongly agitated for war with Germany. Appointed by Chamberlain in 1937, Hore-Belisha quickly came to be seen as spoiling for a fight with Hitler. British MP Oswald Mosley publicly called Hore-Belisha "a Jewish warmonger." Chamberlain's chief of staff, Henry Pownall, referred to Hore-Belisha in his diary in May 1939 as "an obscure, shallow-brained, charlatan, political Jewboy." When conflicts with Chamberlain's relatively pacifist staff increased, Hore-Belisha was finally dismissed in January 1940, just four months into World War II.[23]

Leading British Zionist Chaim Weizmann wrote a revealing letter to Churchill on September 10, 1941:

> There is only one big ethnic group [in America] which is willing to stand, to a man, for Great Britain, and a policy of "all-out aid" for her: the 5 million Jews. From Secretary Morgenthau, Gov. Lehman, Justice Frankfurter, down to the simplest Jewish workman or trader, they are conscious of all that this struggle against Hitler implies. … It has been repeatedly acknowledged by British statesmen that it was the Jews who, in the last war, effectively helped to tip the scales in America in favor of Great Britain. They are keen to do it—and may do it—again.[24]

Weizmann admitted here that American Jews, working in conjunction with British Jews, could be crucial in driving Americans into the war.

Max Aitken, better known as Lord Beaverbrook, was a prominent Canadian-British newspaper publisher who was anti-war and against Churchill's return to public office. Beaverbrook made statements in private letters that he would never have made in public.

In one private letter written on March 9, 1938, Beaverbrook identified the people sabotaging rapprochement with Germany: "There are 20,000 German Jews in England in the professions, pursuing research, in chemical operations, etcetera. These all work against such an accommodation."[25]

In another private letter written to American publisher Frank Gannett in December 1938, Beaverbrook wrote:

> The Jews have got a big position in the press here. One-third of the circulation of the *Daily Telegraph* is Jewish. The *Daily Mirror* may be owned by Jews, the *Daily Herald* is owned by Jews, and the *News Chronicle* should be the "*Jews Chronicle*." … I am not sure about the *Mail*.

Beaverbrook stated that for years he had prophesied there would be no war. However, he wrote:

> But at last I am shaken. The Jews may drive us into war. I do not mean with any conscious purpose of doing so. They do not mean to do it. But, unconsciously … their political influence is moving us in that direction.[26]

British Ambassador to Germany Nevile Henderson very much desired peace with Germany. In August 1939, Henderson was having no success in getting British officials to recognize the atrocities being committed daily against the German minority in Poland. Henderson deplored the failure of the British government to exercise restraint over the Polish authorities.[27]

British historian A.J.P. Taylor wrote about Henderson:

> He told Hitler, quite truly: "the proof of Chamberlain's friendship

was to be found in the fact that he had refused to have Churchill in the Cabinet"; and he said further that the hostile attitude in Great Britain was the work of Jews and enemies of the Nazis, which was exactly what Hitler thought himself.[28]

CONCLUSION

While visiting Oxford on October 6, 1936, someone asked Churchill if there was going to be a war. Churchill replied that there would be "a very terrible war in which London will be bombed." A fortnight later, Churchill told Canadian Prime Minister Mackenzie King that England had never been in greater danger. Churchill said that, inside five years, England might become a "vassal state" of Germany.[29]

Churchill's statements are remarkable in that Hitler had never wanted war with Great Britain. To Hitler, Great Britain was the natural ally of Germany and the nation he admired most. Hitler had no ambitions against Britain or her Empire, and all of the captured records solidly bear this out.[30]

The question is: How could Churchill have known there was going to be "a very terrible war in which London will be bombed?" In this author's opinion, Churchill knew there would be a very terrible war because this is what he and Jewish-controlled organizations such as The Focus had wanted. Churchill obviously had access to a well-developed plan, a plan that he was helping to implement. ❖

Three New Books on the Civil War Era Offer Unique Insights Into the War, Reconstruction

Twelve Years in Hell: Victorian Southerners Expose the Myth of Reconstruction

By Lochlainn Seabrook. Southerners viewed Reconstruction as a Yankee Communist revolution. This revolution was a war planned far in advance to destroy the South. The architect of Reconstruction, Abraham Lincoln, privately planned to subjugate and then totally Northernize the South. After Lincoln's assassination, Reconstruction was taken over by Socialists and Communists, all radical members of the then-left-wing Republican Party. As part of Reconstruction, the North repeatedly violated the Constitution, committed robbery, destruction and seizure of private property, rape and murder. Simultaneously, legally elected Southern officials were thrown out and replaced by "progressives." To maintain control, Grant's radical government weaponized the police, the courts and the military. Many of the social, racial and economic problems plaguing the U.S. today began during Reconstruction. Now the left is using the same 1870s-era tactics. Softcover, 520 pages, #1022, **$35**.

I, Confederate: Why Dixie Seceded and Fought in the Words of Southern Soldiers

Did the Southern Cause died on April 9, 1865 with Lee's surrender? No, the Southern Cause is flourishing today! How can this be if the North won the war? What was and is the Southern Cause? And why were millions of people of all races willing to fight for it? You'll find the answers to these questions, as well as discussions on related topics (the Constitution, nullification, sectionalism, slavery etc.) in Lochlainn Seabrook's *I, Confederate*. Seabrook provides excerpts from the writings, speeches, letters and poems of 200 Southerners (mostly former C.S.A. soldiers), who describe, in their own words, the reasons they took up arms against their Northern cousins. Seabrook also includes writings from Southern and Northern civilians, and Union veterans who also supported the campaign that Southerners referred to as "the bedrock of the Southern Confederacy." Illustrated with rare Confederate photos, preface, introduction, notes, index and bibliography. Softcover, 376 pages, #1023, **$27**.

The Hampton Roads Conference: The Southern View

The most important meeting of the Civil War took place in Virginia in February 1865. Yet it receives barely a mention in most history books. Known as the Hampton Roads Conference, in attendance were the Confederates: VP Alexander Stephens, Assistant Secretary of War John Campbell and Sen. Robert M.T. Hunter. On the other side were Lincoln and Secretary of State Seward. According to conventional history, the meeting opened with "kind-hearted Lincoln" offering generous promises to the "erring South," including $400 million in compensation for slaves—if the seceded states would return to the Union. The Confederates, however, viewed the meeting as a negotiation between "two countries," demanding the North recognize their independence. Lincoln refused and demanded complete surrender. Four hours later the meeting adjourned. Lochlainn Seabrook includes 32 analyses that set the record straight on the myths about the final meeting between the two opposing sides. Softcover, 294 pages, #1024, **$25**.

How the German Navy Thwarted Churchill's Sneak Attack on Sweden

WHY HAS THE BRITISH GOVERNMENT mysteriously classified documents about the sinking of the HMS *Glorious* in the North Sea in 1941?

By Marc Roland

One of the most questionable and horrific battles in naval history has a dark secret still under official lock and key, even after the passage of the last 84 years. Although the first engagement of its kind ever fought, in which one-third of England's operational Home Fleet carrier force was sunk, and more United Kingdom sailors lost their lives than in any other single action during WWII, British government documents remain unaccountably classified until the year 2041.

No other Royal Navy enemy encounter from that conflict has been similarly restricted, because disclosure would reveal Winston S. Churchill as a conspiratorial war criminal. As he himself infamously exclaimed, "In wartime, truth is so precious, that she should *always* [author's italics] be attended by a bodyguard of lies."[1]

Nearly 60 years since he died, the bibulous prime minister's deceitful bodyguard remains on duty at London's Ministry of Defense. Its strictly confidential reports concern the events of June 8, 1940, on a warm, sunny Saturday afternoon, under a clear, untroubled sky, when two German battleships cruised through an eerily placid North Sea in search of enemy freighters. At 15:45 (3:45 p.m.), a *Seetakt* long-range finder aboard *Gneisenau* detected one large vessel, plus a pair of smaller escorts, 25 miles ahead to the northeast. Adm. Wilhelm Marschall, commanding the German task force, signaled his sister ship *Scharnhorst* to close on the radar targets. These would soon prove to be a British aircraft carrier escorted by two destroyers.

CAPT. GUY D'OYLY-HUGHES
Scapegoated for disaster.

Unusually, 18 warplanes, not the standard 48, were aboard HMS *Glorious*, originally a battle-cruiser of World War I vintage, subsequently transformed into an aircraft carrier, before having been thoroughly updated in a final extreme makeover completed just prior to Britain's declaration of war against Germany in September 1939. Weighing in at 27,859 tons, the 787-foot-long warship's top speed of 32 knots (37 mph) made *Glorious* the fastest of her kind afloat. As part of the forward-thinking that went into her modernization, conventional ship-against-ship artillery was replaced by batteries of 16 120-mm guns, providing defense against aerial assault. Attacking surface ships were to be dealt with by onboard torpedo bombers operating in conjunction with more heavily armed escorts.

Capt. Guy D'Oyly-Hughes, 59, recipient of the Distinguished Service Cross for his heroic exploits during the previous war, not only ran a tight ship, but was himself a skilled pilot, with professional, if unorthodox, views of naval aviation.[2] Among these alternative convictions was his belief that carrier-based warplanes should be deployed against inland coastal targets, a conclusion that raised Admiralty eyebrows in 1940, but was dramatically affirmed just one year later when the Imperial Japanese Navy devastated Pearl Harbor, Hawaii.

D'Oyly-Hughes's lookouts barely discerned the first faint image of approaching vessels 15 minutes after the Germans' earlier radar contact, and he dispatched a destroyer to investigate. As soon as it came within range, *Gneisenau* opened fire with six 5.9-inch guns at 16:27 (4:27 p.m.).

Above, the British aircraft carrier *Glorious*. (*Ignominious* might have been a more appropriate name.)

Undaunted, the 323-foot-long HMS *Ardent* responded with spreads of torpedoes at both of the 753-foot-long enemy battleships, forcing them to execute emergency maneuvers out of harm's way. Four minutes later, *Scharnhorst*'s 11-inch shells rained down on *Glorious* from 15 miles off, scoring hits with a third salvo while simultaneously pummeling *Ardent* with secondary armament fire. British deployment of smokescreens not only spoiled German accuracy, but enabled both destroyers to make surprise hit-and-run sorties in and out of the obscuring billows, not, however, with impunity. Caught in a ferocious crossfire between the two battleships, *Ardent* capsized at 17:22 (5:22 p.m.). D'Oyly-Hughes turned his fast carrier away, fleeing at top speed.

To prevent his disengagement, the German navy warships bombarded *Glorious* with a relentless barrage that slowed the carrier down and set it afire. Capt. Charles Eric Glasfurd then ran his 1,370-ton destroyer straight for the 38,700-ton foe, firing his relatively puny 4.7-inch guns while unloosing another spread of torpedoes.

Cmdr. Günther Schubert sidestepped all but one of them, but a single hit at 17:39 (5:39 p.m.) exploded against *Scharnhorst*, tearing a hole 18-feet high by 42-feet wide in her starboard side. Through it, 25,500 tons of sea water gushed into the badly wounded battleship, which began lurching over into a severe list. In serious danger of capsizing, one-third of *Scharnhorst* was deactivated. An engine, rudder, propeller and the rear B turret had been put out of action.

Schubert ordered emergency flooding of portside compartments to stabilize his vessel and prevent her from keeling over. This cost the lives of 53 of his own crewmen who drowned in the process when the water-tight hatches closed before the sailors could get out alive. Marschall then commanded all nine of *Gneisenau*'s 11-inch guns to fire a unanimous broadside at HMS *Acasta*, which literally disintegrated. All that remained was her partial stern, which sank around 17:48 (5:48 p.m.).

Still struggling to escape, the heavily listing *Glorious*, on fire from stem to stern, was ravaged by combined shelling from both battleships, rolling over on her starboard side and sliding beneath the surface of the North Sea at 18:10 (6:10 p.m.).

Of her 842 officers and men, 43 survived, D'Oyly-Hughes not among them. "Only two of *Ardent*'s survivors remained to be picked up by a German seaplane five days after the sinking," according to Ben Barker in his well-researched investigation of the fierce sea-fight. Barker says:

> One of the two later died from exposure. The other was eventually repatriated to Britain in 1943 on

A Fairey *Swordfish* bomber flies over the *Glorious* during training exercises for Operation Paul.

> account of ill health. Ten officers and 142 [seamen] were killed or died of their wounds; 600 men were dead and 900 men were adrift in life rafts; only 41 would survive.[3]

Altogether, 1,519 British and Maltese sailors, marines and airmen perished in history's first confrontation between an aircraft carrier and capital ships.

With the loss of HMS *Glorious*, England was down to two fleet carriers—*Furious*, the only survivor of Britain's original seven carriers with which she began the war, and *Ark Royal*, sunk next year in the Mediterranean Sea. *Glorious* had been lost, according to a surprisingly terse wartime Admiralty report, because she left the protection of an armed convoy due to her low fuel reserves. It was "a story that convinced no one and further undermined the credibility of the Admiralty," Barker writes. "Churchill himself described the explanation as unconvincing, but, then again, as the architect of *Glorious's*, *Ardent*'s and *Acasta*'s demise, he knew the truth." The prime minister was not alone. Doubts arose among other observers, both civilian and military, questioning the formal narrative. "Nothing about the official account quite adds up," Barker informs us. He wants to know what "the Royal Navy and successive governments have been hiding for so long."[4]

And what prevented D'Oyly-Hughes from launching his torpedo-bombers against the enemy, when weather conditions that day were ideal for flight operations? Why was the protection of his highly valuable capital ship inadequately entrusted to HMS *Ardent* and *Acosta* alone, when navy protocol ordained that no aircraft carrier may operationally proceed without a minimum of four destroyers? Why, after Bletchley Park cryptanalysts alerted the British Admiralty that *Scharnhorst* and *Gneisenau* had left their home port of Kiel to patrol the North Sea off southern Norway, was the warning never relayed to *Glorious*, *Ardent* or *Acasta*? Why were their self-sacrificing officers and men repeatedly ignored by the Royal Navy, when they merited special honors? Why have Royal Navy documents pertaining to the engagement been classified "top secret" for more than 100 years?

Part of the enigma included the Germans themselves. Did they really just happen to randomly stumble upon the *Glorious*? At least this question was satisfactorily answered shortly after the war, when the treasonous perfidy of Adm. Wilhelm Canaris, head of the Abwehr, German military intelligence, came to light. He advised a trusting Erich Raeder, grand admiral of the Kriegsmarine, the German navy, that the North Sea between Norway and northeast Scotland was ideal hunting ground for attacking unprotected

British merchant shipping. On the contrary, Canaris deliberately steered *Scharnhorst* and *Gneisenau* into waters infested with Royal Navy units engaged in the Allied evacuation of Norway, thereby thrusting the German battleships into a terribly outnumbered and outgunned predicament.[5]

This was the same Canaris who lied to Raeder, insisting the heavy cruiser *Blücher* would face no opposition if she led a flotilla of warships into Oslofjord on the night of the previous April 8 with the objective of seizing Oslo, the Norwegian capital.

In reality, twin 11-inch coastal guns in the Oscarsborg Fortress opened fire on the German vessel at almost point-blank range, scoring two hits, followed by intense fire from other batteries. Two torpedoes launched from the fortress struck *Blücher*, causing widespread damage. A major fire broke out aboard ship. Uncontained, the conflagration soon engulfed her anti-aircraft gun magazines, igniting a large explosion. Its flames then raced to the ship's fuel bunkers, which erupted with terrific force. The 18,500-ton cruiser keeled over and sank, killing 1,000 soldiers and sailors.

Canaris planned a similar fate for *Scharnhorst* and *Gneisenau*, whose officers and men unknowingly spoiled the secret intentions of this arch-traitor. Both ships went on to gain further renown operating in concert, beginning in late January 1941, when they sped into the North Atlantic, despite every Royal Navy effort to prevent their break-out. They had been aided by identically low-profile superstructures that helped them escape detection from enemy lookouts and radar, alike.

In addition, each set of their three Germania geared steam turbines generated 165,930 metric horsepower for a maximum speed of 31.3 knots (36 mph), an exceptionally high speed for heavy battleships.

Over the next two months at sea, the dynamic duo sank and captured 22 enemy freighters and tankers totaling 115,616 tons before returning unscathed to Brest, in occupied France.

Operation Berlin's record-breaking success was followed early the following year by "the Channel Dash," when *Scharnhorst* and *Gneisenau*, along with the heavy cruiser *Prinz Eugen* and a flotilla of destroyers, boldly steamed through the English Channel in broad daylight to more distant anchorage in the north, despite an all-out attempt by British aircraft and warships to interdict them.

Their eminent partnership was dissolved on the night of February 26, 1943, when *Gneisenau* was irreparably damaged by Royal Air Force bombers. The following December 26, *Scharnhorst* went down, singlehandedly fighting 13 enemy warships, including four destroyers and a battleship, during the Battle of North Cape, the northernmost point in Europe, off the coast of Norway. Out of the crew of 1,968 officers and men, only 36 survived.

Speaking of the *Scharnhorst*, after her loss, the British commander-in-chief of the operation, Adm. Bruce Fraser, told his officers:

> I hope that if you would ever be in the situation of leading a great ship into battle against such an overwhelming enemy strength, that you, gentlemen, will lead your ship just as courageously. And that, if you are in a desperate situation, as the *Scharnhorst* was, you will embark on such maneuvers as the German ship's command embarked upon, and you and your crew will stand up with as much courage as you have seen today in battle with the *Scharnhorst*.[6]

In sharp contrast to the clear fate that befell *Scharnhorst* and *Gneisenau*, the truth surrounding HMS *Glorious* is still obscured by Churchill's self-styled "bodyguard of lies."

Forty years of growing, popular dissatisfaction in England with what was increasingly regarded as a government cover-up prompted Stephen Wentworth Roskill (1903–1982), a former captain in the Royal Navy, to write an exposé of the doomed warship. London's *Sunday Times Review* (in continuous publication since 1821 and today the largest periodical in Britain's

Scharnhorst Cmdr. Günther Schubert paid tribute to Germany's opponents, which was more than Winston Churchill ever did for his own countrymen: "The conduct of *Ardent* was particularly spirited and clever. She out-maneuvered the fall of shot very capably, laid smoke [to shield *Glorious* from view], used it with great skill, and varied her speed from 10 to 35 knots. In this way, she made the task of our guns very difficult. Not only the tactical handling, but the audacity and pluck of the destroyers was outstanding. Every [German] officer taking part in the action was of the same opinion. The destroyers put their utmost into the task, although, in their position, success was impossible from the start." After *Scharnhorst*'s badly damaged hull was repaired, its adjacent quarters were named in honor of HMS *Acasta*, which scored the near-fatal torpedo hit.

***Scharnhorst* and *Gneisenau* attacked and sunk HMS *Glorious*, a British aircraft carrier,** and two destroyers on a spring afternoon in 1940. Above, *Glorious* rolls over on her starboard side to slip beneath the surface of the North Sea, taking with her Churchill's criminal ambitions for Scandinavia. quality press market category) featured his "The Cantankerous Captain of HMS *Glorious*—How the Navy Covered Up the Truth About the Sinking of an Aircraft Carrier," on the front page of its June 15, 1980 edition.

Although the article created a nationwide sensation, it less addressed perennial questions regarding the controversial vessel than it placed blame for her loss squarely on its commanding officer, who, having gone down with his ship four decades earlier, was conveniently unavailable to defend himself. The Admiralty was only taken to task by Roskill for failing to court-marshal the allegedly "cantankerous captain" on charges of incompetence and willful misconduct, long before the disastrous battle could have taken place, thereafter covering up official neglect under a blanket of silence.

Reaction to the piece was mixed. It struck many readers as less disclosure than disinformation. Roskill was, after all, the Royal Navy's own historian, compiler of the multi-volume "British Official History Series" the *History of the Second World War*.[7]

"The demonization of D'Oyly-Hughes has always been convenient," Barker writes, "because it drew attention away from anyone discovering what I believe is the real reason the ships were lost: Churchill's Operation Paul."

Operation Paul was Churchill's original plan for attacking non-combatant Sweden. As Churchill enthusiastically urged fellow conspirator Gen. Hastings Lionel "Pug" Ismay, his personal link with the chiefs of staff, on May 23, 1940:

> We should take every advantage of our position in northern Norway to mine the approaches to Lulea [an urban center of 45,000 residents on the coast of northern Sweden] to the maximum possible extent.
>
> No political considerations [of neutrality] should stand in the way of this operation.

Barker tells how earlier "plans to drop pamphlets warning neutral Swedes that an attack was imminent had been canceled. Churchill's view was attack now, apologize later."[9]

Pug dutifully passed along instructions to field commanders entrusted with undertaking an undeclared act of war: "Pamphlets will not—repeat: *not*—be dropped."

Members of the War Cabinet were "nervous about infringing Swedish neutrality," and A.V. Alexander, Churchill's successor as first lord of the Admiralty, worried that "it is normal procedure to give prior notice of the intention to mine an area." Churchill impatiently overrode such milquetoast reticence:

> No prior notice should be given of our intentions to lay mines outside Lulea. If attacks resulted in sinking of neutral shipping, we should express our regrets in suitable terms.

The brow-beaten War Cabinet caved in: "No prior notice should be given of our intention to carry out Operation Paul."[10]

Attacking Sweden was the ulterior motive for invading Norway. There, the chief goal was capture of the administrative center at Narvik. Its railway carried vital minerals to Lulea, the Baltic port-city lying at the mouth of the Lule River, which spills into Sweden's Gulf of Bothnia.

From here, freighters delivered 82% of the Third Reich's iron ore imports for steel making. Churchill knew that cutting off these indispensable supplies could grind Germany's military production to a halt. "This is one of the most important objects for which we have gone to Narvik," Churchill confidentially confessed to Ismay.[11]

There were other "objects" he coveted: Norway had the most merchant ships in the world, and Churchill wanted them all. The success of Operation Paul would bankrupt the economic lives of both Scandinavian peoples, while killing and wounding undetermined numbers of Swedish sailors. This, however, failed to dampen the British PM's enthusiasm for the invasion of Norway as a first step toward achieving his *raison d'etre*: destruction of Hitler's iron ore at the source.

This was to be achieved by stationing Britain's last fleet carriers—*Ark Royal*, *Furious* and *Glorious*—30 miles off the north coast of Norway, parallel to Lulea. Because operational distances exceeded the 522-mile-range of available bombers, each one would have its middle seat replaced by an extra petrol tank, relocating the navigator to the rear-gunner position, almost doubling fuel capacity. Further modification substituted the biplane's standard torpedo with a single, 1,500-pound mine slung under the fuselage.

According to Prof. Thomas Munch-Petersen and Royal Navy Capt. (ret.) Peter Hore, 60 Fairey *Swordfish* participating in the mission would fly across the Scandinavian peninsula, violating Swedish airspace, to drop 45 tons of anti-shipping mines in the port of Lulea, closing it, before returning to the waiting aircraft carriers.

Since the target area was ice-bound every year until late May, the attack could not be executed until early June 1940, after the thaw began. That period coincided with the peculiar disengagement of HMS *Glorious* from her protective convoy.

Although Royal Navy documents concerning Operation Paul still remain classified for another 17 years, Barker painstakingly chased down scattered relevant facts, collecting them into a credible chronology of what really happened.

Andrew Lambert, professor of naval history at King's College London, told him:

> As I read it, the probability of your version is too high to be mere coincidence. All the pieces line up, and the men are all meeting in the right order. It is about time this gap in the record was closed.

Barker was personally motivated to close that gap:

> My grandfather, Lt. Cmdr. J.F. "Ben" Barker DSC, was the captain of HMS *Ardent*. He and Cmdr. Charles Glasfurd, HMS *Acasta*'s commanding officer, were both recommended for posthumous Victoria Crosses (VC), the UK military's highest gallantry award, for their part in the battle against *Scharnhorst* and *Gneisenau*, a detail dear to me, but very much lost in the cover-up of the truth. The Admiralty turned a deaf-ear to anyone who asked questions. The head of the civil service's military branch advised against any public report. The VC recommendations were turned down. Churchill and the Admiralty wanted the story buried.[12]

It began just after New Year's Day, 1940, when Churchill, then first lord of the Admiralty, proposed deploying three *Revenge*-class battleships, an aircraft carrier, five cruisers, two destroyer flotillas, submarines and supporting auxiliaries to blockade Lulea.

"As well as cutting off German iron ore supplies," according to his Wikipedia entry, "Churchill anticipated that the show of force would encourage [intimidate] the Scandinavian nations to join the war against Nazi Germany."

He admitted that the battleships required significant modification for

resisting air and submarine attack and, in order to pass through the Gulf of Bothnia's shallow waters, results would be worth any extra effort.

His Admiralty colleagues unanimously disagreed and turned down the extravagant scheme as not only impossibly over budget, but a flagrant violation of international law that would not make British allies of neutral countries, but bitter enemies.

Unphased by the Admiralty reaction, Churchill got to work on a less costly version, submitting the revised Operation Paul to a more sympathetic War Cabinet in late March.

On April 16, when England's foreign secretary wondered why politicians in Stockholm "seemed so nervous these days," Swedish envoy in London Bjorn Prytz casually replied, "Oh, I don't know. They think that you would fly aeroplanes over from Narvik and sow mines in the Gulf of Bothnia."

Despite his cavalier dismissal of Prytz's apprehension, precisely what Lord Halifax laughed off as a baseless fantasy was approved days later by the compliant War Cabinet.

After Vice Adm. Lionel "Nutty" Wells was put in charge of Operation Paul during early May, he met with Churchill and D'Oyly-Hughes to inform them that losses in the Fleet Air Arm had reduced the total number of serviceable Fairey *Swordfish* to only 75. The 60 slated for Operation Paul would deprive the other carriers of their most valuable aircraft. Aboard HMS *Glorious*, 823 Squadron would have to settle for only 18 planes. Even so, they were capable of dumping 22,500 pounds of high explosives into the port of Lulea.

That amount might be doubled or even tripled by repeated flights, depending on the Swedes' response, or lack of it. The small Royal Swedish Air Force was well-equipped and flown by skillful pilots, but it had been made smaller still by volunteers gone off to serve in the Russo-Finnish War.

Thus encouraged, four days after Churchill became prime minister on May 14, he ordered Operation Paul to kick off within the next three weeks. He instructed Ismay: "Bring to the notice of the Chiefs of Staff the importance of planting 'vegetables' (i.e., the cucumber-shaped mines) in the approaches to Lulea."[14]

Meanwhile, Wells telegrammed that sets of long-range fuel tanks must be transferred "only to *Glorious*" and her Fairey *Swordfish* being readied to carry out Operation Paul. Fleeing the south coast of Norway about to fall into German hands, the vessel sought protection from enemy ships and planes traveling in the company of an armed convoy of another fleet carrier, several cruisers and more destroyers.

The Admiralty signaled D'Oyly-Hughes:

> Preparations are to be put in hand for carrying out Operation Paul as soon as possible on the completion of Operation Alphabet [the Allied withdrawal from Norway]. Mines and aircraft will be embarked at Clyde [River]. Torpedoes are not—repeat, *not*—to be used. Fighters will not accompany, reducing the operation further, to one carrier and 18 aircraft taking part, instead of the original 60 planned.[15]

In other words, *Glorious* was ordered to Scotland, where she would be loaded with 13.5 tons of mines and have her fuel-oil tanks topped off for the attack on Sweden.

There were other changes necessitated by the unexpectedly swift German conquest. Says Barker:

> When it came to Operation Paul, nothing, it seems, was set in stone, except Churchill's determination to see it happen. By June 5, he was building up a head of steam over Operation Paul. It was now or never.[17]

The following navy transmission advised Wells:

> The greatest importance is attached to Operation Paul, but as no aerodrome will be available in Norway [owing to the German occupation], it has been decided that it must be carried out on a reduced scale as follows: Retire to westward at full speed [immediately after the last *Swordfish* has left the flight deck]. Aircraft, after laying mines, to land in sea at various points off coast of Norway, where small craft would [unlikely] be in attendance.

Aboard *Glorious*, the transformation of her aircraft commenced when deck crews began "the substantial job of fitting extra fuel tanks. … Lt. Cmdr. Hill told the Board of Enquiry, *Swordfish* were arranged on the flying-off deck. These had no torpedo racks fitted, nor were there any bombs up or fused."

This explains why none of the bombers aboard *Glorious* were used to defend against *Scharnhorst* and *Gneisenau*: They couldn't, because their torpedoes had been replaced by mines to be deployed against Sweden. According to researcher John Winton, an 823 Squadron pilot aboard *Glorious* "noticed warheads being removed from torpedoes and other armaments being struck down or stowed away. The chief torpedo instructor in the ship said that they were getting a 'lap ahead'."[18]

"But for what?" Barker asks rhetorically. He answers his own question when he states:

> The more likely explanation is the aircrews had begun preparing the aircraft to carry the mines and long-range fuel tanks for Operation Paul, itself a 24-to-36-hour job per aircraft.

Their window of opportunity beginning to close with the loss of Norway, Wells commanded D'Oyly-Hughes to speed ahead of the slow-moving convoy. "That order, sent at 0043 [12:43 a.m.] on June 8, 1940, was to begin Operation Paul."

By then, D'Oyly-Hughes had followed orders and far out-distanced his fast carrier and two escorts from the shelter of the convoy when he ran into *Scharnhorst* and *Gneisenau*.

Churchill wrote sadly to Alexander at the Admiralty:

> Certainly, the Germans have had a remarkable success. Considering the very few ships they had and the enormous forces which we dispose,

it is astonishing how we are bedeviled by them.

Ironically, "Paris fell a week later, giving the Germans access to high-grade French iron ore," relieving their sole dependence on imports from Sweden, Barker writes.[19] Operation Paul, or any future version of it, was never mentioned again.

Churchill is today revered for having allegedly defended the freedom of smaller, neutral nations from Nazi aggression. Forgotten is how Winnie originated, planned and almost carried out the ruination of two neutral Scandinavian nations, save for the last-minute intervention of a pair of German battleships. ❖

Life in the Reich

Hitler's Germany—1933–1945

By Mike Walsh

The standard of living and quality of life in Hitler's Third Reich was far superior to elsewhere in the developed world. Ordinary German workers enjoyed a lifestyle previously reserved for the upper classes of the West.

Hitler's Germany led the world in fashion, medicine, cinema, lifestyle, manufacturing, transport infrastructure, public facilities, cutting-edge science, healthcare and education. For good reason, the Germans were the cheeriest people on earth.

The claim that this was achieved through investment in militarism is absurd. Despite being war economies, the debt-ridden U.S. and European Union suffer the collapse of their infrastructure whilst their indebted populations live a hand-to-mouth existence. Prosperity in the Reich set an example that damns the hideous failures of the mutually supportive capitalist and Communist systems.

A taboo topic for media and palace publishers, *Life in the Reich* by Mike Walsh was removed by Amazon because it dared to show Hitler's Germany as it was and not as the propagandists would have us believe it was. Mainstream media and court publishers consider this a taboo topic because they don't want you to know in case you draw the right conclusions. National Socialist Germany's 'Strength Through Joy' Program

By Sidney Secular

The common folk under the Nazi regime enjoyed a regimen of "fringe benefits" and activities that were available to all at modest cost, whereas, nowadays, they would be unaffordable except to the corporate and global upper classes and the upper crust of society in general.

These benefits have never subsequently come close to being realized anywhere else after that unfairly, uniformly vilified regime flamed out in massive Allied bombing attacks on mainly civilian centers with incendiaries in a crusade that truly could be called a "Holocaust."

We are referring to, of course, the National Socialist Community Strength Through Joy or "KdF" (Kraft durch Freude) program, that offered all—but particularly lower- and middle-class—workers a stunning array of state-sponsored entertainment and leisure-time activities without parallel or comparison elsewhere. The KdF program had the unique thrust of leveling social distinctions in society by making the same activities available to all without any attendant special privileges available to only those at the top of the social totem pole.

The KdF program was divided into several branches focusing on different activities. One of these was the Travel, Hiking and Holidays division that sponsored a series of activities ranging from simple field trips and outings to major vacation activities such as cruises and travel by airplane, allowing Germans to visit new leisure spots for the first time.

ROBERT LEY
Head of the KdF.

These holidays and events were partially paid for by the government or given free by employers for superior work performance.

The Sportamt (Sports Department) sponsored sporting and game participation and attendance. Each year, 7 million people took part in these activities. A special small-caliber 4 mm bolt-action "gallery gun," modeled after a military rifle, was developed for target shooting during KdF events.

The Beauty of Labor Department addressed worker safety, worksite ventilation, proper attire and cleanliness at workplaces with an army of volunteers overseeing it. Meanwhile, the Adult Education Department schooled adults with approved activities such as book readings, lectures, and the study of selected arts.

There was also a Leisure Time Department, which offered discounted tickets to workers for theatrical performances and concerts. In addition to using outside performers, the KdF had its own full-time orchestra that moved from place to place entertaining the workers.

In small rural communities, where proper buildings were not always available to accommodate KdF programs, mobile theaters were erected to show films or allow travelling orchestras and actors to perform on portable stages. In urban areas with larger on-site facilities, KdF units came to workshops, factories and public buildings to give interested citizens easily accessible places to participate in the activities.

The KdF organized summer horseback riding, swimming, sailing and track events. In winter, skiing, skating and hiking were promoted in both the cities and rural areas. Joining in these activities was emphasized for the pure joy of it and to help undo the stress of heated competitions, fostering feelings of participant equality. The program broke down class distinctions and promoted the concept of a broader national community over the importance of individual accomplishment.

The KdF organized train trips that featured visits to picturesque areas in the mountains or on the seashores where people could stay at resorts and hike, relax or simply enjoy the

beauty of nature.

For more extended outings, a fleet of KdF luxury liners was brought into service. Some of these were leased from shipping companies while others, including the MV *Wilhelm Gustloff* and the MV *Robert Ley*, were specifically built for vacation voyages, which proved to be highly popular. An ambitious long-term plan was to build 30 KdF ships over time, but, of course, this dream was cut short by World War II.

To maintain the equality principle (volksgemeinschaft), when faced with varied accommodations on leased vessels, the KdF assigned vacationers from first class to steerage cabins by lottery. On the two primary KdF ships, cabins were created with the same basic design, differing only in size and corresponding number of bunks. On these massive vessels (the MV *Robert Ley* was 668 feet long and accommodated 1,750 passengers), travelers were treated to well-prepared German-style meals.

Dances were held on the deck in large ballrooms where orchestras played, while, at other times, movies and shows were presented. Libraries, lounges and gymnasiums provided for a variety of activities. Though relaxation was the theme, onboard discipline was strictly promoted with no carousing allowed. "Quiet on ship" was strictly enforced at midnight. Despite all the amenities and entertainment on board, the highlights of the cruises were visits to destinations such as Norway, Spain and Italy which were friendly toward the Reich. The popularity and propaganda value of the low-cost cruise ships and the other KdF travel programs were immense.

The onset of the war spelled the end of the KdF travel program. Its cruise liners were transformed into war service as hospital ships or troop transports. At its peak, the KdF had over 7,000 employees and 135,000

Kraft durch Freude (KdF—"Strength Through Joy") vacationers are shown on a German cruise ship. Before Adolf Hitler's tenure as chancellor, the average German did not take yearly vacations, mostly due to the expense. Hitler wanted to change all that, making it possible for everyday workers to take holiday cruises and vacations, attend and participate in sporting events and enjoy discounted concerts and other cultural activities. Set up in November 1933 by the German Labour Front (Deutsche Arbeitsfront), and headed by Robert Ley, the Strength Through Joy program also aimed to increase Volksgemeinschaft ("folk community")—uniting people across class divisions to achieve a unified national purpose—and discourage subversive anti-state activity. The KdF many times held events in factories so that all workers could enjoy art and music shows.

German women of a variety of ages participate in a Strength Through Joy (KdF) athletic event.

volunteers in its ranks—an astounding number—many of whom would go into the service of the Wehrmacht, while others would be merged into the Truppenbetreuung, or troop care department, the equivalent of our United Service Organization (USO) units to provide leisure activities and light entertainment to the troops, including sports shows.

In a terrible and tragic turn of events, at least three of the KdF cruise liners were torpedoed by Russian submarines or bombed by the Allies into oblivion. These ships transported wounded troops and refugees escaping the onslaught and savagery of the advancing Red Army moving westward into the Reich.

Among these Reds were ruthless Mongolian troops who practiced mass rape, as did their earlier leader, the notorious Genghis Khan.

The greatest tragedy in naval history that has been shoved down the memory hole today occurred when a Russian torpedo sank the MV *Wilhelm Gustloff* cruise ship, which was carrying an undetermined number of innocent passengers, including a special contingent of nurses. The estimate of the casualties range as high as 10,000, a number that dwarfs the 1,200 or so that perished in the *Titanic* disaster.

At least two other large cruise ships were similarly destroyed. [See TBR, January/February 2014, "Germany's Forgotten Dunkirk" by Philip Rife—Ed.]

When the Reich surrendered in 1945, the KdF was outlawed and forced to disband. But we should compare the royal treatment given the German working classes by the Third Reich with the lot of the workers in the Soviet Communist "workers' paradise" behind the Iron Curtain. Such irony.

Also, compare the lot of the disappearing middle class in the United States, where the breadwinners now have to work two or more jobs just to survive paycheck to paycheck and are granted less vacation and sick leave time than their current counterparts in Europe. American workers are certainly worse off than the German workers during the Third Reich period. ❖

Hitler Speaks on the Jews: Selected Speeches and Writings of Adolf Hitler

This book cuts through the lies about National Socialist anti-Semitism by going directly to the source: Adolf Hitler himself. To achieve this task, the compiler combed through hundreds of Hitler's speeches and his major writings, dating from 1919 to April 1945. The end result of this labor is the production, without commentary, in Hitler's own words, explaining why he was an anti-Semite. Softcover, 145 pages, #969, **$15**.

The Myth of the Twentieth Century

Alfred Rosenberg's *The Myth of the Twentieth Century* is a philosophical and political map outlining the ideological background of the Nazi Party and lays out how that party viewed society, other races, religion, art, aesthetics and the structure of the state. It is likely that he was hanged at Nuremberg because of this book. Softcover, 463 pages, #417, **$35**.

The Poisonous Mushroom

Among the most controversial of Nazi publications was a book for children, published in 1938 under the title *The Poisonous Mushroom*. Here, the perceived Jewish threat to German society was portrayed in elemental terms. Ernst Hiemer put together 17 short morality stories in which Jews were depicted as conniving, thieving, treacherous liars who would do anything for personal gain. Though aimed at children aged roughly 8 to 14, Hiemer's lessons were intended for all readers. Long out of circulation, and banned in Germany and elsewhere, this historic edition reproduces full color artwork by German cartoonist Philipp Rupprecht ("Fips"). Softcover, full color illustrations, 72 pages, #1000, **$17**.

The First Assassination Attempt Against Martin Luther King Jr.

THOUGH MANY HAVE NEVER HEARD ABOUT IT, a Black woman actually tried to assassinate the famed civil rights preacher in Harlem, N.Y. in 1958.

By Pat Shannan

Most TBR readers are aware of the elaborate government conspiracy to murder Martin Luther King Jr. in Memphis in 1968, likely directed by no less than FBI Director J. Edgar Hoover, that successfully framed petty criminal James Earl Ray. But a far lesser-known assassination attempt took place a decade earlier in Harlem, N.Y. by a most unlikely knife-wielding suspect—Izola Ware Curry, 42, a Negro woman from Georgia, who had been in Harlem but a month at the time. (The term "African-American" was still years in the future, and to refer to any Black American as "African" in the 1950s would have been considered greatly insulting.)

When the one we know today as Martin Luther King Jr. was born on January 15, 1929, his name wasn't what we know it to be today. According to MLK's original birth certificate, filed on April 12, 1934, his given name was Michael King Jr. His switch to a new name had to do with his father, who served as senior pastor at Atlanta's Ebenezer Baptist Church.

In 1934, King Sr. traveled to Germany, where he witnessed the budding rise of National Socialism there. Germany was also where, in 1517, theologian and monk Martin Luther wrote his "Ninety-five Theses," which in turn inspired the Protestant Reformation.

Izola Ware Curry is escorted to the local jail after attempting to stab Martin Luther King Jr. to death with a Japanese letter opener.

That movement held great significance to King Sr. who, upon returning to the states, chose to change the first name of both him and his son from Michael to "Martin Luther." MLK Jr. would rise to prominence under this new name, though he didn't officially amend his birth certificate until July 23, 1957, when the name Michael was crossed out and the words Martin Luther Jr. were printed next to it.[1]

By the mid-1950s, King Jr. had begun to establish himself as an exponent of civil rights for minorities and a spokesman for Mahatma Gandhi's principles of "peaceful protest," although his private life (according to his fellow reverends and close associates) did not reflect the Christian behavior that he preached.

At the time he had not become popular (or infamous) enough to be hated nationally, and may have had more Black detractors than White ones because they knew him and his tarnished reputation a bit better.

One of these was Izola Ware Curry, who regarded MLK Jr, as "a flimflam artist and Communist who pimped the community." Curry, 42, who hailed from a large sharecropping family living in Adrian, Georgia, had been struggling to make ends meet as a housekeeper when King arrived for a book-signing at Blumstein's Department Store in Harlem on September 20, 1958. She had maintained a longtime disdain not only for the young civil rights movement, but also the National Association for the Advancement of Color People.

Investigator Patrick Parr reported in a 2018 article that, in the right pocket of her blue raincoat that morning, Curry carried a pearl-handled letter opener made in Japan. Tucked into her brassiere was an Italian-made .32-caliber automatic pistol she recently had bought for $37.24.

Parr described the scene:

Left, Martin Luther King Jr. recovers in a Harlem hospital after having a letter opener jammed into his chest by a Black woman who insisted he was a Communist charlatan. Above, King is attended to by his wife, Coretta Scott King, during his recuperation.

King had returned to his seat at the table when Curry walked to the head of the line, hands in her coat pockets.

"Are you Martin Luther King?" she asked.

"Yes, I am," the author said.

Curry suddenly raised her right arm and, with force, plunged the letter opener toward the minister's chest.

King reflexively raised his left hand, which the letter-opener blade nicked before Curry's stabbing action drove her improvised weapon's point 2.3 inches into his chest.

"I saw a red fleck on his shirt near the collar bone, blood on his hand, and a kind of handle protruding from his chest where the blood was showing on his shirt," a witness said. Staten Island neighborhood representative Nettie Carter Jackson grabbed and held Curry.

"Dr. King has ruined my life!" Curry shouted. "He is no good! The NAACP is no good, it's Communistic. I've been after him for six years. I finally was able to get him now!"

Law enforcement officers disarmed Curry and hustled the attacker off to a police station on West 123rd Street.

King sat frozen and surrounded as some of those at his side attempted to remove the letter opener lodged in his chest but quickly decided to let the hospital doctors do it, fearing an increase in blood loss.

At Harlem Hospital, surgeons anesthetized King and worked for two hours and 15 minutes to remove Curry's letter opener, which the attacker had jammed under her target's sternum, grazing his aorta.

King, of course, recovered and lived another decade before being shot in Memphis on April 4, 1968, the target of a well-planned government conspiracy that included high-ranking city and county officials, the Memphis fire department and police officers, as disclosed by Dr. William Pepper, a lawyer who took on alleged assassin Ray's case after learning of the impossibility of Ray's guilt.

It was Pepper who reported some 30 years later that it was Hoover and the FBI that delivered $25,000 to the warden of the Missouri State Prison as payment to allow Ray to escape in the back of a delivery truck in 1967, which allowed the FBI to spend the next year tracking and setting up Ray to be the designated patsy in the murder of King. [See "Who Really Killed Martin Luther King?" in the TBR, May/June 2018 issue.—Ed.]

Although a grand jury indicted her, Curry was never prosecuted for attempted murder because a psychiatrist diagnosed her as a paranoid schizophrenic, reporting that Curry had an IQ of 70 and was in a severe "state of insanity." A month after the attack, she was found incapable of understanding the charge against her and was committed to the Matteawan State Hospital for the Criminally Insane.

After 14 years at Matteawan, Curry was transferred to the Manhattan Psychiatric Center on Ward's Island in Upper Manhattan, and then to a residential care program in Rosedale, Queens. After a fall resulting in a leg injury, Curry was placed in a Jamaica, Queens, New York nursing home, where she resided until her death of natural causes at age 98 in 2015. ❖

Reflections on the Vietnam War and the Tumultuous Events of the 1960s and 1970s

When you talk to people under the age of 50 these days, they seem completely oblivious to the events of the 1960s and 1970s. This was an era of mass protests, race riots, real acts of domestic terrorism, airliner hijackings and more. One thing that remained the same was America's involvement in costly, no-win wars.

By John Massaro

The Korean War began in 1950 and ended in 1953, the year I was born. It has long been called "The Forgotten War," and for good reason. While growing up, I don't recall ever reading a newspaper or magazine article or watching a television program about it. From first grade to my senior year in college, where I majored in history, no teacher or professor of mine uttered one word about it. Even though some 34,000 American soldiers were killed in that conflict, it's almost as if it never happened.

Should we be surprised, then, that the overwhelming majority of Americans younger than, say, 55—nearly three-fourths of the population—were taught next to nothing about the Vietnam War in school, and are unmoved by the mention of it?

In a country as dumbed down as America, severed from its own history by the malicious powers that be, no one should be surprised. Yet, that fact is still hard for me to grasp, because, as a teenager, I was emotionally wrapped up in the Vietnam War, and those emotions resonate to the present day.

LYNDON JOHNSON
Vietnam his Waterloo?

Vietnam and its two western neighbors, Cambodia and Laos, had been colonized by France late in the 19th century, the three nations comprising what was called French Indochina. During World War II, the Japanese occupied the region, but withdrew after their surrender in 1945, creating a power vacuum. The French tried to reassert their dominance in the early 1950s, but met stiff armed resistance in the north and pulled out after their defeat at Dien Bien Phu in 1954. By international agreement, the country was partitioned at the 17th parallel with a nominally Communist regime taking power in the north. (Interestingly, Korea was split in nearly identical circumstances, shortly after WWII ended.)

Right after the French departed, Washington began to meddle in South Vietnamese affairs, though it wasn't until March 8, 1965 that the United States formally began combat operations. That role ended on January 27, 1973, but some American officials remained in South Vietnam right up to April 29, 1975, the day before the North Vietnamese army stormed into the southern capital of Saigon, and the last Americans, along with many other foreigners, were evacuated by helicopter.

John F. Kennedy, who was elected president in 1960, bore much responsibility for expanding both diplomatic and military intervention in South Vietnam, a country wracked by corruption and instability. It should be noted that this was a time when the threat of international Communism, which had been greatly strengthened

In the late 1960s and 1970s, Americans gathered in huge numbers to protest the Vietnam War.

by the outcome of WWII, was front and center on the world stage. Not far from our border, Fidel Castro—backed by the Soviet Union—seized power in Cuba in 1959. How much of this threat was real and how much was contrived, I'm still undecided, but a lot of bad things were happening around the world. Take 1961 alone.

In March, a ragtag army of Africans, whipped up by Communist propaganda spewing from the United Nations, descended on sparsely populated northern Angola—then a Portuguese colony under the resolutely anti-Communist President Antonio Salazar—and, in three days, butchered about 1,000 completely surprised White settlers in the most gruesome ways imaginable. This massacre received virtually no coverage in the world press outside of Portugal.

In the following month, the abortive Bay of Pigs invasion took place in Cuba, in which 1,500 anti-Communist Cubans were abandoned to Castro's tender mercies.

In August the Berlin Wall was constructed, dashing any hopes that residents in the Communist eastern half of the city could escape their bleak existence in relative safety.

In September a multinational UN army invaded Katanga, a breakaway province of the enormous Congo, which had immediately descended into chaos and barbarism after being granted independence from Belgium in June 1960. This initiated an on-again, off-again 16-month war against Katanga and its staunchly pro-Western native president Moise Tshombe. The UN terrorists ultimately prevailed and forced the small country back under the Marxist central government.

I was but seven when all of this happened, and don't remember any of it. I do, however, clearly recall the Cuban missile crisis of October 1962, when it seemed like the United States and the Soviet Union were on the brink of nuclear war. There was tension in the air, and I was quite scared. At this time, nearly all of Eastern Europe had been sold out to Communism as a result of secret treaties among the Allies at the end of World War II. By this time, China had plunged headlong into extreme Communism under Mao Tse-Tung, and there were rumblings throughout Asia and the rest of the world.

JFK was an enigma. On the one hand, he made a lot of noise about checking the Communist threat in southeast Asia, while, at the same time, he had a track record, going back to his days in the U.S. Senate, of supporting "liberation" movements in Africa in the waning days of European colonialism. He firmly supported, both morally and financially, the unjust, barbaric UN war against Katanga, which incurred the wrath of a majority of anti-Communist

patriots throughout America and Europe. He also vacillated. After initiating a much larger U.S. military presence in Vietnam, he later seemed to favor a gradual withdrawal, so as not to get involved in more hostilities. That is how close observers saw it, and I agree with them. JFK took a lot of secrets to his early grave.

Thus, the Vietnam War can be laid squarely at the feet of his successor, Lyndon B. Johnson (LBJ). Richard Nixon was also a bona fide war criminal, but, in his defense, this war, which had become increasingly unpopular when he took office in 1969, was dumped in his lap. LBJ started it. He got his foot in the door after the dubious Gulf of Tonkin incident of August 2, 1964, when three North Vietnamese torpedo boats briefly exchanged gunfire with the USS *Maddox*, which was purposefully looking for trouble by sailing near the coast of North Vietnam.

Four North Vietnamese sailors were killed and their vessels damaged, while there were no American casualties and the ship was unscathed. Two days later, the captain of another naval destroyer, *Turner Joy*, which had joined the *Maddox*, reported that his ship had been fired upon. It was later confirmed that there were no North Vietnamese boats in the area and no such attack ever took place.

Nevertheless, this gave LBJ the pretext he needed for an acquiescent Congress to give him the green light to start a war without a declaration of war.

Seven months later, the first Marine combat unit came ashore at Danang, which was to become the entry point for nearly all American troops that fought in the Vietnam War. The first arrivals believed they were there only to defend the large air base in Danang, a mission that would soon be turned over to the South Vietnamese army.

Through elementary school, I was indoctrinated with the myth of what is now called American exceptionalism—the idea that we are a nation of the highest moral order, a beacon of excellence to which all other people look up, the natural leader of the free world, and all that. We were the guys with the white hats who allegedly could do no wrong, and had won every war in which we had fought. No sooner had we won on the battlefield, we extended a helping hand to our former enemies, namely Germany and Japan, so they could rebuild their nations. If we dropped two atomic bombs on Japan, well, that was just to bring the war to a quick end and prevent the deaths of half a million American soldiers. (My father, who had been drafted into the U.S. Army, was in the Philippines at the time, training with his unit for a ground assault on Japan. He used to tell me that if it weren't for Hiroshima and Nagasaki, I wouldn't be here.)

> Not a word was ever spoken about the 67 Japanese cities that had been firebombed with great loss of life.

Not a word was ever spoken about the 67 Japanese cities that had been mercilessly firebombed with great loss of civilian life. The carpet bombing of Germany was likewise hardly ever mentioned, and I learned nothing of the starvation and expulsion of millions of ordinary Germans that went on for years after the war ended.

So, there was never any doubt in my young mind that we Americans always did the right thing. Also, my conservative instincts were intact, and I was fiercely patriotic, which is not a bad attribute, though I had no idea how this natural feeling had been perverted by our "progressive" education system.

By 1966, I was aware that we were committed to an expanding war in Vietnam, in which young American men were dying in increasing numbers. I totally supported the war, having bought into the absurd domino theory, which held that, if we didn't stop Communism in Vietnam, all the countries in the region and beyond would topple one by one. Thus, I became more and more absorbed in news reports from battle areas.

The news was invariably positive, giving me the impression that week after week we were smashing the enemy and victory couldn't be far off. How could the omnipotent U.S.A. possibly lose to such a puny country like North Vietnam and their Viet Cong guerrilla proxies scattered throughout the south?

At the same time, I was growing more aware of the discontent over the military draft and the voices opposing the war. These could be broken down into two groups. There were the liberal pacifist types who were whining about the U.S. Air Force dropping bombs on North Vietnam, mainly the capital, Hanoi, with considerable loss of civilian life. My reaction was: So what? When we bomb a country it's always for a higher moral purpose, in this case eradicating Communism. These deaths were nothing more than a dry statistic to me, and these pacifists nothing more than an irritation. I made a distinction between them and the hardcore leftist types, especially the ones who marched in the streets carrying Viet Cong flags and chanting for a Communist victory. These street scum, the prototypes of Antifa, made my blood boil.

On the other side of the fence, where I proudly stood, were the flag-waving yahoos who fully supported the war effort. Every good American instinctively felt that everything these Marxist rabble opposed was something that should be supported, and vice versa. The Vietnam War was an extremely polarizing event, and, as the war went on, the number of violent confrontations increased.

Most of the war was fought in the 1960s, a tumultuous and transformative decade when American society began to unravel, though not to the

Shown are flag-draped coffins containing the remains of five U.S. servicemen killed in attacks on an American military installation in South Vietnam on February 7, 1965. Before the return flight to the U.S., a funeral service was held for them at the Saigon Airport, little consolation for the families of the dead, some of whom, no doubt, were draftees who felt an obligation not to dodge the draft.

degree we're currently witnessing. A great deal of racial turmoil was taking place throughout the South in the early 1960s, the so-called civil rights era, but, as a boy, I was only vaguely aware of it.

Aside from the assassination of President Kennedy on November 22, 1963—which traumatized the nation just like the events of September 11, 2001—the early 1960s were the calm before the storm. To me, personally, 1967, the year I started high school, was pivotal. That's when I first began to sense that the old norms were crumbling with narcotic drug use becoming rampant, degenerate trends in art and music seeping in, and sexual promiscuity and weirdness becoming "fashionable." In the summer of that year, terrible nationwide racial riots erupted, every bit as destructive and frightening as those that took place in 2020. And then there was the war in Asia, growing bigger all the time.

The Tet offensive, which began in late January 1968—the year that saw American troop strength at its peak, and the highest number of casualties—was a major turning point. Close to 100 South Vietnamese towns and cities were attacked by the enemy, catching everyone off guard, though the Communists suffered huge losses. I can still remember thinking, "If we ever win this war, it's not going to be easy."

One month after Tet was launched, LBJ's hawkish Secretary of Defense Robert McNamara resigned under the strain of his job. He had come under siege from both sides of the political aisle—from those on the left who reviled him as a mass murderer for bombing civilians, and those on the right who were becoming increasingly angry about their sons and brothers being drafted and thrown into a war with no clear purpose.

LBJ himself was also cracking under the pressure. In a televised address on March 31, 1968, he stunned the nation by announcing that he would not seek re-election in the fall. Four days later, Martin Luther King Jr. was assassinated in Memphis,

sparking another round of race riots with the usual burning and looting. Though smaller in scale than the 1967 riots, some cities, including Washington D.C., were hit hard. Then, in June, Robert F. Kennedy Sr., who was vying for the presidency, was gunned down in Los Angeles after winning the California Democratic primary.

The Democratic National Convention was held in Chicago in late August 1968. To give you an idea of the chaos and depravity of the period, two Jewish leaders of the anarchist Yippie movement (short for Youth International Party), Jerry Rubin and Abbie Hoffman, threatened to sabotage the convention, upon which 10,000 anti-war protestors had descended and set up camp in Grant Park, near downtown Chicago. In a press release, they stated, "We are dirty, smelly, grimy and foul. … We will [urinate] and [defecate] and [fornicate] in public. … We will be constantly stoned or tripping on every drug known to man."

The Yippies, always drawing attention with their antics, nominated a live pig named Pigasus for president. The mood was extremely tense, with barbed wire surrounding the convention site, which was guarded by 11,000 police officers and armed members of the Illinois National Guard. Within the convention, there was bitter debate among the delegates as to which direction the course of the war should take. In the streets, pandemonium reigned with club-wielding cops chasing down demonstrators and brutally beating them.

What distinguished Vietnam from later American conflicts was that there was a draft that fell disproportionately on young, unmarried men with blue collar backgrounds. That opposition to the war, along with "ending racism," was a central plank of every group left of center—from trendy liberals to hippies and radical groups like the Black Panthers and Students for a Democratic Society, some of whom took to occupying university administrative offices. There was also the overtly violent Weather Underground, which planted bombs at several government buildings, though without killing anyone. Into this mix came the Vietnam Veterans Against the War, who joined the countless marches and protests, some in wheelchairs, throwing their war medals away in disgust for the cameras. Everything about this war was beginning to slip beyond my comprehension.

My parents subscribed to *Life* magazine, and I'll never forget the day the June 27, 1969 issue arrived. The cover story read "The Faces of the American Dead in Vietnam—One Week's Toll." Across 12 pages there appeared the names, ages, hometowns, military branches, ranks and photographs of most of the 242 men who had been killed in action the week of May 28 to June 3. For the first time for me, and so many other Americans, our war dead were not just depressing statistics but real young men in whose faces we could see many boys we personally knew. What wonderful faces they were.

> Inexperienced U.S. draftees were no match for hardened, 20-year Viet Cong veteran fighters.

On a sublime level, I suspect that millions of Americans felt as I did, that these young men were the genetic flower of the nation who had died for no tangible reason. In a later editorial, a *Life* writer stated that no issue in the magazine's history had ever provoked such an emotional outpouring. It also came out that many soldiers who died that week were not mentioned, and many more had been killed earlier in May.

When confronted by angry friends and relatives about this deliberate misrepresentation, *Life's* editors offered the feeble excuse that they had been unable to obtain many photographs before the publishing deadline, and decided to make substitutions. It seems even in the rare instance when the media do something of value, they can't help lying.

In September, less than three months after that riveting photo gallery appeared, the first news about a horrific massacre at a village called My Lai, which had taken place much earlier, on March 16, 1968, leaked out. It was reported that a U.S. Army unit nicknamed Charlie Company had swept through My Lai and pumped bullets into every human being they saw, from infants to old men and women, the final number of dead standing at 504.

There was solid evidence, including one widely reprinted photograph showing about 20 bodies lying on a dirt road. Millions of Americans refused to believe that our troops could do such a thing. In their minds, one platoon leader, Lt. William Calley, was responsible. Calley was later arrested, convicted of murder, and sentenced to life in prison, though he never spent a day in jail. Calley was the scapegoat for everything that was going wrong in Vietnam. To many, however, Calley was a hero. He was later pardoned by President Nixon.

On November 15, 1969, the largest anti-war demonstration in U.S. history, featuring speeches by many politicians and popular musicians, was held near the White House. At this point, I still supported the war, though I really had no idea why.

In 1970, there was a palpable sense of reduced combat operations, and this was reflected in the number of Americans killed in action by the end of the year, which came down by nearly 50% from 1969. And there were hints here and there that Nixon was interested in some kind of peace treaty with the North Vietnamese government. But, on April 30, he went on television to announce an incursion into Cambodia—which

THE KENT STATE MASSACRE

In 2007, a reel-to-reel tape lasting 20 seconds, recorded by Kent State student Terry Strubbe, found the light of day, proving that, at 12:24 p.m. on May 4, 1970, officers of the Ohio National Guard issued a verbal command to their troops, directing them to shoot at unarmed students who posed no threat to them. Before the shooting stopped, more than 65 bullets had been fired, four students were dead and nine wounded. According to reporters Bob Fitrakas and Harvey Wasserman, "[T]here was a direct military order leading to the unprovoked assassination of unarmed students. Freedom of Information Act documents showed collusion between Ohio's Gov. James A. Rhodes and the FBI that aimed to terrorize anti-war demonstrators and [end] the protests that were raging throughout the nation."

itself was mired in instability—to wipe out North Vietnamese and Viet Cong forces using the border region as a base for their operations in South Vietnam.

This sparked outrage among anti-war activists. College campuses erupted in violent protests, and attacks against police and other authorities were instigated.

On May 4, a contingent of Ohio National Guardsmen opened fire on a throng of unruly students at Kent State University, killing four and igniting yet more nationwide protests. Counterculture icon Jerry Rubin had given a speech at Kent State just weeks earlier, urging students to kill their parents as part of the Yippie revolution.

At this time, Nixon and National Security Advisor Henry Kissinger began a secret and intensive carpet bombing campaign in Cambodia, which only came to light after it ended in 1973. Even as the bombing escalated, a troop withdrawal timetable was implemented. This was good news for me because I'd be turning 18 in late 1971, and had dropped out of college. I was draft bait. Who knew if the course of the war wouldn't be reversed and re-escalated?

A lottery was held on February 2, 1972 for my birth year, 1953, and word was that the first 20 or 30 birth dates selected would have to report to their local draft board. I was greatly relieved when my birthday came in at No. 180.

One year later, America's combat role came to an end, but the war between North and South ground on. On April 30, 1975, I stared disconsolately at the TV screen, watching a news report that showed North Vietnamese tanks rolling down a tree-lined boulevard in Saigon, then plowing through the fence that surrounded the presidential palace. The South Vietnamese government surrendered without a shot fired, and the war was over. More than 58,200 American servicemen had died for absolutely nothing.

A few years later, the door of suppressed literature was thrown open to me, but, at the time, I was still a ding-a-ling conservative, perplexed by what had happened in Vietnam, still believing that "we could've won the war," whatever that was supposed to mean.

Then in 1978, a friend recommended a recently published book, *A Rumor of War* by Philip Caputo, a Marine platoon leader with the first combat unit that entered Danang in 1965. This book not only touched my deepest emotions, but made me realize that, from the beginning, I had been living in an alternate reality a million miles from the facts on the ground in Vietnam, of which I now realized I knew less than nothing.

Over the next several years, I did a tremendous amount of reading and came to an understanding of how the world works. I also read nine more books written by Vietnam veterans. It should be pointed out that, in the early stage of the war, infantry units were comprised mostly of men who had volunteered or enlisted in peacetime, but that would change, with draftees making up the great bulk of fighting men by the late 1960s.

Similar themes recurred throughout these books:

• Soon after arriving in Vietnam, any notions about protecting the people from the evils of Communism were quickly dispelled, and the sole mission was to survive and make it home in one piece.

• Contempt for rural Vietnamese and their way of life was explicit.

• Men driven to the limits of their endurance often commit acts of savagery due to a combination of constant tension, sleep deprivation for months on end, primitive living conditions, miserable food, oppressive heat and humidity, incessant rain in the monsoon season, the inability to distinguish the Viet Cong from the ordinary civilians among whom they lived, being sent on dangerous jungle patrols and other missions that had no real objective other than to produce dead enemy bodies, the trauma of seeing their friends killed, sometimes blown to pieces by booby traps.

• Racial tension between White and Black soldiers was also common, as was a burning hatred of their commanding officers who lived in comfort, a safe distance from the fighting. There were at least 800 attempts at murdering these higher-ups—about 10% successful in addition to many more injuries—by throwing a hand grenade into their sleeping quarters, which added a new word to the English language known as "fragging."

And what of the men in Washington who were responsible for this war? As a young teen, I had no feelings either way for LBJ, but, soon enough, I learned that he was probably the most vicious beast that ever squatted in the White House. These politicians are such reptiles that I find it impossible to enter their minds. I can only speculate that LBJ started the war to pay off his biggest financial supporters who had helped him since he was elected to the Texas state senate—the Brown brothers of Brown and Root, a firm that won lucrative contracts for huge military construction projects in South Vietnam.

> I've often wondered if Rostow wanted to see as many young, healthy Americans die as was possible.

LBJ had also been egged on by three of his closest advisors who often clashed with one another. This included Secretary of State Dean Rusk, National Security Advisor Walt Rostow, and the aforementioned Robert McNamara. All three were of fighting age during World War II, but played it safe by taking a desk job in the military bureaucracy. Now it was they who were pushing for war in Vietnam.

There used to be a popular term for such cowards: chicken hawks. It's a label that also fitted the next generation of tough talkers, some of whom openly called for war with Israel's enemies, but weaseled out of the draft one way or another in the late 1960s. Among them were Dick Cheney, Bill O'Reilly, Rush Limbaugh, John Bolton and, of course, Donald Trump, who got a medical exemption due to bone spurs on his heels despite playing three collegiate sports.

Of the three warmongers, Rostow, who was Jewish, was the most zealous. He had held the same post under JFK, but Kennedy disliked and demoted him, finding his ideas too frenzied and impractical. LBJ, on the other hand, held him in high regard.

I've often wondered if, down deep, Rostow wanted to see as many young, healthy American men die as was possible, following the Talmudic precept that the best of the goyim should be killed. But McNamara was by far the most visible. He also had the most impeccable globalist credentials, having served as president of Ford Motor Company before his cabinet post, which he also held under JFK, and as president of the World Bank after he resigned. During World War II, he worked with genocidal U.S. Air Force Gen. Curtis "Bombs Away" LeMay, calculating the most cost-effective ways of burning alive the maximum number of Japanese civilians.

McNamara was your typical Eagle Scout psycho. (Former CIA Director and Secretary of State Mike Pompeo also qualifies for that title.) I remember, when I was 11 or 12, seeing McNamara on television, waving his pointer at a map of Vietnam while describing the latest U.S. military assault. Even then I could tell there was something wrong with this Harvard-graduated egghead.

McNamara later wrote a book titled *In Retrospect: The Tragedy and Lessons of Vietnam*. I read it several years after its publication in 1995. It's a shallow, stuffy book riddled with omissions—like any book, a reflection of its author. For the most part, it's a litany of meetings, conferences, debates, assessments, messages, fact-finding tours, arguments, discussions, memoranda, agreements, disagreements, re-assessments—all of which led nowhere. The impression

one gets is that of a bunch of clowns spending three years trying to fix a broken nuclear reactor, only to kill off the surrounding population with a massive radiation leak.

In the last chapter, McNamara enumerates and discusses all the reasons why the war dragged on and ended the way it did. He could've compressed it into three sentences: "We didn't know what we were doing. We made a lot of mistakes. Sorry about that."

McNamara had no real knowledge of history or world affairs, yet his decisions caused hundreds of thousands of people who wanted nothing to do with war, including Americans, to die in agony. His book has unwittingly given us a close look at the soulless, bloodless, super-rich "corporate man" as he functions day-to-day in the highest councils of business and government.

The same malfeasance holds for many who pursue a career in the military, and that's truer than ever today, with a military that has become a woke joke. I've never been in the service, but I've read enough to know that it's a refuge for all kinds of shabby, mediocre men, along with plenty of psychopaths. No doubt there are men and women of high character and courage who try to uphold standards of honor and integrity, but even they don't really seem to get it.[1]

Even they don't seem to understand that the U.S. government is the world's bloodiest terrorist organization, and the military establishment's *raison d'etre* is to start trouble around the world against enemies invented by the all-powerful Zionist-controlled news media.

For the most part these are imaginary enemies who pose no real threat to the U.S. and have no wish to antagonize Uncle Sam. I do believe in military training and preparedness modeled on the Swiss system, but it should be obvious that our Department of "Defense" is in reality a stage-four cancer—a malignant global tumor that must be excised.

Back in my conservative youth, I actually believed that the "liberal news media" was largely responsible for our demise in Vietnam by instilling a nationwide defeatist attitude. Actually, in the first three years at least, the media were the war's biggest cheerleaders, uncritically broadcasting all the lies fed to them by uniformed military propagandists. They made it sound like victory was not far away, while, at the same time, censoring the views of genuine patriots who, from the start, condemned the war as an unwinnable farce, fought for the benefit of parasitic bureaucrats and the merchants of death who always profit from the hell of war.

In his book *The Grunts*, Charles Anderson, a Marine Corps infantryman, mocked the kind of press statement that could be expected after 13 of his buddies were killed when a North Vietnamese mortar shell landed squarely on a ton of high explosive ammunition sitting on a pallet: "The U.S. command in Saigon announced today that scattered actions with enemy forces accounted for 358 Communist dead. American losses were described as light."

That's exactly the kind of thing I recall reading and hearing a hundred times, and it always sounded so encouraging, like we were well on our way to victory. We weren't.

This positive message was reinforced again and again by William Westmoreland, the four-star general and top commander in South Vietnam until June 1968, when LBJ appointed him Army chief of staff. There was something about him that impressed me when I was young, but a closer look later revealed him to be a typical liar and cover-up artist. Up until his death in 2005, he continued to insist the United States had not lost

So what were the dividends of the Vietnam War? In addition to 58,281 American war dead, hundreds of thousands were maimed for life in body or mind or both—and many of those lives were cut short by drug addiction, alcoholism and suicide attributable to the horrors of war.

Rage & Revenge: Torture & Atrocities in War & Peace

Tom Goodrich's Rage & Revenge: Torture & Atrocities in War & Peace is a terrifying, up-close and personal look at what war and its aftermath are really like. For too long, the true nature of combat and the "peace" that follows have been concealed from the general public. Most who have never witnessed war naively assume that there are rules and laws governing such contests. As the reader of this book will quickly discover, nothing could be further from the truth. The fact is, all war is wild, chaotic, brutal and primitive. War is also the refuge where some of the most sick and sadistic among us may live out their darkest fantasies.

In a fast-paced, no-nonsense writing style, Goodrich offers the reader a riveting glimpse at the true face of war in all its ugly reality. Goodrich speaks in lurid detail about how men, filled with rage from battle and perhaps intoxicated by toxic propaganda, turn into some of the most vile, sadistic creatures in the aftermath of the heat of battle. Covering such wars as the Indian Wars during the conquest of the American West to the island hopping of the American military against the Japanese, Goodrich weaves a torrid tale of some of the most unspeakable bestial crimes committed during the aftermath of battle. While many prisoners of war made it home, many more did not, and, to this day, well over a thousand POWs and MIAs are unaccounted for—abandoned by Pentagon bureaucrats who pretend they did not and do not exist.

And what about the people of South Vietnam for whom we were supposedly fighting? Again, I'm not whitewashing the appalling atrocities committed by the Viet Cong, but we inserted ourselves into a civil war in which South Vietnamese forces committed numerous atrocities as well, one prominent case being the nefarious Phoenix Program, carried out under the supervision of U.S. advisors.

In my view, Communist crimes pale in comparison to the death and destruction caused by the American military machine. I have mentioned My Lai, but there were many similar killings of civilians on a smaller scale—outright murder from reckless artillery bombardments, for example—which will never be known to the outside world. As for the My Lai massacre, as it is called, investigative reporter Seymour Hersh got closer to the truth than anyone else by digging up the names and addresses of the men of Charlie Company after they returned home, crisscrossing the country, knocking on doors, and interviewing them in their living rooms, at least those willing to talk.

The things they said, and the way they said them, would shock you. It's a complex and nuanced story, but, at heart, an extremely ugly one. Hersh wrote all about it in *My Lai 4: A Report on the Massacre and its Aftermath.* He followed this up with another book well worth reading called *Cover-Up*, an account of how men of all ranks, from privates to generals, conspired to keep the My Lai massacre a secret, which they succeeded in doing for 18 months.

But it was death from above that took the greatest toll by far in Vietnam, Cambodia and Laos. It's safe to say that millions of inoffensive civilians were maimed or killed as a direct or indirect result of U.S. air terrorism. By indirect I mean, for example, the spraying of the defoliant Agent Orange over 20% of Vietnam, which was not only an ecological disaster but caused widespread illness, including cancer, among the populace, along with birth defects still seen after two generations. This was also a tragedy for U.S. servicemen who were exposed to this toxin.

How many people know that Laos, despite being neutral, is the most heavily bombed country in the history of warfare? Well over 2 million tons of bombs were dropped on this unfortunate country. In fact, U.S. B-52s dropped their payloads on average every eight minutes for nine years straight. These are numbers that can hardly be grasped. This air war was conducted to disrupt movement along the so-called Ho Chi Minh Trail, a network of jungle tracks and roads inside the Laotian border along which the North Vietnamese army transported men and equipment headed for South Vietnam.

> How many people know that Laos is the most heavily bombed country in the history of warfare?

To this day, unexploded ordnance, or UXO, buried in the soil, remains a mortal threat in the region, particularly to farmers who strike and detonate them with their agricultural tools. How many schoolchildren, or even adults for that matter, have even heard of Laos, let alone are able to locate it on a map?

Cambodia did not fare much better. Although the bombing campaign was of much shorter duration, it was relentless, as was the strafing by helicopter gunships of countless civilians out doing their chores, mostly anyone remotely suspected of being the enemy. Kissinger was the architect of this terror, but, since he died recently at age 100, he'll never be hanged for this or any of his other war crimes. American air attacks caused so much grief and struck so much fear into peasants in eastern Cambodia, the fanatically Communist Khmer Rouge was easily able to exploit this as a recruiting tool to quickly strengthen their efforts.

Just two weeks before South Vietnam fell, heavily armed Khmer Rouge troops triumphantly entered the North Cambodian capital of Phnom Penh. Within days, the Communists evacuated the capital and other large cities, forcing residents to march into the countryside where they were forced to work on insane agricultural projects. The country quickly became a vast death camp, people expiring from disease, starvation or execution.

The Khmer Rouge remained in power for nearly four years and, by the end of their rule, about 2 million, or 25% of the population, had been killed off. Per capita, this is the worst Communist genocide in history. This was another consequence of our crusade to stamp out Communism in southeast Asia. And there were factions in our own government that threw their support behind these monsters.

As it happened, because of many murderous cross-border raids into Vietnam, it was that Communist nation that invaded Cambodia and overthrew the Khmer Rouge regime in January 1979, putting an end to their reign of terror.

If all of this sounds crazy, that's because it is, but these are the broad facts of the matter. American interference in the affairs of Vietnam, not only the war but the CIA manipulations behind the scenes, was a bedlam of gangsterism, arrogance, stupidity, confusion and incompetence. It ended the way it did because the stated objectives had no basis in reality.

Fifty years ago, the Viet Cong were the bad guys. In the 1990s it was Saddam Hussein, then Muammar Qaddafi

and, a decade or so later, the Taliban. Now it's China and Russia and Iran and Venezuela and any nation that refuses to kowtow to Washington's New World Order.

I would love to put a simple question to any of these war planners: "What is the point of all this?" I can't imagine any coherent answers, only fictional rationalizations.

Halfway through writing this essay, it dawned on me that, for American youngsters, the Vietnam War is further back in time than World War I was to me when I was a boy. So, I fully understand why they and any parents, born after 1970 consider it a forgotten war, if they ever think about it at all.

They could not possibly be gripped by Vietnam the way my generation was, and still is—unless, perhaps, their fathers or grandfathers fought in it.

I often log on to the website of the Vietnam Veterans Memorial Fund (vvmf.org) and click on the "Wall of Faces" tab. Every day, on their birthdays, roughly 150 faces of young men who gave their lives in that distant land are posted, taking me back to those tumultuous years. America has changed so much in the intervening period, and not for the better. I look at those faces and remember how so many of my young and healthy countrymen, just a few years older than I, got their dreaded draft notices in the mail. Anxious as they may have been, they did what they believed was their patriotic duty.[2]

Let their courage be an inspiration to what is left of American manhood. And let their tragic deaths be a constant reminder to the politicians who exacerbate these wars—but rarely see their own children serve—that they have no right to send our children to fight and die in nations that present no real threat to the security or prosperity of the U.S.A. The problem is, most of them know nothing about history and nothing about war. ❖

A Vietnam Mutiny

As early as 1965, U.S. veterans and active military members were speaking out against the Vietnam War. They continued to be vocal opponents of the cost of the war in terms of money and lives, and the way in which the war was being waged. At Fort Bliss Army base in El Paso, Texas, three privates of the U.S. Army, Dennis Mora, David Samis and James Johnson (left to right in photo) refused orders to deploy to Vietnam and subsequently gave statements to the media in New York City. Much to the consternation of the Army brass, their statements were reproduced in printed materials and distributed widely by members of the antiwar movement.

A portion of their joint statement read, "We have been in the Army long enough to know that we are not the only GIs who feel as we do. … We oppose the criminal waste of American lives and resources. We refuse to go to Vietnam." They were not the only resistors. According to author David Cortright, in his book *Soldiers in Revolt: GI Resistance During the Vietnam War*, "In fiscal year 1972, there were more conscientious objectors than draftees, and precipitous declines in both officer enrollments and non-officer enlistments." He also details a "staggering level of desertions, increasing nearly 400% in the Army from 1966 to 1971."

Cortright also reveals what he calls a "quasi mutiny" of the troops—especially within the ground infantry. Cortright says the widespread "mutiny" was nearly able to "cripple" the war effort. Cortright also shows how the U.S. military was hampered by "drug abuse, political protest, combat refusals, Black militance, and fraggings."

Interview With Antelope Hill

Recently, The Barnes Review has come across another company willing to publish politically incorrect books. What follows is a brief interview with Antelope Hill's outreach manager Taylor Young. Why, one might ask, would TBR introduce readers to another professional publishing company? Willis Carto, the founder of TBR, did not see other companies with similar goals as competition, but allies in a multi-front "war" against government censorship, disinformation and what Harry Elmer Barnes referred to as the "historical black out."

TBR: What is the basic purpose and mission of Antelope Hill Publishing?

AH: Antelope Hill Publishing seeks to ensure history, culture, and revolutionary ideas will be preserved in the written word and made easily accessible, fairly priced and professionally published. We translate, transcribe, and republish existing works in print and eBook format, as well as those of new authors telling the story of the current generation, or creating new, groundbreaking research.

TBR: What sort of goals does your publishing company have for 2024? What do you hope to accomplish?

AH: We want to make widely available a new swathe of historical books that would otherwise risk succumbing to censorship or being lost to time. To enable this, we are seeking to grow in 2024 by expanding our networks and relationships, and branching out into new markets and types of media.

TBR: Many of the books you currently have in print deal with very controversial historical topics—can you address the importance of free speech, freedom of the press and freedom of historical and intellectual inquiry? How are these freedoms being undermined and what can we do to protect these freedoms?

AH: A significant portion of our stock presents the witness of history, told through contemporaries about themselves or about others. We should look very critically at any person or group that feels threatened by this. Without the ability to freely speak, write and print, we will lose our understanding of history and therefore of the present as well, and will be unable to tell truth from error.

There is a lot we can and should do to protect and expand freedom of speech, through speaking truth to power, engaging politically and metapolitically, and building new, anti-fragile business networks, communication tools and communities. But still, there may come a time when the only place you can trust that you will find the truth is a book on your own shelf.

TBR: The motto of The Barnes Review is "to bring history into accord with the facts," which Dr. Harry Elmer Barnes, the namesake of the magazine, once described as his mission when studying, analyzing, and writing about history. Can you comment on this motto and basic approach to studying history and publishing books dealing with various aspects of history?

AH: History can be immensely complicated and easily obfuscated. That's why one of the best methods of studying it is primary sources, and one of the best ways of judging the value of a historical analysis is by its stance toward such primary sources, and the ability of people to have access to them. To us, "bringing history into accord with the facts" means publishing firsthand accounts and voices from the past in order to hold up a measurement against which modern historical narratives can be judged. If someone or something cannot be condemned without being lied about, one should start to wonder if the condemnation is deserved at all.

TBR: Some of the books Antelope Hill has published are original submissions by independent authors in the dissident right sphere. How do you go about choosing what to publish from original submissions? Is there a process or guideline those wishing to submit manuscripts for potential publication must abide by?

AH: We advertise on our website that we are always looking for new authors to consider. Over the past few years of our existence, we've been blessed to showcase some of the highest-quality writing and research that, if we dare say so ourselves, is available anywhere. We have high standards for everything from original fiction to academic-style non-fiction, to ensure that the stories we publish are meaningful and engaging, and the research is relevant and unimpeachable.

We encourage those who wish to submit to us to have at least the majority of a manuscript available for review, and to avoid unnecessary and excessive vulgarity.

TBR: What sorts of topics is Antelope Hill interested in?

AH: There isn't necessarily a limit. Thus far, our works by contemporary authors have included academic-level research on transgenderism, transhumanism and globalism; a firsthand journalistic account of the opioid epidemic in America; British student Lord Miles Routledge's account of his trip to Afghanistan during the Taliban takeover; a firsthand account of the 2014 war in Ukraine from the Ukrainian perspective; and novels with a colorful variety of stories and settings.

TBR: One thing we are interested in is firsthand accounts by participants in ongoing or recent conflicts, in particular the Russia-Ukraine war from the perspective of the Donbass republics or of Russia; the Israel-Palestine war from the Palestinian perspective; and the Syrian war from the Syrian perspective.

AH: Besides that, we are also, of course, always looking for more books of historical, political, or cultural importance that can be republished or translated into English for the first time. We welcome tips on such books as well as original submissions.

TBR: Some of the books Antelope Hill has published were written in various foreign languages that have been professionally translated for publication for an English-speaking and reading audience. Can you address the purpose and importance of bringing such material to an English-speaking audience?

AH: The purpose is to demystify history, allow the fair consideration of ideas, and the informed criticism of modern narratives. The first-time translation of works previously unavailable in one of the world's most ubiquitous languages is one of our proudest achievements and primary goals, and, judging by the reception many of these books have received, it is something eagerly sought after.

About Antelope Hill in Their Own Words

Antelope Hill Publishing seeks to ensure history, culture and revolutionary ideas will be preserved in the written word and made easily accessible, fairly priced and professionally published. The best refutation of historical Revisionists is a clear statement of primary accounts—fighting the battle for minds from the printed page, instead of locked away in secret hard drives and foreign languages. Antelope Hill translates, transcribes and republishes existing works in print and eBook format. We are also looking for the authors who will tell the story of the current generation so that we can publish the words that will inspire us to victory.

AntelopeHillPublishing.com.

Our first original translation was Leon Degrelle's poetic memoir *The Burning Souls*, which has remained one of our most popular and most-liked books. The content—Degrelle's call to eternal struggle for a transcendent ideal, and profound foresight of the world after his defeat—is perhaps even more relevant now than when it was first written, serving as a perfect example of the vital importance of making such works available.

TBR: Can you give us a preview of some of the books scheduled to be published this year?

In January, we published *Generation '68: The Elite Revolution and Its Legacy* by Kerry Bolton. We have more new translations planned for this year, including a collection of Nuremberg Rally speeches, *The Battle for Berlin* by Joseph Goebbels, *The Collected Speeches of Gregor Strasser*, and *The Confessions of a Traitor* by Ernst Röhm. We will also have a new children's book, *The Great Napoleon for Little Children*, our annual writing competition compilation, and many more.

TBR: Please tell us more about Antelope Hill's children's division and also your fiction division.

AH: Our fiction line, Jackalope Hill, exists to publish and highlight novels and short stories that are not just politically or culturally relevant, but are engaging and at the highest level of literary quality. We are very proud of all the authors we've published through this line and would highly recommend their books to lovers of both thrilling and thought-provoking fiction.

Little Frog Hill is our children's book division, and through it we seek to publish brightly illustrated and fun children's books that are free of the subversive or anti-White themes found in most mainstream material, and empower parents to teach their kids lessons in accordance with their values and ideals. While the text of these books is, of course, carefully considered, the illustrations also more than pull their weight, thanks again to the incredibly gifted people who have submitted to us.

TBR: How can readers support Antelope Hill's publishing efforts?

AH: Buy our books! They'll do us and our people no good sitting in the warehouse. Share them and our publishing company with other people you think would be interested. And of course, read our books, and engage with our people, our struggle, and the lies of our enemies armed with the knowledge you find in them. ❖

MARCH OF THE TITANS

The most important multi-volume history ever written on the White race—its accomplishments, it failures, and the outlook for our people in an increasingly hostile world.

By Marc Roland

Especially in these days of declining literacy and politically coerced science, there are almost no new books we can assert with confidence will stand the test of time to emerge as classic works of non-fiction literature. Outstanding among these very few candidates for enduring greatness is a genuinely unique example of its kind.

When the original edition of *March of the Titans* appeared in 2006, word of mouth soon granted it worldwide acclaim and outrage. With an ambitious subtitle—*The Complete History of the White Race*—this first in an eventual series of five volumes was matched by the tome's encyclopedic scope and depth. Profusely illustrated, its text is a rare combination of responsible scholarship and readable clarity.

The release of such a monumental project at a time when all things "White" were in their earlier stages of widespread denigration and unopposed demonization struck readers as courageously defiant. While others were intimidated into cowed silence, someone finally had guts and brains enough to stand up for our people.

Appropriately enough, author Arthur Kemp was born in the eye of a hurricane swirling around the contested existence of Aryan mankind in Southern Rhodesia, 62 years ago. His

Volume One of the new *March of the Titans* series.

intellectual credentials for daring to take on so controversial a multi-volume effort include a degree in political science, international politics and public administration from the University of Cape Town and the University of South Africa.

Thereafter, he served four years with the South African police, beginning in 1984, when he became personally acquainted with racial realities others not so dangerously employed cannot appreciate. Kemp went on to become a journalist with *The Citizen* newspaper in Johannesburg for the then-official opposition Conservative Party, later working as a retail market analyst at a blue-chip firm in Britain, before taking the plunge as an independent writer with his own company, Ostara Publications.

In the 18 years since *March of the Titans*' premiere release, he has been busy collecting reports of the latest archeological discoveries, together with ongoing international and cultural developments related to his original thesis. From this growing assembly of auxiliary materials, he selected especially pertinent samples for weaving into the saga-like narrative of his first volume.

These fresh additions less revised than expanded and elucidated "The Rise of Europe from the Earliest Times to the Fall of the Roman Empire" into an even broader magnitude and more profound significance. Even so, clearly encompassing the development of the world's foremost human race into a 50,000-year time span is quite a challenge to conciseness. That the author has capably overcome this hurdle is self-evident in his narrative flow, which carries readers along in an escalating torrent of burgeoning greatness sure to make even the most self-hating White liberal proud of his race.

The book moves forward at an equal success rate on two alternative levels: as an accessible introduction for newcomers unfamiliar with the

The early Whites of Paleolithic Europe were a sophisticated people, demonstrating not only advanced survival skills and tool- and clothes-making abilities, but also a deep spirituality demonstrated by their cave art. They also displayed an innate aesthetic nature as shown by their decoration of everyday utilitarian objects. You'll learn more about them in *March of the Titans: Volume I—The Rise of Europe*.

subject, or a source the better informed will find vital to their personal research, chiefly because it is an updated edition brimming with lesser-known facts, as engaging as they are often surprising.

When the original version made its debut earlier this century, it naturally attracted extremely favorable reviews and their polar opposites. No middle ground here. If "Goodreads" is anything to go by, *March of the Titans* won a five-star approval rating from 65% of its readers. "Goodreads" is a popular website and app for visitors interested in new books, plus a database of titles and reviews. Another 28% gave *Titans* four stars. Only 9% vented their loathing for the book by pinning it with a single star.

Virtually all of them condemned Kemp's text for alleged inaccuracies, omissions, blunders, misinterpretations, fallacies and gaffes. Yet, not one of these fuming critics cited a single example of the author's alleged failures. His latest multi-volume rendition of *March of the Titans* is sure to reignite their passionate displeasure with anything that honestly discusses White history and the complexities of race and their effect on history.

Kemp has rewritten all chapters, adding others to accommodate a wealth of often neglected, even suppressed discoveries. Together, they comprise the most important account in the English language of White mankind from its origins to early social cooperation and cultural expression, which eventually gave birth to earthly civilization, its florescence and epitome in the Greco-Roman World, following its decline and self-destruction.

As such, *March of the Titans* is the first racial history of Western civilization. It is almost too enormous an epic to grasp, but the writing is an engaging mix of the familiar supported by previously unknown data, leaving us with a feeling of having experienced a kind of true-to-life heroic poem. Its prehistoric roots, for example, go far deeper into the remote past than ever we were taught in school, thereby radically revising our understanding of antiquity.

The author explains:

> Thanks to the advent of modern genetic science, and specifically the ability to extract DNA from ancient remains (a development which only became commonplace during the first two decades of the 21st century), a much clearer picture of the origins of the modern European, or White race has now emerged.

Kemp shows how our *direct* ancestral origins initially manifested themselves 8,000 years ago from a coalescence of three genetically compatible population groups: West European hunter-gatherers (the original inhabitants of western Europe), ancient north Eurasians (located in the Siberian region), and Western Steppe herders (from Ukraine in the west, through Russia, to northwestern China).

Earlier still by many millennia was the magnificent cave art of France and Spain. Several dozen original, surviving portraits in profile of their neolithic artists and celebrants depict them all with a distinctly Western European cast of facial features. The earliest culturally identifiable White people were seafaring Solutreans of the Spanish Mediterranean, circa 20,000 B.C. These Upper Paleolithic beginnings were preceded some 18,000

The perfectly preserved village of Skara Brae in the Orkney Islands has provided unique insights into every day life in the Neolithic era in Europe, circa 3,000 B.C. These structures, all of which would have been covered by roofs, provided the daily necessities with which modern humans will be familiar. This included raised beds, ovens, closets, sewing instruments, tools and even indoor toilets.

years by Cro Magnon, the first *Homo sapiens sapiens*, or modern man. As such, our pedigree as a White race is not only far more profound than hitherto imagined, but possibly the oldest on Earth.

Kemp graphically demonstrates how our forebears' formidable accomplishments—from England's Stonehenge and Scotland's Callanish, a lunar observatory on the Isle of Lewis, to Ireland's solar temple at New Grange and Malta's vaulted hypogea—were the exclusive results of White ingenuity and White labor. They comprised the penultimate step toward full-blown civilization. Approximately 5,500 years ago, when the world's oldest-known wheel was made outside the city of Ljubljana, Slovenia, high culture—made possible by a simultaneous surge in technology—arose at the Nile Delta. Its originally unaffiliated *nomes*, or provinces, united as a dynastic society, around 3100 B.C.

Attempts by Afrocentrists to appropriate the accomplishments of ancient Egypt for themselves came to grief in 2017. Kemp explains:

> [A] team of scientists from the University of Tübingen and the Max Planck Institute for the Science of Human History in Jena, Germany, conducted a comprehensive study of ancient Egyptian DNA taken from an archeological site on the River Nile, Abusir el-Meleq, which was inhabited from 3250 B.C. to A.D. 700. This meant that their DNA samples covered almost the entire period of "ancient Egyptian" history and was able to provide a window into the genetic differentiation and population continuity, over a 1,300-year time span.
>
> After sampling and analyzing DNA from 151 mummified individuals, the scientists concluded that "the ancient Egyptians are more closely related to all modern and ancient European populations that we tested."

Kemp continues:

> The scientists found that the ancient Egyptian DNA was European—and that similar DNA is found in modern-day western and northern European populations. As they analyzed DNA from mummies dating from later time periods in Egyptian history, they found increasingly large elements of African [Nubian] DNA. This means that, as time progressed, Egyptian society was gradually overrun by African and other non-White elements, until finally the White element was totally submerged.

Science to the contrary, the haters of everything White still depict the ancient Nile Valley as having been overwhelmingly Black. Last year's second installment of Hollywood's self-styled "docudrama" *African Queens* had Cleopatra played by an Afro-American actress when, in fact, she was of Greek descent from an unmuddied royal lineage.

Public schools across the United States continue to inculcate their students with historically false images of Negroid pyramid builders. Long before University of Tübingen scientists discovered ancient Egypt's European DNA, Jacques Vandier (1904-1973), France's foremost Egyptologist of the last century, wondered:

> How can one claim that the Egyptians of Pharaonic times were Negroes, which means, according to those who use the term, that they were of the same physical type as the present-day inhabitants of West Africa, when the ancient Egyptians themselves, in their very accurate wall paintings, admirably contrasted this West African Negro type with their own, which is totally different?

The very notion of an "Afro-Egyptian" civilization is contradicted by a certain nilometer erected during the reign of Senusret I at the border with Nubia, and now in the possession of the Upper Nile Valley Luxor Museum. A nilometer was a graduated scale engraved onto the face of a stone stele for measuring the height of the Nile River, especially during its annual flood season. The 3,994-year-old specimen in question still commands, "No Negro shall pass beyond this point into Egypt!"

Despite King Senusret's orders—literally written in stone to the contrary—highly prized Negro dwarves were commonly smuggled across the

southern frontier by Egyptian aristocrats, not out of abolitionist-style sympathies for the primitive wretches, but to perform as popular comedic dancers at lavish banquets for the rich.

Another revealing artifact—this one among the Cairo Museum's celebrated Tutankhamun collection—is the boy-king's rocking-chair. Both rockers were carved to portray bound Black prisoners for Pharaoh to rock back and forth upon to his delight. This is hardly the furniture a "Negro civilization" would have produced for its supreme ruler. Similarly:

> [A] pair of the king's sandals is inlaid with images of a Semite and a Nubian, allowing the pharaoh to trample his enemies underfoot when he walked. Bound Semitic and Black prisoners appear on the footstool of Tutankhamun's ecclesiastical throne. The Egyptian king would rest his feet on his foes.

DNA studies of Tut's early 14th-century B.C. mummy likewise disclosed his own European lineage.

The better-embalmed remains of Ramses II (died 1213 B.C.) preserved his fine, red hair. Much earlier still, Hetop-Heres II, a queen of the Fourth Dynasty, which lasted from 2613 to 2494 B.C., is portrayed with red hair on the wall of the tomb of Meresankh III, her daughter, at the Giza Plateau. It is here Hetop-Heres II's father, Khufu, is said to have built the Great Pyramid. So much for ancient Afro-Egyptians.

Vandier concluded, "It is certain that Negroes did not arrive in Egypt until late. It may justly be claimed that the Egyptian race is of Hamitic origin." In *The Oxford Handbook of the History of Linguistics* (2013), Keith Allan tells how "scholars generally classified the Hamitic race as a sub-group of the Caucasian race, alongside the Aryan race."

Kemp re-examines and expands enlightening comparisons and facts such as these into their fatal consequences for pharaonic civilization:

> The course of racial developments in Egyptian history has been backed up by anthropological

Racial Types of the Ancient Middle East and Takla Makan Desert of Central Asia

Most present-day inhabitants of the region surrounding the Takla Makan Desert in Central Asia are of mixed racial origin and could be best described as Turkic as opposed to East Asian. Even though they demonstrate some Asiatic traits, it is apparent that the Uyghur population (examples above), for instance, have both Turkic and Western European physiognomical traits.

These two busts serve to illustrate the contrasting racial types that struggled for supremacy in the Middle East. Left, the bronze (Semitic) bust of an Akkadian ruler, allegedly Sargon, was discovered in the city of Nineveh, Upper Sumeria, dated to 2270 B.C. (Rijksmuseum van Oudheden, Leiden, Netherlands). Compare this face with that of the governor of the province of Lagash, Gudea (Aryan), dating from circa 2150-2050 B.C. at right. (British Museum, London, UK)

The Children of Ra

Artistic, Historical and Genetic Evidence for Ancient White Egypt

Lavishly illustrated with over 106 full-color pictures, DNA evidence and a complete historical overview, this book proves that White people created the initial Egyptian civilization—and that ancient Egyptian culture came to an end once those people had been bred out of existence.

Contains the dramatic DNA evidence which shows that Tutankhamun was of the same racial stock as present-day western Europeans, and the astonishing results of the largest-ever DNA testing of Egyptian mummies by scientists at the University of Tübingen—which revealed that the ancient Egyptians were closely related to modern Europeans.

A vital work for all those fascinated by ancient Egypt and the origins of that civilization.

Also contains a detailed Egyptian history timeline to explain how this White-founded society was overrun, and how this process led to the extinction of this greatest of the ancient civilizations—a somber warning to today's West.

research. British anthropologist G.M. Morant produced a comprehensive study of Egyptian skulls from commoner and royal graves from all parts of the Egyptian lands and times. His conclusions were that the majority of the population of Lower Egypt—that is in the northern part of the country—was members of the Mediterranean White sub-race.

In the south (or Upper Egypt), this population pattern was repeated, but this time showed a certain percentage of Black admixture (reflecting the proximity of the Nubian settlement).

Significantly, Morant found that, with the passage of time, the differentiation in skull types between Upper and Lower Egypt became less and less distinct until, ultimately, they became indistinguishable—the surest sign of the absorption of the White sub-race into the growing non-White mass.

No more poignant illustration of these words may be found than in a trio of images on page 11: First is the famously beautiful 18th Dynasty masterpiece of Queen Nefertiti from around 1330 B.C., when her country was approaching the zenith of its greatness. The portrait sculpture faithfully depicts a thoroughly European woman.

According to historian Priscus, who visited Attila the Hun in A.D. 449, Attila was "short of stature, with a broad chest and a large head; his eyes were small, his beard thin and sprinkled with grey; and he had a flat nose and swarthy skin, showing evidence of his origin," i.e., Asiatic/Mongoloid. Kemp dedicates a full chapter to Attila and "The First Great Race War."

Beside it, center, another female Egyptian appears 1,400 years later in Roman-era dress at a time that witnessed widespread inter-breeding between the original White culture-creators of Nile Valley civilization with growing numbers of non-White immigrants. The lady's first-century coffin-portrait, while decidedly inferior to the Nefertiti artwork in all respects, nonetheless offers a real-life visual of that racial transition simultaneous with Egypt's fall from power and loss of independence, inevitably culminating in oblivion.

On the far right is presented a photograph of 20th-century Egyptian president Anwar Sadat, who, like the rest of his thoroughly miscegenated people, bore no resemblance whatsoever to the founders and builders of Pharaonic civilization. Kemp says: "The reason for the difference in cultures between Nefertiti, who presided over a superpower, and Sadat, who ruled a Third World country, was a racial change in the Egyptian people."

WHITE SUPERPOWERS

As a dynastic "super-power," however, Egypt was by no means alone in the ancient world. But, following 23 centuries of preeminence, it had already drifted from first place after the Trojan War, around the turn of the 13th century B.C. Filling in a cultural vacuum left by the subsequent Bronze Age collapse of high cultures throughout the Aegean realm, Dorian outsiders engaged in a creative synthesis with their European cousins native to the Peloponnesian Peninsula. The outcome of this genetically compatible combination might have been the most important and influential epoch so far experienced by the White race.

Known as the Hellenistic Period, it was ceremoniously inaugurated in 776 B.C. with the first Olympic Games, which, themselves, came to embody

the very notion of "civilization"—regarded as a progressive ideal that depended upon both individual initiative and social cooperation (i.e., teamwork).

These ennobling concepts self-evidently sprang entirely and exclusively from the mind of the White man. That was the allegory implicit in the famous Greek myth of Athena, the goddess of high culture, springing to life from the forehead of Zeus, king of the European gods, enthroned atop Mount Olympus.

For the next 2,700 years, the Olympic Games were synonymous with and epitomized the White racial origins and character of Western civilization, until a Haitian, Constantin Henriquez de Zubiera, became the first Black athlete, at the invitation of White Europeans, to represent France in rugby at the Paris Olympics of 1900.

Having achieved what may have been the highest cultural levels so far attained, Hellenic greatness attracted the envy of non-Aryan hordes from the Middle East, which invaded Greece in 480 B.C.

"After a series of campaigns lasting nearly 30 years," Kemp relates, "the last of the Persian occupiers were driven out, and the war culminated in the Battle of the Eurymedon River, in Pamphylia (located on the southern coast of present-day Turkey), where a Greek fleet defeated a Persian army and navy."

In what was clearly a race war of life or death for the existence of civilization or the extinction of White mankind, its ultimate victory was Europe's most decisive triumph.

Postwar generations of peace, however, began to replace altruistic patriotism with material profits, engendering social and moral laxity.

Kemp says:

> Greek colonial expansion was primarily driven by the desire for commerce and trade, but it had an important side effect: through the trade in slaves, people from all over the Mediterranean were brought in, including from regions that had

The ancient Egyptians were quite aware of the differences between the races and, when they wanted to depict a Semite or a White or a Black, they did so without causing confusion to the viewer. Though Afro-centrics love to say the ancient Egyptians were Blacks Africans, several ancient Egyptian pharaohs themselves went as far as to post warnings to "Nubians" (Black Africans) not to enter Egyptian territory. In the declining, later period of Egyptian history, Black Africans did take over Egypt and thus began that great empire's cultural and civilizational decline.

long since ceased to be majority White. Athens was given over to tens of thousands of foreigners who had entered the city, most of whom were Middle Eastern.

Kemp tells us that, in 451 B.C., Pericles, "the first citizen of Athens," became alarmed by the rising specter of racial contamination.

Contemporaneous historian Thucydides tells us that:

> [Pericles] enacted a law limiting Athenian citizenship to biological descent. Only those born of an Athenian mother and an Athenian father could be citizens. In other words, voting rights were granted on the basis of blood alone. It was during Pericles's time that Athens reached the cultural heights for which it is remembered today.

He was later seconded by Plato (427-348 B.C.). Kemp tells us:

> [Plato was], the first renowned philosopher to recognize race as a factor in the rise and fall of civilizations. In *The Republic*, he also stated that the first requirement of continued statehood was the necessity of retaining racial homogeneity.

Sparta had already long before instituted just such a requirement: "The Spartans strictly divided their society into three classes, which were based solely on race." In his ominous poem *Eugenics*, the great elegiac poet, Theognis of Megara (circa 540 B.C.), prophetically deplored the racial decline of his fellow Greeks.

"[Pericles's] measures ultimately failed because of the vast numbers of foreign slaves that were present in Athens at that time." Kemp says that:

> In 411 B.C., 40 years after Pericles had enacted his law limiting citizenship to those of biological Athenian descent only, the law was reversed. Citizenship of Athens was given to tens of thousands of foreigners who had entered the city, most of whom were from the Middle East.

By Plato's time, there were 400,000 slaves, many of them Black, in Athens alone:

Pericles was one of the most notable political leaders of Athens during much of the 5th century B.C. He was greatly concerned that immigrants from non-White nations would dominate the democratic process and undermine the racial stability of Greece. He thus passed a law that denied the vote to any whose parents were not both of Athenian descent. Plato, historian Arthur Kemp tells us, seconded the notion.

> This darkening of the population (caused partly by the Nordic and original European elements of Grecian society warring themselves to extinction, and partly by the importation of masses of already mixed Middle Eastern peoples) runs directly in tandem with the decline and fall of classical Greece.
>
> The gradual darkening of the Grecian peoples was noted by many famous writers of the time. By the time of the Roman emperor, Octavian Augustus (who reigned directly after Julius Caesar), the Roman historian Manilius [circa 30 A.D.] counted the Greeks among the dark nations of the world, referring to them as part of the *colorate gentes*.

March of the Titans' breadth of subject matter and profusion of relevant, often generally unknown detail, and melded in its consistently sweeping narrative, bursts the natural limitations of a single book review. Egypt and Greece have been singled out here from the dozens of other precivilized and higher cultures described by Arthur Kemp, because they exemplify his thesis stated in Chapter 2:

> The lesson is clear: a civilization will remain intact as long as its creating race remains in existence. This applies to all races equally: as long as a civilization's founding race maintains its territorial integrity and does not use large numbers of any other alien race to do its labor, that civilization will remain in existence.
>
> Any civilization—be it White, Black, Asian or Aboriginal—stands or falls by the homogeneity of its population, and nothing else. As soon as a society loses its homogeneity, the nature of that society changes.
>
> This simple fact provides the key to understanding the rise and fall of all civilizations. This is an immutable law of nature. It is the iron rule upon which all human endeavor is built—that history is a function of race. ❖

What the TBR Editor Is Saying About This Series

"Having been an editor and graphic designer now for going on 45 years, I can tell you that the sheer amount of time and work that went into taking the original *March of the Titans* 532-page, mostly black-and-white interior volume and turning it into this massive, completely re-edited, re-written and re-designed multi-volume series in awe-inspiring. Not only has Kemp included the most recent scientific and DNA data that was not available when the first volume was created years ago, he has added hundreds and hundreds of gorgeous full-color photos and sidebars that are not only beautiful but also historically elucidating.

"This new Prometheus Edition of *March of the Titans* is, frankly, the most amazing, valuable and historically accurate book on the White race ever written in the history of our people—by anyone. And that is no exaggeration.

"As our true history is being erased before our eyes, our heroes defamed, our monuments defaced and people replaced across the Western world, this four-volume set will stand the test of time. These volumes are a must for you or a young person who may never hear in the schools of the future an honest appraisal of our accomplishments—and our failures, as well.

"We all owe Kemp our thanks for taking on this task." —Paul Angel

LETTERS TO THE EDITOR

EVALUATING HENRY KISSINGER

I appreciated Phil Giraldi's March/April 2024 article on Henry Kissinger for its balance. I do disagree with the leftist assessments of Kissinger cited by Giraldi. The general consensus of the left on Kissinger is that he was a genius. I believe he was an apathetic one instead of an evil one.

Kissinger's support for strongmen stopped the spread of Communism. His interventionist policies kept America from being surrounded by Communist and Communist-friendly states. This likely kept us from having to use nuclear weapons and initiating retaliatory strikes. The support for Augusto Pinochet in Chile stopped a domino effect in Latin America, stemming the tide of Socialism on our doorstep. Pol Pot's Cambodian massacres were inevitable. If anything, Kissinger delayed them.

Had Richard Nixon allowed Kissinger to advise on Israel in the 1970s, it's likely we would not have chaos there now, as he was certainly no Zionist and very clear-eyed about his ethnic kinsmen.

I am far from a neocon apologist, but the threat we faced from the Soviets during Kissinger's era of prominence was real.The interventionist policies he promoted likely saved countless American lives and preserved our way of life. The light on the shining hill is intact today because of policies advocated by Kissinger. It's my opinion that Kissinger was, on balance, the right man at the right time, and was an American patriot.

MORE ON KISSINGER

About Phil Giraldi's article on Henry Kissinger in the March/April 2024 edition of TBR. Giraldi seems to praise Kissinger for stating he had a negative view of American Jews who lobbied on behalf of Soviet Jews. Giraldi writes: "Kissinger once declared any people [Jews] who has been persecuted for 2,000 years must be doing something wrong." For Kissinger to make such a statement is beyond chutzpah. It's like Hugh Hefner blaming Jews for spreading pornography among the Gentiles.

If the ADL refused to condemn a statement like that and not cancel Kissinger, then he is part of their clique. If Pat Buchanan had ever said something like that, he would have been shipped off to Guantanamo Bay.

Furthermore, after the Yom Kippur War, when the Arab states placed an oil embargo on the United States, Kissinger flew there and threatened to take over their oil wells. Kissinger was telling the Arabs, "We will support Israel whether you like it or not."

INVADING EUROPE

Just a few reservations about your Gaza editorial in the March/April 2024 issue, perhaps because over here in Europe we have seen film about the 2023 Gaza atrocities, but also because the emergence of the new far right (i.e. patriotic/nationalist parties) in Western Europe (France, Germany, Italy, the Netherlands etc.) is largely a response to large-scale Islamic immigration. This has changed the character of many cities across Western Europe. In addition, Muslim fundamentalism has led to bestial atrocities against Christian civilians … all foretold by Jean Raspail in his *Camp of the Saints* 50 years ago!

A big difference is that, in the United States, you have to worry about Latin American large-scale illegal immigration, which is fundamentally Catholic. Many Latinos, such as the Cuban diaspora in Florida, are quite conservative, whereas the existential threat to European civilization is posed by Islamic fundamentalism. Just a statistic: The UK Muslim population is now about 4 million, whereas the Jewish population is around 250,000—the former densely concentrated in "Muslim ghettoes" in industrial cities, the latter now widely dispersed and integrated (a century and a half after the Ashkenazim immigrants settled in the East End of London).

Anyway, as ever a scholarly analysis of yours, just that our pressing priorities are how to eradicate the alien Islamist colonies in our midst. A relative living in France says Emmanuel Macron is widely unpopular and Marine Le Pen is attracting much support — I knew her father Jean-Marie—so maybe we could see her as the next president of France? Over on this side of the Atlantic we have to contend with a very real existential threat to our culture from Muslim fanaticism.

PERSISTENT PROPAGANDA

"Does Poland Really Deserve Reparations from Germany?" [TBR March/April 2024] was an excellent article by John Wear that brought the following thoughts to my mind.

War in Europe had been decided upon by the Western democracies by spring 1939 (if not earlier); hence, Britain's guarantee to Poland. War was to be forced on Germany—diplomatic correspondence of the period confirms that. Chancellor Hitler could do nothing to avoid it. He did not want war, but could not stand by and ignore the mass murders of ethnic Germans in Poland. His repeated attempts at negotiations with Poland were ignored.

As the issues with Poland were the last remaining issues from the Versailles Treaty to be remedied, the Allies may have thought this was their last chance to provoke a war and be able to blame it on Germany.

It seems to me that the real reason for the war against Germany is to be found in its striking economic resurgence once it broke free of the bonds of international finance and debt-based currency. Two plutocracies, the UK and the U.S. (bear in mind FDR's behind-the-scenes prodding and goading of Britain and France to go to war against Germany), which could not provide prosperity for their citizens in peacetime, wanted war with Germany, a nation that could and did provide prosperity for its citizens in peacetime.

Adolf Hitler is the most vilified and demonized person in history. What most people do not know is that Hitler is also the most lied about person in history. Thus, it follows that he is the most wrongfully vilified person in world history. To maintain this evil image of Hitler, the most thorough and persistent propaganda campaign in history continues today, nearly 80 years after the war's end.

NAPOLEON & HITLER

I love The Barnes Review and true history. I find some similarities between Napoleon and Adolf Hitler. Both came from humble obscurity and became great leaders by pointing out what needed to be done to bring their counties back to greatness.

Napoleon, in the end, admitted his biggest mistake, one that Hitler never did. Napoleon admitted his biggest mistake was turning against the Catholic Church.

Pope Pius XII was the Papal Nuncio for Germany before being elected pope. He was well acquainted with Hitler and the Nazi party. As Nuncio, he fought hard to keep the crucifixes in hospitals and classrooms. Also, Catholic religious who taught in the schools were paid for by the government, with no interference. As Nuncio, Hitler out maneuvered him by agreeing to remove the Catholic Men's League for other concessions. Hitler admired the Catholic faith and sent his architect Albert Speer to tour the great Catholic cathedrals for inspiration for Nazi buildings.

When Heinrich Himmler started to realize that the SS had too many uneducated thugs, he went to the Catholic seminaries to recruit (draft) new SS members. One such member was Fr. Gereon Goldmann OFM, a seminarian at the time. Twice accused of treason, he was so well educated and proud of German history that he talked circles around his accusers and was released. In SS training camp, some of his fellow soldiers antagonized him until, being tall and robust, he wiped the floor with his detractors. His book *Under the Shadow of His Wings*, shows his pride for Germany throughout the book.

CORRECTING THE RECORD

I read TBR articles with much interest. I was born in France after World War II, and I've heard stories of "atrocities" supposedly committed by the German occupation army, particularly at Oradour. I'd never questioned those stories, until much later, when I realized that things were rarely what they appear to be. Your articles on that subject set the record straight.

Incidentally, my [French] father was a POW in Germany for five years, and, although it was no picnic, he never witnessed any act of brutality committed against the POW's in the camps he was in. When he was sent to a farm to help out an old French farmer with the work, he was treated like a member of the family.

AN ETERNAL BLACK MARK!

I nearly fell off my couch! On page 14 of the March/April 2024 issue of TBR, you refer to the House Un-American Activities Committee (HUAC). This is wrong! The correct title is the House Committee on Un-American Activities!

For The Barnes Review to make such a blunder is unpardonable! You pride yourself on truth! You boast about "bringing history into accord with the facts," but you can't get a simple title correct! To state the title the way you did is to make the committee itself sound un-American!

Obviously, your esteemed writers have never seen a copy of one of their publications where it is printed on the cover.

Now, someone is going to raise the objection that this is a trivial matter, so why get so bent out of shape about it? Well, I already gave you one reason. The other reason is, if you get such a small detail wrong, then how many greater matters are you getting wrong?

This also puts you in the company of the left which loves to call this committee what you call it. (A man is known by the company he keeps!)

This will forever be a black mark against The Barnes Review!

UNDERSTANDING COMMUNISM

I am recently hearing on radio the results of public opinion surveys, in which our younger generations of Americans are saying they think Communism and Socialism are better than Capitalism. They need to be reminded how Communism has played itself out practically in many foreign countries. Regardless of pseudo-intellectual theories on the subject, what it looks and functions like in practice is what counts at the end of the day: 1) Communism means the end of all individuality, the end of all personal freedom, the end of all rights to own private property. 2) Communism means surrender of the individual to the "greatest common good," as decided by the government. 3) Communism demands

Continued on page 86

complete self-sacrifice as an end to human greed. It ends the perennial rat race of "keeping up with the Joneses", it just finds out who the Joneses are and shoots them dead. 4) Nobody gets ahead of anybody else, so as to bring to an end all offended feelings of envy, all feelings of resentment. "From each according to his ability, to each according to his need"—as decided by the government. 5) There is no pursuit of happiness permitted under Communism; it is a paradise lost. All the Communist world is drab and dreary. 6) Under Communism, man—not God—is the final arbiter of right and wrong. 7) Human life is held to be most cheap, easily disposable at the pleasure of the government. No hope for intervention of innate human rights. 8) Communism strives to abolish the traditional human nuclear family. It is seen as a spin-off of capitalism. 9) Everybody is government property, and owes all allegiance and obeisance to it

Is this really the type of governance we want for America? Those wanting it should not impose their wish upon those who do not. Instead, they should renounce their American citizenship and leave America in favor of living in a country where such a government as this already exists.This move must be done with the understanding that the choice is absolutely irreversible.

TALK ABOUT JEWS MORE!

I believe you are dedicating way too much space on trying to "rehabilitate" the history and image of Nazi Germany, something I see as a strategic dead end for our people. And, no, I'm not of Jewish ancestry. You should be focusing on the destructive history and current practices and machinations of the Jews as the main enemy that has been engineering our destruction all along to this very day!!

You have abandoned your duty to expose this to our people. Thus, since my money has become tight, I have elected to let my TBR subscription to be the first (but not the last) to expire without renewal. I've always loved your magazine and I was one of your first subscribers back in 1994, but, if you're no longer going to help us free ourselves by exposing our ancient and current enslaver, and their history, and other history relevant to our current destruction (and revealing their Jewish background in those exposures, rather than leaving it up to us to "guess"), then your magazine has become too timid and merely a "history buff" hobby diversion that is helping to suppress by omission that information vital to our freedom.

I want more hardcore resources that I can use to help awaken our people—White people) to the genocidal war being waged against us, and who has been engineering it all along, and that is the Jews!

WHAT IS JUDAISM?

Properly speaking, Judaism, conventionally understood, is not a religion, per se, but more akin to its offshoot Freemasonry. Jews like to claim that Judaism is a religion, little different from Christianity, but to make such a claim is disingenuous to say the least.

Conventional religions such as Christianity and Islam are professed faiths. In other words, if you affirm a particular set of beliefs, you are a member of that religion or at least a subset of that religion, e.g., a Roman Catholic versus a Lutheran. Judaism, on the other hand, is an inherited, racist, genetic denomination. In other words, you are born a Jew. It has nothing to do with what you profess. That is why it is not a self-contradiction to be a Jewish atheist. In fact, a sizable portion of Jews are atheists and yet they can still call themselves Jews because of their racial lineage.

Another difference between Judaism and conventional Middle Eastern-originated religions is that, traditionally, Jews do not believe in an afterlife. There is no life after death in which the good are rewarded and the evil are punished. For Jews, this current life is all there is, hence, their focus on achievement in the this-worldly here and now.

This also accounts for the amorality of Judaism, at least with respect to non-Jews. Jews traditionally consider non-Jews as sub-human. Therefore, the moral obligations Jews have toward one another as true humans do not apply to sub-human non-Jews. Deceit, prevarication, dishonesty, even murder is permissible with respect to sub-human non-Jews because they are no better than mere dumb animals, or so goes Orthodox Jewish thinking. Jews, like Masons, consider themselves a master race, and anyone outside of their tribe is inconsequential. This behavior is codified at Yom Kippur when Jews the world over affirm Kol Nidre—a vow applicable to the upcoming new year in which Jews pre-emptively disavow any promises or oaths they may make during it. Immorality and deceit are given explicit benediction to Jews during Yom Kippur. There is nothing remotely like this, thankfully, in either Christianity or Islam.

"Synagogue," the generic name for a Jewish gathering place, significantly translates from the Greek to mean merely "a meeting house," and not "a place of worship." Here, Jews are being cryptically honest. Like Freemasons, the synagogues are akin to lodges in which worship does not take place, at least not necessarily.

On the contrary, these facilities are merely places for Jews to gather, period. "Church," on the other hand, is explicitly "a place for Christian worship." The word "church" expressly identifies the facility as a place for Christian worship. "Mosque," incidentally, and similarly to "church," means "a place of worship," and not merely a meeting house.

One significant purpose of a synagogue, like a Masonic lodge, is to provide Jews with a place to network, in which the insider cognoscenti work together to advance either one's own career or advance the goals of the ethnocentric in-group in general. This can be done either overtly or covertly. In other words, Masonic synagogues

functions like quasi-conspiratorial, pseudo-religious, mutual self- and group-promotion societies in which members covertly and overtly advance one another up the bureaucratic chain until they seize control of the targeted institution, be it a democratic government, the banking system, the media (in all its permutations), the stock exchange, financial institutions etc. Anything Masonic Judaism targets can be infiltrated and taken over. Judaism, as a so-called "religion," is in fact merely a veneer to cover its real purpose as a conspiratorial mutual self- and group-promotion society.

Belief in God. Both Judaism and Freemasonry cloak themselves in the veneer of religion. Freemasonry requires a belief in God, undefined, and, while Christianity and Islam believe in an all-good, universal God, Judaism—on the contrary—affirms belief in an ethnocentric God and a God who countenances evil, at least with respect to non-Jews. In fact, at its core, non-atheist Jews believe in Lucifer as their pre-eminent God.

Freemasonry is shot through with Jewish symbolism. For example, Hiram, the original builder of the Temple of Jerusalem (as commissioned by King Solomon), was born of both a Gentile and a Jewish parent. Hiram is seen as the worshipful founder of Freemasonry.

Related to this, the Hiram Award is the highest honor that can be bestowed upon a master Mason (other than being master of the lodge). The two pillars found at the entrance to Masonic lodges are titled Boaz (the pillar to the left) and Jachin (the pillar to the right). These two pillars harken back to the two pillars that were set up in front of the Sanctuary in Solomon's Temple in Jerusalem (1 Kings 7:15-22 & 41-42).

Both names are Hebrew. Boaz was the second husband of the Jewess Ruth, and his name means "in strength," and Jachin was a Jew who accompanied Jacob to Egypt. His name is derivative of "Jacob" and means "he establishes."

Furthermore, the classic symbol of Freemasonry, the square and the compass, normally superimposed on each other, form a Star of David. As we can see from this cursory example, Jewish symbology is fundamental to Freemasonry, but there is more. As with Freemasons, Jews practice various forms of crypto-identification as well. So, just as Freemasons have their secret "handshake," similarly, for example, Jews employ various permutations of the V-sign (derivative from the Jewish "Sign of Kohanim") as a means of crypto-identification between closeted Jews.

(As an aside, we should also mention at least in passing, B'nai B'rith, a clandestine esoteric Jewish/Israeli advocacy society which only accepts Jews as members. True, non-Jews can either volunteer or contribute financially to B'nai B'rith, but they cannot become actual members.)

So, how did Judaism develop, historically, into a quasi-secret society? I can only speculate, but my hypothesis is that since in the ancient world Palestine was at the crossroads of three continents—Europe, Asia, and Africa—it was of great strategic importance to the various empires marshalled there. Ancient Israel certainly did not have the raw manpower to challenge or defend itself against its more powerful imperial neighbors, so, instead of defeating an enemy from without on the battlefield, the Jewish establishment decided to defeat their enemies from within, from the "center." Jews came to be valuable tax-farmers, slave traders, bureaucrats, scribes, commercial traders, money-changers etc., and, using their diaspora connections, they could offer to the ruling elite in whose domain they found themselves instrumental international Jewish spy networks as well.

Hence, they developed their tactical techniques for infiltrating and co-opting established bureaucracies, and that strategy has served the Jewish community very well indeed, right up to the modern day. These are the same tactics Freemasons use to covertly promote one another up the bureaucratic chain until they are well ensconced in the upper ranks of an organization, institution or body.

With this acknowledged, how can a nation or institution protect itself from Judeo-Masonic infiltration? On the political plane, democracy, which is very easily infiltrated and subverted by covert Judeo-Masonic tactics and their operatives, needs to be replaced by government-by-lottery or sortition. This way, the demographics of a nation are relatively accurately represented in a congress. So, in a government-by-lottery, approximately 50% of the representatives would be women, 35% would be minorities, 15% would be from the class defined as poor, 10% would be non-heterosexual, and—most significantly—less than 2% would be Jews. Judeo-Masons would not be completely barred from public service, but their influence would be severely truncated. In fact, I would recommend that all persons selected as representatives in a lotteryist assembly be required, on pain of very severe criminal prosecution, to have to disclose their membership in all societies, secretive or otherwise, and this would include having them identify themselves as Jews or as members of Freemasonry for example.

In conclusion, as we can see from all this, properly speaking, Judaism should no longer be considered a religion, and, when anyone claims that it is a religion, they should immediately be disabused of that opinion. Judaism, in fact, is more akin to a conspiratorial secret society, like its offshoot Freemasonry, and, going forward, should be considered as such. To sum this all up most succinctly: Judaism is, in essence, a public secret society hiding in plain sight.
